"(i) the Attorney General, if the injury is to the business or property of a governmental entity of the United States;

"(ii) the chief legal officer of the State, if the injury is to the business or property of a governmental entity of the State; or

"(iii) the chief legal officer of a subdivision of a State, if the injury is to the business or property of the subdivision and if such officer is specifically authorized by statute of the State to bring actions under this subsection.

"(2) A person, other than a governmental entity, whose business or property is injured by conduct in violation of section 1962 of this title may bring, in any appropriate United States district court, a civil action against the person who engaged in the conduct and shall recover—

"(A) threefold the actual damages that such person whose property or business is injured sustained by reason of such injury, and the costs of the civil action, including a reasonable attorney's fee, if the person who engaged in the conduct was, with respect to such conduct, convicted of an illicit activity or of a violation of section 1962 of this title; or

"(B)(i) the actual damages that such person whose property or business is injured sustained by reason of such injury, and the costs of the civil action including a reasonable attorney's fee, and

"(ii) punitive damages of up to twice the actual damages if—

"(I) the person whose business or property is injured is a natural person and the injury occurred in connection with a purchase or lease, for personal or household use or investment of a product, service, investment, or other property; or a contract for personal or household use or investment;

"(II) neither State nor Federal securities laws make available an express or implied remedy for the type of behavior on which the claim of the plaintiff is based; and

"(III) the defendant acted in wanton disregard of plaintiff's rights (but conduct of the defendant in good faith and in reliance upon a directly applicable regulatory action, approval, or interpretation of law by an authorized State agency is not in wanton disregard of plaintiff's rights for the purposes of this subclause).

(3) In a civil action involving a claim for punitive damages under paragraph (2)(B) of this subsection, the trier of fact, in determining the amount of punitive damages, shall consider—

"(I) the degree of culpability of the defendant;

"(II) the vulnerability of the victim;

"(III) any history of similar conduct by the defendant;

(IV) the benefits derived from the unlawful conduct by the defendant;

(V) the number of persons victimized;

"(VI) any prior decision by a court or State or Federal agency as to whether the defendant violated applicable law or acted in bad faith; and

"(VII) any other factor the court deems to be an equitable consideration bearing on the appropriate amount of punitive damages.

"(4) For a civil action under paragraph (2) of this subsection seeking damages under subparagraph (B) of such paragraph (2), the term "pattern of illicit activity" requires at least two acts of illicit activity—

"(A) one of which occurred not more than five years after the prior act of illicit activity;

"(A) one of which occurred not more than five years after the prior act of illicit activity;

"(B) that are not so closely related in time and place that together the acts constitute a single episode; and

"(C) (for actions based on a violation of section 1962(c) of this title) each of which is related to the affairs of the enterprise.

"(5)(A) A civil aciton under this subsection may not be commenced after the latest of—

"(i) three years after the date the cause of action accrues;

"(ii) three years after the conduct causing injury to the plaintiff terminates; or

"(iii) two years after the date of the criminal conviction required for an action under paragraph (2)(A) of this subsection.

"(B) The period of limitation provided in subparagraph (A) of this paragraph on a cause of action does not run during the pendency of a government civil action or criminal case relating to the conduct upon which such cause of action is based.

"(6) As used in this subsection, the term 'governmental entity' means the United States or a State, and includes any department, agency, or government corporation of the United States or a State, any political subdivision of a State, and any enterprise for which a trustee has been appointed by a United States district court under section 1964(a) of this title (but only during the tenure of such trustee).

"(7) The court shall award a reasonable attorney's fee to a prevailing plaintiff in a cause of action under paragraph (2)(B) of this subsection."

SEC. 3. FEDERAL RULES OF CIVIL PROCEDURES AMENDMENTS.

Rule 9(b) of the Federal Rules of Civil Procedure is amended—

(1) in the caption, by inserting, and Suits under 18 U.S.C. 1964(c)" after "Mind"; and

(2) by inserting after the first sentence the following: "In an action under 18 U.S.C. 1964(c), facts supporting the claim against each defendant shall be averred with particularity.".

SEC. 4. EFFECTIVE DATE.

(a) GENERAL RULE.—The amendments made by this Act shall apply to any civil action commenced after the date of enactment.

(b) EXCEPTION.—In any pending action under section 1964(c) of title 18, United States Code, in which a person would be eligible to recover only under paragraph (2)(B)(ii) of section 1964(c) as amended by this Act, if this Act had been enacted before the commencement of that action, the recovery of that person shall be limited to the recovery provided under such paragraph (2)(B)(ii), unless in the pending action—

(1) there has been a jury verdict or district court judgment, establishing the defendant's liability, or settlement has occurred; or

(2) the court determines that, in light of all the circumstances, such limitation of recovery would be clearly unjust.

LEGISLATION TO REFORM CIVIL RICO

● Mr. LEAHY. Mr. President, in 1970, Congress enacted the Racketeering Influenced Corrupt Organizations [RICO] statute. It contained criminal sanctions which included enhanced penalties and asset forfeiture where the Government could show a pattern of criminal activities associated with a group or organization. The law also established a civil RICO cause of action, the purpose of which was to create "private attorneys general" who would supplement criminal RICO prosecutions by suing organized crime elements. Use of civil RICO is attractive because it provides for treble damages and attorneys fees.

Problems have arisen because the statute contains very broad language as to what constitutes a civil RICO violation. The Justice Department has adopted guidelines to avoid abusive and excessive use of the broad language in the criminal context. But no similar mechanism exists to confine private civil suits to cases involving the activities of "organized crime."

Last summer, the Supreme Court in the Sedima case gave a very broad interpretation as to what constitutes a civil RICO cause of action. There have been a flood of civil RICO claims filed before, and especially since, the Sedima decision, in cases which were never contemplated by Congress back when the law was passed. Most of these involve commercial disputes where the plaintiff adds a count alleging mail, wire or securities fraud. Most of these cases are not decided on the RICO claim, but the plaintiff gets a substantial litigation advantage because he threatens the defendant with treble damages and attorneys fees and gets the public relations advantage of claiming his opponent is a racketeer. These suits are not limited to cross business claims. Many have been filed against labor unions for what are really National Labor Relations Act violations. Claims have even been filed in domestic relations cases, and one was filed by a dissident group of a church parish that sought control of the church.

Recently, the House passed a bill sponsored by Congressman BOUCHER to reform civil RICO.

This bill was the product of extensive negotiations between Senators METZENBAUM, BIDEN, and myself, Congressmen BOUCHER and RODINO, and representatives of business, labor, and consumer groups, as well as representatives of State and local governments. These negotiations were spearheaded by Senator METZENBAUM, and I compliment him for his efforts. These negotiations have produced a compromise bill which deserves the support of all Senators.

I believe that RICO reform is needed now. While the compromise legislation does not deal with all of my concerns. I believe it is a fair compromise, and one that we should act on before Congress adjourns.

In particular, the following elements of the bill are critical to the widespread support that this measure has received:

First, automatic treble damages only in actions for injuries to Government entities and cases in which the defendent against whom the damages are sought has been convicted previously of certain criminal charges;

Second, single damages in most other civil RICO actions;

Third, a limited discretionary additional award in one narrow group of cases, in which an individual has suffered damages to his or her business or property in connection with certain consumer transactions;

Fourth, the limitation to single damages of any civil RICO case in which Federal or State securities laws provide a remedy for the type of behavior on which the plaintiff's claims are based, whether or not the securities laws provide that particular plaintiff with the remedy and whether or not the plaintiff's remedy has lapsed or otherwise been lost;

Fifth, a 3-year statute of limitations that runs, in most cases, from when the plaintiff's claim accrued or the injury to him or her ended, not from the last act in any alleged "pattern" when the injury to the plaintiff had already ended and the plaintiff's RICO cause of action had already accrued;

Sixth, a requirement that a plaintiff plead every element of a civil RICO claim with particularity as to each defendant;

Seventh, the addition of certain specific minimum requirements for allegations of a "pattern" of illicit activity for certain civil RICO actions, requirements which are not intended to limit the development of the judicial interpretation of the "pattern" requirement that has occurred in the response to the Supreme Court's discussion of "pattern" in the Sedima decision; and

Eighth, the immediate effectiveness of the detrebling provisions of the bill, with exceptions only where there has been a jury verdict or court judgment assessing liability against the defendant or in the extraordinary case in which, because of special circumstances, it would be clearly or manifestly unjust to deprive the plaintiff of treble damages.

This legislation will refocus civil RICO on Congress' original intent—suits against parties engaged in a wide-scale pattern of fraudulent or other criminal activity. At the same time, claimants would retain all of the other

statutory and common law remedies for the various forms of alleged misconduct.

It's a good compromise. I compliment Senators METZENBAUM and BIDEN and Congressman BOUCHER and RODINO. I was pleased to participate in the development of this legislation and urge all Senators to support it.●

Mr. SIMON. Mr. President, this bill responds to a distress flag raised by numerous Federal courts across the country. These courts are warning us that civil actions under RICO, created as a part of the Organized Crime Control Act of 1970 to combat infiltration by organized crime into legitimate businesses, are being stretched far beyond that purpose.

Instead, treble damage civil RICO claims are being routinely asserted in business and commercial lawsuits, regardless of whether the defendants have any connection to what is commonly considered organized crime. The threat of treble damage liability gives plaintiffs an unfair advantage because it often forces defendants into early settlement of cases they might otherwise take to trial or settle at a later stage of the litigation.

Judge Abner Mikva, an old friend and former House colleague of mine, has described RICO as a small cottage industry for Federal prosecutors that has become a commonplace weapon in the civil litigator's arsenal. As Judge Mikva stated in his testimony before the House Subcommittee on Criminal Justice last year, "RICO makes an appearance in everthing from divorce suits to religious disputes to suits against one of the national candidates and a major political party, to garden variety contractual suits between businessmen, to corporate raids, to defenses against corporate raids, to State efforts to collect taxes from local businessmen."

While there are few who disagree that civil RICO is being abused, consumer groups and others were concerned that Congress would go too far in changing the statute. They felt that some of the reform proposals would reduce the deterrent effect of the statute and deprive victims of genuinely criminal conduct of a powerful means of obtaining redress for their injuries.

I think this bill represents a carefully crafted response to these concerns. The bill preserves a civil cause of action for treble damages for governmental entities and for private plaintiffs where a defendant has been convicted of criminal acts. Individual consumers suing in connection with a personal or household transaction would retain the opportunity to obtain punitive damages in an amount up to twice the amount of their actual damages if the conduct of the defendant is deemed to be flagrant in nature.

The bill eliminates automatic treble damages in that category of cases where the threat of such liability has been used in harmful and unjust ways—suits involving only commercial entities. Both businesses and consumers would still be able to recover actual damages and attorneys fees for civil RICO violations. The bill also provides sensible relief for businesses now defending suits involving billions of dollars in liability under civil RICO.

Unlike many of the so-called tort reform proposals that have come before the Senate, this bill limits lawsuits in ways that protect the rights of all litigants, not solely those of defendants. It preserves civil RICO as a weapon against both organized crime and all types of business fraud, especially that which victimizes ordinary American consumers.

Finally, I commend Senator METZENBAUM, Senator LEAHY, and Senator HATCH for all their hard work on this difficult and important issue.

Mr. MURKOWSKI. Mr. President, one of the primary purposes of the civil RICO bill (H.R. 5445) is to restrict the inappropriate uses made of present Federal racketeering laws in private civil litigation.

I wholeheartedly support that purpose, but I fear that in pursuit of that purpose, local governments will be needlessly restricted in their ability to pursue legitimate claims under present Federal racketeering laws.

Mr. President, there is a particular provision in sec. 2 of the bill that requires modification. Under sec. 2 a civil RICO action cannot be brought by a municipality unless specifically authorized by State statute. Alaska has no such specific statute it is not now needed because under the current law a municipality can file a civil RICO action under its own authority.

If the proposed bill is left unchanged it will have a devastating effect on several communities in Alaska. Take for example, the North Slope Borough, where the U.S. Department of Justice and the attorney general of Alaska are in the process of investigating criminal RICO violations. The investigation has been going on for more than 2 years, and it is considered the largest and most complicated RICO case in the Nation.

The North Slope Borough should be allowed to pursue its own civil remedies against those who have wrongfully diverted borough revenues. It can now do so under present law, but not under the proposed civil RICO bill. While such actions under the bill could be brought on behalf of the borough by the attorney general, the borough's hands should not be tied in this manner.

It is doubtful that a State would be inclined to engage in expensive prolonged complex civil litigation when any cash recoveries would go to a different political entity. In fact, there is a serious question whether Alaska law would enable the State to turn over recovered civil RICO money to a municipality in such cases.

Mr. President, I request that the bill be amended to allow local governments to pursue their own legal actions. To do so will not only enhance the sovereignty and integrity of local governments, but acknowledge a basic confidence and faith in local government.

There is no reasonable basis to deny local government this right. It is being denied out of a fear or speculation that a local government will abuse the right. I suggest Mr. President that local government will no more abuse this right any more than any other Government entity—be it a Federal or State entity.

With this in mind Mr. President, I just cannot support the civil RICO bill now before this body.

Mr. DENTON. Mr. President, I believe that reform of the civil recovery provisions of the Racketeer Influenced and Corrupt Organizations Act [RICO] is long overdue. However, I am concerned that S. 2907, as the bill was introduced, would not curb sufficiently abuse of civil RICO, and might even exacerbate the problem.

Furthermore, S. 2907 has not yet been reviewed by the Judiciary Committee, which has been working for some time on the issue of civil RICO reform. I believe that it is unwise to consider the bill until its provisions have undergone critical examination in the committee process.

The civil recovery provisions of RICO are greatly in need of reform. The extraordinary remedy provided by RICO has been abused in an ever-increasing number of civil suits based on claims that were never intended to be actionable under RICO, such as small time fraud and simple breach of contract. Armed with the treble damages remedy, plaintiffs in such cases are frequently able to coerce settlements from defendants who are concerned not only about the potential for treble damages but also about the negative publicity attendant to being labeled a "racketeer" in a RICO suit.

This scenario has prompted the Supreme Court Justice Thurgood Marshall to note that "it is not surprising that civil RICO has been used for extensive purposes, giving rise to the very evils that it was designed to combat."

To curb such abuse, a bipartisan effort has been conducted in the Judiciary Committee to focus the RICO civil remedy on its originally intended target: criminal racketeering. A proposed bipartisan amendment to RICO is being discussed by committee members which would require that, before a RICO civil suit may be brought in most cases, the defendant first must have been convicted of a criminal

RICO offense. The amendment would preserve the ability of Federal and State governmental units to sue for treble damages under RICO without the requirement of a prior criminal conviction. Such an amendment has not yet been considered by the full Judiciary Committee and is still being studied.

I believe that the prior conviction prerequisite to civil RICO suits would restore the original intent of the Congress in providing a civil remedy under RICO as an additional weapon in the fight against organized crime.

However, I am concerned that S. 2907 would not reduce significantly the number of civil suits filed under RICO which are more properly actionable under State law. In fact, by merely replacing the treble damages remedy with a punitive damages scheme for consumer actions, the bill would continue to encourage plaintiffs to sue under RICO when a State court would be the more appropriate forum. This problem could be alleviated somewhat by an amendment which would permit the recovery of such punitive damages only where the plaintiff has no other remedy available under State or Federal law.

Mr. President, although S. 2907 is a step in the right direction, it does not attack the root of the problem: The availability of civil RICO for a broad range of causes of action not related to criminal racketeering. Furthermore, the bill contains new civil remedy provisions, the advisability of which has not been considered by the Judiciary Committee. As with other bills introduced to reform RICO, S. 2907 should undergo strict scrutiny by the Judiciary Committee before being considered on the Senate floor.

Thank you, Mr. President.

Mr. THURMOND. Mr. President, I rise in opposition to this RICO amendment.

The original purpose of title 18, section 1964(c) was to provide government and private parties a mechanism against the infiltration of legitimate businesses by corrupt forces. Organized crime was a prime target of this legislation.

The problem has arisen by virtue of innovative private plaintiffs who have brought actions against legitimate businesses, not those influenced or infiltrated by organized crime. These legitimate businesses are being abused by private actions that turn ordinary commercial disputes, securities litigation, banking transactions, insurance claims, and landlord-tenant disputes into RICO actions. Settlements are being extorted by some private actions because legitimate businesses have no choice but to settle out of court to avoid public disclosure of baseless racketeering allegations. I have no doubt that there is a need for reform. But the need demands that the reform be appropriate.

The amendment before this body is seriously flawed in several respects:

First. It does not solve the problem. Consumers can still bring RICO actions and recover actual damages plus punitive damages up to twice the actual damages. This is nothing more than treble damages, which are recoverable under current law, in disguise.

Second. Local municipalities may not bring RICO actions unless their State legislature gives them legislative authority to do so, or the State attorney general is willing to bring the RICO action on behalf of the municipality. This means that large cities across this country—that is, New York—could not bring a RICO action to fight organized crime and corruption.

Third. There is a loophole which does not allow Federal action to recover punitive damages against RICO defendants for securities claims. It is manifestly unfair to protect only securities related businesses and no others from RICO abuse.

Fourth. This proposal unnecessarily federalizes broad areas of State common law and State statutory causes of action.

Fifth. There have been several proposals throughout the 99th session of Congress to deal with the RICO problem. H.R. 2943, the original Boucher bill, required a prior conviction for a predicate act before a private action could be brought. S. 1521, the Hatch bill, required that one of the predicate acts be an act other than fraud and swindling, wire, radio, television, or securities fraud. RICO is a difficult problem. As this Congress nears end, the last proposal on the table should not be rushed through until all affected parties have had the opportunity to examine and respond to it.

I must point out that the Department of Justice opposes this proposal. Their position is that this amendment does not go far enough to solve the RICO abuse problem.

In conclusion, this amendment is not the solution to the RICO problem. Any measure considered by the Senate must be carefully worked out after all affected parties have had the full and fair opportunity to participate in the process. I urge my colleagues to vote against this amendment.

Mr. President, I ask unanimous consent that a copy of a letter sent to me which voices the Department of Justice's objection to this proposal be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,

Washington, DC, October 14, 1986.

Hon. STROM THURMOND,
Chairman, Committee on the Judiciary,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This is to express the opposition of the Department of Justice to H.R. 5445, a bill to amend Chapter 96 of title 18, United States Code. The subject bill seeks to curb the widespread abuses of 18 U.S.C. 1964(c), the so-called private civil RICO statute.

Our objection to current law springs from basic principles of federalism: most suits now being filed under the civil RICO statute should be brought in state court rather than federal court. To the extent that the poorly drafted civil RICO law inadvertently makes windfall remedies available to plaintiffs, it overrides the considered action of state legislatures and courts. While H.R. 5445 would to some extent curb abuses of the civil RICO law, we believe that it fails to achieve the degree of reform needed and is thus unacceptable. More specifically, H.R. 5445 positively encourages litigants to sue in federal court even where a state remedy is clearly available to them. As presently drafted, therefore, there is considerable sentiment to recommend Executive disapproval of H.R. 5445 if it is approved by the Senate.

Should it be determined to act on this issue this year, we believe that, at a minimum the bill should be amended to strike the word "securities" in proposed new 18 U.S.C. 1964(c)(2)(B)(ii)(II). Such an amendment would clarify that the special federal punitive damages remedy would be available only where there is no state legal remedy available. Such an amendment would significantly strengthen the bill and overcome our serious reservations about H.R. 5445 as presently drafted.

Sincerely,

——— ———,
(For John R. Bolton,
Assistant Attorney General).

Mr. MOYNIHAN. Although I recognize the need for the reform of RICO laws as embodied in the amendment offered by my distinguished colleague from Ohio, I am concerned over the requirement that State legislatures give authority to municipalities before they may bring civil RICO actions.

I look to my colleagues for assurance that consideration will be given to delaying the effective date of this requirement for 2 years, or until such time as the State legislature can act.

Mr. METZENBAUM. This provision was the result of lengthy investigations and was reached in the spirit of compromise in order to achieve as sound a consensus as possible. I support future congressional review of this provision in order to ensure that municipalities can bring RICO actions in appropriate cases.

Mr. SPECTER. Mr. President, when Congress passed the Racketeer Influenced and Corrupt Organizations Act [RICO] in 1970, it intended to provide a powerful new weapon in the war against organized crime. In the hands of Government prosecutors, RICO has, indeed, been such a weapon. As the Supreme Court noted 2 years ago, however, private—civil—RICO actions against racketeers for alleged damages

have evolved "into something quite different from the original conception of its enactors."

In short, because of the extremely loose language with which Congress enacted the private RICO provisions 16 years ago, private plaintiffs have—quite understandably—attempted to convert ordinary fraud cases into racketeering claims. The availability of treble damages under the RICO statute provides more than adequate incentive for plaintiffs to append RICO claims to what frequently are ordinary civil actions—actions for breach of contract, securities violations, antitrust and commodities disputes, labor-management grievences, landlord-tenant disputes, even family, or marital squabbles.

As a result of this misuse, there have been thousands of civil RICO suits brought in the already overcrowded Federal courts. Even a casual reading of the cases makes clear, however, that very few actually involve organized crime or racketeers in the sense that the Congress understood those terms. So abused have been the civil RICO provisions that the Federal courts adopted limitations on the statute. In rejecting these judicially imposed standing and evidentiary requirements in the Sedima and Haroco cases, the Supreme Court did not reject the underlying premise that the civil RICO statute has been greatly abused and is desperately in need of reform. The Court simply stated that it is for Congress, not the courts, to reform the RICO statute.

Mr. President, we need to preserve the true purpose of the civil RICO statute—aggressive actions, both civil and criminal, against organized criminals. It is essential, however, that Congress act to end the destructive and unfair use of the RICO provisions, in garden variety disputes, where the most upright of defendants is likely to be branded as a racketeer.

The opinions of the courts of appeals set forth lengthy and scholarly analyses of the manifest defects of the current RICO statute. The Supreme Court did nothing to question those conclusions; indeed, it virtually invited Congress to amend the statute. I urge my colleagues to support the compromise proposal as an urgently needed, albeit imperfect, reform of a much abused statute.

Mr. HATFIELD. Mr. President, I yield a minute to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, this amendment has no place here.

If this amendment is accepted, I am going to offer my amendment on lobbying. That is a very important amendment. I have not been able to get it up.

If you are going to take up a lot of things here that have not been taken up heretofore and have not gotten through, then let us open it up and continue to take matters.

This amendment is discriminatory. It singles out certain things and leaves out others.

For instance, it takes care of the security people. It does not take care of the insurance people; it does not take care of the city of New York as mentioned there, and other reasons.

It is purely discriminatory and should not pass.

If a motion to table does not carry, I am going into more detail and explain further why it should not pass.

Mr. HATFIELD. Mr. President, I want to say in my motion to table I will ask initially for a voice vote only.

I move to table the Metzenbaum amendment.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Ohio. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. BROYHILL], the Senator from Utah [Mr. GARN], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Nevada [Mr. LAXALT], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Idaho [Mr. SYMMS], are necessarily absent.

Mr. BYRD. I announce that the Senator from California [Mr. CRANSTON], the Senator from Vermont [Mr. LEAHY], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I further announce that, if present and voting, the Senator from Vermont [Mr. LEAHY] would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 47, nays 44, as follows:

[Rollcall Vote No. 352 Leg.]

YEAS—47

Armstrong	Hatfield	Pressler
Boschwitz	Hawkins	Quayle
Chafee	Hecht	Roth
Cochran	Heflin	Rudman
Cohen	Helms	Simpson
D'Amato	Hollings	Stafford
Danforth	Humphrey	Stennis
Denton	Kassebaum	Stevens
Dodd	Kasten	Thurmond
Dole	Lugar	Trible
Domenici	Mathias	Wallop
Evans	Mattingly	Warner
Exon	McClure	Weicker
Goldwater	McConnell	Wilson
Gramm	Murkowski	Zorinsky
Grassley	Nickles	

NAYS—44

Abdnor	Eagleton	Matsunaga
Andrews	Ford	Melcher
Baucus	Glenn	Metzenbaum
Bentsen	Gore	Mitchell
Biden	Gorton	Moynihan
Bingaman	Harkin	Nunn
Boren	Hart	Proxmire
Bradley	Hatch	Pryor
Bumpers	Inouye	Riegle
Burdick	Johnston	Rockefeller
Byrd	Kennedy	Sarbanes
Chiles	Kerry	Sasser
DeConcini	Lautenberg	Simon
Dixon	Levin	Specter
Durenberger	Long	

NOT VOTING—9

Broyhill	Heinz	Packwood
Cranston	Laxalt	Pell
Garn	Leahy	Symms

So the motion to lay on the table amendment No. 3479 was agreed to.

□ 2320

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

The Senator will suspend. There will be order in the Senate. Senators desiring to converse will take their conversations off the floor.

Senators will please take their seats. Senators desiring to converse will do so off the floor. The Senator from Oregon.

Mr. HATFIELD. Mr. President, may I make an inquiry of the Chair? Does the unanimous consent request that I made prior to the consideration of this amendment, still stand so that other amendments may be offered or does that have to be made for each amendment?

The PRESIDING OFFICER. It must be renewed at each amendment.

Mr. HATFIELD. I now renew that unanimous consent to temporarily lay aside the Goldwater amendment in order that other amendments may be considered.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 3480

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I will be very brief on this. This is an amendment that I hope will be accepted. It deals with $50 million increase in the so-called TEFAA Program. That is the Temporary Emergency Food Assistance Act. That program takes surplus commodities such as dried powdered milk or flour, corn meal, cheese, and distributes it to the poor through the Community Action Program,

through the Salvation Army, or through church food banks.

A few weeks ago, if I had known what I know now, I would have attempted to get the committee itself when it was working on the agricultural appropriations to take note of this and to make the increase there. But it was only a few weeks ago when I was in Montana at a time when we had wheat piled on the ground out in the countryside that I learned to my dismay that in the Community Action Program, commodity distribution program, there simply was no flour available for distribution.

I draw that to your attention, my colleagues, because the contrast of wheat laying on the ground and yet there is no flour to be distributed to poor families or to the Salvation Army or to the church food banks seems morally wrong. Why was there no flour? Because the Department of Agriculture explained to me that under the $50 million that is available during this past fiscal year they simply did not have sufficient money to process it; in other words, to mill it into flour, and to put it in the pipeline.

The same I am afraid will be true this coming year. We make one improvement as a result of the Farm Act. The transportation costs beginning January 1, will be borne half by the States. That helps. But there is not sufficient funds in the program under the $50 million to cover all the needs that arise during the course of the year.

The commodities themselves, whether it is corn meal or dairy products or the wheat are not charged. They are out of surplus, and they are provided without charge. The money that is required is for the processing and the transportation. I will repeat half of that transportation costs will be borne by the States.

It is that simple. I hope the amendment can be accepted. It is budget neutral. I am glad to yield to my friend from Illinois.

Mr. SIMON. The Senator just answered the one question I was going to ask. It is budget neutral.

The second question, this legislative day, though not this calendar day, since we are 1:30 a.m., I believe is also coincidentally World Food Day when we try and remember that there are less fortunate people here in our country and around the world. It seems to me this is the small modest step that we can take to use this huge surplus that we have that we are going to have to pay storage on if we do not distribute it; get it to people who need it. I commend my colleague.

Mr. MELCHER. I thank my friend from Illinois. The point about storage is true. We do have to pay storage on these commodities. It is a $50 million outlay leveraged into providing for the poor through these various mechanisms. Every State of this land has the opportunity to have a little better nutrition. The storage from the reduction and disposal of this for a very worthy need reduces the storage cost.

The money that is used to offset this is derived by authorizing the Secretary to sell some notes and obligations held in the Rural Development Insurance Fund established under section 309(a) of the Consolidated Farm and Rural Development Act; $50 million is a small amount of sales out of that $8 billion portfolio.

I would hope that there is no vote necessary on this. I would hope that the amendment can be accepted. It is a very modest step and a very worthy one to help the nutrition of the poor here in our own country. Charity does belong at home. This is a very basic charity from funds, $50 million that is leveraged into a great amount of food because, after all, the $50 million is for the processing, and part of the transportation. And it leverages into a great amount of food.

□ 0130

Mr. President, I ask unanimous consent that Senator BURDICK be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Will the Senator send his amendment to the desk?

The clerk will report.

The bill clerk read as follows:

The Senator from Montana [Mr. MELCHER], for himself and Mr. BURDICK, proposes an amendment numbered 3480.

At the end of the amendment, insert the following new section:

"SEC. . Notwithstanding any other provisions of this act, in addition to any sales required under any other act, the Secretary of Agriculture, under such terms as the Secretary may prescribe, shall sell notes and other obligations held in the Rural Development Insurance Fund established under section 309A of the Consolidated Farm and Rural Development Act in such amounts as to realize net proceeds to the Government of not less than $50,000,000, and funds for necessary expenses to carry out the Temporary Emergency Food Assistance Act of 1983, as amended, shall be $100,000,000.".

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I can only say we have been through the appropriations process and this matter has been considered carefully. The amendment would exceed the authorization for this program. Therefore, I move to table the amendment of the Senator from Montana.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Montana.

Mr. MELCHER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Montana. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. BROYHILL], the Senator from Utah [Mr. GARN], the Senator from Nevada [Mr. LAXALT], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. BYRD. I announce that the Senator from California [Mr. CRANSTON], the Senator from Vermont [Mr. LEAHY], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 47, nays 45, as follows:

[Rollcall Vote No. 353 Leg.]

YEAS—47

Armstrong	Gramm	Proxmire
Boschwitz	Grassley	Quayle
Chafee	Hatch	Roth
Chiles	Hatfield	Rudman
Cochran	Hawkins	Simpson
Cohen	Hecht	Stafford
D'Amato	Helms	Stennis
Danforth	Humphrey	Stevens
Denton	Kassebaum	Thurmond
Dole	Kasten	Trible
Domenici	Lugar	Wallop
Durenberger	Mathias	Warner
Evans	Mattingly	Weicker
Glenn	McClure	Wilson
Goldwater	McConnell	Zorinsky
Gorton	Murkowski	

NAYS—45

Abdnor	Exon	Matsunaga
Andrews	Ford	Melcher
Baucus	Gore	Metzenbaum
Bentsen	Harkin	Mitchell
Biden	Hart	Moynihan
Bingaman	Heflin	Nickles
Boren	Heinz	Nunn
Bradley	Hollings	Pressler
Bumpers	Inouye	Pryor
Burdick	Johnston	Riegle
Byrd	Kennedy	Rockefeller
DeConcini	Kerry	Sarbanes
Dixon	Lautenberg	Sasser
Dodd	Levin	Simon
Eagleton	Long	Specter

NOT VOTING—8

Broyhill	Laxalt	Pell
Cranston	Leahy	Symms
Garn	Packwood	

So the motion to lay on the table amendment No. 3480 was agreed to.

□ 0140

Mr. HATFIELD. I move to reconsider the vote by which the motion was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

Mr. HATFIELD. Mr. President, may we have order?

The PRESIDING OFFICER. The point is well taken. There is no order in the Senate. Senators will please

take their conversations off the floor and take their seats.

The Senator from Oregon.

Mr. HATFIELD. Mr. President, I would like to make an inquiry. I inquire as to whether or not any other Senator is expecting to present an amendment that would be presented in the second degree to the Abdnor amendment after we ask unanimous consent to set aside temporarily the Goldwater amendment.

Mr. President, I assume that there are no other amendments.

We are now in a unanimous consent situation, where the floor will revert to the Senator from Arizona [Mr. DECONCINI] under a unanimous-consent agreement that was entered into.

I ask if the Senator from Arizona will yield to me without losing his right to the floor in order to propound a motion.

Mr. DECONCINI. Mr. President, before I yield, I wonder if the Senator wants to tell us what that is going to be. What is he going to move to?

Mr. HATFIELD. I shall explain the motion before I make it in order to make sure all Senators know.

Mr. DECONCINI. I yield the floor, Mr. President, with the understanding that I do not lose my right to the floor after the vote if there is a vote and after the Senator has made his motion.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, this is the situation we are in. At 4:03 this afternoon, an amendment was offered by the Senator from Arizona [Mr. GOLDWATER] in the second degree to an amendment that has been offered by the Senator from South Dakota relating to Federal buildings. The amendment that was offered by Senator GOLDWATER related to one of the planes, the T-46, which is being discussed and has been discussed since 4:03.

Approximately 5 hours ago, there was a beginning effort to resolve this conflict by staff. We had, as the majority leader indicated, the Secretary of the Air Force, a number of generals, sergeants, colonels, members of the Armed Services Committee, many interested parties, all huddled together to try to solve this problem. As of about some hour or so ago, that process broke down. There is no apparent agreement that has been reached or is in the process of being reached.

In addition to that, the amendment in the first degree offered by the Senator from South Dakota [Mr. ABDNOR], relating to public buildings, would exclude from the continuing resolution that is before us, the House portion of that, some 25 or 30 public buildings. Because the amendment would require that these buildings be authorized by both Chambers before construction money would be released, a number of Senators have indicated great concern about that for different reasons.

□ 0150

A number of Senators have indicated great concern about that for different reasons, the Senator from Alabama, and other Senators, and it looks as though, even if we resolve the Goldwater amendment at this moment by some miracle, we still have an unresolved amendment in the first degree that will have to be fought out and ultimately resolved.

Now, again, this is not a position I like, but it is in order to move this continuing resolution. I am informed that we are going to inform the public employees that by noon tomorrow they will have to stay home; we will not have the money to pay them. Therefore, there would be action to shut down the Government, in that sense shutting down the Government. I do not think that reflects well on the political institution in general or the Senate in particular or the Appropriations Committee in specific. I think the public expects us to conduct the Nation's business in an orderly fashion, and these all-night sessions and other things that we engage in I do not think is befitting to the dignity of the Senate and to the expectations of the public.

Having explained that, I will move to table the underlying amendment.

Now, what that in effect would do, when I make that motion—and I am sure there would be a rollcall on that—would be to address the Abdnor amendment in the first degree relating to public buildings. And if that motion should prevail, then that would automatically bring down as well the Goldwater amendment in the second degree. So that the vote would be on basically the issue of the Abdnor amendment but in voting that, one would have to be aware that one is in effect voting for two at one time; you are going to determine the outcome of the Goldwater amendment as well as the Abdnor amendment. I know no other way out. We could adjourn and go home. The floor belongs to one of the parties to this dispute, and they have talked and developed their case over a period of time. There have been some responses in a lesser timeframe. But it seems to me that there would be no possibility at this time to get a unanimous consent on a time agreement of laying this over until tomorrow with a time certain to vote or limited time, that we would be rested, revived by a portion of the night for sleep and back where we are now.

That is the background, that is the reason, that is the logic that I feel prevails at this time that requires me as the comanager of the bill with the assent of my colleague, the Senator from Mississippi, and that is why I asked the Senator from Arizona to yield the floor, to move to table the Abdnor amendment.

The PRESIDING OFFICER. Is the Senator presently making the motion to table?

Mr. HATFIELD. I have made the motion to table.

Mr. ABDNOR. Will the Senator yield?

Mr. HATFIELD. I would be happy to yield.

Mr. ABDNOR. I would like to ask a parliamentary inquiry. If the Senator made that motion, I cannot repeat a couple little pieces of information I think this body should know before they make that vote. As I understand it, if the Senator makes the motion to table, that precludes me from doing so; is that correct?

Mr. HATFIELD. I certainly, Mr. President, would be willing to ask unanimous consent for 5 minutes to a side to discuss the Abdnor amendment, since we have been far removed from that amendment in the time, if I withheld my motion to table.

Mr. DIXON. I would object to a time agreement without having some conversations about this, Mr. President.

Mr. HATFIELD. I see. Well, Mr. President, I think that answers the question. I make the motion to table the Abdnor amendment

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

Mr. STEVENS. Yeas and nays.

The PRESIDING OFFICER. All those in favor——

Mr. STEVENS. Yeas and nays.

Mr. EXON. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? A sufficient second exists.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. BROYHILL], the Senator from Utah [Mr. GARN], the Senator from Nevada [Mr. LAXALT], the Senator from Oregon [Mr. PACKWOOD], and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. BYRD. I announce that the Senator from California [Mr. CRANSTON], the Senator from Missouri [Mr. EAGLETON], the Senator from Vermont [Mr. LEAHY], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

The PRESIDING OFFICER (Mr. DURENBERGER). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 29, nays 62, as follows:

[Rollcall Vote No. 354 Leg.]

YEAS—29

Biden	Hatfield	Moynihan
Bradley	Hawkins	Murkowski
Chiles	Heflin	Sarbanes
Cochran	Inouye	Sasser
D'Amato	Johnston	Simon
DeConcini	Lautenberg	Specter
Dixon	Long	Stennis
Dodd	Mathias	Stevens
Gore	Matsunaga	Weicker
Hart	McClure	

NAYS—62

Abdnor	Glenn	Metzenbaum
Andrews	Goldwater	Mitchell
Armstrong	Gorton	Nickles
Baucus	Gramm	Nunn
Bentsen	Grassley	Pressler
Bingaman	Harkin	Proxmire
Boren	Hatch	Pryor
Boschwitz	Hecht	Quayle
Bumpers	Heinz	Riegle
Burdick	Helms	Rockefeller
Byrd	Hollings	Roth
Chafee	Humphrey	Rudman
Cohen	Kassebaum	Simpson
Danforth	Kasten	Stafford
Denton	Kennedy	Thurmond
Dole	Kerry	Trible
Domenici	Levin	Wallop
Durenberger	Lugar	Warner
Evans	Mattingly	Wilson
Exon	McConnell	Zorinsky
Ford	Melcher	

NOT VOTING—9

Broyhill	Garn	Packwood
Cranston	Laxalt	Pell
Eagleton	Leahy	Symms

So the motion to table the amendment (No. 3477) was rejected.

□ 0210

The PRESIDING OFFICER. Under the previous order, the Senator from Arizona (Mr. DECONCINI) is recognized.

Mr. DECONCINI. Mr. President, I would like to talk at some length. I wish to have the attention of the majority leader and ask him a question.

I ask unanimous consent that I can do that without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I thank the Chair.

My question to the majority leader is, Would it not be wise for us to fold up this morning and come back tomorrow at a civilized hour and continue this debate on this issue? Because it is 2 o'clock now and we have seen the damage that these all-night sessions do to the health of people, to the temperament of people, and the quality of life around here has been slipping a great deal, I say the last week or two, and I do not want the majority leader to go down as the majority leader that is not really interested in the welfare of all Members and the quality of life, and I would hope that the majority leader would ask for unanimous consent that we go out tonight and come back tomorrow morning and it sure would make me feel much better.

Mr. DOLE. That is important to me.

Mr. DECONCINI. Thank you.

I think we will come back tomorrow morning.

Mr. DOLE. He is one of the key players in this little trio here. I think it has just been suggested by the manager if we get some agreement that no other amendments be in order so we come back in the morning and we would have this issue before us and give some of us a little time between now and 9 o'clock to try to work out. If we could get unanimous consent that there be no further amendment in order I think the manager might be willing to do that.

Mr. HATFIELD. Mr. President, I ask unanimous consent that no other amendments be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, there will be no more votes tonight. We will be in at 9:30.

Mr. LAUTENBERG. Mr. President, will the majority leader yield for a unanimous consent request?

Mr. DOLE. I yield.

CHANGE OF VOTE

Mr. LAUTENBERG. I ask unanimous consent that a vote that I cast on the Melcher amendment be changed from "yes" to "no". It would not change the outcome of the vote.

The PRESIDING OFFICER. Is there objection?

Mr. CHAFEE. Mr. President, I would like to ask a question. I thought we were trying to work out and I thought we did have some kind of agreement last year—I confess I am not sure whatever it was—about changing votes. It is nothing obviously personal with people involved.

I think changing votes afterward is not good, and I just hate to see it done. I thought we had some kind of agreement last year. I do not remember exactly what it was dealing with this matter. Some will have a better memory than I.

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, there is simple precedents for changing a vote by unanimous consent as long as it does not change the outcome of the vote.

If a Senator has not voted, of course, he cannot vote and the Chair cannot even entertain a unanimous-consent request that the Senator be allowed to vote after the Chair has announced the vote.

But even though the Chair has announced the vote, I do not think I have heard any objections to a Senator wanting to change his vote. After all, he represents his people. He wants to vote in a way that he thinks best represents his people, and as long as it does not change the outcome of the vote I would hope we would not object.

The PRESIDING OFFICER. Is there objection?

Mr. CHAFEE. Let me say, Mr. President, that I will not object, but I am going to review. I thought we had some kind of announcement. Actually, it was more than last year. I think Senator Baker was involved with it.

I just hope this does not occur too often.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I thank the distinguished Senator for not objecting.

(The foregoing vote has been changed in accordance with the above order.)

Mr. DOLE. Mr. President, there is a cloture vote to occur tomorrow at 1 hour after we come in.

I ask unanimous consent that that cloture vote occur at 1 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, obviously at this time in the evening we cannot run the Cloakroom wires, but in view of the fact if there were an objection the majority leader would have to do one of two things. One, he would have to bring the Senate in at noon in order to have a vote at 1 o'clock or a little past 1, or he would have to come in and if the cloture motion carried that would mean that the Senate would have to continue with that business to the exclusion of all other business which would mean the continuing resolution would have to await the final outcome on the immigration bill and, thus, the closing down of the Government would be accelerated. So I am going to take the liberty on this side, having stated that for the Record, that we have not objection.

□ 0220

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, let me thank the distinguished minority leader. He is correct. If cloture was obtained, and I think it would be, on the immigration bill, I assume we would get unanimous consent to pass the short continuing resolution. We may not have a short continuing resolution. I am not certain the House will send us one. They want to go home tomorrow. They believe the best way to do that is to keep our nose to the grindstone on the big continuing resolution.

As I understand it, nonessential Government employees will be notified at noon unless there is some resolution of the pending Goldwater amendment. Unless there is some temporary relief, they will not work until we fix it up.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS FISCAL YEAR 1987

Mr. McCLURE. Mr. President, the conference on the fiscal year 1987 Department of the Interior and Related Agencies appropriations bill has concluded work and has reached agreement on all items.

The Senate Budget Committee scores the conference report on this bill with $8,079,000,000 in budget authority and $9,109,000,000 in outlays. This represents a decrease of nearly $200 million in budget authority below the adjusted fiscal year 1986 level. In addition, the revenues this budget authority generates is estimated to be over $10 billion.

The conference agreement on House Joint Resolution 738 incorporates some of the provisions of both the House and Senate versions of the Department of the Interior and Related Agencies Appropriations Act, 1987, and has the effect of enacting the act into law. The departments and agencies funded by this act shall comply with the language and allocations set forth in the House Report 99-714 and Senate Report 99-397 unless specifically addressed to the contrary in the joint resolution and accompanying statement of the managers.

In the Bureau of Indian Affairs, the managers have agreed to reprogram some of the remaining balances in the irrigation construction account which were originally appropriated in the Emergency Jobs bill. The two projects from which funds are to be reprogrammed are the Colorado River power project and the Uintah and Ouray irrigation project.

The conference report also provides funds in the Bureau of Indian Affairs, Forest Service, and the Bureau of Land Management for forest firefighting. In the past, these funds were provided in the supplemental but were provided now because of the probability that an offset would be required in the fiscal year 1987 supplemental appropriations bill.

Details of the agreements are listed in the conference report and I ask unanimous consent that the accompanying detail table be inserted in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

INTERIOR SUPPORT TABLE (IN THOUSANDS OF DOLLARS)

URANIUM ENRICHMENT PROVISIONS IN THE CONTINUING RESOLUTION

Mr. BINGAMAN. Mr. President, I rise to comment on the provision in the continuing resolution dealing with the Department of Energy's Uranium Enrichment Program. Let me, first, thank my colleague, the distinguished senior Senator from New Mexico for his help in securing this important language. Although the DOE's new criteria became effective Tuesday, October 14, and it is difficult to totally repeal it now, the language added to the continuing resolution does selectively reject key provisions of the criteria.

Mr. President, the DOE has a statutory obligation under section 161(v) of the Atomic Energy Act to limit enrichment of foreign source uranium for domestic end use to the extent necessary to assure the maintenance of a viable domestic uranium industry. Alternatively, the DOE can impose regulation, or request the Nuclear Regulatory Commission to impose regulations for a similar purpose under sections 161(b) or 161(p) of the act. The DOE acknowledges that the domestic industry is nonviable but still refuses to act. As a result, 18,000 of the industry's 20,000 workers are unemployed. This has caused severe economic dislocation in my State of New Mexico.

The Senate has already adopted language disapproving new uranium enrichment criteria embodying this DOE refusal. The two House authorizing committees with jurisdiction have also acted. I am happy to see that in response to this action the conferees on the continuing resolution have adopted provisions which will neutralize, for the term of the resolution, some of the worst aspects of the DOE's new criteria. The road should now remain clear to enforce existing law requiring the DOE to limit enrichment to the extent necessary to preserve a viable domestic industry or to take comparable action under other provisions of the Atomic Energy Act. The DOE has no excuse for its continued failure to obey the law.

Thank you, Mr. President.

Mr. NICKLES. Mr. President, I would like to ask my friend from Idaho if he would be willing to engage in a brief colloquy.

Management of federally sponsored petroleum and petroleum-related research is currently highly fragmented. In fact, at least four different research centers are being used to perform various portions of the petroleum research program, Bartlesville, OK (enhanced oil recovery and advanced exploratory research), San Francisco, CA (heavy oil), Laramie, WY (tar sands and oil shale), and Morgantown, WV (unconventional gas, arctic research, and management and oversight of Laramie). There are numerous, substantive synergies and commonalities among the technologies being investigated. From a technological and economic perspective, it is apparent that consolidation and integration of these programs would result in more rapid advances in our national petroleum technologies achieved in a more cost-effective manner.

To encourage communications and sharing of results with other petroleum researchers active in these areas and with the operators and service companies who will commercialize and apply these technologies, any consolidated management of these research programs must be in the "oil patch."

The obvious choice for a "home base" for consolidation of petroleum research programs would appear to be the Department of Energy's Bartlesville Project Office. The vast majority of the relevant resources lie in the midcontinent, southwestern, and western States. Consolidation of research management at Bartlesville would strengthen all of the various petroleum research programs by creating a single point of coordination and integration. Further, consolidated management would permit more effective articulation of priorities within DOE and would facilitate broader cooperation and communication between the Federal Government and the various oil-producing States. These States have a large stake in the efficient development of these resources.

My distinguished colleague from Idaho has had a long interest and a respected record in advancing solutions to our national energy problems and has been a leader in promoting cost-effective, efficient government R&D. I wonder if the Senator from Idaho would help to clarify these matters.

Mr. McCLURE. I would be happy to clarify this issue for my friend and colleague from Oklahoma. I am keenly aware of the effects of the oil price decline on domestic production, State and local revenues, and our national energy security. My State, too, has been hard hit. It is the intention of this legislation to address our major energy concerns and I am pleased to assist the Senator from Oklahoma in whatever way I can. Fundamental petroleum research to increase domestic production is a primary concern.

Mr. NICKLES. Does the Interior section of House Joint Resolution 738 provide the Department of Energy with adequate funds to continue the important petroleum research at Bartlesville?

Mr. McCLURE. It is the intent of the bill that the petroleum research program will continue at Bartlesville. Given the presence there of the National Institute for Petroleum and Energy Research [NIPER] and the nature of the work at that site, it is important that the research continue.

Mr. NICKLES. Is the Department of Energy investigating the consolidation of management of oil, gas, and shale research and development at the Bartlesville Project Office?

Mr. McCLURE. It is the understanding of the committee that the Department investigates carriers consolidation plans periodically may make sense to consolidate the coordination of these activities at one site and we would analyze their recommendation in the budget process.

Mr. NICKLES. I thank my colleague from Idaho for his clarification of the intent of his bill. His leadership in advancing this bill to assist a beleaguered industry and to assure national energy security is greatly appreciated.

Mr. President, I yield the floor.

Mr. BINGAMAN. Mr. President, the conference agreement to accompany the Continuing Appropriations Act for 1987, is the largest spending bill in American history. It provides approximately $558 billion in funding for the entire Federal Government to continue its operations through the next fiscal year. Without it, the entire Government would shut down, and as we speak, we face another midnight deadline. This continuing appropriation agreement is needed because not one of the 13 permanent appropriations bills have yet been passed by the Congress. However, I voted against this bill when it was considered by the Senate, and I intend to oppose the conference agreement for the same reasons. I am not opposed to a continuing resolution; I am opposed to the bill in its present form and believe it should be changed. It should be limited to the original purpose for which it was intended which is to continue the Government funding without any extraneous, new legislative language.

While I don't fault the work of the members of the Appropriations Committees of the House and Senate, this agreement represents the worst of the Congress. It is both substantively and procedurally flawed. It is massive in both size and scope, and very few know what is in it. Each year, in fact, the bill gets larger and each year we get further from the original purpose of the continuing resolution. Instead of just continuing the funding for Government, we use it to authorize more and more programs. As a result, the bill has turned into a mammoth legislative vehicle which gets more and more difficult to pass.

I must vote against this agreement for both substantive and procedural reasons. There are a number of provisions in it which I find extremely objectionable on policy grounds. First, I am opposed to the $100 million in aid to the Contras in Nicaragua. This money is just a downpayment on an unwise and counterproductive military intrusion in Central America.

I am opposed to the cuts this bill makes in military readiness. Such cuts

put us on a path toward a hollow, toothless military despite the massive overall increase in military spending in the first half of this decade.

I am glad to see that one provision which was in the Senate bill was struck. That provision would have given the President the discretion to forgive loans made under the Foreign Military Sales [FMS] Program. It applies to unobligated funds appropriated by Congress for the FMS Program in 1985 and 1986, an amount totaling $3.5 billion. The effect of this section would have been to turn a program which Congress created as a loan program into a free grant program, to be used to give away U.S. arms. I opposed this provision, but my amendment to delete it was unfortunately defeated by the Senate. I am glad that it was eliminated in conference.

I am also concerned with many of the domestic spending cuts carried out in this bill. It cuts important education, health, and other human spending programs in many cases beyond the levels needed to sustain these important programs.

There are a number of other questionable legislative provisions attached to this funding bill, which include: private relief legislation; specific weapons; programs not otherwise authorized; direct Federal payments to specific localities; subsidies to individual farms; new labor law provisions; buy-American trade provisions; and many other equally troublesome provisions. Most troubling, however, is the fact that we are not really sure exactly what is in this bill.

The fact of the matter is that not only don't we know what is in the legislation, that very little consideration has been given to its parts. Many of the bills incorporated in the continuing resolution were passed by the House with very little debate and most have never before reached the Senate floor. As a result, we are being asked to vote for bills which have not been previously considered by the Senate.

There are other procedural problems with this bill besides its size, its lack of due consideration, and the lack of knowledge of what is in it. The distinguished chairman of the Appropriations Committee has asked that no authorizing legislation be added to this measure, but he failed to mention that the bill is full of authorizing language added by the Appropriations Committee, some of which I have already mentioned. As a result, much of this bill should also be ruled out of order.

Mr. President, I think it is time we begin to examine our legislative practices. It is time we begin to examine how we conduct our business. We must ask ourselves why we cannot pass any of our permanent appropriations bills and we must ask ourselves why we have so much legislation on an appropriations bill. We must ask ourselves: How can we begin to address these questions and start to improve our practices?

Because of these problems, I feel compelled to vote against this conference agreement. It has provisions troubling to me, and I fear it has other provisions of which I am not aware, which would also be objectionable. I also feel that the agreement is the product o a flawed process that needs drastic overhaul.

I urge my colleagues to oppose the agreement.

Mr. HOLLINGS. Mr. President, as part of the report on fiscal year 1987 appropriations for the Department of Commerce, Justice, and State, the judiciary, and related agencies, we included language on international telecommunications. This language arose out of a concern we had about the development of policy and strategy and about the extent of coordination among the various executive agencies invovled in developing and implementing internal communications policy. Senator RUDMAN and I just received a letter from the Departments of State and Commerce and the Federal Communications Commission about our report language and how they intend to address our concerns. The proposals in this letter meet the objectives set forth in our report language. I ask that the letter I referred to be inserted in the RECORD.

The letter follows:

U.S. DEPARTMENT OF COMMERCE,
Washington, DC

Hon. WARREN RUDMAN,
Hon. ERNEST F. HOLLINGS,
Washington, DC.

DEAR SENATORS: We share your interest in improved coordination of U.S. international communications policy. We are concerned, however, about language included in Senate Report No. 99-425, which accompanied the fiscal year 1987 appropriations bill for the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies (H.R. 5161).

The language at issue seeks to establish a new interagency coordinating process and to mandage monthly meetings of designated Commerce, State, and Federal Communications Commissions (FCC) officials. In addition, an official of the U.S. Trade Representative's Office (USTR) would be required to participate in the proposed communications policy coordinating group (S. Rep. No. 99-425 at pp.5-6).

We recognize the important role that international communications plays and will play in the U.S. economy. The United States today confronts critical choices including how expeditiously to establish U.S.-based international satellite systems, the appropriate role of the United States in the International Telecommunications Satellite Organization given the changing character of its signatories, and the feasibility of linking U.S. policy actions in one telecommunications sector with those proposed in another.

Closer coordination and collaboration among the agencies with primary responsibilities in international communications is highly desirable. As we address current and future issues, there should be full appreciation of the totality of U.S. interests at stake, and an understanding of all strategic and tactical policy options.

Toward this end, we propose the following measures. First, State, Commerce, and FCC officials will plan to meet on a bimonthly basis, if not more frequently, to ensure our efforts in this important area are more effective. Second, when issues with significant trade policy implications arise, USTR will be included. Third, Commerce, State, and FCC staff will continue to coordinate their efforts on a formal and informal basis between meetings of their principals.

We believe that this would meet the objectives set forth in the committee report. We thus urge that the language in the Senate report which concerns us not be included in any final conference report on this bill.

Sincerely,

ALFRED C. SIKES,
Assistant Secretary of Commerce for Communications and Information.
WILLIAM SCHNEIDER, Jr.,
Under Secretary of State for Security Assistance, Science, and Technology.
MARK S. FOWLER,
Chairman,
Federal Communications Commission.

FAIRNESS DOCTRINE

Mr. HOLLINGS. Mr. President, in this legislation we have included a provision requiring the Federal Communications Commission to conduct an inquiry into alternative means of administering and enforcing the fairness doctrine. We do this to determine whether the spirit of the fairness doctrine can be carried out while lessening any burdens that might exist. No one should imply from this language that we in Congress have lessened our support in any way for the fairness doctrine. Our support—as stated in the Senate's report on this legislation—remains as strong as ever. The FCC should not make any material changes in the regulation implementing the fairness doctrine. This would be counter to the direction of the conferees.

In addition to the statutory requirement included in this legislation, in the second paragraph under the Federal Communications Commission section, the "Statement of Mangers" contains language that refers to this statutory provision. It is not the intent of the conferees by the inclusion of this language to support or permit repeal of the fairness doctrine at any tme, even after the required report is filed. In fact, just the opposite is the case. The conferees continue to strongly support the fairness doctrine. I would like to ask my colleague from New Hampshire, Senator RUDMAN, the chairman of our subcommittee, whether this is correct.

Mr. RUDMAN. Mr. President, the Senator from South Carolina is completely correct. This language in the "Statement of Managers" should not be read in any way to support or permit repeal of the fairness doctrine at any time.

Mr. HOLLINGS. I thank the Senator from New Hampshire. The Members of the Senate-House conference were particularly concerned that during the pendency of the report required in this legislation that the FCC take no action to make materials changes in regard to the fairness doctrine. The Members also believed the Commission should not even take such action after the report is required. The FCC should have no doubt about the strong support of the Congress for the Fairness Doctrine and should take no action without Congressional authorization.

Mr. WILSON. Mr. President, I wish to express my appreciation to the distinguished Senator from South Dakota for his support and cooperation in drawing the attention of the House and Senate conferees on this resolution to the need for the General Services Administration to pursue this acquisition of a new Federal building in San Francisco and reduce its reliance on costly leased office space for Federal employees. This is a matter we discussed during the Senate's consideration of House Joint Resolution 738 on October 3.

I am pleased to see that the report contains language directing GSA to initiate a process which upon completion could result in the acquisition of a Federal office building in San Francisco. This is precisely the thrust of our colloquy on this subject of October 3, 1986. The Environment and Public Works Committee has stated repeatedly that GSA should curtail the trend toward increased leasing of high cost office space by using its Building Purchase Program authority to acquire the space needed for Federal activities. The Appropriations Committee has shared the same view, as the long-term cost advantage of converting to Government-owned buildings can be substantial in the long run. This is especially true in cities such as San Francisco where the rental costs to the Government are extremely high.

With the direction given by the conferees, we should look forward to GSA moving promptly to study the alternatives available in terms of existing buildings that might be offered to the Government in response to a solicitation of competitive offers, and to provide an analysis of the cost of purchase as compared to leasing. GSA ought to be able to accomplish that process over the next 3 to 4 months and report to the appropriate committees. That timetable would permit GSA, if it identifies a suitable building that offers a cost advantage over leased space, to commence the acquisition process shortly thereafter.

I understand that the appropriations provided in this resolution may not be sufficient to allow GSA to complete the final acquisition process during the current fiscal year, and yet it would be most unfortunate if it were unable to take early advantage of an attractive purchase opportunity that its study identifies. Fortunately, GSA's existing authority permits it not only to purchase buildings but also to take an option to purchase, or to enter into a short-term lease with an option to purchase, and it should certainly give serious consideration to exercising that authority so that rental savings to the Government can commence as soon as possible. Consummation of the purchase could then occur early in the next fiscal year.

Mr. ABDNOR. Mr. President, I appreciate the interest in this matter expressed by the distinguished Senator from California and concur in his remarks. As a member of both the Environment and Public Works Committee and of the Appropriations Committee, I note that his remarks are entirely consistent with the approach we have been advocating for some time. I have no doubt that both committees will play an important role in assisting GSA in following that approach in this case. I am also certain that the House will play an equally active and supportive role in assisting GSA's process of acquiring a building in San Francisco. During our conference deliberations last week, the House Members shared our view of the need to reduce high cost rents in San Francisco and strongly supported the need to direct GSA to initiate the acquisition process this year.

Mr. WILSON. Mr. President, I thank the distinguished Senator for sharing this explanation of the conference action and commend him for his fine efforts.

LANGUAGE FOR CONFERENCE REPORT ON H.J. RES. 738 TREASURY, POSTAL SERVICE, AND GENERAL GOVERNMENT

Study of Federal Buildings—San Francisco

The GSA is directed under the Building Purchase Program to use a portion of its funds to study the need and availability of existing buildings meeting Federal office building requirements in San Francisco and report to the committee with specific recommendations on alternatives as to cost, space, and locations prior to February 1987.

T-46 TRAINER

Mr. CHILES. Mr. President, it appears the T-46 Trainer Program has become a political football, and this concerns me, because it shouldn't be.

We have heard the argument against funding for this program from the chairman of the Senate Armed Services Committee, whose opinion on these matters, I have the greatest respect. We have also heard arguments from others on the floor today who support the continuation of the T-46 Program.

But, what does the Air Force say? The Senator from Arizona claims the Secretary of the Air Force told him he does not want this new trainer and, if Congress gives it to him, he will put the plane in mothballs. On the other hand, I have spoken to blue suiters in the Air Force who were very impressed after flying the T-46, and told me they need this trainer very badly. If given the funds to purchase the aircraft they will put it to good use in training new pilots.

So, it seems there is a controversy in the Air Force also over this issue.

Some of the arguments against the T-46 Program revolve around contractor design and production problems. It is true that the T-46 Program has had its share of problems. However the number of deficiencies found during the contractor operations review [COR] were not unusual for a brand-new sophisticated small airplane.

I am told great progress has been made in correcting these problems. Over 60 percent of COR deficiencies were corrected by the contractor by March of this year; 97 percent of the identified deficiencies have now been corrected, and the remaining deficiencies should be corrected by the end of this year.

I am also of the understanding that the contractor will be able to meet the Air Force's delivery schedule which calls for the first two production aircraft to be delivered early next year.

Mr. President, U.S. Air Force pilots are flying the most advanced, sophisticated aircraft in the world today. Can we afford not to train these pilots with an aircraft that has similar up-to-date technology?

The Air Force has a critical need for a new trainer. The trainer they are flying today, the T-37, was first introduced 30 years ago and the average age of this fleet is 25 years.

Several months ago the senior Senator from New York was kind enough to include in the RECORD my statement at that time on the T-46 Program. I'd like to take this opportunity to reiterate some of the points I made then.

The American taxpayer has made a substantial investment in the RDT&E of a next generation trainer for the Air Force. To cancel this program now when these aircraft are about to go into production just doesn't make good sense to me. Especially when it appears the selection alternative to continuing the T-46 program will cost an additional $900 million. The T-46A represents an important new asset in the Air Force inventory. With the T-46's ability to train new pilots quickly, effectively and at reduced costs in maintenance and fuel savings, our defense posture should be significantly improved.

Mr. President, it appears what we are trying to decide here today is whether or not to go with an existing 30-year-old training aircraft that has a long list of expensive deficiencies which I won't go into and is quickly approaching the end of its certified

service life, or whether to go with a new more capable aircraft that either meets or exceeds all air training command needs.

I personally think the answer to this question is to go forward with the new T-46 trainer.

THE ABDNOR AMENDMENT

Mr. CHILES. Mr. President, I rise in opposition to the amendment offered by the distinguished Senator from South Dakota. If I understand my colleague correctly, his amendment would prohibit the General Services Administration from even entering into lease construction arrangements in a number of areas where the need for additional Federal space has been well documented. In Miami, for example, the General Services Administration has reported that additional space is very much needed.

At present, Federal workers are housed in 55 separate locations in the Greater Miami area. Of the 6,083 employees in the area, 69 percent are housed in rented space. Federal rental has doubled since 1972.

These rental costs alone drain $8.6 million a year from the Treasury. But the cost does not stop there. Security costs for scattered Federal employees are an additional burden. The GSA has recommended that new space adjacent to the present courthouse complex be provided, and reports that such an arrangement would be very beneficial for both cost and security reasons.

In the GSA's report, made at the request of the House Committee on Public Works and Transportation, an increase of 7 percent in the number of Federal employees in the Miami area is projected over the next 3 to 5 years. A particular increase is expected for the Judiciary and the Department of Justice.

As I am sure other Members realize, south Florida has grown tremendously in recent years. Miami is the center of booming trade with the Caribbean and Latin America. The demand on Federal services has grown even beyond the population growth. The influx of refugees, for example, has caused special problems for Miami and Dade County.

Mr. President, the General Services Administration determined that additional space in the Miami area was needed and should be provided. The only question was whether this new space should be provided by Federal construction or lease construction. There is every reason to believe that Federal construction is justified and would be cost-efficient. Given the current policy of GSA, however, the agency's recommendation was that lease construction be pursued. If this option is eliminated, the currently unacceptable situation in Miami will grow worse.

The House Committee on Public Works and Transportation approved a resolution authorizing Federal construction. The House Appropriations Committee recommended that $2.461 million be provided in fiscal year 1987 for planning and design. I understand that a proposal has been made that the lease construction alternative be pursued, and that this money could be used to acquire land upon which local authorities could construct the needed building for lease to the General Service Administration. Language in the bill provides the appropriate legal authority to the Administrator of the General Services Administration to enter into a lease for a building constructed on Government-owned property for a period not to exceed 30 years.

I must strongly oppose any measure which would threaten this alternative method of construction. The need is there. It has been documented by the General Services Administration and recognized by the House Public Works Committee. The people of south Florida know all to well that the need is there. I urge my colleagues to reject the amendment offered by the Senator from South Dakota.

IN OPPOSITION TO THE ABDNOR AMENDMENT TO AMENDMENT NO. 59

Mr. LAUTENBERG. Mr. President, I rise in opposition to the amendment offered by the Senator from South Dakota.

Mr. President, it is quite common in the Senate to hear that a provision, although not included in a bill before the Senate, is in the House companion measure and will be considered in conference. There is a certain solace in that situation, because almost never does a bill escape a conference without being modified on both sides. The Senate wins on some points; the House on others. This amendment says that unless a project was included by the Senate, it cannot be included in the conference report.

I strongly support one project which was included in the House bill, but not in the Senate bill. The project is a Federal building for Paterson, NJ. The House bill included $1.5 million for planning and design work on the proposed facility.

Construction of a Federal building in Paterson is needed to serve the people of Passaic, Bergen, and Morris Counties in New Jersey. At the present time, the Federal Government leases space throughout the area. Residents are faced with traveling to Clifton, Lodi, Paramus, and Fairlawn for access to offices not in Paterson. A Federal building in Paterson will provide convenient access to the Internal Revenue Service, the Labor Department and the Social Security Administration, which are currently located in leased space in Paterson. In addition, the building will consolidate space for the Defense Logistics Agency, the Occupational Safety and Health Administration, the Small Business Administration, the Defense Contract Audit Agency and the FBI. Such a Federal building could serve as a focal point for the Federal activities in the area.

In addition, construction of a Federal building will provide much-needed stimulus to revitalize downtown Paterson. Paterson, NJ, is the poorest city of its size in the United States. Consolidation of Federal offices will provide a critical mass of workers in the downtown area which will stimulate further construction and revitalization.

Construction of a Federal building is also cost-effective in the long run. The current leasing plan will cost the Federal Government $15 million over the next 30 years. Building a new Federal building is estimated to cost $7.6 million. In the long run, it will save the taxpayers money if the Federal Government owns its building instead of continuing to rent space.

Mr. President, it has been the policy of the Senate, as outlined in public buildings authorization bills passed by this body, to move away from the expensive leasing of space and toward housing Federal agencies in federally-owned buildings. The House provision to construct a new Federal building in Paterson, NJ, is consistent with that policy.

The Senator from South Dakota objects to any building unless it is authorized by both the House and the Senate. It is very difficult to get authorization here in the Senate for any structure unless it is approved by the Administration. Are we simply saying that the Congress is abdicating any role in public buildings and leaving it up to GSA to decide what gets leased and what gets built?

The principle being employed in this case is an unusual one. We are saying that we will only agree to fund public buildings agreed to by the Senate. The usual give and take, which is the essence of the conference committee process, is not being respected in this case.

Mr. President, I am defending the house position in this matter. In addition, I am defending the normal conference committee process in which provisions from both the House and Senate are incorporated in a compromise bill.

Mr. President, I strongly support inclusion of the Paterson Federal Building in the conference report. I oppose the Abdnor amendment and I urge its defeat.

Mr. KERRY. Mr. President let me first state that I fully concur with the remarks made by my distinguished colleagues from Ohio, New Hampshire, and Oregon and I commend them on their tireless efforts on this very critical issue. In addition I would like to reiterate the sentiments of my col-

leagues from Ohio and Oregon that it is likely that we will revisit this issue in the future. They can both be assured that I will be working with them to defeat such dangerous provisions.

Mr. President, I rise in opposition to a provision added to the continuing budget resolution during the conference committee between the House and the Senate. This provision which was not in the Senate passed Commerce, Justice, and State appropriations bill in the continuing resolution, will inhibit the right of women in Federal prisons to have abortions. Although I have no intentions on holding up the continuing budget resolution at this late stage in the session, I want to make it absolutely clear that my opposition to this specific provision is based on two factors. First this provision is unconstitutional and second, this action represents legislating on an appropriations bill.

Federal prisoners do not lose their constitutional rights when they are incarcerated. Last year the Senate was quite clear on this issue when they voted a similar measure unconstitutional. Furthermore, this has been upheld in numerous instances. For example in the case of *Wolff* v. *McDonnell,* 418 U.S. 539, 555-556 (1974), Justice White stated, "There is no iron curtain drawn between the Constitution and the prisons of this country."

In *Roe* v. *Wade,* 410 U.S. 113 (1973), the Supreme Court stated that up to the point of viability "the abortion decision is inherently, and primarily a medical decision . . ." and found that the Government cannot deny a patient the right to obtain an abortion. Moreover an incarcerated woman's right to appropriate medical care is unquestionably protected under the Constitution. This could not be more clearly portrayed than in the U.S. Supreme Court decision *Estelle* v. *Gamble* 429 U.S. 97 (1976), where the Court ruled that the eighth amendment's ban on cruel and unusual punishment requires prisons to provide medical services for inmates; particularly in situations where the denial of elective medical treatment would cause an "irreparable" condition. Preventing a woman from being able to choose to have an abortion in a timely and safe manner is undoubtably "irreparable". This was most recently upheld in a New Jersey court case *Monmouth County Correctional Institution Inmates* v. *Lanzaro,* Civil No. 82-1924 (D.N.J. May 29, 1986). In this case, the court was determining whether it is appropriate for prisons to offer abortions as a medical service. They concluded in their ruling that inmates not only have the constitutional right to an abortion for medical reasons, but that abortions must be paid for by the Government. In sum, this ruling clearly points out the fact that by denying Federal dollars for women in Federal prisons who choose to have abortions we are blatantly denying essential medical services.

I have clearly demonstrated that this provision is unconstitutional. Let us turn our thoughts for a moment to some actual facts about the living conditions in prisons and ask ourselves, should women really be forced to carry a pregnancy to term in a Federal prison if they choose not to? Fact—66 percent of the women in prison were unemployed prior to imprisonment; fact—58 percent of women in prisons lived on less than $3,000 a year prior to imprisonment and 92 percent had less than $10,000 yearly income; fact—the majority of women in prison are single parent mothers; fact—gynecological and prenatal care is inadequate in most prisons; fact—in prisons there is little to no medical care provided for new born children; fact—50 percent of all children do not see their mother after incarceration; fact—prisons have limited support programs for child-inmate relations. Circumstances as grim as this must certainly be studied in depth to assess its impact on the health and welfare of a pregnant woman and her unborn child, before we pass laws in this area.

Mr. President, in conclusion let me say that the constitutionality of a woman's right to abortion was determined in the case Roe versus Wade. Furthermore, the issues of abortion, and access to health care for women in prisons should be carefully examined by the appropriate authorizing committees. Issues of such far-reaching consequences should be fully addressed and not cavalierly placed on a spending bill in the closing moments of this Congress.

THE PAPERWORK REDUCTION REAUTHORIZATION ACT OF 1986

Mr. CHILES. Mr. President, I want to comment on title VIII of the continuing resolution which amounts to the Paperwork Reduction Reauthorization Act of 1986.

This legislation will strengthen the Federal Government's ability to minimize the paperwork and regulatory burden upon the public. It will reduce the number of taxpayer dollars which go to the acquisition and use of information technology by the Federal agencies.

In 1980 I sponsored the Paperwork Reduction Act here in the Senate. Since 1983 the respective authorizing committees of the House and Senate Government Operations and Governmental Affairs, have been working on: First, reauthorizing the 3-year authorization associated with the financing of the Office of Information and Regulatory Affairs [OIRA]; and second, amending the act to correct problems which both committees have examined in oversight hearings. For various reasons that effort has been unsuccessful until now.

The Paperwork Reduction Reauthorization Act of 1986 represents a successful culmination of the 3-year process. It represents a reaffirmation of what Congress intended in 1980 when it passed the Paperwork Reduction Act and a fresh agreement between the Congress and the Executive on how things should proceed under the act in the future.

During the Senate floor debate on the continuing resolution I engaged in a colloquy with Senators HATFIELD, ABDNOR, and ROTH; the respective appropriations and authorizing committee chairmen over the need to respond to the House language relating to the Office of Information and Regulatory Affairs. In brief, my view was that the House had not only zeroed the funding for OIRA but had legislated on the appropriations bill in a way which would have affected substantive laws other than just the Paperwork Act. That colloquy can be found on page 28474 of the October 3 CONGRESSIONAL RECORD.

At that time, I mentioned that Chairman BROOKS of the House Government Operations Committee, Congressman HORTON, the administration and I were working on an agreement on the issues which have surrounded the Office of Information and Regulatory Affairs. The hope was to bring that agreement to the conferees in order to resolve the differences between the House and Senate.

An agreement was reached. Reauthorization language for both OIRA and the General Services Administration Board of Contract Appeals was incorporated. Clarifications to the Paperwork Act and related laws were made. Statutory lines were drawn. The language in title VIII, the Paperwork Reauthorization Act of 1986, represents the agreement which was brought to the conference. Senator ROTH, the Chairman of the Senate Governmental Affairs Committee, participated in bringing about and concurred with this language.

I want to compliment and thank the participants to the 1986 amendments for a job done well. I also want to especially thank Senator DANFORTH whose work as chairman of the Subcommittee on Information Management and Regulatory Affairs during the 98th Congress helped bring about many of the provisions in this 1986 Reauthorization Act.

As I have stated previously, my biggest disappointments since passage of the 1980 act concerned efforts by the executive branch to frustrate both the opportunities for meaningful public participation and mechanisms for accountability to the Congress and the public the law established.

More recently, I sensed to a greater degree than ever, the extent to which these efforts have worked to erode the feeling of trust between the executive and legislative branches of Government. It is critical that this erosion be stopped and reversed. These amendments enable us to avoid the train wreck which was imminent. They provide a basis to build trust, confidence, and accountability for the processes which underpin the Paperwork Act.

For example, this legislation contains several new additional "sunshine" provisions which require more openness on the part of both the agencies and the OIRA in the way decisions under the act are made. Written communications to and from OIRA relating to information collection requests, including those contained in regulations, will be available to the public. The Director of OMB will be required to make an explanation of his reasoning to disapprove or approve requests publicly available. Additionally, as part of the Senate sponsors reaching agreement with the administration on this legislation, the administration agreed to institute sunshine procedures administratively which will make OMB's review of regulations under Executive Order 12291 more accessible to the public.

Open and timely decisions on regulatory as well as other kinds of reviews is the principle to which OIRA is to adhere.

Second, several amendments which will enhance public participation in the decisions which are made as a result of the act have been made. Federal agencies will be required to announce in the Federal Register their understanding of who will be affected and their estimate of what the burden of proposed information demands will be.

This standardization of Federal Register announcements should increase and improve public comments on the proposals. Since agency information requests will be reviewed at least every 3 years, there will be a continuing opportunity for the public to comment on all reporting and recordkeeping requirements.

Most importantly, the potential loophole to section 3512, the public protection section of the act, has been closed. That provision of the law declares that information requests, whether they are forms, recordkeeping requirements, or regulations, must display a control number indicating they have been checked for need. Absent such a control number the request is a "bootleg" and can be ignored by the public. With a control number the justification and need for the requirement can be reviewed by all.

A fundamental premise of the Paperwork Reduction Act is that every citizen in entitled to have their Government check the need for information requests made of them. Duplicative or unnecessarily burdensome requests should be avoided. The Justice Department issued a legal opinion in June 1982 which purported to interpret the paperwork statute. A major effect of that ruling was to confuse the public over what paperwork requirements were and were not covered by the public protection section. The 1986 amendments clarify Congress' original intent. The opinion is specifically overturned. This action should lead to more assertions by the public of the right intended by the public protection section.

Third, this legislation will make activities of OIRA more accountable to Congress. Future administrators of OIRA are to be appointed by the President, with the advice and consent of the Senate.

Additionally, authorization language was agreed to which specifically requires a separate appropriation account for funding OIRA's activities under the act. Funding for carrying out functions assigned to the Director of OMB by the act must come from this account. Separate funding must be obtained for OIRA activities which are not related to the functions assigned by the act.

The effect of this authorization provision will be to enable Congress to focus upon how funds appropriated annually to OIRA are used. The use of funds from this account for reviewing rules or regulations is limited to carrying out the Director's responsibilities regarding information collection requests. To the extent the review of regulations is consequent to such responsibilities funding must come from the newly established account.

In my view, the Paperwork Reduction Act of 1980 was intended as a regulatory reform as well as an information management reform. A key to this understanding is that the framers appreciated the relationship and linkage between the two. Caution was expressed that the authorities contained in the act were not to be abused nor used to extend beyond the scope of the act. Indeed, the initial authorization language of 1980 limited OIRA to no other purposes but to those authorized by the act. Director Stockman moved quickly in 1981 to avoid the establishment of a separate appropriation account for OIRA which would have enabled Congress to provide proper oversight.

But the aspect of new technology for example, and how it could be used to both save money and reduce public burden was and remains a very exciting potential. My fervent hope and intent are this reauthorization act and the amendments incorporated will provide an even better basis to realize this potential.

The oversight mechanism created by the separate account will reveal annually to the Congress the Director's determination of the extent to which OMB's review of regulations is or is not a function of carrying out the information management responsibilities established by the Paperwork Reduction Act.

The requirements for more sunshine, more public participation, and better accountability to Congress were essential to the agreement the Paperwork Reduction Reauthorization Act of 1986 represents. I believe a foundation for success has been rebuilt. OIRA's performance in the upcoming year will say a lot about whether the results the Congress, the Executive, and the American public want can be obtained; whether a modicum of trust can be maintained between the OMB, Congress, and the public; and whether there will be a renewed attempt to eliminate funding.

Mr. President, legislative history for the Paperwork Reduction Reauthorization Act can be found in the following report: the conference report on title VIII accompanying the continuing resolution; (H. Rept. 98-147), (S. Rept. 98-576), and (H. Conf. Rept. 98-861, pp. 1421-1438) of the 98th Congress; and (S. Rept. 99-347) of this Congress accompanying S. 2230. The relevant language of (S. Rept. 99-347) concerns title VI of S. 2230.

I want to place attention on pages 16 and 17 of the Senate committee report of the 99th Congress. This report language amounts to an expression of committee intent that Senator MATHIAS and I drafted for the report. The late Senator Jacob Javits highlighted the Committee on Governmental Affairs special responsibility to provide oversight of the relationship of the Paperwork Reduction Act to civil rights acts during the Senate floor consideration of the Paperwork Act in 1980. Both Senator MATHIAS and I believe Senator Javits admonition should be a constant reminder.

In both the 98th and this Congress I filed an additional statement regarding amendments in which I played a specific role. My purpose was to add to the legislative history behind the amendments. I want to submit for the record a copy of my statement made earlier this year.

The only correction needed concerns the section entitled "Senate Confirmation of the Administrator of the Office of Information and Regulatory Affairs." Language clearly requiring a separate appropriation account was agreed to after the Senate Governmental Affairs Committee reported title VI of S. 2230. The language requiring reporting by function of how resources were used by OIRA referred to in the statement was dropped. I already commented on why the specific provision of a separate account will

provide better accountability to Congress.

An additional comment I offer regarding the language limiting funding to activities "specifically authorized or required by the chapter" is that the issue of whether the information collection budget, a process first established by President Carter by way of executive order, met this standing was discussed by representatives of both the House and Senate authorizing committees. There was agreement that OIRA's present role in the ICB process did meet the standard and would be funded by funds in the separate appropriation account.

Mr. President, let me also include for the RECORD a summary of the act and three newspaper editorials. One is from the Jacksonville Times-Union of August 10, 1982. A second is from the Wall Street Journal of June 3, 1986. The third is from the Washington Post of August 27, 1986.

I ask unanimous consent that those materials be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

SUMMARY OF PAPERWORK REDUCTION REAUTHORIZATION ACT OF 1986

Establishes new goals for reducing the paperwork burden upon the public—5 percent for each of the next three years for a total goal of 15 percent by the end of three years.

Requires future Administrators of the Office of Information and Regulartory Affairs (OIRA) be appointed by the President with the advice and consent of the Senate.

Eliminates confusion over what paperwork requirements are covered by the public protection section of the act. Clarifies that all information demands upon the public, including all reporting and recordkeeping requirements contained in new or existing regulations are covered by the public protection section.

Facilitates additional public participation in the paperwork review process by specifying agencies must include who will be affected, how often they will be affected, and what the estimate of burden is in their Federal Register notices of proposed information collection requests.

Requires all written communications between the agencies and OIRA and between the public and OIRA shall be made publicly available.

Authorizes funds for OIRA for three years—5.5 million dollars for each of the fiscal years 1987, 1988, and 1989.

Establishes a separate appropriation account to fund activities of OIRA related to the functions contained in the Paperwork Act in order to enhance accountability to the Congress.

Clarifies the relationship of the act's authorities to the review of rules for information policy purposes.

Establishes a Federal information locator system within OIRA which shall serve as a comprehensive register of all information requests. The system shall be designed to help agencies and the public in locating Government information.

Requires the Director of OMB to appoint a chief statistician to develop and oversee statistical policies and programs.

Combines the existing Federal telecommunications fund and automatic data processing fund in order to improve the acquisition by agencies of new information technology.

Extends authorization for the General Service Administration board of contract appeals for three years.

Redefines automatic data processing equipment as that term is used in P.L. 89-306, the Brooks Act, in order to recognize the merging of ADP, telecommunications, and other technical resources used in the management of information by Federal agencies.

Clarifies the roles and authorities of the Director of OMB, the Administrator of GSA, and the GSA board of contract appeals as those authorities and roles relate to each other under the Brooks Act and Competition and Contracting Act.

[From Senate Report 99-347]

ADDITIONAL VIEWS OF SENATOR LAWTON CHILES

Title VI of S. 2230 contains language which reauthorizes funds for the Office of Information and Regulatory Affairs and which provides needed amendments to the Paperwork Reduction Act of 1980. The provisions of title VI as amended by the Committee are similar to the provisions of S. 2433, a bill in the 98th Congress which Senator Danforth and I sponsored and which this Committee passed on a unanimous vote of 16 to 0. (Senate Report 98-576.)

At the time of the Committee's action in the 98th Congress I provided additional views on amendments undertaken, supported, and passed by the Committee in which I had a specific role. I want to update and repeat those remarks for the purposes of the 99th Congress.

As I mentioned in my views in 1984, the reauthorization process by the Senate Committee on Governmental Affairs concentrated more upon what problems existed in the act's implementation since 1981 than upon what accomplishments were obtained. This is a proper focus for congressional oversight and congressional oversight is an essential part of the reauthorization process.

However, a perspective should be placed on the achievements. By the end of 1985 some 630 million hours of paperwork requests were eliminated. Time spent fulfilling paperwork requests is used as a proxy measure for cost. At $20 an hour, this amounts to a savings of some $12.6 billion. This savings in and of itself demonstrates the act has made a difference in how the Government works.

But as the experience of the past five years reveal and as the hearings by both the House and Senate document, there is much progress yet to be made if the management and accountability structure created by the 1980 act are to lead to the achievements envisioned by the framers of the Paperwork Act. As I have stated frequently, the ultimate test in my own mind will be when I can travel through Florida and get a sense from the people they feel Government's paperwork demands are not out of control. This still has not happened to me.

The biggest disappointments of the past five years concern efforts by the executive branch to frustrate both the opportunities for meaningful public participation and the mechanisms for accountability to the Congress and the public the law establishes.

What I sense now to a greater degree than two years ago is the extent to which these efforts have worked to erode the feeling of trust between the executive and legislative branches of Government. It is critical that this erosion be stopped and reversed. Several of the amendments contained in title VI are designed to enhance public participation and accountability to Congress. I believe these amendments will go a long way to fulfilling the need.

THE OFFICE OF LEGAL COUNSEL OPINION

The Committee amended the definition of "information collection request" to include the term "collection of information requirement," term used in section 3504(H) in the act. This amendment clarifies what the term "collection of information requirement" was intended to mean when the act was passed in 1980. A specific intent of this amendment is to establish that the legal opinion issued by the Justice Department in June of 1982 provides an invalid interpretation of the law.

I have previously characterized this opinion as a flagrant example by unelected officials in the bowels of the Federal office building to rewrite and change a law passed by Congress and signed by the President. (Congressional Record, July 1, 1982.) It is an opinion which serves to distort and change the congressional intent expressed in the Paperwork Reduction Act. Moreover, the opinion causes more problems than it purports to solve.

According to the opinion, its conclusion is based on, among other things, a thorough analysis "* * * of the language and history of section 3504(H), the language and history of the act's other provisions, and the statute's general scheme * * *". The clarifying amendment to the definition of information collection request makes clear that not only did the opinion reach a false conclusion, it also was based on a selective and false analysis of language and legislative history. Despite its 56 pages, and 101 footnotes, the analysis of the opinion is so flawed, it should not be relied upon for any future efforts to interpret the statute.

The opinion misconstrues the general scheme of the statute. The law was intended to be comprehensive in its coverage of federally sponsored "collections of information." Exemptions to this coverage, either by agency or by class of information were specifically set out in the definitions of section 3502 or the savings provisions of section 3518. The notion the law was dedicated primarily to "forms, questionnaires, and surveys" and not to other instruments such as reporting, recordkeeping, and disclosure requirements which are means to carry out federally "sponsored collections of information" is a fundamental misreading of what the law states, what the Congress of 1980 intended, and what this Committee affirms in the amendments of 1986 contained in title VI of S. 2230.

The opinion does not reflect a thorough analysis of either the language or the legislative history of the act's provisions. It is a limited and selective analysis. The scholarship reflected by the analysis is deficient. The following aspects of the legislative history which were not included in the OLC opinion should be considered in any future interpretations of the act.

1. The Congress used the reports and work of the Federal Paperwork Commission in drafting the law. The Commission's reports on the "history of paperwork reforms" and on the "reports clearance process" specifically instructed the Congress on the legal and policy issues associated with the responsibilities contained in the Federal Reports

Act and the Administrative Procedure Act. (The OLC opinion did not acknowledge any relationship between the Commission's work and the drafting of the act.)

2. The Paperwork Reduction Act of 1980 amended the Federal Reports Act of 1942. The Administrative Procedure Act was passed in 1946. These two laws had co-existed for some 30 years. What the history was and, most importantly, what the prevailing practice of the executive branch, the General Accounting Office, and independent regulatory commissions were in regards to the laws were known to the Congres when the Paperwork Act was deliberated upon. Much of the language of the 1942 law was deliberately incorporated in the Paperwork Reduction Act in order to preserve the traditional understandings of the authority contained in the 1942 law. (The OLC opinion made no reference to the prevailing practice or understanding of the agencies, the Comptroller General, or the Director of OMB.)

3. In 1973 the Congress amended the Federal Reports Act and required the General Accounting Office to be responsible for clearing the information requests of independent regulatory commissions. The amendment was motivated by a concern over the integrity of the rulemaking process. (How the 96th Congress studied the issues raised and responded to the concern of Congress reflected by the 1973 amendment was ignored by the OLC opinion.)

4. The language of section 3504(h) was part of an amendment proposed by Senator Kennedy and accepted and introduced by myself during full Senate consideration of the act. Senator Kennedy's amendment included amendments to other sections of the act, including section 3507 wherein substantive language was added requiring all decisions of the Director of OMB to be made publicly available. (The OLC opinion construed Senator Kennedy's amendment and explanatory comments to relate only to the language of 3504(H). This is inaccurate.)

5. The most definitive statement on the relationship of section 3504(H) and information collection requirements to the procedural requirements of other sections of the act upon information collection requests was made by Senator Kennedy on December 15, 1980. (Congressional Record, December 15, 1980, S 16700.) The OLC opinion does not acknowledge this explanation.)

Federal agencies will continue to try to find ways, including unfounded interpretations of what Congress intended, to limit the scope of the Paperwork Act's requirements and assurances the law is intended to provide the public. The Committee's amendment to the definition of information collection request exposes the attempt which culminated in the OLC opinion of June 1982.

SENATE CONFIRMATION OF THE ADMINISTRATOR OF THE OFFICE OF INFORMATION AND REGULATORY AFFAIRS (OIRA)

The Committee amendment to require advise and consent of the Senate in the selection of the Administrator of OIRA is designed to strengthen accountability to Congress.

During development of the 1980 Paperwork Act the Senate agreed to President Carter's request to drop the idea of Senate confirmation of the head of OIRA in exchange for his support of a separate authorization and appropriation account for the office's activities. This administration chose not to abide by what I regard. the language of the act to mandate. A separate appropriation account consistent with the separate authorization has not as yet been created. In addition, the issue of how resources have been used and what resources are needed to accomplish the ambitious strategy Congress incorporated in the 1980 act has been a point of continuing contention between the administration and OIRA's oversight committees in the House and Senate.

The 1986 amendments will require Presidential appointment and Senate confirmation of the head of OIRA in the future. They retain the language which I believe mandates a separate appropriation account. They also require a reporting by function of how resources are to be used by OIRA which will be tied to the annual budget process. Accountability to Congress will be strengthened by these steps.

IMPROVEMENTS FOR PUBLIC PARTICIPATION

The amendment to section 3507(a)(2)(B) which requires agencies to set forth a title, a brief description of the need for the information and its proposed use, a description of the likely respondents and proposed frequency of response, and an estimate of the burden, is designed to enhance public participation in commenting upon proposed agency requests for information. Since approvals for continuing requests are required every 3 years, this minimum amount of information is particularly important if the affected public is to become a meaningful part of the justification process.

Prior to and shortly after the act's passage the OMB gathered agency notices, complete with the above information, and published them in the Federal Register under OMB auspices. This practice was dropped and agencies were left to their own descretion to meet the act's requirement to give notice in the Federal Register. Testimony from small businesses, individuals, universities, and State and local governments supports the idea that standardizing the requirements for minimal information will improve both the number and quality of comments.

While the Committee amendment does not specifically require OIRA to publish agency notices, I do want to note that the House version of section 3507(a)(2)(B) in 1980 was amended by the Senate at the specific request of OMB. The request was to provide language which would enable all paperwork notices to be aggregated in one location in the Federal Register. At the time the view was that this approach made for more participation by the public in the comment process.

It is my hope that this standardization of what minimal information should be contained in the notices will lead to more thoughtful efforts by the agencies and OIRA to encourage public participation in the process of justifying agency requests.

The Committee amended section 3505 to include the task for the Director of OMB to report to the Congress in a year upon the feasibility and means of enhancing public access, including access by electronic media, to information relating to information collection requests required by the law to be made available to the public.

The administration agreed to this assignment after lengthy discussions on the need to improve public access to the decision making process surrounding agency justification and OIRA review of paperwork requirements. It is my view that with the explosion in computer and telecommunications technology, great strides can be made in improving the ease upon which persons can access the information relating to decisions on paperwork requirements which are publicly available. ORIA can seize this opportunity to demonstrate how new information technology can be used to expand meaningful public participation in how Government makes decisions concerning paperwork burdens. My hope is this opportunity will not be missed.

FEDERAL GRANT PROGRAMS—A MISSING INVENTORY OF PAPERWORK REQUIREMENTS

The Committee also amended section 3505 to require the Director of OMB identify further initiatives to reduce the burden of Federal collections of information associated with the administration of Federal grant programs.

The intent of this amendment is to continue specific statutory attention to paperwork demands associated with grant programs that was highlighted by section 3505(1)(E) of the 1980 act, which has expired.

My view is that there remains a large number of federally sponsored reporting and recordkeeping requirements associated with the management and audit of grants which has not been identified and subjected to the discipline of the Paperwork Reduction Act. A major area of requirements which has not been inventoried concerns reporting and recordkeeping demands that result from OMB's own circulars. Historically, OMB has taken the position that its circulars constitute policy guidance to the agencies and it is agency implementation of OMB's guidance which is subject to the clearance requirements of the act. Agencies have found this view easy to ignore. For many reporting and recordkeeping requirements which are established by the circulars, this position is inconsistent with the requirements of the act and inconsistent with the specific regulation the Director of OMB has promulgated to implement the act. (See 5 CFR Part 1320. 15(B).)

A result has been to confuse recipients of grant programs who seek the assurances of the public protection section of the act, and to permit agencies to find loopholes in the act's coverage.

Enclosed is recent correspondence between Director Miller and myself which concerns this very point in regards to OMB circular A-21. That circular regulates the documentation required of institutions of higher education who receive funds for federally sponsored research.

Circular A-21 has been controversial for some ten years and I have always believed the reporting and recordkeeping demands which flow from it should be subject to the discipline and requirements of the paperwork clearance process. I read Mr. Miller's response to be a commitment to see to it that the Paperwork Act requirements will be complied with in regards to the requirements which flow from A-21.

I expect OIRA to follow up on this commitment on Circular A-21. All other OMB circulars which lead to collections of information should be examined for their practical utility as well.

LAWTON CHILES.

U.S. SENATE,
Washington, DC, March 11, 1986.

Mr. JAMES MILLER,
Director, Office of Management and Budget, Old Executive Office Building, Washington, DC.

DEAR JIM: The Chancellor of the State University System of Florida has brought to my attention your office's proposal in the February 12 Federal Register to change

OMB Circular A-21. He indicates to me he has written to you as well.

As you know, the circular concerns governmentwide accounting principles for educational institutions who are engaged in federally sponsored research. The proposal announces that agencies will limit federal reimbursement for allocated administrative overhead to 26 percent by April 1, 1986; to 20 percent by April 1, 1987. The estimated savings are 100 million in fiscal year 1987, and over 200 million in fiscal year 1988.

Chancellor Reed's essential concern is the manner in which this policy change is being brought about. I am confident you agree the conduct of the federal government's overall relationship to institutions of higher education is an important aspect of our country's infrastructure for the conduct of basic research. Our foundation for basic research is an important factor in those things which contribute to our national security, a growth economy, and a national ability to compete in international markets.

While I understand one justification for this proposal in the need to respond to Congressional concerns, and another is the estimated budget savings. I do share the Chancellor's concern about the manner in which the federal government is pursuing this regulatory role and what it means for the future relationship between the government and the college and university community.

I am reminded this is not the first time the issue of changes to A-21 have arisen. I find myself asking questions similar to those I asked previous Directors of OMB almost a decade ago and repeatedly since. Recall that in your previous position as head of OIRA I had occasion to ask you just these sort of questions.

What is the relationship of the proposed change to A-21 to the need for OMB to comply with the Paperwork Reduction Act and its implementing regulations?

What is the relationship of the proposed change to Executive Order 12291 on Federal regulation? As a major architect of that Executive Order you bring a unique expertise to that question.

A primary purpose behind both the Act and the Executive Order is to ensure the federal government examine its alternatives when undertaking a federal role. Despite previous assurances, I remain unconvinced that the requirements of the Paperwork Reduction Act have been complied with in implementing A-21. I find no burden estimates with either direct or indirect costs associated with reporting or recordkeeping burdens which flow from the circular. Given the public protection section of the law, the proposed change once again raises the serious consequences which result from any failure on the part of agencies to comply.

I also believe the proposed change is subject to the Executive Order on Federal regulation. The 100 and 200 million dollar saving estimates suggest the "major rule" criteria for a regulatory analysis and exploration of alternatives has been triggered. I find little indication that the purpose and spirit, much less the letter of the Executive Order, has been met.

I am enclosing a copy of a letter sent to Chris DeMuth back in 1982 concerning these same questions. His response is also enclosed. As I commented then, I am confident the present A-21 discussion will not be the last time the question of whether a federally imposed burden is appropriate will occur. Establishing and maintaining a cost-effectiveness discipline is an important precedent to set and keep.

I request you do not implement the A-21 proposal until you are satisfied that executive branch agencies are in compliance with the Paperwork Reduction Act and the Executive Order in regard to this circular. I would appreciate your providing me such an assurance. If we are going to have an effective partnership with the university and college community, I think we should assure ourselves the federal government is conducting itself in a manner that makes sense and is consistent with its own rules.

Let me add that the university community does need to strive to reduce administrative costs associated with federally sponsored research. The institutions in my state do understand this point.

Let me suggest that an examination of alternative ways to achieve cost reductions in this area should include the demonstration several agencies and the Florida State system have underway presently. The National Academy of Science's Government-University-industry Research Roundtable is monitoring this effort. The work builds on an experiment first conducted by the National Science Foundation in my state and which was endorsed by the Grace Commission as a means to reduce administrative costs.

Senator Danforth and I have had an interest in this work for the past three years and I am very encouraged by the results so far. It is this Florida experience that I invited you to look at during your confirmation proceedings. The idea of applying the Florida experience nationally could make a significant contribution to research productivity. I believe administrative cost savings which would equal those assumed in the proposed A-21 change would not be an unreasonable expectation. I view this initiative as a target of opportunity for regulatory relief as well and would welcome working with you to explore the usefulness of this particular alternative.

I look forward to your response.

With warm regards,

Sincerely yours,

LAWTON CHILES.

MARCH 15, 1982.

CHRISTOPHER DEMUTH,
Administrator, Office of Information and Regulatory Affairs, Old Executive Office Building, Washington, DC.

DEAR CHRIS: Enclosed is a letter I received from Gus Turnbull of Florida State University.

I would appreciate your response to the two questions posed by Mr. Turnbull.

I am sure you have heard a great deal about the growing federal role in University activities. Both the broad issue of federal-University relationships and the specific issue of Circular A-21 were highlighted in Senate paperwork hearings before and after passage of the Paperwork Reduction Act in 1980. Interestingly, modifications to A-21 were a subject matter of the Subcommittee on Federal Spending Practices first paperwork hearing in June of 1978 and of its successor committee's last paperwork hearing in March of 1981. The A-21 effort reporting issue was specifically referred to your office for review as one of the burdensome demands listed to the Subcommittee on Federal Expenditures by the University community.

It is my firm opinion the reporting and recordkeeping burdens of the Circular are subject to the requirements of the Paperwork Reduction Act. Now that the Public Protection section is in effect, this point is critical. Presently, Circular A-21 does not display a control number.

It has also been my belief that consistent with both Presidents' Carter and Reagan Executive Orders on regulations, A-21 should be subjected to a regulatory analysis. To date the government does not have an estimate of what the compliance costs are for meeting the requirements of A-21, much less an assessment of what the relative costs of alternatives would be. To my knowledge, a regulatory analysis of A-21 has never been conducted.

Whether the Office of Management and Budget considers OMB circulars resulting in substantial economic consequences as regulations subject to the President's Executive Order on Regulations and whether OMB considers circulars which create collections of information subject to the requirements of the Paperwork Reduction Act are important policy questions. Regarding the University research community, I am confident the present A-21 discussion will not be the last time the question of whether a federally imposed burden is appropriate will occur. I believe that establishing a cost-effectiveness discipline is an important precedent to set. Certainly, that was a purpose of the Paperwork Reduction Act for reporting and recordkeeping requirements.

I would also appreciate the Administration's view on the relationship of OMB Circulars to Executive Order 12291 and the Paperwork Reduction Act.

With kind regards, I am

Most sincerely,

LAWTON CHILES.

Enclosure.

THE FLORIDA STATE UNIVERSITY,
Tallahassee, FL, February 24, 1982.

Senator LAWTON M. CHILES,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR CHILES: Knowing of your continuing interest in governmental efficiency, especially as related to governmental paper work, I would like to raise a question on the current status of OMB Circular A-21 as it relates to the Paperwork Reduction Act of 1980. The *Federal Register* of January 7, 1982, contains a long-awaited and apparently useful revision of A-21. Universities and related research associations have long objected to the unreasonable requirements of A-21 and consequent demands of federal auditors acting under its structures. These resulted in a major paper work burden substantially counterproductive of accomplishing the missions of the universities and the objectives of the U.S. Government.

Accordingly, first reactions to the revised A-21 seem favorable. My university and others are preparing a detailed response which will probably praise the improvements while suggesting some additional refinements.

I would like to raise for your consideration, however, another point. Why has the revision of A-21 not been subjected to the provisions of P.L. 96-511, the Paperwork Reduction Act of 1980? The reporting requirements seem to fall under section 3502(4) and thus should bring A-21 under the explicit review provisions of the act.

If the requirements of Circular A-21 are not so reviewed and the A-21 procedures posesses neither the "control number" nor "state that the request is not subject to P.L. 3512," would a university be within its legal right to decline to maintain or provide the requested information as provided under section 3512 of the law?

It would be helpful to the Florida University to have an authoritative interpretation of these points.

Sincerely,

AUGUSTUS B. TURNBULL III,
Vice President for Academic Affairs.

OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, April 14, 1982.

Hon. LAWTON CHILES,
U.S. Senate, Washington, DC.

DEAR SENATOR CHILES: This is in response to your letter of March 15, 1982 which asked that we respond to two questions raised in a February 24 letter from Gus Turnbull of Florida State University and asked about the relationship of OMB Circulars to Executive Order 12291 and the Paperwork Reduction Act (P.L. 96-511).

In his letter, Mr. Turnbull is specifically concerned about the applicability of the Paperwork Reduction Act to reporting and recordkeeping requirements contained in a recently proposed revision to OMB Circular No. A-21, "Cost Principles for Educational Institutions." The letter goes on to ask whether a university would be within its legal right to decline to maintain or provide information requested by the Circular, as provided under the public protection clause of the Paperwork Reduction Act of 1980 (44 USC 3512), since the A-21 procedures neither display a control number nor state that the request is not subject to the Act.

Circular No. A-21 establishes basic principles and requires agencies to implement those principles by establishing appropriate rules and procedures. In establishing such requirements the agencies have considerable latitude. The Circular does not explicitly require answers to identical questions by 10 or more members of the public. However, to the extent that the agencies' implementing regulations require reporting or recordkeeping subject to the Paperwork Reduction Act, they are required to be cleared. Accordingly, on August 21, 1980, we issued an instruction to each agency informing them that before they incorporate the principles of A-21 into their regulations, they had to have the information collection component reviewed and approved by OMB.

While the A-21 procedures do not display an OMB control number, agency implementing regulations which establish reporting or recordkeeping requirements should. In cases where they do not, it appears that the public protection clause of the Paperwork Reduction Act would apply.

Regarding your more general question about the relationship of OMB Circulars to P.L. 96-511 and E.O. 12291, Circulars are subject to the requirements of both. Each OMB Circular that calls for the collection of information involving answers to identical questions by 10 or more members of the public should and does undergo a Paperwork Reduction Act review. Furthermore, each OMB Circular (e.g., A-102 "Uniform Requirements for Grants to State and Local Governments") that requires agencies to obtain answers to identical questions has an OMB control number printed in the Circular where the requirement is set forth.

Under internal OMB procedures, proposed OMB Circulars are also reviewed for compliance with E.O. 12291 by my office. Any Circular designed to implement, interpret or prescribe law or policy or describe the procedure or practice requirements of an agency is subject to such a review (e.g., A-40 "Management of Federal reporting requirements"). Excluded from those requirements, however, are directives that outline procedures to be followed by the President's budget and legislative programs, or for matters affecting only the internal functions, management or personnel of Federal agencies (e.g., A-19, "Legislative coordination and clearance"). In a recent review of existing OMB Circulars, it was determined that twenty-three were covered by the Executive Order.

I am pleased we could be of assistance on this matter. I look forward to a continued close working relationship as we move toward effective management of Federal information resources.

Sincerely,

CHRISTOPHER DEMUTH,
Administrator for Information and Regulatory Affairs.

OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, June 4, 1986.

Hon. LAWTON CHILES,
U.S. Senate, Washington, DC.

DEAR LAWTON: Thank you for your letter concerning the proposed revision of OMB Circular No. A-21, "Cost Principles for Educational Institutions."

As you may know, Federal payments for university allocated overhead rose from 24 percent of total Federal support for research in 1974 to 31 percent in 1984. I believe this disproportionate growth of Federal payments for university allocated overhead is damaging to our efforts to encourage important scientific research.

Congress itself recognizes the problem of rising overhead payments, and has expressed its concern on a number of occasions. In 1981, the Senate Committee on Appropriations, in reporting the FY 1982 Labor-HHS Appropriations bill, expressed concern over the rising level of Federal overhead payment rates, and predicted that should these rates continue to increase, "the amount of money appropriated by the Congress will finance less and less actual research." In 1983, the House expressed its concern about "the rate at which these (overhead) costs are escalating" and that it was "not convinced that the present system for calculating these costs is equitable. . . ." Both this report and the companion Senate report urged the Administration, in consultation with scientists and administrators, to formulate a governmentwide policy to address the issue of rising overhead payments. Last year, conferees for the 1986 Labor-HHS Appropriations bill directed the Administration to take steps to contain both research costs and overhead costs.

Coupled with this longstanding concern of both the executive branch and the Congress, a number of other groups have addressed the issue of rising payments for overhead. Reforms have been proposed in studies prepared by the General Accounting Office, the National Academy of Sciences, the President's Private Sector Survey on Cost Control, the White House Office of Science and Technology Policy, the Department of Health and Human Services, and the White House Science Council. Several of these reports, as well as audits performed by Federal staff of university allocated overhead claims, documented cases where the Federal government was clearly paying more than its fair share of universities' overhead.

In developing proposed changes to OMB Circular No. A-21, we determined that a 26 percent limit represented the average rate for Federal payments to universities for their four allocated administrative overhead pools, with one-half of the major universities exceeding the 26 percent rate. We believe implementation of this rate, followed by a subsequent adjustment to 20 percent, will strengthen efforts to maintain a stable and sustainable program of Federal support for research and development at universities. Especially in light of current budget constraints underscored by the congressionally initiated Gramm-Rudman-Hollings legislation, continuation of the current trend of more for university overhead and less for research is unacceptable. Thus, our primary interest in restoring an appropriate balance between research and overhead is to protect the Nation's research efforts during a period of budgetary restraint.

We welcome alternative approaches to restore an appropriate balance between research and overhead. As noted above, the issue of rising university overhead payments is not new, and we recognize that other alternatives may exist. In seeking the broadest public comment possible, we have sought to ensure that such alternatives would be brought to our attention.

Let me now turn to your concerns regarding the applicability of the Paperwork Reduction Act and Executive Order No. 12291 to proposed changes to OMB Circular No. A-21. The procedural issues you raise are important ones and relate to the ultimate implementation of any changes.

As you know, we have traditionally taken the position that data collection related to OMB Circular No. A-21 occurs only through implementation by agencies. Our position has been that this results from promulgation of instructions, regulations and other implementing guidance by the agencies and that agencies must individually receive Paperwork Reduction Act approval for such collections of information even though they are driven by A-21. In light of the concerns you have raised, we are currently reassessing this interpretation and reviewing all data collection issues related to A-21 and the proposed changes. We hope to conclude this review before any final action on changing A-21 is taken. Regardless of the outcome of the proposed changes to A-21, we intend seriously to deal with these procedural questions relating to the Paperwork Reduction Act as quickly as possible.

You have asked about the relationship between Executive Order No. 12291 and the proposed revisions to A-21. Prior to any final implementation of the proposed or other changes to OMB Circular No. A-21, I assure you that we will conduct a thorough review of the changes, taking into account the President's regulatory principles as contained in Executive Order No. 12291.

The Administration is committed to the importance of discussing OMB Circular No. A-21 revision with the widest possible audience. As you are aware, we have delayed the proposed implementation date of the A-21 revisions in order to fully consult with the university community on how to most effectively curb university allocated overhead. Any final decisions in this area, I assure you, will reflect full consideration of the opinions of the affected public.

Sincerely yours,

JAMES C. MILLER III,
Director.

[From the Jacksonville (FL) Times Union, Aug. 10, 1982]

PAPERWORK REDUCTION ACT RENDERED USELESS BY RULING

Democracy in action: The public protests excessive federally mandated paperwork: Congress finally responds by the Paperwork Reduction Act of 1981. The president signs the bill into law.

So what happens?

Immediately the worst offenders get to work trying to circumvent the law.

That describes, in a nutshell, what's happening in Washington today.

The Internal Revenue Service is by far the worst offender in demanding excessive paperwork. But the IRS has somehow persuaded the Justice Department into giving a ruling that the Paperwork Reduction Act does not, in effect, apply to any regulations adopted before Dec. 31, 1981, the effective date of the act.

This effectively ties the hands of the Office of Management and Budget, the agency charged with enforcing the paperwork reduction law.

OMB officials responded with such reactions as "preposterous" and "bizarre" and "incredible."

Sen. Lawton Chiles, D-Fla., author of the paperwork reduction law, blasted the Justice Department.

"[This] decision serves to distort . . . the congressional intent. . . ."

Chiles has asked the comptroller general to issue a formal legal opinion, which he can take to court, in answer to the Justice Department ruling.

There is a double irony involved.

This IRS determination to defeat the intent of Congress, to block any overview of its continued proliferation of paperwork, is important in itself because the IRS generates about 50 percent of all federal paperwork.

But it also serves as a precedent to inspire any and every other federal agency to seize the ruling the Justice Department gave to the IRS and use it to frustrate the Paperwork Reduction Act in other federal agencies as well.

[From the Wall Street Journal, June 3, 1986]

RED TAPE REVIVERS

With only $5 million to spend and 70 employees, the Office of Information and Regulatory Affairs in the Office of Management and Budget is a mite-sized federal agency. But some congresspersons are accusing it of "intimidating" the entire federal regulatory empire, a colossus with 114,500 rule makers and rule-maker helpers, $9 billion to spend and powerful supporting lobbies. Is the tiny little OIRA really that tough?

Not really, but that's mostly beside the point. OIRA's troubles have to do with a much bigger issue, whether Congress or the president will manage the day-to-day business of the U.S. government. The fight here is over how much red tape Washington will be allowed to inflict on American citizens. It's important to President Reagan because he needs to prevent slippage from his early successes in reducing the regulatory burden. Deregulation, readers will remember, was one of the four pillars of Mr. Reagan's successful economic program, along with tax cuts, spending control and sound money.

To understand OIRA's role, think of it as a pesky machine-gun nest defending the prerogatives of the White House. Week before last, a bipartisan congressional assault team, led by Reps. Dingell, Brooks, and Whitten and Sens. Durenberger and Levin, targeted OIRA. It was accused, as the Washington Post phrased it, of "sitting on regulations, weakening them, intimidating bureaucrats not to impose them, undermining their implementation, holding private meetings with industry and operating in secret." The congresspersons wanted to withhold OIRA's funding.

A point at issue is whether OIRA, created by legislation, can legitimately carry out broader assignments for the president. OIRA was set up by the Paperwork Reduction Act of 1980 primarily to review all information requested by federal agencies from the American public to see if the information was really needed, was duplicative of some other agency's work and could be collected efficiently. Passage was helped along when one witness taped together the federal forms needed to start a small business and stretched them across a congressional hearing room. Nobody doubted that federal paper-work demands had gone round the bend.

Ronald Reagan, less than a month after becoming President, launched a far broader assault. His Executive Order 12291 demanded that all federal agencies weigh regulatory moves in terms of whether sufficient need had been demonstrated, benefits outweighed costs and some less costly and intrusive method might be found to achieve the same result. OIRA was assigned to review agency actions to test their compliance with EO 12291. Among the early achievements: The Department of Education dropped a rule barring federal funds for schools with dress codes that distinguish between girls and boys.

Just before Mr. Reagan took office, Murray Weidenbaum of Washington University's Center for the Study of American Business had estimated that compliance with federal regulation cost American business nearly $100 billion a year. Mr. Weidenbaum, who returned to the center after having served two years as Mr. Reagan's chief economic adviser, hasn't done a recent compliance cost estimate, but he still keeps track of the size of the regulatory apparatus. And after Mr. Reagan's initial pruning, it has been growing again. Estimated employment in the 56 regulatory agencies this fiscal year is 114,566, up 2,622 jobs from fiscal 1985. Budgeting, in real terms, last year returned to the 1980 level and this year will exceed it.

One of the fastest-growing regulatory enterprises is the Environmental Protection Agency. Environmental laws have yielded public benefits but they also now are widely used to obstruct development. Most of the complaints about OIRA come from the so-called "environmental lobby."

The administration tells congressional complainers that even if they wipe out OIRA, the White House will continue to screen out regulatory nonsense. So even if the machine-gun nest goes, the war won't end. But it would be a shame if a doughty little agency that has done so much for rule-plagued Americans were wiped out.

[From the Washington Post, Aug. 27, 1986]

WHO REGULATES THE REGULATORS?

In the 1960s and 1970s, Congress passed an ambitious series of acts to regulate the cleanliness and safety of the air, water, work place, highways, pesticides, waste disposal sites, consumer products and much more. Because the issues involved were often technical, and because it could not always agree, Congress tended in these acts to enunciate broad regulatory standards, leaving to executive agencies the job not just of enforcing them but of refining what they meant. The regulation-writing that has ensued has blurred the textbook distinction between the legislative and executive branches, creating a new realm of government not wholly either. There is now an enormous fight over the extent to which the President controls this.

Beginning with Richard Nixon, four successive Presidents have tried to exercise greater control. In part these have been the usual efforts of Presidents to master and direct the sprawl of agencies beneath them. But there has also been a sense that the benefits of regulation need to be better balanced against the costs. That was the view of some even in the Carter administration. In the Reagan administration, where regulation is almost always referred to as a burden, the view is that benefits often fail to equal costs.

In two executive orders, one at the start of his first term, one at the start of his second, the President has centralized and seized control of the regulatory process as never before. His instrument has been OIRA, the Office of Information and Regulatory Affairs in the Office of Management and Budget. It is no longer possible for a line agency, without the approval of OIRA, even to gather information about whether a problem exists that might in the future require regulation. No regulation can be proposed, much less promulgated in binding form, unless this little-known agency agrees; every regulation must pass what OIRA regards as a properly constructed cost-benefit test.

In many areas and ways, the administration is now regulating less, or trying to. OIRA has become the target for those both in and out of Congress who are fighting this. They say the OIRA operation is unconstitutional; that no such regulatory switchyard has been authorized; that OMB has improperly displaced line agencies with greater commitment to, and expertise in, the regulatory areas involved; and that in reversing those agencies, as it often does, it fronts for industry. They complain that it operates furtively, has clandestine contacts with industry representatives, imposes ideology on scientific judgments, rigs the cost-benefit calculus and unfairly uses delay as an ultimate weapon. The House has voted to cut off OIRA's funds.

The White House has responded that it will continue to control the issuance of regulations in some other way if funds are cut off; that the President has both right and duty to guide the regulatory decisions of his appointees as he does all other important aspects of his administration; that regulations do have costs and that if Congress doesn't want these costs weighed, it should come out and say so, which it generally has not done. The President's people say the constitutional and other procedural arguments made against OIRA are mainly an expression of unhappiness with the last election returns.

There is some merit on both sides of this argument. Congress, often for lack of majorities to strengthen them, has left most of the regulatory statutes open to interpretation. The President is accountable; he should take and have control, and there is no way to deny it to him in any case. But OIRA has, on a number of well-documented occasions, gone too far. Secret dealings and delay are the ugly problems. If there is an

open and timely decision and it is wrong, it can be attacked in court. Various senators, rather than go through the confrontational exercise of cutting off OIRA's funds, are trying to force the agency into the sunshine (it has now adopted some sunshine rules) and subject it to the clock. Those are homely steps, but they are the right kind of solution to this problem.

CHILD NUTRITION COLLOQUY

Mr. BOSCHWITZ. It is my understanding that H.R. 7, the School Lunch and Child Nutrition Act Amendments of 1986, may be passed by Congress as part of two different pieces of legislation.

I am concerned that the Department of Defense authorization bill and the continuing resolution for fiscal year 1987 have different effective dates for the child nutrition provisions. Which dates are controlling?

Mrs. HAWKINS. As the sponsor of both amendments, and as a member of the Senate Agriculture Committee I believe that our intent was to provide the Nation's schoolchildren with benefits as soon as possible. Therefore, I believe that the intent of Congress is to take the earliest effective date. If both bills are signed into law, it is the intent of the Agriculture Committee that the earliest effective date prevails.

THE NORTHERN VIRGINIA COMMUNITY FOUNDATION FOUNDER'S AWARD

Mr. WARNER. Mr. President, I rise to recognize the presentation of the Northern Virginia Community Foundation 1986 Founder's Award to Mr. James T. Lewis of McLean, VA.

The award will be presented to Mr. Lewis at a dinner gala at the Sheraton Tysons Corner Hotel in Tysons Corner, VA, on October 25, 1986.

Each year, the Northern Virginia Community Foundation presents the Founder's Award, its most prestigious award, to a northern Virginian in recognition of outstanding community service and dedication to the improvement of northern Virginia.

The foundation salutes individual achievement to promote awareness of the importance of an individual contribution to the community as a whole.

The Northern Virginia Community Foundation has been in existence since 1978, when it was started by a group of northern Virginia residents who wanted to build and improve on the quality of life in the region. The foundation receives gifts from individuals as well as national corporations and foundations and channels them into the community in the areas of the arts, education, youth, health, and civic improvement, exclusively in the area of northern Virginia.

The recipient of this year's Founder's Award, James T. Lewis, has made significant contributions to the northern Virginia area, both through his professional activities and his community involvements.

He is president and chairman of the board of James T. Lewis Enterprises, Ltd. The partners of James T. Lewis Enterprises and its affiliated companies have initiated and constructed more than 2.5 million square feet of new commercial office space in the last decade.

James Lewis serves as vice president and board member of the Tysons Transportation Association, which is dedicated to the improvement of Tysons Corner transportation; as a director of the Fairfax County Council of the Arts; as president of the McLean Citizens Foundation; chairman of the Community Development Bureau of the Greater Washington Board of Trade; and member of the Fairfax County Chamber of Commerce.

In addition, Mr. Lewis has contributed to the northern Virginia community through his involvement in the International Children's Festival and Gala, the RACE Against MS and the American Heart Association's cardiac arrest.

James T. Lewis indeed has been a driving force in the improvement of the northern Virginia community, both through his business leadership and his civic contributions. Please join me and the Northern Virginia Community Foundation in saluting the deserving recipient of the 1986 Founder's Award, Mr. James T. Lewis.

TRIBUTE TO SENATOR BARRY GOLDWATER

Mr. LAUTENBERG. Mr. President, I rise in tribute to Senator BARRY GOLDWATER, who will retire from the Senate at the end of this session of Congress.

Senator GOLDWATER has served this body, the State of Arizona, and his country with distinction and dedication for 56 years—as a soldier, a Senator, and a statesman. He defended his country in military combat. He has represented the State of Arizona ably in the Senate for 30 years. And, as past chairman of the Senate Intelligence Committee, and current chairman of the Senate Armed Services Committee, he has worked hard to keep our Armed Forces strong and effective. His expertise in national defense matters is undisputed, as is his integrity and dedication to his country.

His views may not have paralleled my own on many issues. But I never doubted for a moment that he arrived at them after careful deliberation, and with the good of his country foremost in his mind.

It is with regret that I bid farewell to a great leader and a great American, Senator BARRY GOLDWATER.

PRODUCT LIABILITY LAWS STIFLE INNOVATION

Mr. PRESSLER. Mr. President, as a cosponsor of the Product Liability Reform Act and a long time advocate of product liability and other tort reform, I have often argued that our current tort laws stifle innovation. As a result they often have an adverse effect on safety innovations as well. A recent article from the October 6 edition of the Journal of Commerce, entitled "Product Liability Law Stifling Creativity?" illustrates the point very well. I ask unanimous consent that the article appear in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PRODUCT LIABILITY LAW STIFLING CREATIVITY?

(By Leah R. Young)

WASHINGTON.—A Japanese academy of engineering would not have five lawyers on a meeting program, an attorney-engineer told the U.S. Academy of Engineering.

Instead, Peter W. Huber said, a Japanese program would have sessions that would be on ceramics, genetic and other engineering topics.

Mr. Huber used the comment to explain to the U.S. academy last week why he believes that product liability law and safety regulations by federal agencies is stifling creativity by U.S. engineers.

"The legal system is pounding a message—don't innovate," Mr. Huber said. The risk is great, he added, that U.S. technology will fall "irretrievably" behind the technology of other countries because of liability problems.

Technological productivity would thrive best in an atmosphere in which the courts abandoned the rules of strict liability and returned to the negligence standard, Mr. Huber suggested.

But realistically, he said, engineers will have to settle for "more modest changes." He suggested a goal of inserting into the law the idea that complete compliance with federal standards established by competent agencies should be a total defense in product liability lawsuits.

Under the current legal regime, he pointed out, "knowledge of the law is no excuse" and meeting all federal safety criteria is not a defense in a product liability action.

He also argued that regulatory agencies must be reconstituted. Since the 1960s, he said, they have seen themselves as "gate keepers" regulating on the side of what is "acceptably safe."

Prior to this time, regulatory authorities considered only what was "an unacceptable hazard."

The consequence of the new regulatory zeal is an environment in which it is much harder to recognize the benefits of products being developed. Mr. Huber noted that 10 years ago there was a movement to curtail the techniques of genetic engineering.

There is no way, he said, to assess the benefits that the nation will forgo if research is not undertaken, he stressed.

The regulatory agencies have "an inordinate fear of what is new" while tort law weighs not the technologist and his care or competence, but the technology itself. He pointed out that juries are much less likely to condemn the familiar—such as pesticides from new recombinant DNA technology.

Why else, he asked, have familiar tobacco products escaped verdicts on defects while new pharmaceuticals are constantly challenged?

David G. Owen, professor of law at the University of South Carolina, noted that juries in product liability cases are valuing human lives at monetary levels far in excess of that assigned by the individual himself when he purchases life insurance.

The reality, Edward G. Jefferson, former Chairman of E.I. du Pont de Nemours & Co., said, is that this year Du Pont will experience product liability claims outnumbering its legal cases of all kinds seven or eight year ago.

THOMAS H. CANDON OF VERMONT

Mr. LEAHY. Mr. President, it was not that long ago that Democratic conventions in my State of Vermont could be held in telephone booths without disturbing the person making the call.

The early Democrats in our State were tolerated as eccentrics and were concentrated in the more populated areas. In those days, before the one man, one vote decision, the city of Burlington, with a population of more than 30,000 cast one vote as did the representative of Granby, population 24. The folks in Granby had two things in common. They were all Republicans and most of them shared the same surname.

It was not particularly difficult to get the Democratic nomination for legislative office. Most likely you would run unopposed. But only very close members of your family would vote for you. And you could not even count on that.

This was pretty much the situation when a very good friend of mine, Thomas H. Candon, of Rutland, ran for the Vermont House of Representatives more than 20 years ago.

Now, Tom had a couple of strikes against him. He was not born in Rutland—he was born down the road in Pittsford. And even though he had a distinguished military record—he worked for the Federal Government and was a Roman Catholic, a combination of vices that would not only deny one election in Vermont, but absolution itself in some folk's minds.

Well, Tom got elected to the legislature, and made so much sense that people got to thinking that having Democrats represent them was not the end of the world after all. Other heresies followed, and Vermonters discovered a two-party system made some real sense because it offered some alternatives to previously accepted doctrines which had gone untested for decades.

The fact that people like Tom Candon ran as Democrats—and made no bones about it—was a turning point in our State. Soon we were electing Governors—and for the first time in our history—a U.S. Senator.

Mr. Candon retired from a long and distinguished career in the Vermont General Assembly recently—and there were Republicans and Democrats at his retirement dinner. And you could not have told one from the other because they all loved and respected Tom Candon and listened to him when he talked about economic growth and jobs and homes for Vermont families.

He was minority leader, and actually became majority leader—that is how popular Democrats had become—in Vermont House.

He also provided inspiration, to me and others who later sought and won elective office on the local and State levels.

I was sorry the Senate stayed in session and I missed Tom's retirement dinner in Vermont, because so many good friends were there to thank Tom and his good wife, Margaret for more than 20 years of exemplary public service to the people of our State. My wife told me it was one of the outstanding gatherings in Vermont.

I know that all Senators can trace their desire to run for public office back to people and events that inspired them.

The standards of honest and dedicated public service set by Thomas Henry Candon remains an inspiration to those of us in public office in Vermont today.

His long record of achievement as a legislator will benefit Vermonters for years to come.

REEXAMINING THE STRATEGIC DEFENSE INITIATIVE

Mr. MATHIAS. Mr. President, President Reagan is on the right track when he asks the American people to reflect on the critical questions that are raised by the Strategic Defense Initiative. In fact, one of the great benefits of the Reagan-Gorbachev talks in Iceland could be the renewed interest of the American people in star wars and what it could mean to them both positively and negatively.

One specific question that the President asks the American people to consider is "how does a defense of the United States threaten the Soviet Union or anyone else?" It is a central question and one that must be understood with all its implications if the events in Iceland are to have any meaning. So let us respond to the President's request by working through this issue step by step.

In the first place, the ambitious defense that we seek to build called SDI or star wars, will probably be somewhat limited in its scope. The shield, if it is constructed, is unlikely to cover the entire country, but only afford protection to our own missiles to protect them from an incoming attack, although more ambitious hopes are sometimes expressed for it.

I have talked with defense officials in the Soviet Union and have a clear idea of their response to such a proposal. In fact, this reaction is similar to our own position at the time they were threatening to build an antiballistic missile system that might intercept incoming missiles.

What both the United States and the Soviet Union have said is that if one nation has both offensive weapons and a defensive system it has the potential to launch an attack against an undefended nation without suffering a retaliatory response. In short, a defensive system could confer a first strike capability.

We did not want the Soviet Union to gain such a first-strike capability by deploying a nationwide ABM system and they do not want us to acquire it through SDI. Thus what may appear at first glance to be a matter of defense for them or for us, clearly has implications for the other side.

If the Soviet Union believes that our technology is 5 or 10 years ahead of theirs in this field, they could see that we would have a strategic advantage for at least that period of time. It would be for them a window of vulnerability.

Should it come to that, the response of the Soviet Union is predictable. If star wars could eliminate 50 percent of incoming missiles, they could restore the strategic balance by doubling the number of warheads in their arsenals. That is a development that should concern us deeply.

There are, of course, collateral questions that must be present in Russian minds about star wars. The concept involves vast systems of very high-technology equipment, some of it equipped with lethal weaponry. While these weapons may have been designed to kill missiles in space, any prudent general in the Kremlin will be bound to ask "what else will they kill?" The answers are likely to conjure up another vision of a new window of vulnerability. No matter how many labels "For Defense Only" we stick on the star wars weapons we cannot expect to reassure them.

The window of vulnerability that we feared in the early 1980's was the Soviet Union's arsenal of massive missiles. They have now offered to reduce that arsenal and consequently the perception of vulnerability if we do the same for them.

It is something to ponder, and President Reagan is right to urge the American people to think about it seriously. The opportunity is too important and

too rare to lose over unnecessary disagreements.

The conference in Iceland failed to come to the point of agreement over the question of whether the United States could or could not test star wars in space within the next 10 years. It was agreed that laboratory testing and other research would go forward.

I suspect that the issue could be defined differently and more accurately. The Soviet Union is saying, if you test in space you may open our window of vulnerability, you may place us at a strategic disadvantage.

President Reagan has said many times that he has no such intention. I fully believe him. But given the logic that has animated the whole subject of defense systems for years it may be difficult to make the Soviet Union believe him. By our own ABM arguments, strongly expressed, he should be willing to revise his thinking about star wars. But that may not be necessary, although I think it would be desirable. The fact is that the Soviet Union, for its own reasons, is ready to accept star wars research as legitimate so neither party has to forego all such activity. What we now need is a solution like the ABM Treaty which recognized the basic logic that defensive systems are not productive of better defense, but at the same time allowed each party a symbol instead of a system.

So my advice is to put the experts to work, to sketch the kind of guidelines that will let us do what we need to do to prove or disprove our theories without acquiring a strategic advantage that the President says we do not want.

That should be a task within the grasp of human ingenuity and we should get on with it while the positive aspects of the Iceland meeting are still visible.

PLANS TO FIGHT THE KILLER BEE

Mr. MATHIAS. Mr. President, Senators may recall that during the Senate's earlier consideration of the continuing resolution I had offered an amendment to earmark $1 million of agriculture funds to be used to curb the advance of the Africanized or killer bee.

My amendment would have directed the United States Animal and Plant Health Inspection Service to use the money to establish a biological barrier across the Mexican isthmus of Tehuantepec that could have blocked the northward migration of this dangerous insect. I was gratified that the Senate shared my concern and passed my amendment.

I regret, however, that my amendment has not survived the conference committee. I appreciate the pressures faced by the conferees as they struggled to reach agreement on a bill as massive and complex as this continuing resolution, and I can understand how my amendment may have fallen by the wayside in the crush. In place of my legislative earmark, the conferees added language to the conference report expressing the Congress' concern and directing USDA to conduct additional study with available funds and to make recommendations for action to the Congress next year.

I am pleased that the conferees underscored congressional concern about the Africanized bees, but I think it is important to point out that if USDA waits until next year to propose a plan for dealing with the bees, it may well be too late. Scientists within the United States Animal and Plant Health Inspection Service have already drafted a proposal for protecting agriculture and human health by establishing a biological barrier across a narrow isthmus in Mexico. They have sound reason to believe such a barrier could actually prevent the bees from migrating further north toward the United States.

There is a catch, however. USDA must move immediately if the plan is to work, because the bees will reach the isthmus in 3 to 6 months. If USDA chooses to delay, the bees will have already crossed the isthmus and the opportunity will be lost.

Further study of the bees is important, but study alone will not head off the agricultural disaster the bees will bring. I hope that USDA officials will take notice of this very worthwhile plan within their own department and make the decision to commit the funds necessary to move ahead with the barrier.

RETIRING SENATORS

TRIBUTE TO SENATOR RUSSELL B. LONG

Mr. HEFLIN. Mr. President, the U.S. Senate is widely acclaimed as the greatest deliberative body in the world. I believe that this reputation is largely a result of the truly outstanding contributions of a few Senators who have provided this country with such leadership, counsel, and guidance that their actions have reflected on the name of the Senate as a whole. The names of Calhoun, Clay, Webster, Lodge, Adams, and LaFollette are among the most prominent.

RUSSELL B. LONG, who has announced his retirement after 38 years of service to his country in the U.S. Senate, is one man whose name belongs among those legends of our past. Throughout his tenure in the Senate, RUSSELL LONG has been the Senator's Senator. He is the "Old Master." When many of the present Members of this Chamber were just graduating from college or establishing a career, and when a few others were children or adolescents, RUSSELL LONG was already serving his Nation with the likes of Richard Russell, John Stennis, and Carl Hayden. Indeed, the Senate as an institution has changed dramatically since he was first elected, and Senator LONG has provided needed continuity, and direction during this change. Whether this change has been for good or bad is not at question—what is most evident about this period of history in the Senate is that RUSSELL LONG has served throughout this time to provide an example that others could follow. His presence, attitude, outlook, and concern has been a definitive factor in determining the manner in which every Member of this body behaves. His sense of humor defuses even the most heated debate even at the latest hour. Somehow, Senator LONG is always able to direct our attention to humorous factors which are evident in any political or legislative question—while still making an important point and even underscoring its importance. This is a highly effective technique, and adds to his unrivaled powers of persuasion. He has been repeatedly recognized for his influence and persuasion in several surveys of his colleagues conducted by such publications as U.S. News & World Report, and Washingtonian magazine. He has been chosen as the "Most Respected Senator" and the "Best Senate Debater" by the public television program "The Lawmakers." These are great honors, and I am sure that our colleague views them with a grain of salt, but I agree with their accuracy.

Throughout his service as a U.S. Senator, RUSSELL LONG has distinguished himself with his knowledge of finance. His tenure as chairman of the Senate Committee on Finance spanned 14 years. I have heard it said that he has learned so much about finance during his years in the Senate that he has forgotten more than most Members have ever known. I must doubt this, however, for I have never known RUSSELL LONG to forget very much. I believe that he may let us think that he has forgotten certain things so as not to show off. If he ever revealed to us how much he actually does know about finance, I imagine that there may emerge a mandate among Members which would require him to stay. And I know that he is ready to return to his home.

There are many legislative accomplishments of which RUSSELL LONG can be very proud. He has been the leading congressional champion of the employee stock ownership plans, which encourage greater productivity, job satisfaction, and company interest by providing the employee with a share of the company for which he or she works. Another is the Child Support Enforcement Program which has helped children and their mothers while saving the Government more

71-059 O-87-42 (Pt. 22)

than $5 billion in welfare costs by locating "runaway" fathers and requiring them to contribute to the support of their children. Among those achievements which are, doubtless, most important to him are the reforms and advancements made in the field of Social Security, and Medicare. When he took office in this body, many of the Nation's aged, blind, disabled, and truly needy had no means of adequate financial support or medical care. Senator LONG worked to champion their cause. However, he has also led the fight against a "DOLE" which would have guaranteed annual income for able-bodied persons who refuse to work, thereby ensuring the survival of the incentive to work and to do a job well done.

Mr. President, I have greatly appreciated and enjoyed having the opportunity to serve in the Senate with RUSSELL LONG. He is truly a modern day hero, and a legend of our time. His contribution, which is evident in so many programs and laws, is nothing less than outstanding. I am sure that each one of my colleagues joins me in thanking him for the friendship that he has provided to each Member, and to the direction that he has given to the Senate and to the Nation as a whole.

TRIBUTE TO SENATOR PAUL LAXALT

Mr. HEFLIN. Mr. President, I rise, today, to pay tribute to my colleague and friend PAUL LAXALT, who has announced that he will retire from the Senate at the end of this, the 99th Congress. I am sorry to see him leave, for with his departure, the U.S. Senate will lose a trusted friend and valued adviser.

PAUL LAXALT was born in Reno, NV, and then raised in the small State capital town of Carson City. He learned two things while growing up, that, it is apparent, remain with him still. The first is the strong importance which he learned to place on the family. The second is the strong work ethic which was instilled in him by his father, who was a sheep herder, and his mother, who ran a small boardinghouse in town. I know that each of these qualities has been of great benefit to him during his entire life. They are evident in his attitude, and in his outlook.

Like so many before him, the first time that PAUL LAXALT served his country was during World War II, when he served as a U.S. Army corpsman and saw combat duty in the South Pacific. After the war, he continued to serve the public interest as the district attorney of Ormsby County and, then, he set up a private law practice. In 1962, our distinguished colleague decided to return to public service, and was elected as Nevada's Lieutenant Governor. He so impressed the people of his State that 4 years later, they elected him as their Governor. PAUL LAXALT was a highly effective Governor, advocating a policy of self-reliance and fiscal prudence, which resulted in the largest fiscal surplus in Nevada's history up to that time. In 1970, he momentarily stepped out of the public limelight to continue his law practice and conduct family business interests.

However, in 1974, PAUL LAXALT ran and was elected to the U.S. Senate. As he had done so often in the past, and as he continues to do, PAUL used the experience he had gained in previous office and occupations to provide background experience for his work as a U.S. Senator. I know that he serves the citizens of the State of Nevada well while earning the respect of his colleagues here in this body. I have been honored to have served with him on the Senate Committee on the Judiciary, where he has been instrumental in the passage of several key legislative packages, including the Omnibus Crime Control Act of 1984.

Mr. President, PAUL LAXALT has served his country in an excellent capacity. He has provided great leadership and guidance to the citizens of his State, and to the Members of this body. Additionally, he has been a very close friend and adviser to the President of the United States. His career is truly remarkable, and his efforts have been tireless. I wish him the best of luck and happiness in the future. This country has benefited from his past contributions and, I am sure, will benefit from future accomplishments.

TRIBUTE TO SENATOR THOMAS F. EAGLETON

Mr. HEFLIN. Mr. President, I rise, today, to bid farewell to my good friend and colleague, Senator TOM EAGLETON. The senior Senator from Missouri has announced that he will retire at the end of this, the 99th Congress. All Members of this body will miss his good sense, his outspoken, frank opinion, and his enthusiastic energy. He has served his Nation well.

THOMAS F. EAGLETON grew up in St. Louis, the second son of a prominent figure in St. Louis politics. After graduating from high school, he demonstrated his keen intellect by earning a B.A. degree, cum laude, from Amherst College, and a law degree, also cum laude, from Harvard. He served a stint in the U.S. Navy, and then returned to St. Louis to pursue a career in law and politics.

In November of 1956, he was elected to his first public office, the circuit attorney of the city of St. Louis. He then served for one term as chief prosecutor for the city, and in 1960 was elected attorney general of Missouri. In 1964, TOM EAGLETON was elected Lieutenant Governor of Missouri, and finally, in 1968, he was elected to the U.S. Senate. He was reelected in 1974 and in 1980.

Throughout his career in the Senate, THOMAS EAGLETON has possessed a moral passion and a sense of moral justice that are unrivaled and unquestioned. He is incredibly committed to what he believes in, and will fight to the end to oppose any matter which is not right or just. His character displays his sense of leadership and guidance with which he has provided a clear voice for justice. This voice is logical and persuasive. His convictions, his eloquence, and his impeccable integrity have distinguished him as a Member of this body. His effectiveness in the Senate is well known.

Mr. President, we will miss the service of THOMAS EAGLETON, yet he is not leaving the realm of public service entirely. The students of Washington University in St. Louis will be very fortunate to learn of his qualities. I hope that he is able to find better students there than he did here in this Chamber.

TRIBUTE TO CHARLES MC C. MATHIAS, JR.

Mr. HEFLIN. Mr. President, I rise today to pay tribute to Senator CHARLES MCC. MATHIAS, JR., who announced that he would retire from the Senate at the end of this Congress. Thoughout his life, whether as an attorney, Congressman or Senator, MAC MATHIAS has never been one to forsake his conscience for the purpose of party politics or personal ambition. His attitude is refreshing and inspiring. His voice has been one of wisdom and reason—he will be greatly missed.

During his entire adult life, Senator MATHIAS has been an outstanding servant of the people of Maryland in many different ways, and as the holder of many different elective offices. After receiving his law degree, he was elected as the assistant attorney general of Maryland. He then served as the city attorney for the city of Frederick, was later elected to the Maryland House of Delegates, and then, in 1958, was elected to the U.S. House of Representatives, where he served for three terms. Finally, in 1968, CHARLES MATHIAS was first elected as a Member of this Chamber. Looking back through this truly unselfish record of public service, one is reminded of the similar examples of public service established by our forefathers—for the life of CHARLES MATHIAS was cast in the same mold.

Throughout his history of service to the people of Maryland, and to each citizen of this Nation, CHARLES MATHIAS is probably best known as a strong advocate of civil rights. During his tenure in both Houses of Congress, he has always been in the forefront of the fight for equality among all American citizens. He is one of the chief sponsors, as a Member of the House of Representatives, of the civil rights legislation which was passed by Congress in 1964 and 1965. In 1968, after being elected as Senator, CHARLES MATHIAS introduced the Fair Housing Act. He has since that time fought to strength-

en the act in an effort to further protect both the elderly and the handicapped. Additionally, he was instrumental in the 1975 and 1982 extensions of the Voting Rights Act. His tenure in the Senate will be remembered for both his courage and wisdom.

CHARLES MATHIAS is also known for his great work in other areas vital to our national interests. He has served for years as a member of the Senate Foreign Relations Committee, and has worked with NATO members to assure our national security. I recently had the pleasure to serve on the Impeachment Committee of Judge Harry Claiborne which Senator MATHIAS chaired. I must say that I was impressed with his efforts to provide the defense with all legitimate requests while still preserving the sanctity of the Senate. Senator MATHIAS provided tremendous leadership and direction during the implementation of this archaic impeachment process.

The moral character of Senator MATHIAS is unquestionable. He often serves as a defender of the citizen who has no voice. He will not tolerate any injustice, or impropriety. His service has been long and valuable. He has helped to provide the Senate with an irreproachable conscience. His contribution, voice, and good nature will be missed. His friendship will also be missed.

TRIBUTE TO SENATOR BARRY M. GOLDWATER

Mr. HEFLIN. Mr. President, I rise today to pay tribute to a truly outstanding American, BARRY M. GOLDWATER, with whom I have been lucky to have served in the U.S. Senate. Few men in our history have contributed so much or have dedicated themselves with such vigor to the welfare of these United States. His sage counsel, and wise advice will certainly be missed.

An examination of the career of Senator GOLDWATER impresses upon one the truly outstanding nature of his service. He began his service for our country in 1930 when he was commissioned as a second lieutenant in the Infantry Reserve attached to the 25th Infantry. In 1941, at the beginning of World War II, he volunteered for duty and was subsequently attached to the air training command, ferrying command, and air transport command. As a transport pilot, he ferried P-47 fighters and flew air transport command missions to China and India. After World War II, BARRY GOLDWATER was instrumental in organizing the Arizona Air National Guard and served there until his first election to this body. He reitred as a major general in the Air Force Reserve after serving in the Army and Air Force Reserves from 1930 to 1967. He is a graduate of the Air War College, and an honorary member of the Air Force Academy Association of Graduates.

Senator GOLDWATER began his political career in 1949, when he was elected to the city council of Phoenix. In 1952, he was elected to his first term in the U.S. Senate. He was reelected in 1958, but did not seek reelection to the Senate in 1964 as he ran as the Republican Presidential nominee. In 1968, he was again elected to the U.S. Senate, and was assigned to the Senate Armed Services Committee, of which he is now the chairman. I believe that the entire Nation is aware of his tireless efforts to provide for the common defense of the people of this country. Additionally, Senator GOLDWATER has provided great leadership to the Senate as a member of the Commerce Committee, the Committee on Small Business, and the Select Committee on Indian Affairs.

Senator GOLDWATER is admired throughout this Nation as a great patriot, and strong defender of the liberties, freedoms, and values possessed by all citizens. He has the strongest sense of moral justice, and is a staunch supporter and defender of the qualities that made this Nation great. Even during our involvement in Vietnam—a period in our Nation's history when it was not always fashionable to defend the qualities of this Nation—he forever labored to, again, lead people to a pride in their country.

Among his other many talents, our colleague is a talented author. The books which he has written relate both to his ideology and outlook as well as to his interests. "The Conscience of a Conservative," "Why Not Victory?," "Where I Stand," "Down the Green and Colorado Rivers," and "With No Apologies" are just a few of them.

This Chamber will, indeed, be left lacking after the departure of Senator BARRY GOLDWATER. His experience and expertise in military affairs is unrivaled, and his opinion in all matters is highly valued. Yet, each Member of this body has learned much from his example, and his instruction. Many are in his debt, and no one will forget his example. In the future, the Members of this body will have the honor and the duty to build on his achievements—and our task is easier because of his efforts. We have also been fortunate to have known the loyal friendship of our colleague from Arizona. In the years to come, I hope that he will experience the greatest happiness.

TRIBUTE TO SENATOR GARY HART

Mr. HEFLIN. I am pleased to rise, today, to pay tribute to my distinguished colleague, Senator GARY HART, who has announced that he will retire from the Senate at the end of this Congress. Throughout his career, he has been a fine Senator who has represented the people of Colorado well. He is a man of conscience and of strong feelings. His voice will be missed as a part of this body.

Though my opinion often differed from those of Senator HART, his viewpoint in any debate was important and necessary, for it aided the deliberative process. He always argued with conviction, reason, and passion. A well-based decision on legislation cannot be made without first considering all facets of a problem, and our distinguished colleague, Senator HART, always made his point of view known to all Members of this body. Throughout his service, he has brought forth new ideas, and new approaches which will continue after his departure. People throughout the Nation have been affected by his approach, and he has helped to initiate a reexamination of the issues crucial to our country.

After receiving both a divinity degree and a law degree from Yale University, GARY HART began his career in public service after being appointed to the U.S. Justice Department. He then served as the special assistant to the Secretary of the U.S. Department of the Interior. He was elected to the U.S. Senate in 1974, and has been serving since that time.

The service that Senator HART has provided has been very valuable. As a member of Senate Armed Services Committee, he has helped to lead the fight for military reform, and founded the bipartisan military reform caucus. He has helped to protect against wasteful spending through his work on the Committee on the Budget, and with the Committee on Environment and Public Works, he has been a strong advocate of legislation which has been designed to protect our land from pollution, and to preserve our national parks for many generations to come.

Additionally, throughout his career, Senator HART has been an active author, and I admire him for the many books, and writings he has published. Among these are, "America Can Win," and a contemporary spy thriller which he coauthored with Senator WILIAM COHEN of Maine, "The Double Man."

I anticipate that Senator HART will somehow be involved in a future race for the Presidency and wish him luck in any such venture. We are sorry to see him leave this body, and wish him and his family the best of happiness in the future.

CALICO ROCK, AR

Mr. BUMPERS. Mr. President, I wish to take a few minutes to pay tribute to an extraordinary place in the fine State of Arkansas, the town of Calico Rock. This town is a shining example of the virtues of small town life in this country.

I recently had the good fortune to visit Calico Rock, a lovely town which takes its name from the color of the

bluffs of the Ozarks mountains. Glenn Bennett, the mayor of the city of Calico Rock, has described in a letter to me what is special about his hometown:

> We hope you will have recorded • • • that you visited a place this summer, a place in your home state in North Central Arkansas, across the river and beyond the mountains—a town of 1,100 people, by the name of Calico Rock, nestled in the foot hills of the Ozarks on the banks of the White River. You found a happy people in a town where the city jail has been closed for over 25 years. There is no town marshall or city police. There are no beer joints but there are 14 active churches in the general vicinity. You have found a place called Calico Rock that is alive and well and striving with all its heart, mind, body, and soul to be a better place to live.

The mayor's description of Calico Rock is indeed accurate. The White River he mentions is a crystal clear stream, and its trout attract fishermen from across the country. The peaceful but breathtaking beauty of the Ozark National Forest, on whose border the town rests, tends to melt away the stress of modern life. Calico Rock has held onto the best of the past and looks forward to the best the future has to offer.

RETIREMENT OF SENATOR CHARLES McC. MATHIAS, JR.

Mr. MITCHELL. Mr. President, although I have not had the privilege of serving on a committee with Senator MATHIAS—indeed, although we have served on separate sides of the aisle in the Senate—I believe his retirement this year marks a major loss to this body.

Senator MATHIAS has exemplified the kind of reasoned debate, civility and thoughtfulness that give meaning to the idea of the Senate as the world's greatest deliberative body.

His principled approach to issues as volatile as criminal code reform and as close to home as the administration of the Senate itself has earned the respect of those who differ with him as well as those who do not.

Senator MATHIAS has acted on principle throughout his public life. In the early 1960's, he was one of three Republican Congressmen who introduced the bill which ultimately became the law we know as the Civil Rights Act of 1964. Throughout his Senate career he has pursued the strengthening of that law and its companion voting rights and fair housing statutes.

He has sought to pursue and to guide our Nation's foreign policies in ways that serve our Nation's long term interests, under Republican and Democratic Presidents alike. His far sighted view of our national interests was particularly aptly recognized last year, when he was unanimously elected president of the North Atlantic Assembly, a legislative body of NATO members. He is the first U.S. Senator to have been so honored.

And he has remained a champion of constitutional values and constitutional protections throughout his career. Whether the issue is as misunderstood as the exclusionary rule which serves to buttress the fourth amendment or as controversial as capital punishment, Senator MATHIAS has never sought refuge in stridency or in silence. His has been a voice of reason, of political courage and of sanity in the Senate.

It has been a privilege to work with him. His loss will be felt on both sides of the aisle.

RETIREMENT OF SENATOR GARY HART

Mr. MITCHELL. Mr. President, the retirement of Senator GARY HART of Colorado is a loss to the entire Senate. Senator HART's 12 years of service in this body have enriched its deliberations and broadened its perspective on a broad variety of issues, ranging from defense preparedness and arms control to environmental and energy policy.

It has been my personal pleasure to serve with Senator HART on the Environment and Public Works Committee, working on issues such as Superfund and nuclear powerplant safety.

Senator HART's contribution to public safety through his work on the Three Mile Island disaster is incontestable. His willingness to review in depth the steps needed to improve the security of nuclear powerplants and the safety of the people whose homes abut them will protect thousands of Americans in communities around the country for decades into the future.

In 1978, in the aftermath of one of the most fiercely contested environmental debates in its history, the Senate appointed GARY HART chairman of the National Commission on Air Quality, a bipartisan and interdisciplinary group which studied the Clean Air Act, its implementation, and its regulatory effects for over 2 years.

The conclusions drawn from that Commission's work, under Senator HART's guidance, have been an essential element in preserving the consensus for strong environmental legislation which exists today. It is a consensus that has ensured the fight to maintain environmental standards will not be derailed, even in the face of neglect and outright hostility.

Senator HART's work on our Nation's defense policies, ranging from his insistence on a strategic buildup based on sense and effectiveness, not dollar amounts, have brought balance and rationality to the debate over defense procurement and strategic posture.

Senator HART's pathbreaking efforts in the late 1970's to alert us to the potentially devastating shortcomings in our early warning system have helped put into place necessary corrections to help prevent the worst nightmare, an accidental nuclear war.

And his recent lucid lectures on "Enlightened Engagement" have helped recommence the national policy debate that is so clearly needed if we are to move from a foreign policy that is based on reaction and policy lurches to an understanding of international change and the opportunities and dangers it presents to our Nation.

Senator HART's role in the Senate, as a leader of difficult causes, whether it was ratification of Salt II in 1979 or his principled opposition to the popular Gramm-Rudman bill, has always sprung from his personal examination of the issues and his commitment to pursuing what he saw as right, not what was politically expedient.

His hard work has earned him a role as a leader of the national Democratic Party. As a candidate in the 1984 primary campaign, Senator HART won 27 primaries and caucuses. He led 1,200 delegates to the National Democratic Convention.

He will pursue the rational debate and deliberation of public policy when his Senate career ends. I know his contribution to the policy debates of our time will energize and elucidate all Americans, as they have his colleagues in the Senate.

SOUTH DAKOTA PARKS VISITATION DOWN IN BOOM YEAR—REASONS UNCLEAR

Mr. PRESSLER. Mr. President, 9 percent fewer visitors have visited Mount Rushmore this year compared to last year, but we lack the tools to say why. With my home State of South Dakota embarked upon a promotional plan to increase tourism by 20 percent during the next 4 years, this is a matter of real concern.

Witnesses appearing before my Subcommittee on Business, Trade, and Tourism during an October 1 hearing on the adequacy of Federal data collection activities testified that this concern is prevalent throughout the travel and tourism industry. They believe the Federal Government has dropped the ball in this area, and that the industry is suffering as a result.

The message delivered during that hearing was clear: travel and tourism related businesses, State, and local governments, and even Federal agencies need more information if they are to make the best use of their shrinking budgets.

The Mount Rushmore situation is a good case in point. Before there can be a cure, one must pinpoint a cause. The drop in attendance at that monument has been attributed to a variety of potential causes, none of which can be confirmed without a better picture of what is happening on a nationwide basis.

Potential visitors may have been scared off by early predictions of overcrowding at our national parks. The economic problems faced by the farm families in South Dakota and bordering States—which contribute the most visitors to the monument—have undoubtedly played a large role. The real reasons may never be known, unless the Federal Government begins to take seriously the need for better travel and tourism statistics.

During the subcommittee hearing, we were told that most Federal and private policymakers are frustrated by the lack of a standardized and recurring survey which would help them analyze changes as they occur. Many travel and tourism statistics users feel that the last year for which we had an accurate picture of what was happening in travel and tourism in America was 1977. That was the last year in which a national travel survey [NTS] was undertaken by the Bureau of the Census.

The impact felt in the absence of the NTS, or similar data collection activity, was described by the witnesses at the hearing as follows:

Mr. Roger Whyte, Deputy Undersecretary for Travel and Tourism, U.S. Travel and Tourism Administration [USTTA], testified that his agency finds it difficult to analyze international travel to individual States in order to help them develop effective marketing plans.

Mr. Richard Walsh, Director of the Office of Economics, Office of the Assistant Secretary for Policy and International Affairs, Department of Transportation [DOT], testified that his Department lacks the ability to analyze travel patterns related to trips of over 100 miles from home—which account for almost 20 percent of all highway vehicle miles traveled annually.

Mr. Ken Hornback, chief of the statistical unit for the National Park Service, testified that his office lacks the tools with which to understand the changing characteristics of the average family in this country so appropriate planning can take place to prepare our parks for the recreational needs of the future. There is a new generation of travelers arriving on the scene: two-income families with one or no children, a week or two to spend on vacation, and a preference for traveling by plane. Understanding and responding to such changes demands analysis which is not currently possible.

Dr. Douglas C. Frechtling, director of the privately sponsored U.S. Travel Data Center, testified that only the Federal Government has the ability to obtain information of the scope and level of detail that is required for planning decisions to be made by State travel offices, city convention and visitors bureaus, and thousands of small businesses. Vital information on origin and destination related travel patterns by region and State has not been available since the NTS was last conducted in 1977.

Statements such as these provide considerable evidence that the travel and tourism industry in this country is operating what might be called a statistical black box. What is necessary for its illumination is our Nation's reinvestment in gathering accurate and timely data, such as that once collected by the NTS.

This is not to say that the NTS is the only vehicle that should be considered for collecting needed information. The hearing I conducted last Wednesday is only the beginning of a process to learn what information is available and how people can obtain it, and what actual data gaps exist and how they might be filled.

If States are to reap the economic benefits from promoting attractions like Mount Rushmore, they need to be able to understand why people across the country are coming to visit them, or not. They need to know when trends are developing that will affect the way they should do business. They need to know how to invest limited resources in the most effective marketing efforts.

During the upcoming Congress I will be consulting with representatives of Federal, State, local, and private organizations to consider possible options for developing and funding a survey which would fill the data gaps that exist. A number of approaches will be explored ranging from full Federal responsibility to the possibility of building a consortium of private and public data users.

The future is only a step away. I urge my colleagues to join me in working to ensure that the travel and tourism industry in this country is equipped to face it successfully.

TRIBUTE TO DEPARTING SENATORS

CHARLES MC C. MATHIAS, JR.

Mr. PRYOR. Mr. President, when Senator McC. MATHIAS leaves the Senate at the end of the current session, we will be losing one of the true gentlemen scholars this body has known. Senator MATHIAS is my friend, and he is the friend of all Americans who cherish what's good and decent and upright in this country.

Senator MATHIAS has distinguished the Foreign Relations Committee with his experience and wisdom, as well as the Aeronautical and Space Sciences Committee, the Joint Committee on the Library, the Government Affairs Committee, and the District of Columbia Committee.

And, probably more crucial for those of us serving every day in the Senate, he has been chairman of the Rules Committee—that sensitive body that determines administration and operating procedures, and budgets, and laws governing campaign finance. On a daily basis, this nuts-and-bolts committee has tremendous sway over our lives.

Always, Mr. President, and without fail, Senator MATHIAS has been courteous and fair and equitable in this sensitive area. I have seen him under great pressure, and he has always dispatched this difficult job with a balance of judgment and good sense that's called for in such a chairman.

I want to mention, finally, the record Senator MATHIAS has put together in controlling the spread of nuclear weapons. He has been a staunch and fearless advocate of arms control legislation since he first came to Congress. He was an adviser to the SALT II delegation and an observer at the START talks in Geneva. Although active in other foreign policy matters, this issue has always been important to Senator MATHIAS, and we owe him our thanks and recognition for those tireless efforts.

Mr. President, we will miss McC. MATHIAS in this Chamber. I wish him well as he retires to that beautiful farm, "Bullskin," in the countryside he loves so much. His accomplishments will always be a part of the history of the Senate.

GARY HART

Mr. PRYOR. Mr. President, the close of this session marks the end of an illustrious Senate career for our colleague, GARY HART. First elected to the Senate in 1974, Senator HART has served with distinction as a member of the Budget, Environment and Public Works, and Armed Services Committees.

He was Congress' earliest voice for military reform and a cofounder of the Congressional Military Reform Caucus, the chair of which it has been my privilege to serve this session of the Congress. GARY HART spoke the loudest and got the attention of a number of us who share his view that the Pentagon is not above continued scrutiny of the performance of its programs and its personnel.

GARY HART and I have labored together on another issue about which we both feel quite deeply. We share a belief that the moratorium this Government has observed with respect to the production of lethal nerve gas weapons must be continued. We must not allow these terrible weapons to be restockpiled. The Senate will miss his leadership on this issue, but I want him to know that there will be a number of us who will continue speaking out for that cause.

On January 4, 1986, GARY HART announced his plans to retire from the Senate. I doubt that he will confine his activities to writing, a profession

for which he also has immense talents. I fully expect that he will continue to be a national voice in our party—a man whose thoughts and ideas will be sought as our party prepares for the future.

PAUL LAXALT

Mr. PRYOR. Mr. President, PAUL LAXALT has chosen to leave this body when the 99th Congress adjourns. I want to add my words of tribute to those he has already received.

Though we are not of the same political party, I have continually been impressed with the manner in which Senator PAUL LAXALT has discharged his role as the recognized "best friend" of President Reagan. When called upon by our President to represent this Nation as a foreign emissary, PAUL LAXALT, in every instance, without hesitation, has accepted. Without exception, we, on both sides of the aisle, respect PAUL LAXALT.

The manner in which he handled the delicate situation in the Philippines during the upheaval in that country is clear evidence of PAUL LAXALT's strength and steadiness.

A Senator of many legislative accomplishments, PAUL LAXALT will be particularly remembered for his work on the Comprehensive Crime Control Act of 1984—legislation regarded by most as the most sweeping piece of anti-crime legislation in the history of the Congress.

The people of Nevada are fortunate to have been served so well by PAUL LAXALT's quiet determinations.

BARRY GOLDWATER

Mr. PRYOR. Mr. President, few of us will ever be able to amass even a small portion of the legislative legacy of retiring Senator BARRY GOLDWATER.

From serving on the Phoenix, AZ, City Council to chairing the Senate Armed Services Committee, Senator GOLDWATER has given 37 years of his life to service in government. Probably his finest hour in the legislative battlefield came earlier this year with the passage of the Defense Reorganization Act of 1986—a measure which appropriately is named for him. In the years to come, our children will recognize the importance of this legislation in revamping our military services and their programs and procedures.

We owe him a debt of gratitude for his service as chairman of the Senate Select Committee on Intelligence and for his stewardship as a member of the Commerce, Science and Transportation Committee, the Small Business Committee, the Select Committee on Indian Affairs, and the Aeronautical and Space Sciences Committee.

BARRY GOLDWATER is certainly deserving or more time with his family. Their gain is the Senate's loss. We will miss his persistence in reminding us regularly of the need for a strong national defense, a fiscally sound budgetary policy, and vigilance in protecting our cherished freedoms.

I hope that we can count on BARRY GOLDWATER to admonish us in the future should we be straying from that course, in the inimitable way that he has done so for almost 40 years.

RUSSELL LONG

Mr. PRYOR. Mr. President, in 1979, the Reader's Digest described Senator RUSSELL LONG in this way: "A consummate strategist and persuasive advocate, power broker and wheeler-dealer par excellence, he has become, in ways rarely understood by the public, one of this country's greatest movers and shakers."

I want to associate myself with those remarks, Mr. President, and stand here today to pay tribute to my friend and mentor, Senator RUSSELL LONG, with genuine regret that he is leaving the Senate. But let me add that I wish him the very best in his new challenges when he returns to his beloved Louisiana.

It is hard to imagine the U.S. Senate without RUSSELL LONG. It is hard to imagine the Senate Finance Committee without RUSSELL LONG. Our colleague, Senator BOB DOLE, said at one time that "RUSSELL LONG knows more about the Tax Code than all of us combined." And I believe this to be true.

When I came to the Finance Committee in 1983, Senator LONG was not only my model but my friend as well. Faced with a bewildering array of figures and issues and questions of public policy that ranged from taxes to trade, I was in need of leadership and guidance. And it came from the senior Senator from Louisiana. I will never forget his example, his willingness to be the coaxing nudger when that was so clearly what I needed.

Senator LONG came to the Senate in 1948, one day before his 30th birthday. And what changes and developments he has seen since that time. Our post-war economy was fashioned in those years, with the guidance of Senators such as RUSSELL LONG. Our present strong defense was defined and executed then, and our health care system, and our network of public education, and the transportation improvements that have made this country accessible in all its corners.

Someone asked me once who was the founder and defender of the ESOP Program—the Employee Stock Ownership Plan that gives tax advantages to corporations that allow their employees ownership of company stock. Of course, it is RUSSELL LONG. And then I thought of other programs he might be grandfather to—revenue sharing, child support enforcement, financial election checkoff plans, and numerous benefits under Medicare. The list goes on and on.

What I will personally remember RUSSELL LONG for is his shrewd understanding of the workings of the Senate and the sense of humor he is always able to employ when describing them. There are many times in this body, Mr. President, when we must laugh and appreciate what is humorous and funny in order to avoid becoming cynical and fall into despair over the world and its troubles. Never have I seen RUSSELL LONG give up on the Senate. Never have I seen him give up on the American people or the country he loves and has served so faithfully throughout the years.

THOMAS F. EAGLETON

Mr. PRYOR. Mr. President, I recall the shock and dismay all of us felt in the summer of 1984 when our friend and colleague, TOM EAGLETON, made the announcement that he would not seek reelection to the Senate. At the same time, we championed this decision as one that came from someone who had worked long and hard and who wanted to move on to other areas of contribution and participation.

Now the time has come for our colleague, TOM EAGLETON, to make that move, and for that reason I am sorry to see the end of this session of Congress come. Senator EAGLETON has been a personal example to me—an example of dedication and public spirit, of fairness, and of good judgment in the face of great pressures.

The work Senator EAGLETON has done on the Government Affairs Committee was an inspiration when I first came to the Senate in 1979. He knows how the Government works better than anybody. He understands the bureaucracy and the frustrations all of us meet in cutting through redtape and getting down to bare-bones service to the people. Time and again, I have seen TOM EAGLETON bore into an issue and come out with clean evidence that fraud and abuse have indeed occurred, that an inspector general is now more necessary than ever before, and that the recovery of lost dollars and hours is possible after all.

Senator TOM EAGLETON has always waged a fearless fight for the handicapped, the poor, the elderly, and those oppressed by big power wherever it occurs. He was a guiding light in putting together the National Institute on Aging and in making available extended services under the Older Americans Act. These are typical of the courage and dedication he has shown as a Senator. They are only part of what distinguishes his record and the legacy of TOM EAGLETON in the Senate.

In addition to his public record, TOM EAGLETON will be missed because he is a warm and personable colleague. He is my friend, Mr. President, and I will miss seeing him daily in this Chamber. His decision to move into law and teaching is a fortunate one for his

native Missouri, and I can only wish him well in this new challenge.

PRESIDENT KYPRIANOU SPEAKS TO THE UNITED NATIONS ON THE SITUATION IN CYPRUS

Mr. PRESSLER. Mr. President, recently President Kyprianou of Cyprus spoke to the members of the U.N. General Assembly about the plight of Cyprus, and I ask that his speech be inserted in the RECORD following my remarks. His statement makes clear that Turkey has refused to abide by the demands of the international community for the withdrawal of troops, respect for the territorial integrity of Cyprus, withdrawal of colonizers sent from the Turkish mainland to occupy Greek-Cypriot homes and property taken in the 1974 invasion, and resolution of the cases of the five missing Americans and 1,600 Greek Cypriots missing from 1974. President Kyprianou states:

"Despite the oppressive presence of the Turkish occupation troops and settlers which makes mockery of free negotiations as provided for in the landmark General Assembly resolution 3212, we have not refused to negotiate. We have been negotiating for the past 12 years under duress and under all sorts of pressures."

He is absolutely right. The Republic of Cyprus has a population just slightly more than that of a typical U.S. congressional district. Yet 37 percent of its territory is occupied illegally. And do we really expect a government in such a situation, with a gun pointed at its head, to give up its sovereignty and dissolve itself with only a promise of future troop withdrawal? Of course not. Yet that is what the most recent U.N. settlement proposal called for.

Cyprus deserves better. The United States must stand for the rule of law and respect for human rights and territorial inviolability, and if that requires more active United States involvement in the effort to reach a fair settlement for Cyprus, then that should be the next and urgent step for the United States Government to take.

The speech follows:

STATEMENT OF PRESIDENT SPIROS KIPRIANOU BEFORE U.N. GENERAL ASSEMBLY, SEPTEMBER 25, 1986

Mr. President, when we gathered in this hall last year to celebrate the 40th anniversary of the United Nations and evaluate the progress achieved in translating its principles and purposes into living realities, we concluded that the record was still far from being satisfactory. Now, a year later, the record is not much better.

The situation prevailing in the world continues to be more often one of affront and violation of the very principles and purposes of the UN Charter rather than one of commitment and adherence to them. Thus, the use or threat of use of force in international relations, aggression, military occupation, and foreign interference in the internal affairs of states as well as the persistent violation of human rights in many parts of the world are still frequent phenomena. No one can deny that if this frightening vulnerability of the international political system remains unchecked, it would vitiate the very concept of collective security which lies at the heart of the Charter, not to speak of the ultimate disastrous consequences on humanity as a whole. [passage omitted]

Mr. President, I now finally turn to the grave situation we are confronted with in Cyprus, a situation with which the General Assembly and the Security Council are only too familiar. In fact the reason why the Cyprus problem still exists is the nonimplementation of the resolutions of the General Assembly and the Security Council. This is an example of the weakness of our organization I referred to at the beginning of my statement. But if the Cyprus problem is to be properly and reasonably solved the implementation of the resolutions of the United Nations constitutes an absolute necessity. There is no alternative. Various attempts have been made to solve the Cyprus problem away from the provisions of the charter and the resolutions of the United Nations. These attempts have unavoidably contributed to the perpetuation of the unresolved crisis and indeed to the worsening of the situation. It is only when all efforts are concentrated on implementing the provisions of the relevant resolutions of the United Nations that progress toward a just and lasting solution can be achieved.

The elements contained in the UN resolutions for a solution to the Cyprus problem represent the only realistic approach. We are ourselves in the process of considering what should be done next on our part in pursuance of the implementation of the UN resolutions.

Twelve years have gone by since the inhuman invasion of Cyprus by Turkey. Despite the condemnation of the aggression, 37 percent of our territory is still under the occupation of Turkish troops, one third of our population are still refugees forcibly prevented from returning to their homes and ancestral lands, the missing persons are still unaccounted for, while the occupying power persists in its calculated policy of consolidating the occupation and the division of the country.

Turkey still maintains an occupation of about 30,000 men. She has implanted in the occupied part 60,000 colonist settlers from her Anatolian provinces. In fact the Turkish Cypriot community itself is now submerged under the vocal colonist element and one of the most ominous recent developments, ominous for Cyprus and for the Turkish Cypriot themselves, is the fact that the political party which was formed by the settlers is now playing a determining role in the so-called government in the occupied area of Cyprus. The systematic large-scale implantation of colonist settlers from Turkey in a calculated attempt to change the age-long demographic character of Cyprus, in addition to the presence of the Turkish troops of occupation and the solution she envisages, is a manifest attempt by Turkey to place our country under her permanent political and military control. Throughout this period Turkey has been taking a series of partitionist steps culminating in the 1983 blatant attempt at secession which was condemned by the United Nations in Security Council Resolutions 541 and 550.

Neither Security Council Resolutions 541 and 550 calling for the reversal of all secessionist acts nor the other resolutions of the Security General and of the General Assembly calling for the withdrawal of the occupation troops, for the respect of the sovereignty, territorial integrity, unity, and nonalignment of Cyprus, calling for the return of the refugees to their homes, condemning the influx into the occupied area of colonist settlers from Turkey, calling for the cessation of foreign intervention in the internal affairs of Cyprus have been respected by Turkey.

Turkey has been able to ignore with impunity every principle and norm of justice and morality. Turkey felt in a position to ignore completely the General Assembly and the Security Council. It is obvious that free from any real pressure Turkey has not so far felt the necessity to give up her expansionist and partitionist plans against the small, defenseless and nonaligned Republic of Cyprus.

Mr. President, occasionally an attempt is made by some to present the Cyprus problem as a dispute between the Greek Cypriots and the Turkish Cypriots. Nothing could be further from the truth. The problem of Cyprus in its essence is a problem of invasion and occupation aiming at the imposition of a solution that will serve the expanionist designs and other interests of Turkey in the region. There may be internal differences to be settled between the Greek Cypriots and the Turkish Cypriots. I am convinced, however, that these differences would have been solved many years ago if it were not for the presence of the occupation troops and the foreign intervention.

Despite the oppressive presence of the Turkish occupation troops and settlers which makes mockery of free negotiations as provided for in the landmark General Assembly Resolution 3212, we have not refused to negotiate. We have been negotiating for the past 12 years under duress and under all sorts of pressures. In our genuine desire to reach a peaceful solution we have made a series of concessions to an extent that no other government I believe would have ever gone in similar circumstances. In fact if the concessions we have offered in connection with the constitutional and territorial aspects of the Cyprus problem were applied to other states having ethnic minorities with separatist inclinations a large number of states would be confronted with permanent instability and even complete disintegration. And yet all the concessions we have offered, away from such internationally recognized and accepted democratic principles as majority rule and one man one vote, have not been considered enough. They now want us to make even further concessions to the point that it would mean the legalization of the results of the invasion and a prescription for new deadlocks and conflicts, with reprecussions beyond Cyprus.

Mr. President, I have to be very frank. Unfortunately the mentality prevailing in certain quarters, which we very much resent, is that pressure must be exercised on the victim being the weak side and not on the stronger party, namely Turkey, irrespective of the fact that she is the aggressor and the wrongdoer. Some consider this more practical. They consider a solution easier through continuous conscessions on the part of the weak side, irrespective of the merits of the case or the principles and moral issues invovled. But even if we suppose that this attitude prevails and succeeds the net result would not be a just and viable solution, but instead it would be the beginning of a new crisis with far-reaching consequences. Let me at this point make clear that despite the

many difficulties we are encountering, despite our weaknesses and the different pressures, we cannot under any circumstances agree to a solution which will place Cyprus directly or indirectly under the military and political control of Turkey, or a solution that because of its inequity and unworkability would lead to a new Cyprus problem, to new conflicts, and to new tragedies. The solution must be just, viable, and workable and in full conformity with the charter and the resolutions of the United Nations.

Mr. President, we have extended our sincere cooperation to the secretary general of the United Nations in the exercise of his mission of good offices, which is well defined in the resolutions of the United Nations. We have done this motivated by a genuine desire to achieve a peaceful and fair solution in strict conformity with the Charter and the resolutions of the United Nations. We shall continue the dialogue with the secretary general in the same spirit.

The internal aspect of the Cyprus problem is of course important. We have been negotiating on the internal aspects, namely the constitutional and territorial, for a federal system for almost 12 years. We all know where both sides stand on these. But we do not know where the Turkish side stands with regard to the basic issue of the withdrawal of the occupation troops and settlers, the question of international guarantees, and the question of the application of fundamental freedoms and human rights for all Cypriots.

In a letter I addressed to the general on 10 June 1986, I explained to him our position with regard to his latest initiative and I suggested to him how we might proceed forward. Progress cannot be made by demanding more and more concessions from one side to the point that an arrangement will be both totally unjust and unworkable. In fact all the concessions we made in the past which, I repeat, no other government in my humble view in our position would have made, were contingent upon acceptance of the position that the subject matter of the resolutions of the United Nations relating to the withdrawal of the occupation troops and settlers, the question of the effective international guarantees with no spurious claims of rights of unilateral interventions, and the application of the fundamental freedoms and human rights for all Cypriots were priority questions to be discussed and settled urgently. If agreement on these three fundamental issues is not possible there is no point in discussing further the constitutional aspect of the problem. If on the other hand agreement on the three vital issues proves possible that will facilitate an overall agreement as provided for in the resolutions of the United Nations. The way out, therefore, would be without further delay and as a matter of priority to tackle the important issues of the Cyprus problem.

Mr. President, the problem of Cyprus is a problem of the United Nations and it should be solved within its framework and in conformity with its Charter and its resolutions. This has always been our position and it will continue to be so, but it is only natural and I hope understandable to expect efforts and initiatives which will preclude the realization by Turkey of her sinister designs at the expense of Cyprus or any arrangement that might lead, because of its unworkablility, to new conflicts and new crises.

If progress is to be made the international community must at last find the way to make Turkey feel the necessity to abandon her expansionist and partitionist plans at the expense of Cyprus. Meaningful and effective efforts toward checking Ankara's intransigence are necessary and fully consistent with the obligations of all the members of the United Nations to ensure the implementation of its resolutions. Equally, we welcome any proposals from any side that contribute toward finding a just solution to the Cyprus problem. In this connection I wish to reiterate that we welcome the proposals made by the Soviet Union last January on the principles of a Cyprus settlement and ways to reach it. These proposals are fully consistent with the principles of the Charter and the resolutions of the United Nations. In order to address the major components of the Cyprus problem the proposals call for the convening of a representative international conference under the auspices of the United Nations. We urge all concerned to consider this suggestion, which we fully support, seriously and urgently.

Mr. President, It is not the first time I address the General Assembly and it is not the first time that I speak in this hall about the Cyprus problem. I repeatedly appealed to the General Assembly and the Security Council to take concrete steps for the implementation of the UN resolutions. I repeatedly appealed to all the members to place the Cyprus problem higher on their list of priorities.

For how long will the occupation of a large part of our territory continue? For how long more the refugees will forcibly remain away from their homes and for how long more the fate of the missing persons will remain unknown? For how long more the human rights of our people will be denied? For how long more the people of Cyprus will live in agony about their future and their very survival?

The Cyprus problem may appear to be a complicated problem, but in its essence is a simple one. If Turkey is made to see reason and the resolutions of the United Nations are implemented the Cyprus problem will be solved. Cyprus is a small island but it has all the possibilities to be a happy place for all its inhabitants irrespective of ethnic origin. This can be achieved without the presence of occupation troops and without dividing lines. This can be achieved without foreign interferences and interventions. We want peace, security, and stability in Cyprus. We want freedom. We want human rights for all our citizens. Cyprus is truly a test case for the United Nations.

KIPRIANOU COMMENTS ON MEETINGS AT UN TO HELLENIC RADIO TELEVISION, ERT, SEPTEMBER 27, 1986

My talks with the UN secretary general, the U.S. secretary of state, and the Soviet foreign minister have all been substantive. I had the opportunity to explain our views on the latest developments in the Cyprus issue in detail, as well as present our opinions about what should be done.

In all my meetings, I have emphasized that Cyprus cannot accept a solution which would place it either directly or indirectly under Turkey's political or military control. Cyprus also cannot accept a solution that will only collapse and lead the country into new tragedies. These were the main points which I made during my talks with the UN secretary general and the foreign ministers of the two superpowers. I also stressed these points in all my other meetings.

During my talks with the UN secretary general, I naturally explained our reply to his recent proposals. I pointed out why it is now imperative to give priority to the well-known basic question; namely, the withdrawal of troops and settlers, the need for effective guarantees, and the protection of human rights. It is impossible to have an endless discussion about the constitutional aspects of the Cyprus issue. This has been going on for 12 years and look where it has led us. We must achieve some sort of substantive progress, or I should say agreement, on the basic aspects of the Cyprus issue that will constitute prerequisites for an overall Cyprus solution.

The UN secretary general listened very carefully to my analysis. I gave a similar presentation during my other talks. We must now wait and see what the UN secretary general's next step will be. He has given me some indications in this regard, but at this stage I should not make any further comment.

I would like to add something else, however. As a result of my various meetings, I have noted a greater interest in the Cyprus issue this year as compared to last year. Perhaps this is due to the nonaligned conference, or to developments in general. Maybe it is the result of efforts on the part of the Greek and Cyprus Governments. I cannot predict future developments. We must keep a close watch on the situation. I would not like to rule out the possibility of a debate at the UN General Assembly if developments so warrant.

RETIRING SENATORS

TRIBUTE TO THOMAS F. EAGLETON

Mr. PRESSLER. Mr. President, when the 99th Congress stands in adjournment, the Senate will bid farewell to Senator THOMAS EAGLETON, the senior Senator from Missouri. I have had the privilege and pleasure to work with Senator EAGLETON on the Foreign Relations Committee and regret that he is retiring after 18 years in the U.S. Senate.

TOM EAGLETON seemed destined for a successful political career soon after receiving his law degree from Harvard. In 1953, he was elected circuit attorney of St. Louis and quickly became State attorney general and Lieutenant Governor of Missouri. He first won election to the Senate in 1968.

He is the ranking Democratic member on the Governmental Affairs Committee and also is a member of the Foreign Relations and Select Intelligence Committees. As a member of the Appropriations and Labor and Human Resources Committees until the 99th Congress, Senator EAGLETON played a paramount role in writing much of the social legislation of the 1970's. He demonstrated his concern for the elderly and policies affecting this special segment of our society by helping to create the National Institute on Aging. In addition, Senator EAGLETON was instrumental in expanding the services offered under the Older Americans Act.

I appreciate the opportunity I've had to work with TOM EAGLETON in the U.S. Senate. His empathy for others compelled him to apply his scholarship and political expertise to the writ-

ing of law assisting the less fortunate. No amount of praise would be adequate to commend Senator EAGLETON's effective efforts in the Senate. I wish him life's best in all his future activities.

TRIBUTE TO PAUL LAXALT

Mr. PRESSLER. Mr. President, I am honored to have worked with my friend and colleague, Senator PAUL LAXALT of Nevada, who will not be seeking reelection this year.

A dedicated public servant, he can be credited with numerous legislative accomplishments. During his two terms as U.S. Senator, PAUL LAXALT worked diligently on regulatory reform and crime control legislation. He fought long and hard to defeat a picketing bill and won. A close friend of President Reagan, Senator LAXALT was instrumental in persuading the President to modify a questionable MX missile deployment proposal in 1981.

After completing law school in 1949, PAUL LAXALT was elected Ormsby County District Attorney and was later a city attorney in Carson City, NV. He also was elected Lieutenant Governor and Governor of Nevada. Senator LAXALT's outstanding U.S. Senate career began when he was elected to this body in 1974.

During the 99th Congress, Senator LAXALT has been an effective member of the Appropriations Committee, where he chaired the Commerce, Justice, State and Judiciary Subcommittee. While serving on the Judiciary Committee, he chaired the Criminal Law Subcommittee.

The Senate will be losing one of its best and most personable members when the 99th Congress adjourns. PAUL LAXALT's wisdom, dedication and legislative talent are enduring assets which will make him a successful leader in all his future endeavors.

I commend Senator LAXALT for 12 years of exemplary work as a U.S. Senator, and wish him the best of luck in the years to come.

TRIBUTE TO GARY HART

Mr. PRESSLER. Mr. President, Senator GARY HART of Colorado will not be seeking reelection this year in order to devote more time to the pursuit of other interests. This gentleman has made great contributions to the Nation during the two terms he has served in the Senate. It has been an honor and a pleasure to serve with Senator HART and I am certain he will work hard to carry out the priorities he has established for himself in the Senate in all his future endeavors.

Defense and energy were two issues that received major amounts of Senator HART's time and effort. In the area of defense, he focused our attention on the over-reliance on sophisticated weaponry where emphasis on small, maneuverable ships and airplanes might be more effective. He also staunchly supported policies lessening U.S. dependence upon imported oil long before this issue dominated the political scene.

After graduating from Yale University Law School in 1964, he was an attorney for the U.S. Justice Department for a short period of time. Then the future Senator worked as a special attorney for the U.S. Department of the Interior and later practiced law in Colorado. He immersed himself in politics as the national campaign director for Senator GEORGE MCGOVERN's bid for the Presidency in 1972. His experience as a campaign manager helped in 1974 when his own bid for the Senate was successful. During the last Presidential election, GARY HART sought the democratic nomination. Through all of these efforts, GARY HART has proved himself to be one of the foremost players on the American political stage.

Senator GARY HART has displayed an ardent interest in the future of our Nation's environment and our Nation's defense. He is to be commended for his consciousness-raising efforts within this body and across the Nation. Although the Senate will be losing the benefit of this intellect and ideals, we are indebted to Senator HART for the fresh insights he brought to this institution.

TRIBUTE TO RUSSELL LONG

Mr. PRESSLER. Mr. President, the Long family has been an institution in Louisiana politics for many, many years. Today it is my privilege to pay tribute to the retiring senior Senator from Louisiana, RUSSELL LONG. After having served 38 years in the Senate, he is leaving this distinguished body to enjoy a much deserved retirement.

Senator RUSSELL LONG has a very impressive career and is held in the highest esteem by his friends and colleagues. After receiving his law degree in 1942 from Louisiana State University and practicing law for a few years, he was elected to the U.S. Senate in 1948 to finish the term of John Overton, who died while in office. Six successful reelection bids followed RUSSELL LONG's introduction to the Senate—a powerful recognition of his hard work for the citizens of Louisiana and the Nation. He also served as the Senate majority whip from 1965 to 1968.

Senator LONG is renowned for his accomplishments as chairman of the Senate Finance Committee from 1966 to 1980. His unquestionable mastery of the Tax Code helped to shape important tax reform initiatives, perhaps more than any other Senator. Two of LONG's many accomplishments as chairman of the Senate Finance Committee include the voluntary tax check-off provision that provides public funds to Presidential campaigns and the tax credit program for companies that offer stock ownership plans to their employees. He also worked tirelessly to implement tax policies to help the working poor.

During the 99th Congress, Senator LONG has held the prestigious position of ranking Democrat on the Finance Committee and on the Surface Transportation Subcommittee. The Select Committee on Ethics and the Joint Committee on Taxation also were graced with RUSSELL LONG's intellect and talent, and I am honored to have served with him on the Commerce, Science, and Transportation Committee.

Senator RUSSELL LONG is leaving the Senate, but his impeccable reputation as a warrior for the common person will not be retired. I join my colleagues in lauding this great man for his 38 years of dedicated work on behalf of a better, fairer nation. The world is a better place because of men like RUSSELL LONG, and the principles he advanced, and I extend my congratulations to him for a job well done.

TRIBUTE TO BARRY GOLDWATER

Mr. PRESSLER. Mr. President, one of the privileges I have enjoyed during my nearly 8 years in the U.S. Senate is working with the senior Senator from Arizona, BARRY GOLDWATER. As the 99th Congress draws to a close, this body will bid a fond farewell to a great man and a great patriot. I would like to take a few moments to reflect briefly upon Senator GOLDWATER's impressive career.

From 1930 to 1967, he was a member of the U.S. Army Reserve and the Air Force Reserve. Senator GOLDWATER began his political career in 1949 when he was elected to the Phoenix City Council. In 1952, he was elected to the first of two successive terms in the U.S. Senate. Senator GOLDWATER did not seek a third term when he won the Republican candidacy in the Presidential election of 1964. He returned to his position of U.S. Senator from Arizona in 1968 and has held that office ever since.

Throughout his tenure in the Senate, Senator GOLDWATER has adhered sincerely to his political philosophies and worked hard to fulfill the goals he set for himself. When he became chairman of the Commerce Subcommittee on Communications in 1981, he continued to carry out his belief in less government by working toward the removal of excessive governmental bureaucracy from broadcasting. Similarly, he has carried out his interest in and dedication to our Nation's military personnel and his conviction in the need for a strong national defense through his chairmanship of the Senate Armed Services Committee.

He is justifiably proud of his service to Native Americans through his active leadership on the Indian Affairs Committee.

I have been fortunate to have had the opportunity to serve on the Commerce, Science, and Transportation Committee and the Small Business Committee with such a distinguished and respected Member of this body.

One of the highlights of my association with him was his visit to South Dakota with me in 1984. South Dakotans strongly supported him and continue to regard him with the highest respect and affection, as I do.

Senator BARRY GOLDWATER has devoted his life to the service of his country and I applaud him for his unfailing and successful efforts. While we will miss BARRY GOLDWATER's presence greatly, the ideals and principles he espoused will continue to guide the Senate and constantly remind us and future generations that the greatness of man arises from faithful commitment to those noble values.

TRIBUTE TO CHARLES MCC. MATHIAS, JR.

After 18 years in the U.S. Senate, Senator CHARLES (MAC) MATHIAS is retiring to devote his keen skills to teaching and practicing law, as well as spending more time with his family. This body is honored to have claimed MAC MATHIAS as a Member, and the citizens of the State of Maryland are fortunate to have been so conscientiously represented. I personally have enjoyed working with my colleague from Maryland, and it has been a pleasure and an education to serve with him on the Foreign Relations Committee.

MAC MATHIAS is famous for his concern for justice and equality for the needy and disadvantaged. A staunch advocate of civil rights legislation, he also has been a leading supporter of many social programs, such as the Job Corps. His knowledge of the law and the Constitution has always guided him when Senate business presented him with difficult decisions. Senator MATHIAS fought to keep the ever-growing defense budget in perspective, and searched tirelessly for ways to bring an end to the escalation of the arms race.

CHARLES MATHIAS began his illustrious career with the study of law. After receiving his law degree from the University of Maryland in 1949, he spent a year as assistant attorney general of Maryland, 4 years as city attorney in Frederick, and 2 years in the Maryland Legislature. His political career expanded to the national level where he served in the U.S. House of Representatives from 1961 to 1969, and in 1968 he was elected to the U.S. Senate.

Senator MATHIAS is completing his Senate service as chairman of the powerful Rules and Administration Committee and as a valuable member of the Governmental Affairs, Judiciary, and Foreign Relations Committees. His dedicated service in Congress also culminates in other leadership positions, as chairman of the Joint Committee on Printing and as one of the vice chairmen of the Joint Committee on the Library.

I congratulate this learned scholar on his outstanding and distinguished performance as a U.S. Senator. MAC MATHIAS's life and leadership in this body have been characterized by intelligence and compassion. After leaving the Senate I hope he continues to find his path filled with the same success and good fortune that have marked his career among us.

FOCUS ON LIBYA

Mr. DENTON. Mr. President, much concern has been expressed in the news media over the reported administration deception plan to help destabilize the regime of Mu'ammar Qadhafi in Libya. While we applaud the determination of the administration to take effective action to bring to an end Libya's outrageous behavior as a prime sponsor of international terrorism, we must take issue with the judgment that any alternative to Qadhafi would be better for U.S. interests.

Mr. President, such a judgment obscures the high probability that were Qadhafi to be toppled as a consequence of U.S. actions, his most probable immediate successor would be Maj. Abdel Salem Jalloud. Jalloud has long been identified as Moscow's man in Libya. Thus, to facilitate Jalloud's rise to power may well mean the ultimate transformation of Libya into a Soviet base on the southern flank of NATO.

Mr. President, I have an advance copy of the October issue of "Focus on Libya" which points out most clearly that while the United States has focused its attention almost exclusively on the terrorist antics of Qadhafi, he has been working aggressively and astutely to destabilize Egypt, and establish a commanding influence in sub-Saharan Africa, a region of vital strategic importance to us and our allies.

Mr. President, there is substantial cause for concern over the apparent failure to develop an acceptable alternative to Qadhafi beforehand, rather than precipitate Qadhafi's downfall and trust to serendipity to prevent a Soviet-backed takeover. As observed in the article I have referred to, "it would be a tragedy if the seeds of empire that Qadhafi has so carefully planted in strategically important Africa were to be harvested by the Soviet Union, aided and abetted by a United States that couldn't quite see the forest because of the trees."

Mr. President, I ask unanimous concern that the attached article entitled "Focus on Libya," by Dr. Martin Sicker, be placed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FOCUS ON LIBYA—OCTOBER 1986

WHOSE DECEPTION PLAN?

The strong media reaction to the revelation in the Washington Post on October 2 of a secret Reagan administration deception plan to destablize the Qaddafi regime focused entirely on the question of whether Washington was providing disinformaton to the American press. Completely ignored were the grave implications of the premises of the plan as outlined in the memorandum by National Security Advisor Admiral John Poindexter to the President in preparation for the meeting of the National Security Planning Group.

Poindexter's memo stated: "Most intelligence estimates conclude that in spite of new tensions and Gadhafi's own shock, depression and impaired performance following the April 14 raids he is still firmly in control in Libya." The memo noted further that while there were risks involved, "the benefits of a successful policy demand that every appropriate effort be made to achieve our objectives." Finally, the memo stated that the purpose of taking steps against Qaddafi was to deter terrorism and ultimately to "bring about a change in leadership in Libya . . . *any alternative leadership to Gadhafi would be better for U.S. interests and international order*" (emphasis supplied).

This judgement clearly indicates a serious failure to grasp the realities of the Libyan situation. While any alternative to Qaddafi might indeed reduce Libyan sponsorship of terrorism, or at least reduce its visibility, there is much more at stake in Libya than its support of terrorism. As pointed out in August's "Focus," the critical question is who will take control in Libya if Qaddafi is ousted. It is highly improbable that any of Qaddafi's leading lieutenants have the independent standing or capacity to assume control. Each of them is inextricably linked to Qaddafi they all have Libyan blood on their hands and lack the charisma necessary to exercise unchallenged control of the country. What this means is that if Qaddafi is toppled, his successor will need substantial support from the outside. At the moment, only the Soviet Union is in a position to render such support. As has been pointed out previously in these pages, Qaddafi's longtime second-in-command, Jalloud, would probably move to seize power in the event of his collapse, in conjunction with the other remaining original members of the Revolutionary Command Council and with the backing of the Soviets and the East Germans who continue to have their hands on Libya's internal security apparatus.

While the desire and the will to strike back at international terrorism is commendable, prudence dictates that the longer range consequences of such action be thoroughly understood. The phenomenon we are concerned with is state-supported terrorism, and equal attention must be given to the "state" aspect of the problem. It would be a pyrrhic victory to stop Libyan-backed terrorism by precipitating the overthrow of Qaddafi and in the process swing that strategically located country more firmly into the Soviet orbit. A Soviet dominated Libya would have a dramatic impact not only on the security of the Mediterranean and NATO's southern flank, but also on the future of Africa.

The United States should move decisively to provide a political alternative to Soviet proxy control of Libya, rather than precipitate Qaddafi's downfall and trust to seren-

dipity to prevent a Soviet-backed takeover. Such a takeover would hardly "be better for U.S. interests and international order."

Terrorism, and state-sponsored terrorism in particular, is indeed a most serious problem and significant steps must be taken by the international community against both its perpetrators and backers. However, the Reagan administrations' focus on Libya in this regard is overdrawn. It has obscured not only the fact that the primary sponsors of international terrorism today are Syria and Iran, but also that it is Qaddafi's sponsorship of radicalism that far overshadows in importance his involvement in terrorism per se. Indeed, one could make a persuasive case that Qaddaffi's support of some of the more outrageous terrorist incidents over the past several years are part of his own deception scheme, calculated to draw the attention of the United States away from his more historically important moves in Africa and elsewhere. After all it is only a little more than two years since President Reagan felt compelled to publicly embarass France into taking action in Chad to prevent the collapse of the pro-Western government and the conquest of the country by Qaddafi proxies backed by Libyan troops.

While the United States seems to be preoccupied with Libya's role in terrorism, Qaddafi has been moving aggressively to alter the political map of sub-Saharan Africa, a region of immense strategic importance to the West.

SUDAN: A HIGH PRIORITY TARGET

Even as the Sudanese prepared to go to the polls on April 1 of this year, in the first multi-party election in 18 years, there were already clear signs that Libyan political influence in the country, on the rise since the overthrow of Jaafar Nimeiri a year earlier, had already reached dramatic dimensions. A report from Khartoum on March 29 by Radio France International observed, "it is clear that Libyan influence has taken on proportions much larger than what has been imagined abroad, and that the future Sudanese regime will be closer to the Libyan regime than the current one."

In mid-March, the Sudanese Defense Minister General Usman Abdullah and Prime Minister Dafaalah Djazouli visited Tripoli and concluded a defense agreement. Libya promptly lent the Khartoum government two TU-22 medium range bombers which were immediately used in attacks upon the southern Sudanese rebels. On April 17, obscured by the uproar over the U.S. attack on Tripoli and Benghazi a few days earlier, the Washington Post reported that,

"Greasing its entry with free oil, foreign employment and, most recently, shipments of military equipment, Libya has transformed its image from pariah to powerful patron . . . . In recent years, the United States has been willing to commit more resources to Sudan than to any African country south of the Sahara. According to a senior western diplomat here, the spending is intended to guarantee that Sudan is a pro-American buffer 'of a million square miles that Saudi Arabia and Egypt don't have to worry about.'

"But after a year of head-to-head competition against Libya, a well-placed western official conceded that the Americans' buffer 'has lost a lot of its resiliency. It was Libya that Sudan was supposed to be a buffer against. Now there is a cat among the pigeons.'

"Sudanese officials and western diplomats agree that there is a widespread public feeling in Khartoum that the United States has abandoned the government here in its time of need as civil war escalates in the south against rebels armed and supported by the Ethiopian government.

"Libya, in the meantime, has lent Sudan at least two Soviet-made bombers that have flown raids against southern towns held by rebels of the Sudanese People's Liberation Army. A senior western diplomat here said the United States was never asked by Sudan to provide bombers for the war, but he added that such a request would have been turned down.

"The hostilities between the Reagan administration and Qaddafi have fueled northern Sudanese concern over what they see as anti-Arab intentions of the United States.

"Sudan's defense minister, Lt. General Osman Abdullah, recently described the U.S. confrontation with the 'brotherly Libyans' as part of an American campaign in the region 'that is really against Arabs.'

"'The Americans' timing, in the case of Sudan, is most unfortunate,' a senior western diplomat here said. 'For at the same time as the U.S. is more critical than ever of Qaddafi, Sudan's relations with him are warmer than ever. When Reagan plays to his domestic audience, he loses the people of Khartoum.'"

On September 9, Qaddafi spoke to a rally at Omdurman while on an official visit to Sudan. Among many other points of great interest he asserted:

"There must be a resumption of the call for Arab unity under the banner of Arab nationalism, with all strength and force. We must be prepared to change the map of the Arab homeland. Time will be working against us if we hesitate in realizing this demand . . . A union must be established immediately between Sudan and Libya. Any force from among the people that opposes such a union must be identified, exposed, and fought because it is the enemy of this nation, its future, and its aspirations. Unity o' brothers, at the present stage is not an emotional demand, but it is a necessity, a necessity for survival, a necessity for our survival . . . Unity is the only way by which we can confront not only the United States and Israel and also famine, drought, disease and underdevelopment. Come and take Libya's oil and Sudan's Nile, and let us mix them together for the Libyan and Sudanese peoples."

Qaddafi amplified on this at Khartoum University on September 13:

"I call for the establishment of a union between the two countries. Any action other than unity is a waste of time and a blurring of the issue, and will lead to dangers in the future. There would be danger from pan-Arabism and our existence if Arab unity is not established. Now the atmosphere is suitable for establishing a union between Sudan and Libya. Regardless of the time needed for the establishment of a union, there are huge potentials between the two countries. We can achieve economic integration and benefits for both peoples. Libya has oil and oil derivatives, cement and chemical industries, and 2000 km of coast on the Mediterranean; Sudan has the Nile and rain. Sudan has a large population; Libya has only a small population. Sudan is on the Red Sea and is in the heart of Africa; we are close to Europe and Sudan is close to Africa. This is a great thing. Both countries could complement each other. There are many things we need from Sudan, and Sudan needs things from Libya."

QADDAFI'S STRATEGY

Qaddafi's reach for Sudan has very dire implications for both Egypt and sub-Saharan Africa. With regard to Egypt, Qaddafi is committed to undermining the already shaky rgime of Hosni Mubarak and overturning the Camp David Accords. His elusive goal remains the integration of Libya and Egypt, the leading country of the Arab world, into a new Arab empire. Since he cannot attack Egypt frontally, he is pursuing a strategy of applying pressure through Sudan which controls the head waters of the Nile, Egypt's lifeline.

The transformation of Sudan into a Libyan appendage would isolate Egypt in Africa and threaten its very viability. It would also provide a means of resolving one of Libya's chronic resource problems, the lack of adequate water to sustain a self-sufficient agricultural capability, a problem made worse by the gross mismanagement of Libya's water resources by the revolutionary regime. The optimum way of achieving this would be, as noted in Cairo's Al-Ahram on March 29, 1984, by "the digging of a canal from Lake Nasser to the Kufra oasis and the building of a pipeline from Kufra to Tobruk and from Tobruk to Tripoli, the Libyan capital to carry fresh water from the Nile." On August 7, 1985, Qaddafi reaffirmed this idea in an interview with Cairo's Al-Ahali:

"I believe that the Arab nation can become a paradise. It can become one powerful state. I imagine that it is possible to link the Nile to the great man-made river in Libya, that the Libyan and Egyptian deserts can turn green, and that the western desert can yield fruits and become a green carpet . . . I would imagine that Lake Nasser will be linked to al-Kufra, the source of the great man-made river. Will we not thus create paradise on earth?"

Failing Egyptian acquiesence, Qaddafi would divert the Nile from Sudan to Kufra. This would extend the necessary canal by several hundred kilometers, but would be quite feasible given Qaddafi's willingness to expend the required sums for construction.

However, the key to Egyptian compliance with Qaddafi's wishes lies in the Sudan. Ten days after Nimeiri's ouster, Qaddafi warned:

"Any regime in Sudan that is hostile to Egypt can harm Egypt . . . For who really needs the other? Sudan or Egypt? Egypt needs Sudan. Then Egypt should be the one attached to Sudan, which could impose on Egypt anything that Sudan wants. Because in the final analysis, it is Sudan that can choke the Nile and stop the Nile's resources and dominate it. How can Sudan, which controls the resources of the Nile, be subservient to Egypt which needs it? . . . We believe, however, that the situation will be redressed . . . and that Egypt will become attached to the Sudan . . . This is because Sudan controls the resources of the Nile and Egypt needs Sudan."

While it is unquestionably true that a hostile Qaddafi-dominated regime could strangle Egypt by blocking the Nile, it is also inconceivable that Egypt would sit still for such a threat to its life line. Surely any serious attempt to tamper with the flow of the Nile to Egypt should provoke an Egyptian military intervention. However, it seems that Qaddafi is prepared to gamble that Mubarak is in no position to intervene in Sudan, given the rising concern over the viability of his government. On the other hand, failure by Mubarak to mitigate the growing rhetorical threat to Egypt's life

line, which may after all only be a plausible ploy to pressure Mubarak, could help bring him down. By seeking to extend a controlling influence over Khartoum, Qaddafi is engaged in a very high risk game which could engulf the whole region in conflict.

As suggested, however, getting at Egypt is only one of Qaddafi's aims in Sudan. Another of equal if not greater consequence is to become the dominant influence in all of sub-Saharan Africa. An entrenched position in Sudan would enable Libya to capitalize on its investments in Uganda and the small states of Rwanda and Burundi, providing a direct wedge from Tripoli to the very heart of Central Africa. As noted by Intelligence Digest (September 24, 1986): "Gaddafi's route southwards lies either through West Africa or East Africa. He tried hard to force his way into West Africa through Chad but was brought to a halt principally by Nigerian opposition and active resistance, including Nigerian military aid to Chad. The further result was Nigerian determination to keep Gaddafi out of the entire West Africa, and an unwritten West African anti-Libyan alliance, but de facto without doubt, now exists. That left East Africa, of which Uganda is an integral part, offering also easy access to Kenya and Tanzania as well as Zaire."

On his return from his tour de force at the Nonaligned Movement summit in Zimbabwe, Qaddafi stated on September 14:

"Regardless of the sacrifices and the battles won and lost, after a number of years passed, we finally came out the victors in Uganda. We defeated our enemies, the racists such as Obote, the fascists such as Obote, the fascists and the agents of colonialism hostile to the revolutionary policy and to the Jamihiriyah. Thousands of Ugandan fighters welcomed me in Uganda. They were trained in Libya. They are the fighters who entered Kampala and liberated it from the enemies of the Jamahiriyah, enemies of the Ugandan people, at the top of whom is our friend Museveni, who was in Libya. We used to meet with him and struggle together to liberate Uganda, to recover this position; it has been recovered. Now Uganda is a semi-jamahiriyah, its system is revolutionary-popular; people's congresses and people's committees have been established in every village, and the formation of revolutionary committees has begun. All of this needs time to emerge and be firmly established. A new jamahiriyah, in fact, has started to be formed in East Africa—i.e. Uganda—which at one time was a hostile post to us and in which we fought. They thought they had won the battle; however, in the end it was we who have won the long struggle in Uganda."

What Qaddafi appears to be concocting is a far-flung Libyan-dominated Arab-Muslim empire with an African colonial system which can be exploited to serve the needs of the imperial center—Libya. Thus, in reference to the states of sub-Saharan Africa, Qaddafi observed:

"All those countries are rich; they are not poor and do not need charity but need joint programs between them and the people of the Great Jamahiriyah so the Libyan Arab people and those countries would benefit. They are countries very rich with all the materials needed by Libya, and which it is importing from countries very far away, sometimes from colonial markets. These materials are abundant and only need to be exploited in Sudan, Uganda, Ethiopia, Zimbabwe, Tanzania, Burundi and Zambia."

Finally, in a remark pregnant with geopolitical significance, Qaddafi stated that "from Bab al-Mandeb, from Yemen and Aden to Ethiopia and Sudan and to Libya, from the Arabian Sea to the Mediterranean, all these have become forces allied with each other. In fact colonialism was pinning hopes on Sudan in breaking this axis and this bridge, which links Aden with Addis Ababa and Tripoli in a single chain of allied liberated peoples."

There can be little question that the removal of Qaddafi from power by virturally any means is necessary and it is in the interests of the free world. However, who takes his place is critical. It would be a tragedy if the seeds of empire that Qadddafi has so carefully planted in strategically important Africa were to be harvested by the Soviet Union, aided and abetted by a United States that couldn't quite see the forest because of the trees.

TOWARD AN ENDING OF MARTIAL LAW ON TAIWAN AND OPENING OF POLITICAL PROCESS

Mr. DENTON. Mr. President, last week the President of the Republic of China, Chiang Ching-kuo, gave a remarkable interview to the Washington Post. He discussed widely and forthrightly each of the major issues facing the Republic of China.

During the course of the interview, the President discussed steps toward ending martial law on Taiwan, a move which he indicated would be consistent with the enormous economic maturity which Taiwan has gained in the past several decades.

President Chiang Ching-kuo also addressed the complex question of legalizing new political parties on Taiwan. The President offered the view that he would support legalization for parties which subscribed to several fundamental national premises. These premises include: the three principles of nationalism, democracy, and social welfare advanced by Dr. Sun Yat-sen; anticommunism; and noninvolvement in the Taiwan independence movement.

Mr. President, every nation in the world possesses a fundamental framework within which political debate and disagreement take place. Without this framework of shared commitment, one simply does not have a nation. In the United States, for example, our Constitution provides this structure. All political issues must be settled within the bounds and procedures of the Constitution. Even the act of amending the Constitution must occur in a fashion which is prescribed by the Constitution itself.

How would we view an individual or a group which set itself apart from this fundamental structure and which did not recognize its authority? How would we view a State which denied its citizens a republican form of government? How, in fact, did we view States which proposed to secede from the Union? We fought a bitter civil war over this latter question.

Mr. President, what Chiang Ching-kuo is attempting to do is to define the broad premises of the political life of the Republic of China. He is open to further developments in the evolution of a broad political consensus. At the same time, he is sensitive to the need for these developments to occur in a way that is consistent with the overall security and preservation of the nation.

Mr. President, I believe that President Chiang Ching-kuo's interview merits the attention of all colleagues. For that reason, I ask unanimous consent that the interview, as well as several articles about it, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CHIANG ENVISIONS CHANGE FOR TAIWAN

(By Daniel Southerland)

TAIPEI, TAIWAN—Chiang Ching-kuo, the president of Taiwan, is an affable, chunky, round-faced man not given to dramatic gestures or public muscle flexing.

When it comes to tough issues, Chiang usually lets his prime minister or others fight the day-to-day battles. They take the flak. The smiling, unruffled Chiang seems above it all.

But the benign-looking Chiang, the eldest son of the late president Chiang Kai-shek, is now fighting to bring limited changes to Taiwan's authoritarian political system. If he succeeds in doing half of what he promises, the changes could prove to be dramatic over the long run.

In the end, those changes may require every bit of political muscle Chiang can exert.

Thanks partly to its economic success, Taiwan has reached a political turning point. The 76-year-old Chiang has been pressing for reforms that would include not only the lifting of martial law but also the end to a longstanding ban on organized political opposition.

The opposition to reforms from the right wing of Chiang's ruling party is so strong that only a leader of his standing is likely to be able to bring even the beginnings of meaningful change.

To get his way, Chiang is having to apply quiet but steady pressure. The main resistance comes from some of the elders within his own party and from leaders of the military as well as the police and intelligence organizations.

The problem for Chiang, it would appear, is to give the more than 80 percent of the population that is native Taiwanese a greater voice in affairs, but to do so without creating instability or a real loss of power.

Opposition politicians and Taiwan human-rights activists, some of whom have spent time in prison or seen their publications repeatedly censored, are skeptical.

You Chiang, a founding member of an opposition party formed two weeks ago in defiance of the ban, said this week that he detects nothing more than a change of tactics by the president. Another opposition leader calls it "old wine in a new bottle."

No one expects major changes before the Dec. 6 legislative elections. Even while lifting martial law, the ruling Kuomintang, or Nationalist Party, is expected to propose a

new national security law that could be nearly as stringent, critics say.

But some critics grudingly acknowledge that taboos are being dismantled. An opposition politician who dared even talk about lifting martial law or forming a new party might have found himself under arrest a few years ago.

Some critics also recognzie that the opposition to change is such that unless Chiang Ching-kuo puts his strength and prestige on the line, little is likely to happen.

Chiang is clearly not aiming for anything like western-style democracy. The Kuomintang is organized along Soviet lines, with a Central Committee at the top and party cells below.

But Chiang has been trying to move the island, as opposition politician You Ching describes it, from "hard authoritarianism" to "soft authoritarianism."

Chiang's motives seem to include a desire to create a more broadly based political framework that would, in theory at least, provide a more stable base for Taiwan's remarkable economic progress once the president leaves the scene.

Because of health problems and his advanced age. Chiang may also be thinking of his place in history. He may have an eye on Taiwan's image—none too good in some parts of the world because of past crackdowns on opponents. And Chiang must realize that once he goes, no leader is likely to have the standing required to make the changes he is now pursuing.

Chiang's likely successor, Vice President Lee Teng-hui, an agricultural economist and native-born Taiwanese, is widely liked but lacks Chiang's experience and influence.

All of this matters much more than it might seem at first glance to the outside world. The island may look like a mere dot on the map, but its more than 19 million inhabitants have turned Taiwan into a major exporter. Its location, not far from China, Hong Kong, Japan and the Philippines, adds to its importance.

In Peking, Chinese leaders watch every move Chiang makes. They appear to be more comfortable with the idea of dealing with Chiang, anticommunist that he is, than with his successors.

If Chiang's current strategy works, Peking will be facing a more broadly based and thus more complicated political entity on Taiwan. The president's successors may be even less interested than he in Peking's proposals for "reunification" with the mainland.

Chiang is apparently encouraging political change, in the meantime, not only for reasons of his own but also because of pressure coming from three directions—from his opponents, from an expanding Taiwanese middle class that wants more representative government, and from the younger members of his own political party. In their view, Taiwan's politics are a few decades behind its economics.

But while the long-range change may prove dramatic, Chiang can move only gradually in the short run. The president cannot make a move without consulting the Kuomintang patriarchs.

Chiang long ago brought the generals under control, but he cannot ignore them. There unhappiness is reflected in a Defense Ministry publication, the Youth Daily News, which over the past two weeks has published 25 editorials and commentaries against legalizing the new opposition political party.

Chiang said in an interview last week that the termination of martial law would mean an end to trials of civilians in military courts.

Most observers have concluded that an end to martial law will also mean diminished influence for the Taiwan Garrison Command, which now carries out much of the censorship. But censorship and restrictions on opposition activities in elections may continue under other laws.

Chiang has shown in the past that he can deal with tough opponents in the military and police. But even if he can get the military and police to work within a new system, he will face challenges from the political opposition. The newly formed Democratic Progressive Party includes some members who favor Taiwan independence, a taboo for Chiang.

Those who support Taiwan independence question the legitimacy of mainland-born Chiang's rule and propose instead that Taiwan be governed by those who were born on Taiwan. Mainlanders make up little more than 10 percent ofthe island's population.

TAIWAN: THE WINDS OF CHANGE

More than ever, those are only words. Communist rule in Peking has been a fait accompli almost since 1949, the year the Red Army pushed the bedraggled Nationalist forces to retreat to Taiwan. But in the minds of the Kuomintang hard-liners who have ruled in Taipei since then, the struggle to reconquer the lost empire has never really ended. For more than a quarter of a century Chiang Kai-shek kept the country on a civil-war footing with his "Temporary Provisions Effective During the Period of Communist Rebellion," martial-law regulations forbidding the formation of political parties and giving the government nearly unlimited authority. Since the generalissimo died in 1975, his son, Chiang Ching-kuo, has ruled with the same authoritarian powers.

Now at the age of 76, Chiang has no doubt begun to reflect on the legacy he will leave behind—and he evidently does not like what he sees. As things stand now, his government is unable to meet the demands of Taiwan's increasingly pluralistic and educated population. Reforms may be the only way to guarantee stability in the future. Chiang is also apparently unhappy at the prospect that he might be remembered as a dictator, and he has orchestrated a remarkable outreach to his political opposition in recent months—remarkable in Taiwanese political terms at least. Last April he appointed a three-member committee from the Kuomintang (KMT) party to hold ground-breaking talks with the *tangwai*, Taiwan's opposition. In an interview last week with Newsweek and The Washington Post, Chiang confirmed publicly for the first time that he plans to lift martial law (box). The president said at one point that the government had "decided to terminate the emergency decrees."

That hardly amounts to a pledge to inaugurate a Western-style democracy in Taiwan. Chiang set no firm timetable for implementing the changes, and he made it plain that new national-security legislation will replace some of the old provisions of the emergency decrees. But if his vow to end martial law is not *derailed or compromised* it will institutionalize the concept of a legitimate opposition to the KMT's one-party rule. "We've never before had an organized political opposition," tangwai member Antonio Chiang said last week. "This will be an experiment." If it works, it will almost certainly lead to further political liberalization, a home—and perhaps, eventually, *to an end to Taiwan's four decades of enmity toward Peking.*

Whatever the outcome of Chiang's promise, the pressure of change on the KMT will only increase. Just three weeks ago a group of 135 opposition members dared to form what they are calling the Democratic Progressive Party (DPP). That was technically a violation of Taipei's martial-law rules—aimed, at the very least, at preempting the government's reforms, with an eye toward the Dec. 6 legislative elections. Internationally Taiwan's diplomatic isolation continues to grow; the list of countries still recognizing the KMT as the legitimate rulers of China has dwindled to just 23. And inevitably, many Taiwan residents have come to question the relentless fearmongering over the communist menace from Peking. In fact many business leaders see the mainland as a perfect market for expanding Taiwan's export-driven economy.

Against that background, Chiang has begun remaking his own image. The president suffers from diabetes and eye ailments, and last April he had an operation to implant a pacemaker. He moves slowly, with apparent pain, and his hands tremble. Still, Chiang's mind remains keen, and at last week's National Day festivities his message was firm even though his voice was feeble. "We must be united!" he rasped before crew-cut soldiers and banner-waving students. "Long live the Republic of China!"

In spite of the rhetoric Chiang began practicing the art of cautious compromise years ago. At the very time he assumed office he brought into the government scores of native Taiwanes, who make up 85 percent of the island's population. That incensed some of the mainland-born KMT establishment but helped assure the party's grip on the government. Now Chiang is apparently betting that the same pragmatic approach to politics will lead to a smooth transition, and continued KMT rule, after he is gone.

Lifting martial law makes the first step in that process. As Chiang explained to NEWSWEEK, the proposed modifications in the country's legal system will first go to the Legislative Yuan, the country's highest legislative body. Under the new laws, civilians will probably no longer be tried by Taipei's strict military courts. Such crimes as sedition—which currently has no precise definition in Taiwan—will likely be spelled out in detail. But the biggest change beyond doubt will be the legalization of political parties. Until now opposition candidates could run for office, but only as independents with no party affiliation. The whole campaign process heavily favors the KMT. (Two other legal—but insignificant—parties rarely, if ever, front candidates against the KMT.) In truth, the opposition has been given slight leeway this year. But in the past, members had to go through elaborate charades—calling their political meetings "birthday parties," for example—to avoid violating martial law.

Understandably, all this resulted in a deeply divided and fractious opposition. Although a few opposition politicians have been elected to national office, the largest turnout the opposition ever received was 27 percent. The 135 founding members of the DPP hope to begin changing all that. It remains unclear whether the government will give the fledgling party a chance. According to top KMT officials, the Army and right-wing party members wanted to arrest the DPP founders the day they issued their

manifesto. Fearing the international criticism that followed an opposition roundup after a bloody riot in 1979, party moderates managed to persuade the extreme rightists to back down. Chiang himself has tried to ignore the group as best he can, dismissing it as a "so-called party"—a convenient rhetorical side step.

MAXIMUM FLEXIBILITY

In fact, the government has apparently concluded that no quick action is the wisest response to the DPP. Last week Prime Minister Yu Kuo-hwa attacked the party during a session of the Legislative Yuan, warning ominously that DPP members would be "dealt with in accordance with the law." The following day Chiang cut a different tack, conceding that some KMT members might see the government's response to "certain problems" as weak. But he went on to say that in order "to attain more important goals, priorities should not be confused." Such deliberately mixed signals from the top give the government maximum flexibility on the DPP issue, and help keep the opposition off balance. If the DPP stirs up trouble, nothing will prevent a swift, hard crackdown. If the opposition sinks into its previous state of confusion, the KMT can probably ignore the DPP. "Let the opposition form their party," scoffed one young high-level KMT pragmatist. "They have little support, and we have nothing to fear."

Taiwan's economic prosperity helps support such bluster. Shortly after their arrival, the Nationalists cut an unspoken deal with the longtime residents of the island, reserving the fields of government and security for themselves but leaving the operation of business largely to the Taiwanese. Concentrating on low-tech exports, the country has built a robust $60 billion economy with almost no inflation or unemployment. The income of Taiwan's citizen, now an average of more than $3,000 annually, is more than 10 times the amount the typical mainland worker makes.

Still, prosperity has its price. Although wages in Taiwan remain low, especially when compared with those in the United States or Japan, such countries as Thailand and China now easily undercut Taiwan's labor costs on big international contracts. Such nations have begun to compete with Taiwan in the production of low-end consumer electronics, textiles and toys. Taiwan has had little success in upgrading its exports to more sophisticated products that rely more on technology than cheap labor. Spending for research and development remains alarmingly low. That, combined with a generally low investment rate, spells almost certain trouble for the future. And the very efficiency of the export machine has created problems. Last year, for example, Taiwan recorded a $13 billion trade surplus with the United States, its biggest export customer, touching off fears over a growing protectionist drive in Washington.

CREATURE COMFORTS

The economic miracle also has high social costs. Taiwan's growing middle class enjoys such creature comforts as refrigerators, color televisions and VCRs. Many also have money to spend on such pleasures as, say, foreign travel. The exposure to other, more liberal systems of government has prompted many people to ask why things cannot be as free at home. Economic achievement has also brought a sense of security in Taiwan's business community on the question of relations with Peking. China's 1 billion potential consumers are barely 100 miles away across the Formosa Strait. They seem natural customers for Taiwan's finished products and could in turn supply huge amounts of much-needed raw materials. "We must stop looking at the mainland as our enemy and start dealing with it as our strong competitor," says one daring young government official. Peking can't possibly swallow Taiwan without an international uproar, the argument goes, so why not put the past to rest and start talking?

The very question sets off panic among KMT stalwarts. Their entire lives have been constructed around a rigid policy known as the three noes—no negotiations, no compromise and no contact—with what they regard as the communist usurpers on the mainland. Even as he discussed the eventual end to martial law last week, Chiang remained adamant about Chinese intentions toward Taiwan. "They have not abandoned their desire to invade or incorporate us," he insisted. Indeed, Peking refuses to rule out a military solution to the Taiwan question.

However, the Chinese have also made very public and increasingly peaceful overtures aimed at reconciliation. Seven years ago Peking's Marshal Ye Jianying even announced a proposal for reunification that would have allowed Taipei to maintain its capitalist economy and its own military. The KMT rejected the offer out of hand, although that stance made Taiwan look like the stubborn party. Since then, Peking has continued its so-called smiling offensive, repeatedly reiterating the offer to establish a plan modeled on the "one country, two systems" settlement worked out with Britain over the future of Hong Kong. Taipei has rejected each proposal.

Yet cracks may have begun to appear in Taipei's resolve. Last May, after a pilot from Taiwan's China Airlines diverted a cargo plane to Canton, CAL representatives sat down with their counterparts from CAAC, Peking's state airline, and worked out an agreement for the return of two other crewmen and the $60 million Boeing 747. Taipei insisted the talks amounted to nothing more than "businesslike" dealings over "a single aviation case," but for the first time since 1949 the biggest of the three noes had been breached. In other, smaller ways, Taipei now gives a nod to unofficial contacts between its citizens and those on the mainland. A burgeoning unofficial trade with Chinese companies, conducted mostly through Hong Kong middlemen, accounts for more than $1.2 billion in two-way trade each year.

Although the government would never acknowledge it, Taiwan now has little choice in dealing with the China issue. Peking's extensive formal relations with foreign governments give it a distinct advantage in the elaborate game of international diplomacy. Still, Taipei has found dozens of ways to compensate for the loss of official ties. Contacts with Washington, which broke ties with Taiwan in 1979, fall under the purview of the Coordination Council for North American Affairs, an aggressive, well-oiled lobbying group. The United States, in turn, operates the American Institute in Taiwan, staffed by career diplomats who temporarily "resign" from the diplomatic corps to avoid ruffling feathers in Peking. Taiwan's assiduous courting of the Americans pays off; until recently, for example, the U.S. Congress made little fuss over the big trade imbalance with Taipei.

"UNOFFICIAL" FRIENDS

Such attempts to maintain good relations overseas has helped to assure Taiwan a significant reservoir of good will, albeit from "unofficial" friends. The foreign outreach is led by a coterie of young, mostly Western-educated advisers who surround Chiang. These young technocrats, says Lu Ya-li, a political science professor at National Taiwan University, "are not theoretic, but pragmatic," and their cleareyed approach to statecraft "does not reflect liberalism of any kind." A decade ago Taipei felt obligated to pull out of any organization that recognized Peking. Now, although the government denies that there has been an official policy change, Taipei has stopped such knee-jerk reactions, preferring to remain in those organizations. Since China was admitted to the Asian Development Bank last March, for example, Taiwan curtailed its participation but has not officially withdrawn.

There is little question about the source of such reforms. They are the will of Chiang Ching-kuo," says one longtime foreign resident to Tapei. "He wants to bequeath a stable and long-lasting system before he dies." Chiang has only recently begun preparing for his succession. In 1985 he ruled out the possibility of a "Chiang Dynasty," vowing that none of his children would run for president. But Chiang has yet to point to a successor as head of the KMT, where real power lies. Officially, should anything happen to Chiang, Vice President Lee Teng-hui will take over. The 63-year-old Cornell-trained agronomist is one of the first Taiwanese to reach such a high government position. He enjoys enormous popularity among Taiwanese, but has little support within the KMT and the powerful military. For that reason, says Taiwan University's Lu, "he will be a titular ruler only." Academics and opposition leaders expect some sort of collective leadership after Chiang dies.

The possibility of political change in Taiwan many make it impossible for Chiang to handpick a successor. The KMT, says tangwai member Antonio Chiang, is only moving "from hard authoritarian to soft authoritarian." Yet even he concedes that an end to martial law may signal a new beginning for the country. "Martial law has handicapped our thinking," Chiang says. "There was supposedly a civil war going on. Once you remove martial law, that mentality will have to go." Chiang Ching-kuo has no doubt considered just that-and the other repercussions that inevitably accompany reform. Now, in the autumn of his life, he has apparently concluded that the advantages of moving forward outweigh the risks of standing still.

TRIBUTES TO RETIRING SENATORS

SENATOR EAGLETON

Mr. SASSER. Mr. President, politicians are often criticized for speaking out on issues only when they know it's politically safe to do so. But I cannot recall anyone ever accusing TOM EAGLETON of such reticence. He is a man who is unafraid to speak his mind. More important, when he does he is usually right.

TOM EAGLETON came to the Senate when this Nation was bitterly divided over the Vietnam war. He could have

played it safe and stayed in the background on one of the most controversial political issues of this century. Instead, he became one of the most outspoken critics of America's involvement in the war. Senator EAGLETON believed in his heart and in his mind that America was in the wrong war, at the wrong place, at the wrong time; and he did everything in his power to extract us from that troubling conflict. In fact, his amendment to a 1973 appropriations bill effectively ended U.S. involvement in the Indochina war by cutting off all funds for combat activity in Cambodia and Laos.

TOM EAGLETON has displayed this remarkable talent for speaking out with a clear voice of reason time and time again throughout his 18 years in the Senate. He has never been one to lie low on matters of vital importance to the American people—whether it be the Vietnam war, civil rights, abortion, or school busing. His candor and forthright style have brought him much deserved respect and admiration from both sides of the aisle. No one, even those who disagree with him, can help but admire his enormous political courage.

I am going to miss TOM EAGLETON and I am sure the Senate will miss this extraordinary man as well. But our loss is Washington University's gain. The students at this fine St. Louis university will have the unique opportunity to learn from an experienced politician and 18-year veteran of the U.S. Senate who has not lost his youthful idealism and candor.

Thus, it is with mixed feelings that we say farewell to TOM EAGLETON. His presence in the Senate will be sorely missed. However, I take solace and comfort in knowing that TOM EAGLETON will be a living example of true statesmanship to his students at Washington University. I am confident that TOM's example will prompt others to follow his path of public service. And for that we can all be grateful.

SENATOR LONG

Mr. SASSER. Mr. President, with the closing of the 99th Congress, the Senate will lose one of its true legislative giants, RUSSELL LONG. Since his arrival in the Senate in 1948, RUSSELL LONG has been at the forefront of many important issues. Indeed, over a 36-year career of service in the Senate, RUSSELL LONG has witnessed a parade of critical events and issues in this Chamber. Many times he has been at the center of these historic debates.

Impressive as this record of service is, we all know what RUSSELL LONG will be best remembered for. For over 20 years, RUSSELL LONG has played a central role in shaping tax policy for this country. It is these significant contributions to the critical area of tax policy for which RUSSELL LONG will stand out as a historic figure for years to come.

RUSSELL LONG became the chairman of the Senate Finance Committee in 1966. He served as chairman of this important and very influential committee for the next 15 years. During that tenure and in the capacity of the ranking minority member on the Finance Committee, RUSSELL LONG has molded many a tax bill.

Among the host of tax bills that RUSSELL LONG has seen during his years in the Senate, several major issues stand out. Some suggest that tax reform was a new idea this year. Well RUSSELL LONG has helped push through the Senate not one, but three separate tax reform bills. In 1969, 1976 and again this year, RUSSELL LONG has shephered tax reform measures through this Chamber. In addition, he can point with pride to his landmark efforts in establishing the Revenue Sharing Program.

The one issue for which RUSSELL LONG will be most fondly remembered is employee stock ownership plans. Quite literally, Mr. President, RUSSELL LONG is the father of this important concept. It is through ESOPS that we actually see democratic ownership of capital throughout America. It is through ESOPS that more Americans are able to more fully reap the fruits of their labor.

ESOPS are saving thousands of jobs across America. They are giving American workers a greater sense of pride and interest in their work. Something we desperately need as we strive to compete in today's world markets. As I pointed out earlier this year, ESOPS are doing much for many workers in Tennessee and other States.

For championing this important program, we are all indebted to RUSSELL LONG. We will miss his leadership on this and many other important issues of the day. I join my colleagues in thanking RUSSELL LONG for all that he has brought to this body. I wish him well in the days ahead.

SENATOR HART

Mr. SASSER. Mr. President, when we pay tribute to a retiring Senator, we normally reflect on the end of a political career. However, I feel sure the remarks my colleagues and I make about GARY HART in the final days of this session will not show up in the final chapter of his political career. Senator HART is too talented, too energetic, and too interested in America's well-being to remove himself permanently from the political arena and the policymaking process.

GARY HART exemplifies a generation of Democratic leaders who feel unbound by the ideas and the policies of the past. Building on the base within our party established by Franklin Roosevelt and John Kennedy, he has helped rekindle a sense of compassion and commitment to innovation. His 1984 Presidential campaign helped inspire the belief among young and old Americans that the Federal Government should have a positive impact on people's lives.

But GARY HART has brought more than vitality and new ideas to the political process. In his 12 year career in the Senate, he has developed a level of knowledge and expertise on the issues that is unsurpassed. Nowhere is his expertise more evident than on defense issues. On the Armed Services Committee, he is an acknowledged expert on military tactics and strategy. He helped found the military reform caucus and has become one of the Senate's most knowledgeable spokesmen on arms control.

GARY HART's years of public service will likely not end as the 99th Congress comes to an end. But, even in the unlikely event that that the Senator from Colorado does retreat forever to a private life in his beautiful State, he can take great pride in his major accomplishments over the last 12 years. He has done much to set the agenda of his party and the Nation for years to come.

I congratulate Senator HART on an excellent career in the Senate and thank him for his outstanding service to the American people.

JAPANESE JOINT VENTURE JOURNALISM

Mr. HEINZ. Mr. President, it has been some time since I took the floor to criticize the Japanese for the one-sided nature of our trade relationship and their failure to act to rectify current inequities. I might say that my voluntary restraint on harsh criticism or even on incendiary rhetoric was based in part on my belief that limiting public attacks on the Japanese might encourage the resolution of some of our serious and outstanding trade problems. But now I have learned that the Japanese would rather manipulate American attitudes about Japan through public relations gimmicks than deal with our concerns seriously.

The best evidence of this comes from a recent article in the Japanese daily Mainichi, which details the plans of the Japanese Government's Ministry of International Trade and Industry, [MITI] to hire American reporters to promote the image of Japan as a benevolent ally and trading partner.

I repeat that: To hire members of the American news media to manipulate American opinion in favor of the Japanese.

Apparently, the Ministry of International Trade and Industry has decided to pursue a joint venture in journalism, one that would paper over with propaganda the serious differences be-

tween our nations instead of trying to resolve them.

It seems that now that the Japanese have established themselves in every market, MITI and the Japanese are going to market a "new and improved" image of Japan, a Japan that is supposed to really care about its major trading partners.

Mr. President, I am not buying that, and I do not think the American people are either. Leaving aside the implications this effort to manipulate American public opinion has for the integrity of American journalism, by even proposing such a scheme the Japanese demonstrate to this Senator that they are not interested in taking the difficult steps necessary to promote improved and equitable and fair trade relations. Instead, MITI likes the present state of affairs and wants to paper over any disagreements.

Japanese filmmaker Akira Kurosawa pointed out in his award winning film, "Rashomon," that reality is a matter of perception and perspective. It is past time that the Japanese realize that our perception of Japan will not change until our perspective changes. The only way this can occur is if the Japanese pursue, in good faith, an improved, balanced trade relationship. A $200,000 investment in the fourth estate will not undo the damage of a $70 billion trade imbalance. As Americans, we value action over words. If MITI and the rest of the Japanese Government were smart, they would invest in real improvements in Japan's relationship with the United States, rather than trying to buy a positive image by buying American journalists and opinion makers.

Mr. President, I ask unanimous consent that the article detailing this ill-inspired effort be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"FRICTION REPORTERS" TO BE ASSIGNED TO US; MITI PLANNING "LOCAL HIRE" IN 10 STATES WITH STRONG CRITICISM AGAINST JAPAN

MITI will consolidate a "grass-roots information network" in the US to cope with the intensifying economic friction. It is a local-reporter system, which MITI will carry out through the Japan External Trade Organization (JETRO) as a new project from the next fiscal year, and MITI will conclude contracts directly with US local economic-world persons and will take up live voices closely connected with local communities. In the initial year, MITI plans to establish it in ten states, including states which have deep-rooted criticism against Japan. In this connection, MITI has submitted a budget estimate of 30 million yen.

MITI and JETRO are both entertaining a sense of crisis, because Japan's trade surplus with the US this year is likely to break the level of 70 billion dollars. Also, there is self-reflection upon the fact that the Japanese side was driven into difficult negotiations, due to its lack of US local information, on such occasions as the inter-governmental semi-conductor consultations since last year, and partly because of this, MITI and JETRO decided to set about hiring foreign reporters for the first time.

As reporters, MITI and JETRO have already prepared a listing of enterprise managers, executive officials of local chambers of commerce and industry, lawyers, and newspaper editorial staff members in local areas. MITI and JETRO are planning to have one reporter in each of ten states, including Missouri, Oregon, and Michigan, in which JETRO has no branch office.

Making a contract with Japan is a side-job for reporters, but the Japanese side is aiming at collecting information about local enterprises while making use of their "faces." MITI and JETRO are attaching expectations on them, while thinking that it will be possible to probe the background of the US Congressional bill for retaliation against Japan and it will also be possible to collect information for the purpose of helping Japanese enterprises advance into the United States. Also, MITI and JETRO will try to persuade American citizens who are angry at the expanding of the trade imbalance, by asking these reporters to conduct PR on Japan's market-opening measures.

THE 10TH ANNIVERSARY OF NORTH PACIFIC FISHERY MANAGEMENT COUNCIL

Mr. STEVENS. Mr. President, the North Pacific Fishery Management Council recently celebrated its 10th anniversary. The North Pacific Council is one of eight regional councils which develop management plans and policies for our domestic fisheries.

Attendees at the historic 10th anniversary celebration were treated by the presence of a very special person, Elmer Rasmuson. As the first chairman of the North Pacific Fishery Management Council, Elmer began a tradition of effectiveness and dedication which subsequent chairmen were able to continue. Elmer delivered insightful remarks on his impressions of the first 10 years of the regional fishery management process which provide us with valuable suggestions for future improvements.

Mr. President, I request that the following remarks by my good friend Elmer Rasmuson be submitted for publication in the CONGRESSIONAL RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY ELMER RASMUSON ON THE OCCASION OF THE 10TH ANNIVERSARY OF THE NORTH PACIFIC FISHERY MANAGEMENT COUNCIL

Dr. Calio, Chairman Campbell, ladies and gentlemen: This is a birthday party and, having just returned from Harvard's 350th, I am very conscious of the occasion. It is a point in time for both a recollection of the past and appraisal of the future.

Now, looking backwards and forwards at the same time is not only hard on the neck but is probably the most difficult task in public service—keeping the right balance.

As we observe this decennial, it is indeed appreciated that a comprehensive review of the council system is taking place to consider needed improvements.

The council system, created under the Magnuson Act, is unique in that for the first time in the history of our nation, the Federal Government entrusted management decisions to a lay body and on a decentralized basis. It did this in response to the needs of the great and growing diversity of fishing interests. Recognizing that the differences were legitimate and complex, there was nevertheless a necessity to provide for some apparatus that would mold them in an agreeable course of action.

Conceptually the council system is ingeniously simple. It funnels through the wants and wisdoms of all the interested parties on a localized basis because this is where the decision impact falls. The necessary coordination with state responsibilities is provided for in council membership and selection. Then to recognize national and international interests and maintain some degree of unity in policy, a review procedure is provided for in Washington.

I doubt many people would want to scrap this arrangement. It is only in the administration of the Act that disagreements and sometimes friction arise. The overall success depends upon the degree of cooperation extended by the participants.

I share the feeling that the early success of the North Pacific Council was due to the training and association so many of us had on the International North Pacific Fisheries Commission. Most of us had worked together. Stability and longevity on a council is not adequately appreciated. We had accepted the biologists' findings as a foundation. We were raised in the principle of extended jurisdiction because that is basically the meaning of the abstention line. We understand the importance of working together as between states and the Federal Government and sovereign nations. In setting up the council, we adopted the advisory committee system that had worked so well under INPFC. In other words, when we organized the North Pacific Council, we hit the decks running.

Certainly the council concept is worth keeping. Because the acceptability of any legislative Act depends upon the men and women who administer it, the composition of the attendant officials in both Washington and the states is extremely important and should not be treated as political plums. Nor in council decisions is there any place for strictly parochial voting.

However, there are certain technical changes that can be helpful in achieving the desired cooperation. A shortening of the review time in Washington would be desirable. This can be achieved in two ways without weakening the benefits of the national overview. The first is by having the fishery and environmental authorities work earlier and more closely in the drafting of the management plans. The second is to have all reviews as concurrent as possible.

A second suggestion is to borrow a concept from our judicial system. That is to regard the council as the sole determinant of the management facts and leave the Washington review to matters of policy and law. This can be done if the recommended early participation in the development of a management plan is adopted.

A statutory distinction between voting and non-voting members on the council has always bothered me. If an individual is qualified for membership, he should actively participate in the deliberations and not just as an observer. If qualified to help

shape the dialogue, he should participate in the final decision process which is voting.

I have appeared before your Council as a member of the U.S. Arctic Research Commission. This Commission has no operational or funding authority but was created by the Congress to achieve a cooperation in Arctic research between the various cabinet offices, state and local authorities, indigenous peoples and foreign countries. Because the enabling Act defines the Arctic in such broad terms as to encompass the western coast of Alaska, including the Aleutian Islands, fishery research is of prime concern. As a matter of fact, the first agreed direction for joint research between the state of Alaska and the Commission is in fisheries. This is another vehicle for bridging the gaps between disciplines and line authorities.

My concluding comment is that we live in a shrinking world where separateness has ever decreasing importance. We must respect the integrity of diverse views but nevertheless achieve a working unity. In my experience, this is best accomplished by concentrating on long range goals for the greatest public benefit but administered with patience and through the use of informed common sense.

TRIBUTE TO J. BATES GERALD

Mr. THURMOND. Mr. President, I was saddened to learn of the recent death of my good friend J. Bates Gerald of Charleston, SC. Mr. Gerald was a fine man, who accomplished much in the service of his State during his lifetime.

He was born August 30, 1894, in Manning, SC, and earned two degrees from the Blackstone School of Law. Among his many enterprises, he was a very successful businessman, and retired president of North State Lumber Co.

Mr. Gerald was elected to the South Carolina General Assembly in 1928. During his brief term in office, he was instrumental in helping to create the State highway department, which later became the South Carolina Department of Highways and Public Transportation. He also helped to write the bonds bill which led to the paving of highways in South Carolina.

The achievement for which he was best known, however, was the founding of the South Carolina Republican Party in 1938. He was a dedicated Republican, not only serving as the chairman of the South Carolina party for 12 years, but paying for its certification; serving as chairman of the State delegation to four national conventions; and working as a member of the Republican National Committee for 8 years.

Mr. Gerald's warmth and good humor were constantly evident to those around him, to whom he was fond of saying that he had been a Republican when there were only two in the State, and he had lit a lantern and walked down Broad Street looking for a third.

Always active, he helped to organize the Veterans of World War I and the American Legion, and was a member of the Episcopal Church.

His political activities and his many personal attributes brought him numerous friends, including several Presidents. I will remember Bates for his integrity and energy, and his true kindness and concern for his fellow man.

I will always be grateful that I had the opportunity to know Bates Gerald, and I would like to extend my deepest sympathy to his fine family.

DEATH OF J. WILLIS CANTEY OF COLUMBIA, SC

Mr. THURMOND. Mr. President, on October 15, 1986, South Carolina lost one of its most outstanding citizens. J. Willis Cantey, a heavily decorated veteran of World War II and a dedicated citizen, died after a lengthy battle with cancer.

Willis Cantey was my good friend, a man in whom I had the greatest confidence. However, he was a friend to everyone in my State who knew him. His accomplishments, as a soldier and as a civilian, helped him develop a reputation as an individual who served his State and his Nation with honor and distinction in war and peace.

While his contributions to the fields of banking and financial management were very noteworthy, Willis Cantey is best known for his distinguished military service. At 25, he became the youngest battalion commander in the U.S. Army, serving in World War II and winning three Silver Stars for gallantry in action, four Bronze Stars for heroic achievement, a Purple Heart, the Legion of Merit for exceptional meritorious service, and the French Croix de Guerre.

He was later promoted to the rank of colonel and in 1981, retired from military duty. I had the high privilege and great pleasure in recommending Willis to be the civilian aide to the Secretary of the Army for my State in 1981, and he was reappointed to that post 2 years later. After resigning for health reasons, Willis served as civilian aide emeritus.

As a civilian, Willis Cantey fought hard for improvements in higher education and was one of the most public-spirited people I have ever known, serving on the South Carolina Ports Authority Board, the last 2 years as its chairman; and as director of the National Safety Council. His love for his State, his Nation, and his fellow citizens was boundless. So was the love and devotion he had his lovely wife, Nancy, and his devoted family.

All who knew Willis Cantey will miss him greatly. Our State, and indeed our entire Nation, have lost a true friend, a devoted patriot, a brave soldier, and distinguished citizen.

So that my colleagues might know more about the accomplishments of Willis Cantey, I ask unanimous consent that a newspaper story about his life be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From The State (Columbia, SC), Oct. 16, 1986]

COLUMBIA LEADER CANTEY, 69, DIES

Businessman, banker and much-decorated World War II hero James Willis Cantey died Wednesday at the age of 69.

Born March 3, 1917, in Columbia, Mr. Cantey was a son of John Manning and Elizabeth Childs Cantey.

Mr. Cantey, of 1400 Westminster Drive, joined Columbia Outdoor Advertising Co. during the 1940s and served as its president until 1958, when he became chairman of the board. In 1960, he was named president of Citizens & Southern National Bank of South Carolina. He served as chairman of C&S from 1971 until 1974, and later served as a director of the bank.

Mr. Cantey was a decorated combat veteran of World War II. At 25, he became the youngest battalion commander in the U.S. Army. He was later promoted to colonel. In 1981, decades after he retired from military service, Mr. Cantey was appointed the Civilian Aide for South Carolina to the Secretary of the Army. He was reappointed to the post in 1983. After resigning for health reasons, Mr, Cantey was made Civilian Aide Emeritus.

For his leadership in banking and financial affairs, his efforts to improve higher education, and for his work in the public interest, Mr. Cantey was awarded an honorary doctor of laws degree by the University of South Carolina in 1985.

His accomplishments and public service were praised Wednesday by Sen. Strom Thurmond, R-S.C., and James B. Holderman, president of USC.

"I am deeply saddened by the death of my good friend, J. Willis Cantey," Thurmond said.

"He was a man who served his nation with honor in both war and peace. South Carolina and, indeed, our entire nation have lost an outstanding leader."

Holderman said Mr. Cantey's death was a loss to Columbia and USC.

"From his childhood days when his father was part of the university family through his distinguished later years, Mr. Cantey was an important part of the Carolina community," Holderman said.

"We will miss the wisdom and keen intelligence he brought us through his active participation in a variety of university groups."

He attended the University of South Carolina, where he enlisted in the S.C. National Guard in 1935. He graduated and was commissioned as an infantry lieutenant in 1938. His unit was mobilized in 1940 as part of the 30th "Old Hickory" Division, which distinguished itself in Europe.

As an infantry troop leader in combat, Mr. Cantey was awarded three Silver Star medals for gallantry in action, four Bronze Star medals for heroic achievement, a Purple Heart, the Legion of Merit for exceptional meritorious service and the French Croix de Guerre (War Cross) for bravery.

At the war's end, Mr. Cantey joined Columbia Outdoor Advertising Co., which he later purchased.

He joined C&S bank as assistant to the president in 1958.

During his tenure with C&S, the bank grew substantially. In 1958, loans were $56 million, deposits were $110 million and total assets were $121 million. There was a net operating profit of $950,000. C&S then operated in five cities.

By 1974, loans totaled $344 million, deposits were $464 million and assets were $604 million. There was a net operating profit of $5,170,000. C&S Corp. had been formed, with seven subsidiaries operating in four states. There were 76 branches in 25 cities. Mr. Cantey was credited with negotiating seven mergers.

While with C&S, Mr. Cantey served as president of the S.C. Bankers Association and president of the association's Past Presidents' Club. He was a member of the Banking, Monetary and Fiscal Affairs Committee of the U.S. Chamber of Commerce and served as a director of the Federal Reserve Bank of Richmond, Va., Charlotte Branch, 1967-72.

The Southern Banker named him "Banker of the Year" in 1971.

Mr. Cantey also was active as a director of various companies in South Carolina, including The State-Record Co., Standard Savings and Loan Association, Liberty Life Insurance Co. and Carolina Freight Carriers with headquarters in North Carolina.

He served for eight years on the board of the South Carolina State Ports Authority, acting as chairman for the last two years of his tenure. He also served as director of the National Safety Council.

Mr. Cantey was committed to advancing higher education in South Carolina. He was a founding member of the USC-Business Partnership Foundation and served as chairman and secretary-treasurer of the Investment Committee of the foundation. He served on the President's Council at USC Alumni Association, where he was awarded the Algernon Sidney Sullivan Award in 1970 and the university's Distinguished Alumni Award in 1984.

Mr. Cantey also was active in civic affairs. He served as president of the United Way campaign in Columbia and worked to bring business and investment to his home city. The Columbia Chamber of Commerce named him Ambassador of the Year in 1972, and he was chairman of Capital City Development Foundation.

He was a member of the Cotillion, the Centurion Society, Forest Lake Club, the Summit Club, the Palmetto Club, Sigma Alpha Epsilon, Omicron Delta Kappa, Kappa Sigma Kappa, Beta Gamma Sigma, the Kiwanis Club and Trinity Episcopal Cathedral.

Surviving are his wife, the former Nancy Moorer, formerly of Walterboro; three sons, James W. Cantey, Jr., Joseph M. Cantey and John C. Cantey; a brother, Dr. William C. Cantey, all of Columbia; a sister, Mrs. Stewart W. (Elizabeth C.) Heath of Spartanburg; grandchildren; and nieces and nephews.

Services, with military rites, will be held at 4 p.m. today in Elmwood Cemetery, conducted by the Very Rev. John E. Banks and the Rev. Susan Heath.

Memorials may be made to the Charity of one's choice.

THE NOBEL PRIZE FOR ECONOMICS

Mr. DOLE. Mr. President, I want to bring to the attention of my colleagues an outstanding decision by the Royal Swedish Academy of Sciences. The Academy announced this morning that the 1986 Nobel Prize in economics will be awarded to Dr. James Buchanan of George Mason University.

This is an extraordinary and groundbreaking decision, and not just for reasons of civic and regional pride. Of course, we are proud that Dr. Buchanan is working right here in the Washington area. But more importantly, his work has vital lessons for those of us in the Congress, lessons that have profound significance, as the Nobel award recognizes.

POLICY AND POLITICS

James Buchanan has made a big, big difference in the way we look at economic policy and at the political leaders who shape that policy. His unique contribution has been to focus our attention on why political leaders come to certain decisions, and on the forces that shape political decisionmaking. In other words, Dr. Buchanan emphasizes the rules that shape the political game, and goes on to analyze what those rules mean for economic policy.

When you think about it, Mr. President, that is a logical, commonsense way to looking at economic policy—but it was not obvious at all, until men like Jim Buchanan moved so-called public choice theory to a leading position in the world of economics. And for those who think this is a matter only of interest to the academic world, let's look at some of the implications Dr. Buchanan's work has for the work we do in the Senate, each and every day.

THE WAY WE ARE

Jim Buchanan tends to believe that politicians vote their self-interest, and that more often than not, a politician's self-interest won't be the best thing for the public as a whole. For that reason, the Buchanan approach is to look at ways to restrain the actions of politicians.

And that, Mr. President, is what constitutions are all about. The Bill of Rights is probably the most celebrated text in the world that serves to restrict the power of the Government, in order to protect the freedoms we all enjoy. In the sphere of economics, Dr. Buchanan's public choice approach is the driving force behind the campaign for a balanced budget amendment to the Constitution—a discipline we dearly need, in the opinion of this Senator. And public choice analysis also is keenly relevant to initiatives like the line-item veto, the Gramm-Rudman law, and limits on tax rates and on the scope of taxation in general.

These are not just important economic issues, Mr. President. They are critical pocketbook issues for each and every American. That's why the work of Jim Buchanan and his colleagues is so important to all of us, and to the American voter. Dr. Buchanan has changed the way we try to shape economic policy; in my view, our thinking on economic subjects is sounder as a result of his work.

I congratulate Dr. James Buchanan on his award—and I congratulate the Nobel Prize Committee for its exceptionally good judgment.

TRIBUTE TO SENATOR MATHIAS

Mr. LAUTENBERG. Mr. President, I rise to bid farewell to the senior Senator from Maryland [Mr. MATHIAS] who will retire from the Senate after this session of Congress.

MAC MATHIAS has served three terms in this body. His record is one that has the respect not just of the people of Maryland, whom he has so ably represented, but also of the Nation as a whole.

Mr. President, during the years he has served in the Senate, political tides have changed, Presidents have changed, and control of the Senate has changed. But, in the face of these changes, Senator MATHIAS has stood firm in his convictions.

MAC MATHIAS has stood firm in support of civil rights and civil liberties. He has stood firm in support of the Constitution and the separation of powers. He has stood firm in support of a judiciary that is above reproach. In defense of his convictions, he has at times stood alone in his party. At times he has stood alone in the Senate.

His convictions have cost him opportunities that would otherwise have been his. But, they have won him a place in history.

Mr. President, I have worked most closely with MAC MATHIAS on issues concerning intellectual property. That is an interest of mine. It is one I have shared with the Senator from Maryland.

As chairman of the Subcommittee on Patents, Copyrights and Trademarks, Senator MATHIAS has helped revise and modernize our law, to protect innovative ideas, and to preserve to their authors the fruits of their invention. The effective protection of intellectual property provides a critical incentive to invest in research and to expand our knowledge. There are few steps we can take that can have a greater impact in maintaining America's economic competitiveness than rewarding and encouraging technological innovation.

Just in the years I have served with Senator MATHIAS, he has played a leading role in the enactment of legislation to create a new form of intellectual property protection for semiconductor masks; to extend the patent term for pharmaceuticals, to compensate for time lost because of regulatory review; and to strengthen the law against counterfeiting of trademark goods.

I have worked most closely with Senator MATHIAS in our continuing effort to revise the law on process patents. Our goal has been to make it an infringement of a U.S. process patent to make, use, or sell a product in the United States made outside the United States through the unauthorized use of a process patent. Our legislation would bring American law in line with that of our major trading partners. It would provide important protection against foreign piracy of our most innovative processes.

Mr. President, Senator MATHIAS' persistence and wisdom brought the legislation through Senate passage last week. And if, as I hope, the Congress completes action on the legislation and sends it to the President for enactment, it will be due in large part to the work of the Senator from Maryland.

Mr. President, I will miss the Senator from Maryland. The Nation will miss him as well. I will miss his thoughtfulness, and his insights. His service to the Senate and his service to American ideals has been and will remain a model to us all.

RETIRING SENATORS

TRIBUTE TO SENATOR BARRY GOLDWATER

Mr. INOUYE. Mr. President, it is with great difficulty that I say farewell to one of our great statesmen and one for whom I hold a deep and abiding affection. As he departs this great body of the Senate, the gentleman from Arizona—the Honorable BARRY GOLDWATER—leaves with us a magnificent friendship, his unfailing good humor, and his wise and excellent counsel.

He leaves us uplifted and so much the better for having served with him. He leaves the U.S. Senate a classier institution than when he entered it.

And what does he leave the rest of America?

Voting rights for 18-year-olds.

Overseas and absentee ballot voting rights.

Awareness of the plight and special status of the American Indian and ultimately all native Americans.

His wisom as a student of history and an abiding belief that the "Past is Prologue."

Comprehensive DOD reorganization.

Grand Canyon Park Enlargement Act.

I cite these few, of the many achievements of the great Senator because I know they are especially dear to his heart.

Above all, we will be left with his inspirational gifts of courage and devotion.

I recall graffiti scribbled many years ago during his Presidential campaign which gave the chemical formula for gold and water: "AU H20=formula for courage."

At a time during the Vietnam-era when it was politically disastrous, he dared to pique the conscience of America and questioned our involvement in the war. At a time when it was not mandatory for him to resign from Senate office to run for the Presidency, he set precedent by his own example in order that his beloved State of Arizona would not be served less as a result of his higher political aspirations.

I will miss the courage of this great man in the Senate. Whether we fought together or on opposite sides he was always honorable, always courageous and always my friend.

A TRIBUTE TO SENATOR GARY HART

Mr. INOUYE. Mr. President, I wish to pay tribute to a great American and a fine leader, GARY HART, who in the coming days will be ending an outstanding 12-year career in the U.S. Senate.

While Senator HART's insight and leadership will be solely missed upon his departure from this body, I do not feel great sadness at this occasion, as I feel he is moving forward to new frontiers of service for this Nation. I am certain that although we are losing a strong and creative voice in the Senate, the country will continue to gain from Senator HART's vision and leadership.

During his tenure in the Senate, GARY HART has been an inspiration to us all through his thoughtful and creative approach to matters of national importance. By going beyond stereotyped responses and established positions, Senator HART has opened our eyes to fresh and promising avenues of endeavor. His willingness to make hard choices and take tough but necessary positions has forced us all to recognize and address the new challenges this Nation faces in the modern world.

In his work on the Armed Services Committee, Senator HART has delved deeply into the military policy of the United States, looking for the most effective approaches and strategies for the defense of our Nation. By broadening the debate on military strategy, he has encouraged the military leaders of this Nation to consider different options and prepare for different scenarios. In this role, Senator HART's contribution has been invaluable and his dedication to the task extraordinary. Indeed, it was demonstrative of GARY HART's commitment that, at the age of 44, he joined the Naval Reserve to serve the country in yet another capacity.

In conclusion, I know I am joined by all my colleagues in wishing GARY HART the best as he leaves the Senate to pursue other avenues of public service. Although his absence will leave a void in the Senate, I hope that he will continue to provide us with the benefit of his wisdom and insight when issues of supreme national importance are debated in these Chambers. I am certain GARY HART will continue his keen interest and involvement in these matters, and I feel the Nation will be the greater for it.

TRIBUTE TO SENATOR CHARLES MCC. MATHIAS, JR.

Mr. INOUYE. Mr. President, every 2 years, the press of business at the end of another Congress and the happiness of returning home is overshadowed by the sad task of saying farewell to some of our colleagues. This year is especially difficult since the U.S. Senate is losing one of its most respected and prominent Members, Senator CHARLES MCC. MATHIAS from Maryland.

It has been an honor and a privilege to work with Senator MATHIAS over the last 18 years, and I view his departure with deep regret. Popular with his constituents, esteemed by his colleagues, and admired by his staff, MAC MATHIAS contributed greatly to the business of this Nation. Democrats and Republicans alike sought his counsel and benefited from his advice. During his tenure on the Foreign Relations Committee, the Rules Committee, and the Judiciary Committee, our Nation's legislation passed through the hands of an individual who had a keen sense of the rule of law, fairness, and the place of the United States in a modern world. He made significant contributions to both our domestic and foreign policy, a fact rewarded by the people of Maryland who ignored party registration and returned this man to the Senate by ever-widening margins. As chairman of the Rules Committee, he has also made unique contributions to the Senate by overseeing its transition to the electronic age. His constituents and fellow Senators would have welcomed him back next year, but he has chosen new horizons, a decision we can all appreciate and admire.

Mr. President, I look forward to hearing about the future accomplishments of this great man and trust that I may benefit from them. The U.S. Senate will not be the same without MAC MATHIAS, and I join my colleagues in wishing him Godspeed.

SENATOR RUSSELL B. LONG

Mr. INOUYE. Mr. President, in 1948, Harry Truman was President of the United States, the Nation was in the process of recovering from World War II, and RUSSELL B. LONG, at the age of 30, was elected to the U.S. Senate from the State of Louisiana.

In the 38 years since that time, the world has changed a great deal, but at least one thing has remained constant, the people of Lousiana have had the wisdom and good fortune to return RUSSELL LONG to the U.S. Senate. Few who have served in this body during

this period of time would question that wisdom.

This year my good friend has decided to deprive the people of Louisiana of that privilege. While none can fault that decision, I personally look upon it with great regret because RUSSELL LONG has come to represent not only what the Senate was, but what it might be at its best.

Included among the values that RUSSELL LONG's senatorial career has manifested is a commitment to maintaining the dignity of this body and comity among its Members. He has relied for his substantial success, not upon image creation or demogagory, but rather upon knowledge, courtesy, respect, and patience. These values and traits reflect the Senate that RUSSELL LONG has believed in and constantly tried to make real. By these traits and values he has earned the respect and trust of every Member of this body.

To those of us who have had the privilege of serving with him between 1965 and 1980, RUSSELL LONG will be remembered as the chairman of the Senate Finance Committee. No chairman has ever had a better grasp of his subject matter or greater ability to efficiently and effectively manage a complex pastiche of interests and personalities. And as ranking minority member of this same committee, no one would deny that his abilities and knowledge have been invaluable in our current tax reform efforts.

The State of Hawaii owes a special debt to fairness and foresight of RUSSELL LONG. For in 1959, a concern regarding the abilities and inclinations of our multiracial society was shared by many Senators. RUSSELL LONG took the time to learn and had the courage to enable Hawaii's statehood bill to be considered by the full Senate. In the minds of those of us who were involved in Hawaii's quest for statehood, Senator LONG's courage and fairness was firmly established. And in the 27 years since, I have never been disappointed.

Mr. President, by the retirement of RUSSELL LONG, this body will lose the accumulated wisdom and ability gained by almost four decades of hard work and commitment. I hope that as we attempt to fill this void, we do so in a manner which reflects the genuine affection and great energy that the great Senator from Louisiana invested in this institution and Nation.

TRIBUTE TO SENATOR PAUL LAXALT

Mr. INOUYE. Mr. President, I wish to express my sentiments on the impending retirement of PAUL LAXALT from this body. We will lose a respected and able Senator, and I will lose a dear friend.

Senator LAXALT and I have both served on the Appropriations Committee throughout the past 12 years of his service in the Senate. During that time we have on most occasions been on the same side of issues, but frequently found ourselves in opposite positions. I would speculate that our voting records are probably as divergent as any other two Senators.

I point out our contrasts as an illustration of how the U.S. Senate can and should serve as a deliberative body that places the interests of our Nation above political differences. Where we have differed, we have done so within the Senate rules of discourse and debate that encourage the full discussion of legislation, and done so within a spirit of collegiality that promotes rather than hinders the work of this body.

Senator LAXALT has left his imprint in the legislative record in domestic and international affairs. His sensitive handling of a diplomatic mission to the Philippines earlier this year helped to avoid bloodshed while preserving United States relations with this ally. He is a man of his word; an individual of integrity.

Mr. President, I am certain that we have not seen the last of PAUL LAXALT. Wherever his future endeavors may lead him, I wish to express my good wishes to PAUL LAXALT and the sense of loss that will be felt by his departure.

UNMASKING THE FACE OF TERROR

Mr. DENTON. Mr. President, as many in this body may know, the Security and Terrorism Subcommittee on the Committee of the Judiciary, has held numerous hearings on terrorism related security issues. One series of hearings has dealt very specifically with the Palestine Liberation Organization and its support for, and practice of the most heinous terrorist acts.

In the past 20 years, the PLO has fashioned a cult of righteous violence, an ideology of terrorism. Terrorism has not only been justified as a military necessity but has been glorified as a reclamation of Arab dignity. But where is the dignity of taking innocent lives, whether it be the murder of Leon Klinghoffer aboard the *Achille Lauro*, the murder of 15 innocent bystanders in the Rome and Vienna airports or the murder of five passengers aboard TWA flight 840, including an 8-month baby and a yet-to-be-born child or the murders of helpless worshipers in an Istanbul synagogue?

It is clear that the PLO is a terrorist organization. As then candidate Ronald Reagan stated on September 3, 1980, "President Carter refuses to brand the PLO as a terrorist organization. I have no hesitation in doing so." During the same campaign, GEORGE BUSH noted:

> The PLO—and let there be no doubt this—is nothing more or less than international Ku Klux Klan, pledged to hatred, violence and the destruction of the values and free institutions we hold dear.

More recently, on April 8, 1986, Attorney General Edwin Meese declared:

> We know that various elements of the PLO and its allies and affiliates are in the thick of international terror. And the leader of the PLO, Yasser Arafat must ultimately be held responsible for their actions.

Referring to the fight against terror, Mr. Meese states:

> You don't make real progress until you close in on the kingpins.

Mr. President, there is no mistake about it, Yasser Arafat is one of the kingpins of world terror. He is ultimately responsible for terrorism committed by Fatah the main wing of the PLO directed at Americans, Israelis and other innocent citizens. For example:

According to the public record, Arafat's wing of the PLO and affiliated factions have been responsible for the murder of at least 35 Americans, the wounding of at least 40 Americans and the kidnaping of at least 6 Americans.

Arafat is directly linked, through his top aides, to such major atrocities as the murder of U.S. Ambassador Cleo Noel, the *Achille Lauro* piracy and the murder of Leon Klinghoffer, and the terror campaign of the Black September. Black September is nothing more than a non d'guerre for the PLO.

Over the past year, Arafat's anti-American threats have been explicit. On November 13, 1985, he stated:

> We are on the threshold of a fierce battle—not an Israeli—Palestinian battle but a Palestinian—U.S. battle. (*AL-Ahali*, 11/13/85).

This past January, Arafat reasserted his hostile position on the United States:

> The Arab "strategy should take into consideration that . . . the enemy is the same, be he Israeli or the United States." (*KUNA*, 1/3/86).

Arafat has continued to call for the destruction of Israel through terrorism. Recently, he reiterated these orders;

> I don't simply want, I demand, more (commando) operations, and more resistance against this occupation. (*Arab News*, 11/11/85).

As President Reagan noted in a July 8, 1985, address to the ABA:

> We must act against the criminal menace of terrorism with the full weight of the law, both domestic and international. We must act to indict, apprehend and prosecute those who commit the kind of atrocities the world has witnessed in recent weeks.

Mr. President, yesterday PLO terrorists struck again. They hurled hand grenades near the western wall of King Solomon's Temple in Jerusalem. These grenades were thrown at a group of 300 new Israeli Army recruits of the Givanti Infantry Brigade who had just completed a swearing-in ceremony at the wall, the last remnant of

the temple that was effectively destroyed by the Romans in 70 AD.

These grenades killed one civilian and injured 66 people gathered for the ceremony. Among those injured were 32 civilians, including 13 women and 7 children.

Full responsibility for this despicable attack was claimed by the military spokesman for the PLO from the Palestine Center in Cairo. He said:

> This heroic act confirms the decision on escalation adopted by the Palestinian leadership at its last meeting when it undertook to continue the policy of armed struggle against the Zionists and colonialist cancer throughout our Palestinian soil.

The PLO representative in Cairo, Tayat Abd Al-Rahim, told the French News Agency on October 15, that the decision under which the Jerusalem attack was carried out was taken by the Supreme Military Council of the Palestinian Center in Baghdad 10 days ago.

Mr. President, we must recognize the PLO for what it is—we must deny it acceptance or legitimacy at every turn. We should make every effort to close its office in the Nation's Capital and treat its representatives and leaders with the contempt and disdain they so richly deserve. This is an issue which I will continue to follow closely and I urge my colleagues to do likewise.

Thank you, Mr. President.

RETIRING SENATORS

TRIBUTE TO SENATOR HART

Mr. LAUTENBERG. Mr. President, with the retirement from this body of the senior Senator from Colorado [Mr. HART], the Senate will lose one of its most creative thinkers. But, fortunately, the Nation will continue to hear from the Senator. His will be a voice to be reckoned with in the next Presidential elections.

The Senator has distinguished himself as a critic of our Nation's military policy. He has been a leader in the so-called military reform movement. He has raised important questions about whether buying increasingly expensive and complex weaponry necessarily buys us a more effective defense. He has stressed the importance of high morale, cohesion, skill, and the readiness of our troops to successfully fight when called upon.

I have served with Senator HART on the Senate Budget Committee. There have been few voices in the Senate who have spoken more clearly about what this Nation's budgetary priorities ought to be. Senator HART has been an advocate for investment in this Nation's future. That means investment in education, science, and research. It means investment in the infrastructure upon which economic activity depends. We cannot leave the generations to follow impoverished by a mountain of debt. But, we cannot leave them impoverished, by failing to make the necessary investments, to equip them for the future.

To make these investments, we will need the people's approval, because they will bear the cost. That takes leadership of the kind that Senator HART has offered.

He has been willing to take tough political positions. He has proposed taxes to pay for the spending he believes we need. He has cautioned the Senate to resist the temptation to accept substitutes for the exercise of our own judgment. He was a leader in what, unfortunately, proved to be the unsuccessful opposition to the Gramm-Rudman-Hollings budget law.

Mr. President, the Senate will miss Senator HART's contribution to the development of our Nation's budget policy.

It will also miss his contribution to the development of an economic policy that will ensure this Nation's competitiveness. Part of that depends upon investments in science and education. Senator HART has proposed new approaches to enhance the education of our youth, to retrain our work force, and to encourage technological innovation. He has advocated a trade policy that is built on opening markets and boosting world economic growth.

Senator HART has consistently applied fresh insights and imagination to the problems this Nation faces. He has not been afraid to question the accepted wisdom. He has recognized that among our responsibilities is the responsibility to lead, to marshall the public's support for the choices that must be made.

We have known each other since 1972 when we worked together to support the Democratic nominee for President. History acknowledges the defeat of a candidate and the birth of an ideal that propelled GARY HART into the national spotlight.

Mr. President, while the Senate will be without Senator HART's voice, it is my hope that the Nation will continue to hear from him for many years to come.

TRIBUTE TO SENATOR LONG

Mr. LAUTENBERG. Mr. President, the end of the 99th Congress will mark the end of the Senate career of Senator RUSSELL LONG of Louisiana. Elected in 1948 at the young age of 30, Senator LONG has become a Senate institution. I know that for me, he has been a source of valuable advice and information about the Senate and its traditions.

Senator LONG is well known for his contribution to the formation of the Nation's tax laws. While I did not serve in the Senate during his tenure as chairman of the Finance Committee, he continued to make his mark from his position as ranking Democratic member. His important contribution to the development of the tax reform legislation that passed the Senate this year is viewed as a critical factor in its enactment.

RUSSELL LONG also has been a leader in the development, through the tax laws, of employee stock ownership plans. I was pleased to support his efforts to provide employees a greater stake in a company's success. When I was in the private sector, as chairman of a large company, I saw firsthand the benefits of employees investing in their company and sharing in its growth. The company gains from increased employee commitment and productivity and employees gain from their share in the company's success.

Mr. President, Senator LONG has accumulated a legislative record that is difficult to categorize. He is neither a conservative nor a liberal. But, he has cast key votes, perhaps unusual for a Senator from his region of the country, that have had a broader national impact than the impact of a single vote. I have heard my colleague from Hawaii, Senator MATSUNAGA, describe the key role Senator LONG played in securing statehood for Hawaii. Senator LONG also played a pivotal role in the debate on the ratification of the Panama Canal Treaty.

Mr. President, I would like to share with the Senate a personal story, that says a lot about the man, RUSSELL LONG. He and I happened to cross paths during separate visits to Israel. We met in Jerusalem where he was seeking understanding of the situation there. He later met with representatives of the Arab community. They were making a case on behalf of the Arabs in the West Bank. They argued that the Arabs there had just grievances. And the Senator from Louisiana was giving them a fair hearing. But, one Arab gentleman then sought to persuade the Senator that these grievances excused, if not justified, the violence that has plagued the West Bank. Terrorist acts continue to plague not only Israel but many nations of the world.

At this suggestion, Senator LONG responded. He responded by rejecting this justification for violence, as I think any Member of this body would have responded. But, he responded also as no other Member of this body could. He responded with the personal knowledge and experience of politically motivated violence. We can only hope that the eloquence of his message will someday be heeded.

Mr. President, RUSSELL LONG has enriched this body with his wisdom, his knowledge, his humor and his respect for its traditions and institutions. I have gained from his contribution and so has every present or past Member of the U.S. Senate who has served with him. While he will no longer serve in this body, I will continue to count him as a friend.

I wish him and his wife Carolyn well on their return to Louisiana.

200 MONTAGNARD REFUGEES TO RESETTLE IN NORTH CAROLINA

Mr. HELMS. Mr. President, admirable efforts are being made in North Carolina to assist a group of 200 Montagnard refugees who will be settling there in mid-November. The 200 Montagnards are originally from Vietnam but are coming to North Carolina from the Philippines.

Lutheran Family Services in Raleigh and Greensboro, with assistance from Catholic Social Services in Charlotte, is coordinating and administering the search for appropriate sponsors, willing volunteers, housing, jobs, and donations of cash and household goods. These groups will also oversee lessons in acculturation and training in English as a second language.

In assisting the Montagnards settle in the United States, the American people are fulfilling commitments made 25 years ago in the course of our military campaign in Vietnam. The Montagnard tribes were told that if they supported our efforts and the Government of the Republic of South Vietnam and denounced the Vietnamese Communists, we in turn would help secure their long-term interests.

Tragically, when the war ceased, the Montagnard people were left to suffer and die at the hands of the Communists on account of their support of our efforts to win freedom in Vietnam. Today, after 25 years, thousands of Montagnards continue to be persecuted by the Vietnamese Communists. The 200 Montagnards coming to the United States from the Philippines next month represent in a real sense the thousands of Montagnards who fought and gave their lives along with American and South Vietnamese soldiers. We, as a people and a nation, owe them a tremendous debt of gratitude. The Montagnards, in every sense, are Vietnam veterans.

Mr. President, many in North Carolina are ready and eager to make the upcoming resettlement of the Montagnards an answer to previously overlooked promises. But they cannot do it alone. They need the help of other Americans, and I urge my fellow citizens to assist in the North Carolina effort.

Readers of the CONGRESSIONAL RECORD who would like to help should contact Lutheran Family Services Refugee Program, P.O. Box 13147, Greensboro, NC 27415; telephone 919-275-2719.

OMNIBUS ANTIDRUG BILL

Mr. ROCKEFELLER. Mr. President, I applaud last night's action—the passage of what I hope will serve as the final version of major antidrug legislation. I urge my colleagues in the House of Representatives to also approve this bill and send it to the President for immediate enactment into law.

As I have said on the floor before, the American people expect, and should expect us to respond to the country's drug abuse problem. Thanks to the leadership on both sides of the aisle and in both bodies of Congress, comprehensive antidrug legislation was developed in the past 2 months swiftly and, for the most part, cooperatively.

I stress, again, that many of the proposals in this bill stem from years of thought and analysis—their chief proponents, however, had to wait for the time when drug abuse was recognized as an urgent priority by the President and Congress. Other measures represent more recent efforts to address aspects of the drug problem. But they also are the result of indepth research and deliberations. For example, I have been actively involved in drafting education provisions of this bill which were developed through a process of talking with numerous educators, experts in drug abuse prevention, and members of the Senate and the House about the best approach to take in supporting drug education programs nationwide.

Because of my overriding commitment to insuring the passage of this antidrug legislation during this Congress, I voted against cloture yesterday. I did so with the understanding that the failure to achieve cloture would provide the necessary signal to the majority leader and to the House leadership to persuade them to drop those measures which continue to stand in the way of enacting this legislation. It was clear to me that we were not going to pass a comprehensive drug bill with provisions that are strongly opposed by some of our Democratic and Republican colleagues. In my view, the responsible thing to do is to save the controversial questions for early next year when we have far more time for debate, discussion, and action. We must not—and thankfully, will not—miss the opportunity to adopt this year those measures which enjoy a consensus and should have a significant impact on curtailing drug abuse.

I sincerely hope that we will see the Anti-Drug Act become law in the next several days. Across the country and in my State of West Virginia, elected officials, law enforcement officers, school administrators, teachers, parents, and many others are anxiously waiting to know whether more Federal support is on its way to combat the drug problem. There is a great deal of work to do to curb the supply and use of illicit drugs—with this legislation, the Senate is taking essential action to assist in getting the job done.

STATE TERRORISM IN INDIA

Mr. HELMS. Mr. President, the recent assassination attempt against President Rajiv Ghandi of India has not yet been satisfactorily explained to the public. It is not clear whether the assassin was a deranged man, acting alone, as appears from the circumstances, or whether he was the instrument of a larger plot to destabilize the Indian Government. Nevertheless, the incident serves as a reminder that Mr. Ghandi has been marked for death by those who killed his mother, Indira Ghandi.

Political assassination is a technique of terrorism which is abhorred by all men, and is rightly condemned in the modern state. Indeed, even though Mrs. Ghandi's assassins were Sikh extremists, the Sikhs themselves condemn terrorism and do not support such measures in their struggle to retain their national and cultural identity. Nevertheless, the Sikh nation itself has been the victim of organized State terrorism by the Government of India. Thousands of Sikhs in India, innocent of any antistate plotting, have been brutalized, tortured, and even murdered by the State security apparatus in its attempt to assimilate and destroy Sikh religious, cultural, and economic achievements.

It is only recently that most Americans are coming to understand the distinctive achievements of the Sikh people, particularly with the arrival of many Sikhs to the United States where they have set to work with energy and dedication to become citizens of this country. A number of Sikhs have settled in North Carolina, and I have been impressed in talking to them by the ways in which they have contributed their formidable talents to our economic and political system.

Indeed, Mr. President, as Americans get to know the Sikhs better, they understand why the Sikhs have played such a dramatic role in the affairs of India, far out of proportion to their numbers. It is well-known that Sikh farmers have vastly out-produced their Hindu neighbors, that Sikh officers and soldiers have been the backbone of the Indian military, that Sikh civil servants have kept the Indian Government service operating despite the bureaucratic burdens imposed, and that Sikh lawyers and doctors stand at the very top of their professions. The Sikh people are strong for private property, individual initiative, and anticommunism.

These qualities have not made them beloved among their Hindu neighbors, for whom the vague, Third World, pro-Soviet socialism of Rajiv Ghandi

holds an inexplicable attraction. Moreover, the fact that the religion of Sikism believes strongly in one God, like the monotheism of Islam and Christianity, stands in stark contrast to the infinite array of Hindu gods and goddesses. Although Hindus and Sikhs have historically lived in mutual peace, the fact remains that the Sikhs are a national group, marked by their faith, and set aside from the religion and culture of the Hindu majority. The failure of the secular state to dominate the Sikhs economically and politically has made the Sikhs appear to be a threat to the unchallenged rule of the Congress I party, the party of the late Mrs. Ghandi and her son.

Indeed, the attempts of the Ghandis to exploit the Sikhs' economic power, to crush them politically, and to control and infiltrate the Sikh religion through penetration have accentuated the division. The Sikhs have reacted by asserting their individuality, greater autonomy and freedom in their affairs, and even political independence. It was Mrs. Ghandi's oppressive tactics which resuscitated and gave credence to the Sikh dreams of reviving the ancient Sikh republic of Khalistan.

In order to crush the Sikh spirit, Mrs. Ghandi conceived and organized the assult on the holiest of Sikh religious shrines, the Golden Temple in Amritsar, Punjab, on June 4, 1984. On that date, the Indian Army mounted an armed offensive against a group of Sikh militants who had taken refuge in the Temple. Despite the fact that thousands of religious pilgrims—men, women, and children—the Indian Army launched an artillery and tank attack that resulted in the death of thousands of innocents. Even the official version admitted by the Indian Government placed the dead at over 900. It was thought that the truth would never be known, since the Indian Government immediately placed Punjab under tight military rule, with a total news blackout. Only a handful of government-favored journalists were allowed in.

However, in April 1985, a factfinding team of five distinguished citizens, sponsored by the Citizens for Democracy, spent 13 days in the Punjab, taking firsthand accounts from eyewitnesses of what happened. The participants were Mrs. Amiya Rao, Mr. Aurobindo Ghosh, Mr. Sunil Bhattacharya, Mr. Teijinder Singh Ahuja, and Mr. N.D. Pancholi. The result was an account of atrocities, murder, and deception that amounted to a bill of indictment against the so-called democracy of India. Indeed, it is an account not just of repression, but of genocide.

It is noteworthy that only one of the five members of the team was a Sikh. The foreword was written by a distinguished Indian jurist, Justice V.M. Tarkunde. No sooner was the report published than the Indian Government, on September 13, 1985, immediately sought the arrest on sedition charges of the five authors, along with Justice Tarkunde. Justice Tarkunde wrote:

> The report * * * describes the inhuman barbarities to which the people of a particular community in Punjab were subjected. It is a terrible tale, carefully documented, of sadistic torture, ruthless killings, fake encounters, calculated ill-treatment of women and children, and corruption and graft on a large scale.* * * The story shows that although the relations between the Hindus and Sikhs in Punjab are not as cordial as before, the basic unity even in villages where the Hindus were in a hopeless minority * * * The story gives the impression that such extremism as one finds among the Sikhs is largely the result of the acute dissatisfaction and resentment caused by army and police atrocities.

Mr. President, this statement by Justice Tarkunde, gives the lie to the claim of India that it operates a democracy that protects minority communities. Indeed, I believe that the United States should reexamine its relationship with India, and use what influence we may possess to work for the restoration of freedom and civil liberties in that country.

Mr. President, I ask unanimous consent that the introduction to this report, "Oppression in Punjab," be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTRODUCTION

In 1923 the National All India Congress had rushed a three-member fact-finding team to Punjab when hundreds of Sikhs protesting against the illegal takeover of the Nabha State by the British administration were sent to jail without any warrant and tortured inside the Nabha prison. Jawahar Lal Nehru, who had headed the team and his two colleagues were also jailed after their arrival in Nabha; all the facts they had gone to find they found inside the jail itself. After India attained independence, however, the All India Congress lost this admirable zeal for probe for verification of truth; and with the passing of time fact-finding teams were considered by it as irrelevant, since the Congress party was in power and the "Congress Government could do no wrong"; thus even after the massacre of the Muslims in Moradabad, blinding of prisoners in Bihar, killing of political activists in Kerala, dishonour of a woman in the open marketplace of Bagphat by the police in broad daylight and now after the incredible violence in Gujarat, the Congress party has not thought it necessary to send a team to any of these places.

The onerous duty of reaching the oppressed people at their hour of trial, and equally important, to present after meticulous investigation a correct picture to the public of hundreds of men, women and children living under duress; has fallen on those who staunchly believe that no violation of civil liberty and human rights can be tolerated and democratic principles India swears by must be observed in action and not merely remain on paper. They do not share the comfortable notion that because a prestigious party is in power things cannot go wrong.

Now in 1984 after the Operation Blue Star, suddenly the Government clamped down on Punjab an undeclared emergency. Punjab was cut off from the rest of the country for days, censorship was declared, all press men-both foreign and Indian—were expelled. There was total black-out of news excepting what was told by the Government-run All India Radio and Doordashan, again bringing back the unpleasant memories of Emergency days. One heard that "there was unprovoked firing from inside the Golden Temple on June 1 and the Security Forces showed extreme restraint and did not fire a single shot, a variety of Government sponsored news items informed us how the Army took the Golden Temple complex with the utmost care bordering on reverence (they even took their boots off while entering the Temple), how the city remained untouched and undamaged. Without a scrap of evidence we were expected to believe that it was Pakistan which was responsible for the growth of terrorism in Punjab and there was a seizure of highly sophisticated weapons. In July 1984 the White Paper carried the story of a modern Arms Factory located inside the Complex. Days after when we were assured of calm and normalcy in the Temple, the expulsion order regarding the foreign press was not withdrawn and even the Indian Press was not allowed to move about freely, a guided tour was arranged for them as if Amritsar had been an enemy territory recently captured. It is only on July 26 this year that there has been a temporary and partial relaxation of the ban on some foreign correspondents to enter Punjab for the specific purpose of covering the Akali Dal meeting after the announcement of the award of Chandigarh to Punjab. Obviously the Government has a lot to hide still.

That the ruling party was anxious to hide something earlier also was amply clear from the Government vendetta which the foreign correspondent of the Associated Press Mr. Brahma Chellany had to face. He was under intensive interrogation by the Police and the Army Intelligence Bureau and was charged with sedition, because he was the first pressman of standing who exploded the myth of Army's "human behaviour" towards the "militant" Sikhs who were arrested, unturbaned, hands tied behind their backs and then at least 13 of them shot in cold blood; and it was again he who gave some tentative figure of the dead—both the Sikhs and the Army—since the number of the Sikhs killed "was not of much concern to the authorities and the number of the army men killed was, Chellany's 200 soliders dead had to be whittled down to 96, but Shri Rajiv Gandhi while addressing the Nagpur session of the National Students Union in September 1984 raised the figure to 700; so far it has not been contradicted; it could be like his other famous utterance that Sant Jarnail Singh Bhindranwale was a religious teacher.

Under these circumstances rumours held sway—so much so that thousands of Sikh soldiers far away from home imagined the worst and became emotionally overwhelmed and today are undergoing painful punishment for no fault of theirs excepting that they had placed their faith above everything else in the world.

Extremely harsh laws have been promulgated covering the whole country but ever since the President's rule in Punjab and particularly after the Army Action, some of

these laws have been devised specially for Punjab—to teach the Sikhs a lesson: Punjab Disturbed Areas Act, Chandigarh Disturbed Areas Act, Armed Forces (Punjab & Chandigarh) Act, Terrorist Affected Areas (Special Courts) Act, 1984. The Code of Criminal Procedure (Punjab Amendment) Act. All these have given enormous power to the police and the Army. How vindictive the Government meant to be towards the Sikhs would be clear the way Punjab Government violated the National Security Act (NSA) provisions. In a number of cases the serving of revocation order recommended by the Advisory Board was held up for over 2 months. According to a report the Home Department in a letter marked "secret" to the I.G.P. (Intelligence) stated that while forwarding orders of revocation of some detenues, to the District Magistrates, the S.D.M. should be asked to consider re-detention if necessary and "serve revocation and fresh detention orders simultaneously". The Home Department of the police were keen on over-ruling the opinion of the Advisory Board recommendation releasing an Akali leader. The Home Department also issued instructions to the District Magistrates to keep a "close watch" on all those who had been detained under NSA but released and "apprehend such people without any loss of time" if they were found indulging in prejudicial activities, a list of such released persons was sent to the District Magistrates. Even the Supreme Court's order to Punjab Government for the immediate release of 22 minor children and 4 women held in Ludhiana jail since Army Action in 1984 was not given effect to. The minors continued to remain in jail and later when released again under orders of the Supreme Court two were rearrested and sent to Nabha jail. It was obvious that in Punjab violation of the rule of law had become the norm. The District & Sessions Judge, Patiala, Mr. Cheema's report on torture of detenues in Ladha Kothi in Sangrur District was too shocking for words. (Annexure No. 5).

The Government propaganda was perfect. The Punjab had become a dangerous place because of extremists roaming around with rifles and pistols and hand-grenades ready to kill and had been fairly accepted by the people; reports of encounter deaths were fairly frequent—the dead were always the Sikh terrorists; though no particular communal incident could be reported, the media never tired of communalism in Punjab. One heard how thousands of Sikhs were demanding Khalistan but for some reason the Khalistan flag was never described though it had been hoisted by those who are out to destroy the country! Even the national dailies had succumbed to the propaganda. Though they had no means of verifying the truth—the Temple being out of bound, one of them wrote in an impressive editorial about "the very magnitude and calibre of the weapons found in the Temple complex, some of foreign origin, the eleborate fortifications discovered within the holy temple." Terms like "Command Headquarters", "trained guerillas" used in real wars were just dropped casually like small pebbles in reams of learned articles.

One had a tremendous urge to rush to Punjab, to Amritsar's Golden Temple, to other Gurdwaras where army action had taken place, to various towns and villages in Punjab and using one's eyes and ears try to reach the truth. The team was expected to find out if there had been any erosion of civil liberty after the promulgation of the oppressive laws and the Operation Blue Star; if the Army's mopping up operations which was extended to the villages—known by the pretty name "Woodrose" Operation, which had begun simultaneously with the Army Action in Golden Temple, had affected the lives of the rural people adversely; how far the communal virus had spread and if the Hindus were really migrating from Punjab out of fear of the Sikhs; how deep was the alienation of the Sikhs from the Hindus, and if Khalistan was just a vague concept or if people were preparing for a new State called Khalistan—for that would obviously mean a bloody civil war.

The report has attempted to cover mostly these points. It is based entirely on interviews, which were held mostly on village common, sometimes under a tree or in a school compound—but always in the open. It was only after talking to these people we realise with a shock that most of the facts on which we had been fed for the last one year through articles and the media were highly exaggerated or mostly false; many vital facts touching the common man's daily life had been totally suppressed. Truth, it is well known, is the biggest casualty in war and few may be aware or though aware would not like to admit that a war is on—an undeclared, unilateral ruthless war—against hundreds of innocent defenceless men and women in far-away tiny villages of Punjab from where their voices do not reach the rest of India.

Though many of these villagers were on bail and some had come out of jail only a couple of days before they met us, they showed amazing self-control and fearlessness and without any hesitation told us their story mentioning the names of police officers who had tortured them and had demanded and in several instances accepted huge bribes, if they wanted their women not to be molested or their sons and brothers not to be killed in "encounters."

The Report has gathered that in the name of curbing terrorism unabashed State terrorism has been unreleased on the Sikhs branding them as criminals, arbitrary arrests and McCarthy style witch-hunt, sadistic torture of Amritdhari [1] Sikhs and cold-blooded shooting down of youngmen in false encounters, are common occurrences; even village women are not spared, they are being harassed and beaten up, dishonoured and taken away to Police Stations or to unknown destinations and kept there, sometime for more than a month. It is all male-police—there was no sign of woman-police in the villages. The demand is that the women must produce their missing or absconding husbands and sons; women after women came to meet us from different villages to tell us what they had been facing for the last one and half year; fields are not cultivated, the police whisk away the servants, cattle is not fed, crops cannot be harvested; a woman saddled with children with no man in the house to help and all the time the police-fear haunting her is a common story in the villages.

The Army never made a list of the dead after the Operation Blue Star nor returned the bodies—so none knows whether these men who had gone to the Guru Parb on June 3 either as pilgrims or with gifts of corn for the 'langar'—are dead or have absconded for fear of being arrested and tortured. Swinging between hope and hopelessness, afraid of the police, in many villages women have locked up their houses and have disappeared; in Verka village, for instance, houses were not even locked—they were lying empty, deserted. The situation is really desperate and it will be surprising if the brutal torture by the police does not encourage retaliation and fresh violence and create fresh terrorists. People who had undergone terrible torture came to see us and described these to us in detail. With these gruesome details reminding one of the medieval days we are marching toward the 21st century. Who can tell what is in store? We have included some of these descriptions in our appendix for better comprehension of what the army and the police have been doing to our people. There is a distinct pattern in the atrocities committed by the police; repeated raids in a particular house, repeated arrests of a particular person, removal of his agricultural implements, carrying away of the women to some unknown destination, threats to set on fire the house and the crops, harassment of relations, and finally extortion of money. Amritdhari Sikhs are not "dangerous criminals" as the obsessed Army has declared, but the Amritdhari Sikhs are in danger—their fate is uncertain.

We have pointed out, perhaps for the first time and with proper evidence, that the story about the so called "highly sophisticated arms" which were used to fight back the Army is totally baseless. A number of responsible men and women who were inside the Golden Temple throughout the Army action, described to us how innocent people were slaughtered like rats—first letting them enter the Complex and then declaring the curfew which prevented them from going out—thousands were thus caught unawares; finally when the survivors were asked to surrender they were shot in cold blood; our photograph would show how the hands of men were tied at their back with their own turbans, some of whom were shot. The post mortem reports show how the bullets had pierced their bodies. The eye witnesses witnessed the use of gas by the Army, the pile of dead bodies on the 'parikarma', the arrival of tanks which some of them thought were the ambulance, the hovering of helicopter at night, throwing their search-light on targets which were bombed, the wanton destruction of the Akal Takht, the Research Library and the Museum, and finally the killing of the 4 Sikhs of the Bunga Jassa Singh Ramgarhia in the basement of the Akal Takht—Bhindranwale was not definitely one of them. Of these eyewitnesses some were arrested and one is still inside jail, one was on the point of being shot but was saved almost miraculously. The facts have exposed the Army's 'restraint' we heard so much of and have proved conclusively that the White-paper is after all not so white. We learnt for the first time with amazement that the Red Cross

[1] Amritdhari. This tradition of Amritdhari was started by Guru Gobind Singh when he initiated "Panch Pyaras" (Five Beloved ones) as true Khalsas. Water and 'Batashas' (Sugar tablets) were put in a steel pot and it was mixed with a Khanda (two edged 'Kirpan'). Gurbanis were recited and this mixture was called Amrit (nectar). 'Panch Pyaras' stood in one line and drank the said 'Amrit' one by one from the same pot. This tradition is followed and all those Sikhs who are baptised in the above manner are called 'Amritdharis. They have to follow strict rules of discipline and a rigorous life. They have to keep always five things on their body *i.e.* 'Kachha', 'Kada', 'Kesh' and 'Kangha' (Underwear, steel ring on hand, sword, hair and comb.) They are required not to take any wine or any other intoxicant, never to look at other's women with bad intentions, never to eat 'Halal Meat', never to tell lies, never to attack first. They are also required to defend the oppressed and the exploited, and never to tolerate injustice.

was not allowed even to enter the Complex to attend to the wounded, many not allowed any water to drink died of thirst; on June 7,28 people were pushed inside a strong room without any ventilation and locked up, and when the room was opened, 14 of them were dead. Bodies were left to rot, inside the room and then burnt. This was free India's Jallianwala Bagh—leaving the old Jallianwala Bagh of the British days far behind in the number of killed and in the manner of killing.

We interviewed the sorrowing parents of some youngmen who are now in Jodhpur Jail as 'dangerous terrorists'. They showed us the photographs of these 'guerillas' gentle, innocent faces—all between 20 and 23, looked at us through the framed photos. One was a good musician, fond of books, a serious student in college—completely apolitical' another an excellent chess player, well qualified, looking for job in the State Bank of India, yet another a designer of steel furniture—there is not even a shred of evidence against most of these boys. Some were arrested because they happened to live in the Golden Temple Complex and were young.

We visited some special courts from outside and met a few who were being tried under the Arms Act. We were told that there were about 5,000 such cases—contemptuously called pen-knife cases. To make the cases look more prestigious revolvers and pistols are sometimes planted on the boys; even one cartridge would do the job; One of these extremists we met in the court holding up his tattered 'banyan' asked us "where could I have hidden a revolver?" Under the Terrorists Affected Areas (Special Courts) Act, the accused had to prove his innocence and virtually there was no appeal since the appeal was only to the Supreme Court, as far off as the moon in the heaven for the rural poor; so he had to rot in jail—much longer than the punishment called for. But the Government was happy with performance of the police—it is the number that counted—being utterly oblivious of the hardship the families had to face during absence of the men. Thus circumstances have forced many of these innocent people to stand before the Court and "confess their guilt", only to have the period of their detention reduced and then released. The Black Laws have virtually nullified the functioning of ordinary criminal laws ensuring fair trial and some kind of level justice.

For months the civil authorities had almost ceased to function. It is only under a military dictatorship, army officers could drag a Sarpanch to the Army Camp—and order him to produce some weapons which he was suspected to possess and when he could not, made to stand in a deep pit and earth piled inside till it reached his neck. We found that the Army was hated not only by the common villager but by their own retired Havaldars and Captains, for in several cases they were the targets being Amritdharis. Today the image of the Army is of a communal, corrupt, cruel and a grossly insensitive force. Its drunken revelry did not amuse the villager either. We have included some interviews in the Appendix on the behaviour of the Army—they are revealing and ask for no further comment.

Regarding communalism in Punjab we had interviewed several people both Hindus and Sikhs—excepting a few Hindus who appeared to communal and made some unsavoury remarks about the Sikhs, we never came across any positive evidence of communal feeling and there certainly was no migration of the Hindus from Punjab; but what we did find was alienation—that old trust, that spontaneous affection is gone, just now there is distrust and bitterness; unfortunately some Congress (I) when are fomenting this distrust. In the villages, on the other hand, there is harmony and friendship—as a villager remarked "bad things always come from cities". The interviews held in different villages gave us ample proof that the villages have still remained unspoilt.

As regards Khalistan it is on record that even Bhindranwale did not have a clear conception of Khalistan. According to a recent report, Harminder Singh Sandbu—a close associate of Bhindranwale has stuck to his statement that Bhindranwale never wanted a separate state called Khalistan. Those who are asking for a separate state they do not live in Punjab; and one must not take their words as the words of those who are here and all that they mean by Khalistan is to be able to live, with dignity and honour, inside India. We have recorded some interview on this subject—which has been falsely projected to lower down the Sikhs—who are no less patriotic than any other Indian.

In our Report we have not made any comment on the Anandpur Sahib Resolution, since reporting truthfully is our primary function, we have to say that those days when we were in Punjab, nobody talked about the Resolution. It could be because the people were much too harassed by the police and the army to think about the Anandpur Sahib Resolution.

But now that Sant Longowal and the Prime Minister Rajiv Gandhi have signed an agreement which includes transfer of Chandigarh to Punjab and also a reference of the Anandpur Sahib Resolution to the Sarkaria Commission, it is necessary perhaps to write a few words.

The 'historical accord' as it has been hailed could have been reached 4 years ago without much trouble at all—without destroying the holy shrine Akal Takht causing so much pain and anguish to those who hold their faith above everything else in life. One could have reached Chandigarh without having to wade through blood of thousands of men, women and children since 1982.

But all this did not happen. What has happened one might perhaps examine with some care.

While efforts to achieve the accord should be appreciated, it cannot be disputed that no accord can bring lasting peace in Punjab which ignore the burning issues over which the Sikhs feel deeply agitated. The Rajiv-Longowal accord has seemingly forgotten.

(1) The thousands of so-called Army deserters.

(2) and thousands of Sikh youth languishing in different jails of the country,

(3) and also the families of those—again running into thousands—who have allegedly gone to Pakistan but actually have been killed by the police and the Army.

(4) The problem of absconders who are underground, and who have fled under duress;

(5) Rajiv-Longowal accord has not said one word about the Police-Lawlessness or the repeal of most of the Black Laws; nor has it dealt with the withdrawal of the Army from Punjab.

(6) The accord is silent about adequate compensation for the November '84 riot victims.

Will the accord bring solace to those hundreds of men and women who have lost their peace of mind because of the constant terror of police they have been living in? As a poor village woman told us in Dera Baba Nanak—it is the poor who suffer when big people fight for their 'Kursi'.

We place our report before the Government and the people and demand that to bring back normalcy in Punjab, a General Amnesty must be declared without much delay, police repression should be stopped and all the black laws should be repealed forthwith.

THE PROMOTION OF AMBASSADOR CORR

Mr. HELMS. Mr. President, yesterday the Senate confirmed the nomination of Mr. Edwin G. Corr to the rank of Career Minister in the Foreign Service. Ambassador Corr's nomination was received by the Senate on October 25, 1985, and has remained there until the Senate acted yesterday.

Some of my colleagues have wondered why Ambassador Corr's promotion in the Foreign Service was delayed so long. The fact is that Ambassador Corr's promotion was delayed because the Department of State has been attempting for 15 months to evade the law with regard to the appointment of an independent Inspector General at the Department of State.

Indeed, it is a law which the Congress passed, and the President signed, not once but twice in that period. Yet it is just now that Congress has received satisfaction from the Department that it no longer considers itself above the law, and that an independent Inspector General will actually be named. It is too late, of course, for the Senate actually to receive the nomination for Inspector General, to hold hearings, and to get assurances from the nominee of the way in which he will conduct the office. At least he will be named, and the State Department is no longer claiming, as it did in an official letter, that Gramm-Rudman reducitons left no funds to for the appointment of an independent Inspector General.

A week ago, I wrote to President Reagan, and outlined the reluctance of the State Department to submit to independent inspection under the provisions of the law. I pointed out the dangers of the situation which has existed up to the present time, namely, that the State Department was the only agency of Government which claimed the right to have colleagues examining the actions of colleagues.

Mr. President, I ask unanimous consent that my letter to President Reagan be printed in the RECORD at the conclusion of my remarks.

However, I have been assured by Deputy Secretary of State John Whitehead, that the New Inspector General will actually be named in a few days.

Mr. President, I raised this issue on July 15, 1985, when Mr. Corr's name was before the Senate as the nominee to be the U.S. Ambassador to El Salvador. At that time, I said:

A large number of responsible people have come to me in recent weeks to tell me they do not believe that Mr. Corr deserves the President's trust. They have raised very serious charges. They have told me of incidents involving Mr. Corr's actions which go far beyond a question of philosophy or capability, if these reports are accurate, and I am inclined to believe they are, Mr. President, because the people who have come to me are responsible Americans, they are knowledgeable Americans, and they know what has been going on.

It gives me no pleasure, Mr. President, to raise such questions on the floor of the Senate when there has been no independent investigation of charges against Mr. Corr. The key word is "independent." There has been no independent investigation of the charges. That is precisely the point. Why is the Senate acting on this nomination when there has been no independent investigation?

I could go into detail concerning these issues on the Senate floor. I would have the protection of Senate immunity. But I do not want to do that. And I should not. But I say, Mr. President, that the charges should be examined by competent, independent authority.

I regret to say that has not been done. Just this afternoon I have been informed that the matters to which I refer have already been investigated by the Inspector General of the State Department. But the Inspector General's report has not been sent to the committee, nor is the Inspector General of the State Department a truly independent authority. Of course he is not. The State Department's Inspector General office is the only such office in the Government which is under the authority of the Cabinet officer in charge of the Department.

Moreover, the head of the Inspector General's office—that is, the State Department, and get this, Mr. President—is the former President of the Foreign Service Association, the State Department union. So you see, Mr. President, why I find suspect any benign report from this gentleman. In my judgment he is part of the problem, a problem that has existed for a quarter of a century.

Mr. President, as I pointed out in these remarks last year, it was only at the last moment that I had access to the Inspector General's report on Mr. Corr. After that speech, I had an opportunity to consider the report more carefully, and I was appalled—not only at the methodology of the investigation, but at the slipshod and erroneous work involved. Moreover, in addition to the issues which the Foreign Service-connected Inspector General had looked at, there were other, even more serious allegations which called into question not only Mr. Corr's performance in his former post in Bolivia, but also actions which would reflect adversely upon Mr. Corr and upon the United States.

The case of Mr. Corr, then, is a perfect example of why an independent Inspector General is needed. I cannot prejudge any independent investigation, but, in fairness to Mr. Corr, I am willing to accept the outcome of any investigation that is independent and complete. Indeed, as soon as the new Inspector General is named, as promised by Mr. Whitehead, I intend to submit a formal request that the long-delayed investigation of Mr. Corr be undertaken. Perhaps the new Inspector General will be able to submit a progress report when the name is officially submitted to the Senate in January and the nominee is brought before the committee.

It is unfortunate that the State Department delayed action on Mr. Corr's nomination so long by declining to obey the law. Indeed, the delay itself ought to be the subject of another investigation by the incoming Inspector General. It is curious that the former Inspector General, Mr. Harrop, who so botched the report on Mr. Corr, and who reportedly resisted the appointment of an independent Inspector General, was rewarded by his colleagues with a $20,000 bonus, courtesy of the U.S. taxpayer. That inspection could also study the role of the Under Secretary for Management, Mr. Spiers, in opposing the appointment of an independent Inspector General, and who received a $20,000 bonus voted by his colleagues the year before.

However, the prospect of an Independent Inspector General does seems to be close at hand at last. Therefore, I no longer had any objections to the consideration of Mr. Corr's promotion.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

October 8, 1986.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: It has been 15 months since you signed into law Public Law 99-93, the Foreign Relations Authorization Act for fiscal year 1986-87. This legislation included provisions requiring the establishment of an independent Inspector General at the Department of State under the terms of the Inspector Generals Act of 1978. No action was taken by the Department of State to implement these provisions.

Congress once again passed legislation this year requiring the Department of State of appoint an independent Inspector General as part of Public Law 99-399, the Omnibus Diplomatic Security and Anti-Terrorism Act of 1986. Mr. President, you signed this bill into law on August 27, 1986, but the Department of State, 6 weeks later, still has not moved to send a nominee for Inspector General to the Senate.

This failure of the Department of State to act when under a specific statutory mandate by Congress, not once, but twice, constitutes a grave dereliction of duty. Under the Inspector Generals Act, incorporation by reference into the recent directives by Congress, the head of the agency involved is required to recommend the name of an Inspector General nominee directly, without the participation of subordinates who might in the future come within the purview of the IG's investigations.

Although the State Department in the past has had an official with the title of Inspector General, that position was an internal position only, and not regulated by the strict standards of independence mandated by the Inspector Generals Act. A number of practices called out for reform:

—the old IG's office was staffed with career State Department employees, many of them not qualified as auditors or investigators, rotated in and out of the office from other State Department positions. Because these employees were called upon to investigate former and future colleagues and superiors, they were placed in a situation of actual or potential conflict of interest.

—furthermore, when these investigators were themselves Foreign Service officers, and member of the American Foreign Service Association (AFSA, the State Department union), they faced a further conflict of interest problem in attempting to separate individual wrong-doing from the needs of an organization dedicated to furthering career advancement. Non-union employees of the Department particularly doubted the objectivity of investigations conducted under such circumstances. This problem became particularly acute when the most recent occupant of the Inspector General's post was the past President of AFSA.

—finally, Inspectors General were formerly chosen not directly by the Secretary of State, but by the same career apparatus that controlled administration and career advancement throughout the Department. Thus any nominee for the post was inevitably open to the suspicion of being part of an insider's network, with professional and collegial ties that excluded the majority of State Department employees.

It is to avoid situations such as these that every other agency of government has an independent Inspector General. That is why the abolition of the old Inspector General's office, and the creation of an independent Inspector General is a very important reform in the State Department. It is deeply disturbing that the State Department has not only failed to act, but has actively resisted implementing the law. We have now come almost to the end of the 99th Congress, and no nominee has been sent to the Senate to fill this important position.

Mr. President, since the Secretary of State has failed to act on this important matter, I urge you to act directly and send a name of a qualified Inspector General for the State Department to the Senate in the hours that remain. While it is perhaps too late for the Senate to give its advice and consent in this matter, your nominee at least can be made known, and appointed an interim until the convening of the 100th Congress. Alternatively, I suggest that you designate the Inspector General of the Department of Agricultural, an independent and eminently capable individual known to many members of the Committee on Foreign Relations and the Committee on Agriculture, to handle matters involving the State Department, until an appropriate nominee to the State Department slot is nominated and confirmed next year.

There are a number of reform issues pending at the State Department which require immediate, thorough, and independent investigation, including issues relating to the State Department's unreasonable resistance to implementation of this legislation. I will be happy to discuss these in detail with whomever you designate to act as Inspector

General for the State Department. However, if we are to retain public confidence in our government, we cannot postpone reform for another 4 months until the new Congress convenes.

Sincerely,

JESSE HELMS

THE SEARCH FOR PEACE IN NORTHERN IRELAND

Mr. MOYNIHAN. Mr. President, I rise today to share with this body an insightful analysis of the search for peace in Northern Ireland. Mark J. Hurley, bishop of Santa Rosa, CA, has written an essay examining the attempts made in this century by Great Britain to resolve the Irish Question, including the most recent effort: the November 15, 1985 agreement signed in Hillsborough by Prime Minister Margaret Thatcher of the United Kingdom and Prime Minister Garret FitzGerald of Ireland.

That agreement—commonly referred to as the Anglo-Irish agreement—includes the acceptance of three fundamental principles. First, that "Any change in the status of Northern Ireland would come about only with the consent of a majority of the people of Northern Ireland." Second, that "the present wish of a majority of the people of Northern Ireland is for no change in the status of Northern Ireland." And third, that "if in the future a majority of the people of Northern Ireland clearly wish for and formally consent to the establishment of a united Ireland—the Governments of Ireland and the United Kingdom—will introduce and support in the respective Parliaments legislation to give effect to that wish."

The agreement also established the Anglo-Irish Intergovernmental Council to give the Government of Ireland a consultative role in dealing with political matters, the administration of justice, and other affairs in Northern Ireland. And in signing this agreement, both Governments reaffirmed "their total rejection of any attempt to promote political objectives by violence" and "their determination to insure that those who adopt or support such methods do not succeed."

But in testimony to the moderation—and the promise—of this agreement, extremists on both sides of the conflict are intensifying their efforts to destroy the accord. The Irish Republican Army has redoubled its campaign of terror. On August 5, 1986, the IRA announced that its gunmen would henceforth target telephone technicians, civil servants, and other workers deemed to be cooperating with the British "war machine" or doing business with the Royal Ulster Constabulary. The IRA advised displaced workers to find "alternative sites of employment."

This was described as a "sick joke" by Terry Carlin, nothern executive of the Irish Congress of Trade Unions, who pointed out that massive unemployment already exists in Northern Ireland. Indeed, the Irish Government estimates that Northern Ireland suffers from an unemployment rate of 21 percent, and that unemployment in some Catholic areas reaches 60 percent.

Irish Prime Minister Garret FitzGerald also denounced the new IRA threats as a "most indiscriminate and wholesale onslaught on the right to life of decent people." Mr. FitzGerald added that it was evident that the IRA was fearful that progress was being made toward peaceful reconciliation under the Anglo-Irish agreement.

As Bishop Hurley makes clear in his essay, Unionist extremists have also been doing their utmost to destroy this agreement. The virulence of their opposition stems in part from Unionist fears of being abandoned by the rest of Great Britain—more, than the rest of Great Britain does not consider Unionists truly British. Bishop Hurley quotes the Lord Mayor of Belfast, Sammy Wilson, as stating that "We've always had it lorded over us. They're—that is, the British—so superior * * * their accents and everything. * * *" And in a May 1986 poll, 61 percent of mainland Britons stated that they saw Northern Ireland's future as lying outside the United Kingdom.

We must not dismiss the potential impact of Unionist opposition to the agreement. As Bishop Hurley points out, Unionists have succeeded in overturning previous attempts to negotiate a political settlement to the conflict, including the Home Rule Bill of 1914 and the Sunningdale Agreement of 1973.

Yet, Bishop Hurley also reports that there are grounds for hope. The agreement has survived the "marching season" in Ulster; there is evidence that the British Government is working to meet some longstanding concerns of the Catholic community, including that of establishing tighter control over the Ulster Defense Regiment.

Mr. President, I ask that Bishop Hurley's essay be entered into the RECORD.

The essay follows:

THE THIRD TRY, THE CHARM?

The Hillsborough Treaty, that Anglo-Irish agreement, forged between the Thatcher government of Great Britain and the Fitzgerald government of Ireland, now eight months ago, has just survived, some say "just barely," the "marching season" in Ulster. The Orangemen's 1986 celebration of the Battle of Boyne where, in 1690, the forces of King William the Protestant defeated the forces of King James the Catholic, has dictated caution to any prophecy of the future survival of the treaty itself.

Predictably the extremists have pronounced it dead, with only proper burial left. Both the Provisional IRA and the Paisleyite Democratic Unionist Party, the DUP., bitterly oppose it but for utterly contrary reasons: the former because it will keep Britain in Ulster indefinitely, the latter because it will keep the Irish Republic there indefinitely. As the French proverb puts it: "The more things change, the more they are the same."

The Hillsborough Treaty is the third attempt in this century in which Great Britain has seriously attempted to meet the "Irish Question," which has bedeviled it not for years but for many centuries. Will the third time be the charm? or is it three strikes and you're out?

THE FIRST AGREEMENT, 1914

The British parliament toyed with the notion of Home Rule for Ireland from 1886 onwards, with the hopes of the Irish being regularly raised and regularly dashed. In 1912 under Prime Minister Asquith, who relied on Irish members of parliament to keep him in power, the Home Rule Bill came to maturity, with Royal Assent granted on Sept. 18, 1914.

From all over the world came a chorus of praise: Irish overseas rejoiced; Irish in Ireland sang the anthem "A Nation Once Again." Winston Churchill had already enthused that Ireland would no longer be the same "fierce and tragic" island because "rebellion, murder, and dynamite, these have vanished from Ireland." There seemed to be a true balance of interests even in Ulster where a 1910 vote in its nine counties was 103,367 Unionist and 94,073 Nationalist. But the cultural descendants of the victors at Boyne were irredentist and implacably so.

Led by the Masonic Orange Lodges, by Edward Carson and Sir James Craig, who later was to say as Grand Master of the Orange Lodge of County Down: "far more than I do being Prime Minister . . . I have always said that I am an Orangeman first and a politician and member of parliament afterwards . . . all I boast is that we are a Protestant parliament in a Protestant state," the Unionists mounted a counter-offensive to Irish Home Rule.

Carson proposed cutting six counties off from the nine in Ulster; to back up his intention he even imported rifles to arm civilians. Caparisoned with black bowler hats, walking sticks, broad orange stoles and phylacteries around their shoulders, to the tune of fifes and drums, the Unionists paraded through the streets in a determined campaign against the law. Carson even put the newly organized Ulster Defense Force of some 100,000 "on a war footing."

Meanwhile, General Hubert Gough, the commandant of the Curragh Brigade (near Dublin) and 57 of his officers publicly proclaimed that they would resign their military commissions rather than coerce Ulster to obey the new law. Strictly speaking, no direct orders from London were disobeyed but the event became commonly known as "The Mutiny of the Curragh." Some parliamentarians called for prosecution of the rebellious leaders but in vain.

Asquith and his government backed down, condoning the "mutiny" and winking at the mass importation of firearms for the UDF which, on April 25, 1914, consisted of 24,600 rifles and three million rounds of ammunition purchased from Germany. Even in the face of this retreat 132,454 Irishmen of whom 79,511 were Catholic, joined the British armed forces in the war against Germany in 1915, at the same time that Catholic Bishop Fogarty was pronouncing the obsequies: "Home Rule is dead and buried."

The 1916 Easter armed rebellion which ultimately secured freedom for 26 of the 32

counties in Ireland seemed fore-ordained and quite predictable in the sequence of events. Strike one, the umpire might have signaled.

THE SECOND AGREEMENT, 1973

The second attempt at an "Irish settlement" came in the 1973 Sunningdale Agreement. Not only had Ireland been partitioned in the meanwhile, but Carson's initiative to partition Ulster itself with six of the nine counties excised, had been implemented.

Ulster became a gerrymandered constituency without "one man, one vote," a paradigm of religious, judicial, and political oppression wherein not a single Catholic was ever chosen to be in the government, e.g. as a cabinet member, in over fifty years, where religious and political discrimination in housing, employment, and commerce could not have but eventually brought Great Britain into disrepute.

Civil rights associations such as the European Human Rights Commission, the London based Amnesty International and others began to raise serious questions about the legal system, the police and public security, the treatment of political prisoners, the denial of suffrage and assembly. Nationalist peaceful marches were banned; Unonists were police-protected. The seeds of yet another explosion like that of 1916 were sowed. The new Provisional IRA was born; The British Army, some 16,000 troops, was moved into Ulster on Aug. 14, 1969 "to protect both sides." In 1971 the Provo IRA had killed their first British soldier in the streets of Belfast; 1972 saw the British army wantonly shooting down 13 innocent unarmed civilians in their Bogside ghetto in Derry. The results again were predictable.

The Stormont government of Ulster was suspended by Westminster; Great Britain itself took over direct rule of the six counties, a rule which has perdured to the present day.

In 1973 the second major attempt at settlement was made. The Sunningdale Agreement proposed a sharing of power between majority and minority populations. One man one vote became law, the Royal Ulster Constabulary police were disarmed and the para-military "B" specials officially disbanded. A new Council of Northern Ireland, to seek cooperation with the Irish Republic, was proposed, as was a "devolved" local government sharing cabinet posts and administrative positions between Unionists and Nationalists, between the Protestant majority in the six counties and the Catholic minority. Of such proposals demagogues are born in Ulster; Ian Paisley, described as "a brilliant mob orator" rode to power, fame, and election to the London Parliament and the DUC became a source of power.

For the second time in the 20th century Great Britain had taken an initiative to bring at least a modicum of democracy into what it calls its "province." But the question then (as now) was not its willingness to pass legislation and to formulate agreements but whether it had the will power to enforce them. The clear answer, in the face of the Unionist recusant onslaught, was in the negative.

With relative ease in 1974 the whole scheme was subverted by a political strike called by the Workers Union of Ulster. This act of massive resistance and civil disobedience paralyzed the Province for about a week. The RUC police force and the British Army stood idly by unwilling to move against the Unionist protesters. Power-sharing which had been the notable feature of Sunningdale was not acceptable; good will was not translated into commensurate action. Northern Ireland had once again reverted to type, drifting aimlessly into more violence, murder, terrorism and heart-break on all sides.

Again folk heroes were born. Bernadette Devlin, to be shot by Unionists in her own home; Bobby Sands on hunger strike at the Long Kesh prison were elected to the Westminster Parliament in London. Policemen, British soldiers, judges, among each group some Catholics, were ruthlessly murdered by the Provo who publicly "took credit." Just seventeen days after Bobby Sands died on May 5, 1981 Carol Ann Kelly, aged 12, was shot down by British troopers just outside the Sands' family home in Twinbrook, Belfast, with plastic bullets, the allegedly "non-lethal" missiles which had already killed twelve people, all of them Catholics.

On April 5, James Prior, the British Secretary for Northern Ireland, issued a "white paper proposing to put an end to bloodshed, a proposal which he called "novel, fair, and flexible." It was repudiated by all sides.

Sunningdale with all its works and promises was dead and buried. The Unionists still held de facto veto power over the British Parliament; Great Britain would not enforce its own laws, treaties, and agreements in a divided Ulster.

"Strike two" the umpire might have signaled.

THE THIRD ATTEMPT, 1985

A new dynamic was at work in the beautiful green village of Hillsborough, near Belfast, in Dec. 1985 as the third agreement of this century was signed by the two prime ministers, Mrs. Margaret Thatcher for the United Kingdom and Dr. Garret Fitzgerald for the Republic of Ireland. For the first time in the tortured history of a partitioned Ulster, the Irish government had been conceded a role, albeit a consultative one only, in the affairs of the Province.

Violence as a policy and coercion as a means were ruled out by the Hillsborough Agreement. Thatcher promised to support a United Ireland when and only when "the majority" (unfortunately not specified as to meaning) so wished; Fitzgerald foreswore any use of force as licit for the reconciliation of the two sides. The U.K. and the Republic pledged to cooperate jointly to build a just society as prelude to peace wherein both majority and minority rights were respected and sustained. A joint commission from north and south of the border would work together to revive the local legislature at Stormont as a step towards good government.

As usual, the extremists on both sides violently opposed Hillsborough but for contrary reasons: Paisley and the DUP because it would keep Dublin in Ulster's future indefinitely; Adams and the IRA because it would keep London there. On June 26 Paisley declared that "we are on the verge of civil war;" at the same time the Provo IRA took "credit" for the killing of two British soldiers. The Unionists replied with the murder of a young Catholic man, Brian Leonard, aged 20 of the Shankhill area of Belfast, "in retaliation."

Paisley dipped back into history urging the officers of the Royal Ulster Constabulary to resign their commissions rather than enforce the law; he called up the ghosts of General Gough and the "Mutiny of the Curragh." He suggested that he would lead hand-to-hand fighting in the streets, with blood flowing as in 1914. The newspapers were quick to label his actions: "Paisley Urges RUC Revolt." Hours later he said he was not fomenting revolution or mutiny but merely predicting them.

Councilwoman Dodie McGuinness in defiance of the RUC addressed an illegal assembly of 1,000 on June 30 in Derry (Derry Journal, July 1). A Sinn Fein city official, she openly supported violence and the IRA, heaping scorn on the supporters of the Hillsborough Agreement:

"Thatcher only started to take Ireland seriously when the IRA put a bomb under her backside in Brighton, and history has shown that Britain like all colonial aggressors only listens to force." On July 10, the IRA admitted yet another killing: of John McVitty of the RUC in front of his 10 year old son.

The Lord Mayor of Belfast, Sammy Wilson, called for a repudiation of the British as well as the Irish governments: "We've always had it lorded over us. They're (i.e. the British) so superior . . . their accents and everything . . . Unionists see the role of the Irish government and the SDLP (the Nationalist party) as being not too far from the position of the Sinn Fein (Provisional IRA). Instead of using IRA guns, they're using British guns." (Sunday Tribune, July 13, Belfast).

Editorials both north and south of the border grew increasingly pessimistic as "the marching season" came into the spotlight. July 12 did not come off exactly as in the past. There were the customary marches under the patronage of the Masonic lodges; the black bowler hats, the walking sticks, the broad orange stoles, and the fife and drum corps a la 1914, but the Unionists were not granted carte blanche to do as they pleased.

Parades were routed around and away from Catholic areas in many cases; compromises were effected. John Hume, the moderate leader of the SDLP vigorously protested the "compromise" in Portadown on July 12, which kept the Orange marchers out of their customary parade through the Nationalist Tunnel area, but which permitted the marchers to strut their stuff in a much larger Catholic area Hume interpreted this "compromise" a "victory for Paisley" and "a boost for bully boys."

Editorialists were cautious in their assessments of the situation, and somewhat on the pessimistic side. The Irish Times, July 10, accused Paisley of dangerous words in calling on "the police, in effect, to mutiny, picturing him as having spent "a good part of his life skating on the fringes of the law . . . coming very close to sedition—and incitement to violence." The Derry Journal, July 11, noted that "today the police and the British army are threatened by forces on both sides of the divide. The people in general are threatened by security forces and paramilitaries within their respective communities. In such conditions is it any wonder that more and more people ask, despairingly, what are the chances for peace?"

The Sunday Tribune, July 10, entitled its editorial "Meaningless Agreement," expressing disappointment: "There nonetheless must be concern that the means of political resolution of the problems of Northern Ireland have begun to appear a good deal less effective than we had been led to believe some eight months ago. The Anglo-Irish Agreement was welcomed largely on a perception of how it would resolve the grievances of the minority. The reality is that since its signing it has done almost nothing on that account."

The Irish Press, July 10, in its editorial "Powder Keg," put its finger on the key point: "We will discover whether the British

government's writ still runs and whether the RUC is willing and able to enforce the law."

There are some signs of hope contrary to the pessimism engendered by the last eight months; some things have indeed changed. All of Ireland and Great Britain saw with their own eyes, Dr. Paisley being hauled bodily and unceremoniously out of the Stormont legislature kicking and shouting, and twenty-one of his legislative associates with him. Protestant mobs attacked the RUC police with sticks and stones and, more ominously, with petrol bombs formerly known as Molotov cocktails—Protestant against Protestant. Perhaps the most startling of all was the use of plastic bullets by the RUC against the Unionist protesters, bullets which were reserved only for Nationalist marchers in early times. The "marching season" did not follow previous patterns of untrammeled flaunting of Orange ascendancy. The Orange Order in Belfast, for example, refused to cooperate with Paisley's call for massive marches "bad tactics," they said.

Britain's BBC presented, June 30, a documentary on the Unionist mentality in Portadown, re-enforcing the perception, as the polls in Great Britain clearly indicate: the British people are sick and tired of Northern Ireland, its toll on British troops, and its cost to British taxpayers. They don't feel drawn to defend more Portadowns.

Many leaders in state and church in Ireland, North and South, have not yet given up on the Anglo-Irish Agreement of Hillsborough. They see clear signs that the Thatcher government means to stand by it and up to it. Parliament at Westminster also sees its "ultimate authority" (Great Britain has no written Constitution) being seriously challenged and eroded.

Moderate politicians are looking for speedy amelioration of some classic grievances which are not *ex professo* addressed in the Agreement but can help support it if ameliorated or even solved.

They expect that the current practices of the Diplock courts, with its single judge sitting without jury, can now be changed to a three judge court. Snorted the IRA Provos: "What's the difference between one Unionist judge and three Unionist judges?" There is a bill introduced in Westminster by Seamus Mallon of Armagh to curb the use of "supergrass," the convicted paid informers whose uncorroborated testimony, which would never be accepted in England, is in Northern Ireland.

New measures of control of security forces are also expected, particularly the mode of operations of the Ulster Defense Regiment. Under present arrangements these reserve officers, weekend police, and auxiliaries to the regular RUC are not supposed to work or engage in police actions without the presence of a fully professional policeman of the RUC. When asked how this assignment was working a prominent politician said "about one-third of the time;" a Catholic bishop assured "about half the time."

It seems fair to say that most leaders still think it is too early to judge whether Ulster will for the third time hold veto power over the Westminster Parliament. Nationalists and Unionists of moderate stripe are skeptical, but in most cases not cynical; give the Hillsborough Agreement a chance for at least one year but not more than two, they say.

Will the third time be the charm? Or is it three strikes and you're out?

It's too early to tell.

MESSAGES FROM THE HOUSE

At 9:10 a.m., a message from the House of Representatives, delivered by Mr. Allen, one of its clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 738) making continuing appropriations for the fiscal year 1987, and for other purposes; it recedes from its disagreement to the amendment of the Senate numbered 60 to the joint resolution, and agrees thereto; it recedes from its disagreement to the amendments of the Senate numbered 19, 59, 117, and 124 to the joint resolution, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate; and it insists upon its disagreement to the amendment of the Senate numbered 23 to the joint resolution.

The message also announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 753. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes.

At 10:30 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1128) to amend the Clean Water Act, and for other purposes; and that the House insists upon its amendment to the title of the bill.

The message also announced that the House agrees to the amendments of the Senate numbered 1 through 4, and 6 through 11 to the bill (H.R. 5028) entitled "The Lower Colorado Water Supply Act"; and that the House disagrees to the amendment of the Senate numbered 5 to the bill.

The message further announced that the House agrees to the amendment of the Senate to the bill (H.R. 3614) to restrict the use of Government vehicles for transportation of officers and employees of the Federal Government between their residences and places of employment, and for other purposes.

The message also announced that the House has passed the bill (S. 1374) to establish the Blackstone River Valley National Heritage Corridor in Massachusetts and Rhode Island; with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the amendment of the Senate to the bill (H.R. 3004) to amend section 3006A of title 18, United States Code, to improve the delivery of legal services in the criminal justice system to those persons financially unable to obtain adequate representation, and for other purposes; with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 5495) to authorize appropriations to the National Aeronautics and Space Administration and for other purposes; with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 411. Concurrent resolution to correct a technical error in the enrollment of the bill S. 475.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

At 12:56 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolution:

H.R. 2067. An act to validate conveyances of certain lands in the State of California that form part of the right-of-way granted by the United States to the Central Pacific Railway Company;

H.R. 3113. An act to implement the Coordinated Operations Agreement, the Suisun Marsh Preservation Agreement, and to amend the Small Reclamation Projects Act of 1956, as amended, and for other purposes;

H.R. 3352. An act to transfer certain real property to the city of Mesquite, Nevada;

H.R. 4175. An act to authorize appropriations for fiscal year 1987 for certain maritime programs of the Department of Transportation and the Federal Maritime Commission; and

H.J. Res. 753. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes.

The enrolled bills and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

At 4:57 p.m., a message from the House of Representatives, delivered by Mr. Allen, one of its clerks, announced that the House has passed the following bills and joint resolutions, without amendment:

S. 511. An act to change the name of the Loxahatchee National Wildlife Refuge, Florida, to the Arthur R. Marshall Loxahatchee National Wildlife Refuge;

S. 2864. An act to provide for a Deputy Secretary of Labor, an Assistant Secretary of Labor for Administration and Management, three additional Assistant Secretaries of Labor, and for other purposes; and

S.J. Res. 427. Joint resolution reaffirming our friendship and sympathy with the people of El Salvador following the devastating earthquake of October 10, 1986.

The message also announced that the House has agreed to the following

concurrent resolutions, without amendment:

S. Con. Res. 168. Concurrent resolution authorizing a technical correction to be made in the enrollment of the bill S. 2250; and

S. Con. Res. 171. Concurrent resolution to correct the enrollment of H.J. Res. 626.

The message further announced that the House agrees to the amendment of the Senate to the amendments of the House to the amendment of the Senate to the bill (H.R. 4350) to amend the Wild and Scenic Rivers Act, and for other purposes.

The message also announced that the House agrees to the amendment of the Senate to the following bills and joint resolution:

H.R. 4244. An act to authorize funds to preserve the official papers of Joseph W. Martin, Jr.;

H.R. 4961. An act to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1987, 1988, 1989, and for other purposes; and

H.J. Res. 626. Joint resolution to approve the "Compact of Free Association" between the United States and the Government of Palau, and for other purposes.

The message further announced that the House agrees to the amendments of the Senate to the bill (H.R. 5167) to declare that the United States holds certain public domain lands in trust for the Pueblo of Zia.

The message also announced the House has passed the joint resolution (S.J. Res. 43) to authorize the Armored Force Monument Committee, the U.S. Armor Association, the World Wars Tank Corps Association, the Veterans of the Battle of the Bulge, the 11th Armored Cavalry Regiment Association, the Tank Destroyer Association, the 1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 13th, 14th, and 16th Armored Division Associations, and the Council of Armored Division Associations jointly to erect a memorial to the "American Armored Force" on U.S. Government property in Arlington, VA, and for other purposes, with amendments, in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the amendment of the Senate to the bill (H.R. 4899) to amend title 35, United States Code, with respect to patented processes and the patent cooperation treaty; with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendment of the Senate to the title of the bill (H.R. 5595) to amend title XVI of the Social Security Act to make necessary improvements in the SSI Program with the objective of assuring that such program (including the work incentive provisions in section 1619 of such act) will more realistically and more equitably reflect the needs and circumstances of applicants and recipients thereunder; and that the House agrees to the amendment of the Senate to the text of the bill, with amendments, in which it requests the concurrence of the Senate.

At 9:17 p.m., a message from the House of Representatives, delivered by Mr. Allen, one of its clerks, announced that the House has passed the following bills, without amendment:

S. 485. An act to amend the Alaska National Interest Lands Conservation Act of 1980 to clarify the treatment of submerged land and ownership by the Alaska Native Corporation; and

S. 2648. An act to improve the public health through the prevention of injuries.

The message also announced that the House agrees to the amendment of the Senate to the following bills:

H.R. 2776. An act to amend the District of Columbia Stadium Act of 1957 to direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia; and

H.R. 4208. An act to authorize appropriations for the Coast Guard for fiscal year 1987, and for other purposes.

The message further announced that the House agrees to the amendment of the Senate to the bill (H.R. 2482) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, and for other purposes; with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the bill (H.R. 2057) to establish the President's Council on Health Promotion and Disease Prevention; with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has passed the bill (S. 1311) to authorize the Smithsonian Institution to plan, design, and construct facilities for the National Air and Space Museum; with amendments, in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the amendment of the Senate to the amendment of the House to the title of the bill (S. 991) to provide authorization of appropriations for certain fisheries activities; and that the House agrees to the amendment of the Senate to the amendment of the House to the text of the bill, with amendments, in which it requests the concurrence of the Senate.

The message further announced that the House has passed the following bills, in which it requests concurrence of the Senate:

H.R. 2127. An act to establish a United States Boxing Commission, and for other purposes; and

H.R. 5705. An act to protect and provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 414. Concurrent resolution to correct the enrollment of the bill S. 1200.

MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 5705. An act to provide for the enhancement of the resources of the Columbia River Gorge, and for other purposes.

The Committee on the Judiciary was discharged from the further consideration of the following bill; which was placed on the calendar:

H.R. 2652. An act for the relief of Kumari Rajlakshmi Bais.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, October 16, 1986, she had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 209. An act to amend section 3718 of title 31, United States Code, to authorize contracts retaining private counsel to furnish legal services on the case of indebtedness owed the United States;

S. 1895. An act for the relief of Marlboro County General Hospital Charity of Bennettsville, South Carolina;

S. 2266. An act to establish a ski area permit system on national forest lands, and for other purposes;

S. 2506. An act to establish a Great Basin National Park in the State of Nevada, and for other purposes;

S. 2750. An act to establish a property tax fund for the Houlton Band of Maliseet Indians in furtherance of the Maine Indian Claims Settlement Act of 1980, and for other purposes;

S.J. Res. 169. Joint resolution to commemorate the bicentennial anniversary of the first patent and the first copyright laws;

S.J. Res. 232. Joint resolution to designate October 6 through October 10, 1986, as "National Social Studies Week";

S.J. Res. 299. Joint resolution to designate the week of December 7 through December 13, 1986, as "National Alopecia Areata Awareness Week";

S.J. Res. 304. Joint resolution to designate the week of November 16 through November 22, 1986, as "National Arts Week";

S.J. Res. 306. Joint resolution to designate the week beginning November 23, 1986, as "National Adoption Week";

S.J. Res. 308. Joint resolution to designate March 25, 1987, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy";

S.J. Res. 311. Joint resolution designating the week beginning November 9, 1986, as "National Women Veterans Recognition Week";

S.J. Res. 322. Joint resolution to designate December 7, 1986, as "National Pearl Harbor Remembrance Day" on the occasion of the anniversary of the attack on Pearl Harbor;

S.J. Res. 392. Joint resolution to designate the month of December 1986 as "Made in America Month";

S.J. Res. 396. Joint resolution to designate the week October 26 through November 1, 1986, as "National Adult Immunization Awareness Week";

S.J. Res. 410. Joint resolution to designate the period commencing February 9 and ending February 15, 1987, as "National Burn Awareness Week";

S.J. Res. 414. Joint resolution to designate March 16, 1987, as "Freedom of Information Day"; and

S.J. Res. 418. Joint resolution to designate February 4, 1987, as "National Women in Sports Day".

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATFIELD, from the Committee on Appropriations;

Special report entitled "Revise Allocation to Subcommittees of Budget Totals from the Concurrent Resolution for Fiscal Year 1987 (Rept. No. 99-540).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. LUGAR, from the Committee on Foreign Relations:

Treaty Doc. 99-12. 1984 Protocols amending the Civil Liability and Fund Conventions on Oil Pollution Damage (Exec. Rept. 99-28); and resolutions of advice and consent to ratification thereto:

TEXT OF RESOLUTION OF RATIFICATION PROTOCOL OF 1984 TO AMEND THE INTERNATIONAL CONVENTION OF CIVIL LIABILITY FOR OIL POLLUTION DAMAGE, 1969

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Protocol of 1984 to Amend the International Convention on Civil Liability for Oil Pollution Damage, 1969 (Civil Liability Convention), subject to the following reservation, understandings and declaration:

RESERVATION

Notwithstanding Article III, paragraph 4, of the Convention of Civil Liability for Oil Pollution Damage, 1969, as amended, to the extent that oil pollution damages in respect of any one incident may exceed the total amount recoverable under said Convention (Liability Convention), the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage (Fund Convention), as amended, and the applicable U.S. Federal oil pollution liability and compensation statute, claimants may seek recovery of their uncompensated damages in courts of competent jurisdiction of the States of the United States, including its territories and possessions and the District of Columbia, pursuant to applicable State statutes and common law, after remedies available under the Liability Convention, the Fund Convention, and the applicable U.S. Federal Oil pollution liability and compensation statute have been exhausted, except that in any such section under a State statute or common law for such uncompensated damages, no claimant shall be entitled to assert any substantive or procedural right based on any provision of the Liability Convention for the Fund Convention.

UNDERSTANDINGS

(1) The United States understands that the definition of pollution damage in Article I, paragraph 6 of the International Convention of Civil Liability for Oil Pollution Damage, 1969, as amended by Article 2, paragraph 3 of the 1984 Protocol thereto, does not exclude reasonable and directly related loss of tax revenue to the United States, its States and territories and subdivisions thereof, and the District of Columbia.

(2) The United States understands that nothing in the Protocol of 1984 to Amend the International Convention of Civil Liability for Oil Pollution Damage, 1969, prevents any claimant from combining damage awards from two or more incidents which have injured the same or adjacent resources to fund a restoration project which addresses those incidents.

(3) The United States understands that the definition of pollution damage in Article I, paragraph 6 of the International Convention on Civil Liability for Oil Pollution Damage, 1969, as amended by Article 2, paragraph 3 of the 1984 Protocol thereto, includes loss of profit or impairment of earning capacity caused by damage of the environment by an oil pollution incident.

(4) Any damages not compensable due to the definition of pollution damage in Article I, paragraph 6 of the International Convention on Civil Liability for Oil Pollution Damage, as amended by Article 2, paragraph 3 of the 1984 Protocol thereto, or by any future interpretation of the Liability Convention as so amended, may be provided for by laws of the United States, its States, territories or the District of Columbia.

(5) The United States understands the definition of pollution damage in Article I, paragraph 6 of the International Convention on Civil Liability for Oil Pollution Damage, 1969, as amended by Article 2, paragraph 3 of the 1984 Protocol thereto, to include loss of use of subsistence resources.

(6) The United States understands the definition of pollution damage in Article I, paragraph 6 of the International Convention on Civil Liability for Oil Pollution Damage, 1969, as amended by Article 2, paragraph 3 of the 1984 Protocol thereto to include directly related and reasonable costs of investigation, assessment of damage and court costs, excluding defense costs.

DECLARATION

In accordance with Article 13 of the Protocol of 1984 to Amend the International Convention on Civil Liability for Oil Pollution Damage, 1969, the United States declares that its instrument of ratification of that Protocol shall be deemed not to be effective for the purpose of said Article 13 until the end of the 6-month period described in Article 31 of the Protocol of 1984 to Amend the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1971.

TEXT OF RESOLUTION OF RATIFICATION PROTOCOL OF 1984 TO AMEND THE INTERNATIONAL CONVENTION ON THE ESTABLISHMENT OF AN INTERNATIONAL FUND FOR COMPENSATION FOR OIL POLLUTION DAMAGE, 1971

Resolve, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Protocol of 1984 to Amend the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1971, (Fund Convention), subject to the following understandings and declarations:

UNDERSTANDINGS

(1) The United States understands that nothing in the Protocol of 1984 to Amend the International Convention on the Establishment of an International Fund for compensation for Oil Pollution Damage prevents any claimant from combining damage awards from two or more incidents which have injured the same or adjacent resources to fund a restoration project which addresses those incidents.

(2) Any damages not compensable due to the definition of pollution damage in Article I, paragraph 6 of the International Convention on Civil Liability for Oil Pollution Damage, as amended by Article 2, paragraph 3 of the 1984 Protocol thereto, or by any future interpretation of the Liability Convention as so amended, or of the International Convention on the Establishment of an International Fund for Compensation of Oil Pollution Damage, as amended by the 1984 Protocol thereto, may be provided for by laws of the United States, its States, territories or the District of Columbia.

DECLARATIONS

(1) In accordance with Article 30 of the Protocol of 1984 to Amend the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1971, the United States declares that its instrument of ratification of that Protocol shall not take effect for the purpose of said Article 30 until the end of the 6-month period described in Article 31 of that Protocol.

(2) In accordance with Article 14 of the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1971, as amended, the United States declares that it assumes itself all obligations that are incumbent under the Convention on all persons who are liable to contribute to the International Oil Pollution Compensation Fund 1984 (the Fund) in accordance with Article 10, paragraph 1, in respect of oil received within, the territory of the United States. The Fund shall be entitled to enforce all such obligations exclusively under the applicable U.S. Federal oil pollution liability and compensation statute.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BYRD (for Mr. INOUYE (for himself and Mr. RUDMAN)):

S. 2928. A bill to provide for more effective regulation of vehicles not originally manufactured to meet Federal safety standards; ordered held at the desk.

By Mr. MOYNIHAN:

S. 2929. A bill to amend chapter 44 of title 18, United States Code, to prohibit the manufacture, transfer, or importation of .25 caliber and .32 caliber ammunition; to the Committee on the Judiciary.

By Mr. HATFIELD:

S. 2930. A bill entitled the Department of Energy Environmental Compliance Act of 1986; to the Committee on Environment and Public Works.

S. 2931. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Umatilla Basin Project, Oregon, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2932. A bill to establish the El Malpais National Monument, the Masau Trail, and the Grants National Conservation Area in the State of New Mexico, and for other purposes; to the Committee on Energy and Natural Resources.

Mr. MOYNIHAN (for himself and Mr. HEINZ):

S. 2933. A bill to charter the National Academy of Social Insurance; to the Committee on the Judiciary.

By Mr. DOLE:

S. 2934. A bill to establish a Commission and National Advisory Committee to study a constitutional amendment regarding impeachment; to the Committee on the Judiciary.

By Mr. CHAFEE:

S. 2935. A bill to prohibit the use of subtherapeutic doses of penicillin, chlortetracycline, and oxytetracycline in animal feed; to the Committee on Labor and Human Resources.

By Mr. PELL (for himself, Mr. CHAFEE and Mr. WEICKER):

S. 2936. A bill granting the consent of Congress to the Connecticut, Rhode Island, Massachusetts, and New York Rail Improvements Compact; to the Committee on the Judiciary.

By Mr. NUNN (for himself and Mr. COCHRAN):

S. 2937. A bill to amend the Food Security Act of 1985 to increase the number of acres placed in the conservation reserve program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SPECTER:

S. 2938. A bill entitled the "Logan Relief Act"; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. ROCKEFELLER:

S. 2939. A bill to amend the Motor Vehicle Information and Cost Savings Act to provide for the appropriate treatment of methanol; to the Committee on Commerce, Science, and Transportation.

By Mr. SIMPSON (for Mr. MATHIAS (for himself, Mr. SARBANES, Mr. WARNER, and Mr. TRIBLE)):

S.J. Res. 428. A joint resolution granting the consent and approval of Congress for the State of Maryland, the Commonwealth of Virginia, and the District of Columbia to amend the Washington Metropolitan Area Transit Regulation Compact; considered and passed.

By Mr. HARKIN (for himself, Mr. KENNEDY, Mr. KERRY, Mr. BYRD, Mr. MELCHER, and Mr. LEAHY):

S.J. Res. 429. A joint resolution to require a report by the President on possible involvement by U.S. government personnel in the provision of military support by American citizens to the Nicaraguan democratic resistance.

By Mr. DOLE (for himself, Mr. BYRD, Mr. THURMOND, Mr. CRANSTON, Mr. SIMPSON, Mr. COCHRAN, Mr. SARBANES, Mr. BOSCHWITZ, Mr. HATCH, Mr. BOREN, Mr. BENTSEN, Mr. LEAHY, Mr. WILSON, Mr. GOLDWATER, Mr. LUGAR, Mr. FORD, Mr. HEINZ, Mr. STAFFORD, Mr. DOMENICI, Mr. CHILES, Mr. NUNN, Mr. LEVIN, Mr. DECONCINI, Mr. BROYHILL, Mr. BURDICK, Mr. DODD, Mr. DURENBERGER, Mr. INOUYE, Mr. GORE, Mr. HOLLINGS, Mr. TRIBLE, Mr. WARNER, Mr. PACKWOOD, Mr. STEVENS, Mr. LAUTENBERG, Mr. WEICKER, Mr. GRASSLEY, Mr. MURKOWSKI, Mr. EAGLETON, Mr. ANDREWS, Mr. ABDNOR, Mr. D'AMATO, Mr. JOHNSTON, Mr. ROCKEFELLER, Mr. SIMON, Mr. RIEGLE, and Mr. PRYOR):

S.J. Res. 430. Joint resolution to commemorate the United Way of America on its centennial; considered and indefinitely postponed.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SIMPSON (for Mr. ROTH (for himself, Mr. DOMENICI, and Mr. CHILES)):

S. Res. 509. A resolution providing for a point of order against extraneous material in certain reconciliation measures; considered and agreed to.

By Mr. SIMPSON (for Mr. DOLE (for himself and Mr. BYRD)):

S. Res. 510. A resolution authorizing the President of the Senate, the President of the Senate pro tempore, the Majority Leader of the Senate, and the Minority Leader of the Senate to make certain appointments after the sine die adjournment of the present session; considered and agreed to.

By Mr. BOSCHWITZ:

S. Res. 511. A resolution expressing the sense of the Senate that the Joint Political-Military Group should develop policies and programs which promote strategic cooperation between the United States and Israel; to the Committee on Foreign Relations.

By Mr. SIMPSON (for Mr. DOLE) for himself and Mr. BYRD)):

S. Res. 512. A resolution to direct the Senate Legal Counsel to represent the staff of Senator DOLE and to authorize the testimony of such staff in the case of United States v. Michael Evan Bardoff, et al.

By Mr. SIMPSON (for Mr. MCCLURE):

S. Con. Res. 171. A concurrent resolution to correct the enrollment of H. J. Res. 626; considered and agreed to.

By Mr. SIMPSON (for Mr. THURMOND (for himself, Mr. DOLE, Mr. BYRD, Mr. STENNIS, Mr. HATFIELD, Mr. SIMON, and Mrs. KASSEBAUM)):

S. Con. Res. 172. A concurrent resolution to convene the Congress in Philadelphia, Pennsylvania, on July 16, 1987, in order to commemorate the 200th anniversary of the Great Compromise creating the basis of representation between the Senate and the House of Representatives; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MOYNIHAN:

S. 2929. A bill to amend chapter 44 of title 18, United States Code, to prohibit the manufacture, transfer, or importation of .25 caliber and .32 caliber ammunition; to the Committee on the Judiciary.

VIOLENT CRIME PREVENTION ACT

● Mr. MOYNIHAN. Mr. President, handgun control has not worked. The Gun Control Act of 1968 has been evaded by foreign imports. On top of that, the Firearms Owners Protection Act of 1986 repealed provisions of the Gun Control Act restricting the sale of guns. Now, we learn from the FBI this week that serious crimes reported to police rose 8 percent in the first half of 1986. Violent crimes led the way with a 14-percent jump.

Today there are an estimated 60 million handguns in this country a number which is likely to climb to 100 million by the turn of the century. Handgun control has not worked and it cannot work. A handgun is a simple machine with a technology worked out before the Civil War. The average "Saturday Night Special" has some 40 parts. The Model T, on the other hand, had 5,000 parts, and the antiques still operate today. Unless it wears out, which is surely rare, or seizes up with rust, which is easily prevented, a handgun has a near infinite lifetime. Let us say the United States now has something like a two century supply of firearms.

On the other hand we have about a 7-year supply of handgun ammunition. Each year 4 billion rounds of ammunition are manufactured and approximately 2 billion rounds are consumed. If ammunition has a shelf life of 5 to 10 years this gives us around a 7-year supply of ammunition. But mind you my statistics are somewhat sketchy. Recordkeeping has always been restricted and following passage of the Firearms Owners Protection Act it is now nonexistent for ammunition sales. With only 7 years of ammunition out there at any one time, and 60 million hand guns, is it not a more realistic hypothesis to control ammunition as a means of controlling violent crime than it is to control handguns.

This is a simple proposition: A handgun without ammunition is out of commission. Why not try this strategy? It could just work.

In 1986, the same year the Congress passed the Firearms Owners Protection Act, Congress passed the first legislation in history forbidding the manufacture, import, and sale of a particular type of handgun ammunition, armor-piercing ammunition—the so-called cop-killer bullet. This round jacketed with tungsten alloys, steel, brass, or any number of other metals, has been demonstrated to penetrate no less than four police flak jackets and an additional five Los Angeles County phone books at one time. In 1982 the New York Police Benevolent Association came to me and Representative BIAGGI and asked us to do something about this. The result was the Law Enforcement Officers Protection Act, which we introduced in 1982, 1983, and for the last time during the 99th Congress. In the end, with the tacit support of the National Rifle Association the measure passed the Con-

gress and was signed by the President as Public Law 99-408 on August 28.

Now it is time to do something about the Saturday Night Special, a phrase coined by Detroit police to describe the weekend traffic in cheap guns from Ohio. Saturday Night Specials, or snubbies, are for the most part of small caliber, .22, .25, and .32, and they are easily concealed. As Cox Newspapers ably documented in 1981, these small caliber weapons are the overwhelming choice of criminals. They are not the choice of sportsmen as trail guns, and marksmen don't use them in competition.

Back to my proposition about controlling ammunition as a means of controlling violent crime. Let us ban the manufacture and importation of the ammunition for these weapons, and here I speak specifically of .25 and .32 caliber ammunition. In 5 or 7 or 10 years anywhere from 10 to 20 percent of the crime guns in the United States will be out of commission. Will there be others? Of course. But President Reagan survived a .22 caliber wound. President Ford very likely would not have survived the .32 round that was fired at him. President McKinley, Huey Long, and George Moscone did not. The armed services are just now switching over from their .45 pistol (those 1911 automatics work well to this day) to a .9 millimeter round, about the size of a .32 and intended of course to be a deadly weapon. The .22 is too small to be automatically deadly, the .45 too large to conceal (and Alaskan guides need them for bear attacks). In between we could just save a couple of thousand lives a year.

It is a new thought. But remember, we have already passed one ammunition bill. Why not a second. It is called the Violent Crime Prevention Act introduced on what appears to be the next to last day of the 99th Congress, which enacted the first, and is due to be introduced on the first day of the 100th.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2929

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Violent Crime Prevention Act".

SEC. 2. Section 922(a) of title 18, United States Code, is amended by—

(1) striking out "and" at the end of paragraph (5);

(2) striking out the period at the end of paragraph (6) and inserting in lieu thereof a semicolon; and

(3) adding at the end thereof the following:

"(7) for any person to manufacture, transfer, or import .25 or .32 caliber ammunition, except that this paragraph shall not apply to—

"(A) the manufacture or importation of such ammunition for the use of the United States or any department or agency thereof or any State or any department, agency, or political subdivision thereof; and

"(B) any manufacture or importation for testing or for experimenting authorized by the Secretary; and

"(8) for any manufacturer or importer to sell or deliver .25 or .32 caliber ammunition, except that this paragraph shall not apply to—

"(A) the sale or delivery by a manufacturer or importer of such ammunition for use of the United States or any department or agency thereof or any State or any department, agency, or political subdivision thereof; and

"(B) the sale or delivery by a manufacturer or importer of such ammunition for testing or for experimenting authorized by the Secretary.".

SEC. 3. Section 923(a)(1)(A) of title 18, United States Code, is amended to read as follows:

"(A) of destructive devices, ammunition for destructive devices, or .25 or .32 caliber ammunition, a fee of $1,000 per year;".

SEC. 4. Section 923(a)(1)(C) of title 18, United States Code, is amended to read as follows:

"(C) of ammunition for firearms other than destructive devices, or .25 or .32 caliber ammunition for any firearm, a fee of $10 per year.".

SEC. 5. Section 923(a)(2) of title 18, United States Code, is amended to read as follows:

"(2) If the applicant is an importer—

"(A) of destructive devices, ammunition for destructive devices, or .25 or .32 caliber ammunition for any firearm, a fee of $1,000 per year; or

"(B) of firearms other than destructive devices or ammunition for firearms other than destructive devices, or .25 or .32 caliber ammunition for any firearm, a fee of $50 per year.".

SEC. 6. Section 923 of title 18, United States Code, is amended by adding at the end thereof the following:

"(k) Licensed importers and manufacturers shall mark all .25 and .32 caliber ammunition and packages containing such ammunition for distribution, in the manner prescribed by the Secretary by regulation.".

SEC. 7. Section 929(a)(1) of title 18, United States Code, is amended by—

(1) inserting ", or with .25 or .32 caliber ammunition" after "as defined in subsection (b),"; and

(2) inserting ", or .25 or .32 caliber ammunition" after "armor-piercing handgun ammunition".

SEC. 8. This Act and the amendments made by this Act shall take effect on the first day of the first calendar month which begins more than 90 days after the date of enactment of this Act.●

By Mr. HATFIELD:

S. 2930. A bill entitled the "Department of Energy Environmental Compliance Act of 1986"; to the Committee on Environment and Public Works.

DEPARTMENT OF ENERGY ENVIRONMENTAL COMPLIANCE ACT OF 1986

● Mr. HATFIELD. Mr. President, today I am introducing the Department of Energy Environmental Compliance Act of 1986. This legislation would reform the Department of Energy's [DOE] management of radioactive and hazardous wastes at all DOE installations, including the Hanford Nuclear Reservation in the State of Washington. The text of this legislation is identical to a substitute version of H.R. 4848 which was introduced by Congressman WYDEN from Oregon. The original text of H.R. 4848 was introduced in the House of Representatives on May 19, 1986.

The management of both radioactive and hazardous wastes at the DOE's defense facilities was regulated by the Department until a 1984 U.S. court ruling gave the Environmental Protection Agency [EPA] jurisdiction over hazardous waste management under the Resource Conservation and Recovery Act of 1976 [RCRA]. Consequently, the waste produced by the DOE's defense facilities currently is under dual management, with the Department self-regulating radioactive waste and the EPA regulating hazardous waste. Mixed waste, a combination of both radioactive and hazardous wastes, falls under the regulatory powers of both the DOE and the EPA. Needless to say, the current management strategy for the three types of waste causes confusion over the ultimate environmental responsibility.

At the Hanford Nuclear Reservation, the DOE has compiled a poor record of self-regulation regarding the proper disposal of radioactive and hazardous wastes. For example, the Department's own guidelines disapproving soil dumping of radioactive liquids have been set aside continuously at the Hanford site. According to a 1985 report by the Rockwell Corp., which operates Hanford's waste activities, the total volume of liquid wastes dumped on the ground at Hanford since 1943 is in excess of 200 billion gallons. That is enough liquid to cover Manhattan Island to a depth of 40 feet. It is obvious to me that such a practice never would be allowed at a commercial operation. Why then do we allow it at a federally operated facility?

The management of hazardous waste is another source of contention at Hanford. The State of Washington recently assessed fines in the amount of $49,000 against the DOE for violations in the handling of hazardous wastes at the Hanford site. The DOE allegedly falsely certified that it was in compliance with RCRA provisions at these facilities in a RCRA permit application. This incident led to a criminal investigation of the DOE's actions by the EPA, and marked the first time that a Federal facility has been under criminal investigation as a potential lawbreaker for hazardous waste management violations.

This legislation is designed to reform current radioactive and hazardous waste management techniques em-

71-059 O-87-43 (Pt. 22)

ployed by the DOE. The first title gives the EPA an extension of its current regulatory authority over the DOE's defense facilities waste management operations. The EPA would have authority to regulate public exposure to all radioactive wastes, including the radioactive component of mixed waste. By limiting annual public exposure to radiation from DOE sources and setting aggregate limits for lifetime exposure to radiation, the EPA could ensure a consistent management program at the DOE's defense facilities.

The legislation's second title requires the EPA to monitor the DOE's compliance with environmental laws and to report annually to Congress on this matter. The Department would be required to cease dumping radioactive wastes into the soil, as is the current method of disposal at Hanford. Also, the DOE would be required to estimate the cost for cleanup and safe disposal of its current waste output, and to provide quality assurance at all facilities, including Hanford.

Mr. President, the time has come for a more comprehensive approach to waste management at the Department of Energy's defense facilities. The proper management at the Hanford site is critical to the image that the Federal Government projects in the Pacific Northwest, as well as the eminent safety of the citizens of that region. This bill would ensure that both concerns would be properly addressed and subsequently carried out.

Mr. President, I ask unanimous consent that the text of this legislation appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2930

SECTION 1. SHORT TITLE.

This Act may be cited as the "Department of Energy Environmental Compliance Act of 1986".

SEC. 2. DEFINITIONS.

For purposes of this Act;

(1) The term "Administrator" means the Administrator of the Environmental Protection Agency.

(2) The term "environment" includes air, water, soil, rock, sediment, and living things, both on and off the premises of any facility.

(3) The term "Governor" means the chief executive officer of a State.

(4) The term "hazardous waste" has the meaning given such term in section 1004 of the Solid Waste Disposal Act (42 U.S.C. 6903).

(5) The term "monitoring" means sampling and measurement of environmental compliance parameters, or review, inspection, and testing of in-place sampling and measurement devices and methods adequate to establish the thoroughness and accuracy of such devices.

(6) The term "person" includes an individual, corporate entity, partnership, association, State, political subdivision of a State, Federal Government, and any department, agency, or instrumentality of the Federal Government.

(7) The term "radioactive" means spontaneously emitting ionizing radiation through a process of nuclear decay at a level detectable above the natural background level.

(8) The term "radioactive waste" means radioactive materials that are intended for discard or disposal, or radioactive materials that are sometimes discarded or disposed of and that must be reprocessed before being further used. Such term does not include material undergoing reprocessing.

(9) The term "Secretary" means the Secretary of Energy.

(10) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

TITLE I—STANDARDS FOR PROTECTION FROM RADIOACTIVE EMISSIONS FROM FACILITIES OF DEPARTMENT OF ENERGY

SEC. 101. ISSUANCE OF STANDARDS.

(a) IN GENERAL.—The Administrator of the Environmental Protection Agency shall, by rule, issue and periodically revise standards for the protection of the public health and safety and the environment from radioactive emissions from facilities of the Department of Energy not subject to regulation by the Nuclear Regulatory Commission, or by an agreement State under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021).

(b) LEVEL OF PROTECTION.—The standards under subsection (a) shall provide for a level of protection of the public health and safety and the environment at least as great as the level of protection provided by the standards regulating radioactive emissions at facilities licensed by the Nuclear Regulatory Commission, as such standards may be revised from time to time.

(c) SPECIFIC STANDARDS.—The standards issued under subsection (a) shall include—

(1) annual limits for whole body and organ exposure to radioactive emissions resulting from activities of the Department of Energy, which limits shall be issued not later than 6 months after the date of the enactment of this Act;

(2) aggregate limits for lifetime public exposure to such radioactive emissions, which limits shall be issued not later than 12 months after the date of the enactment of this Act; and

(3) models for calculating public exposure to such radioactive emissions, which models—

(A) shall assume that the public is not excluded from any location greater than 0.5 miles from the specific source of such emissions; and

(B) shall be issued not later than 24 months after the date of the enactment of this Act.

(d) NONPREEMPTION.—The issuance of standards under this section shall not preempt any authority of the Federal Government or a State under other Federal law to issue standards that are more protective of the public health and safety and the environment.

SEC. 102. MONITORING OF COMPLIANCE BY DEPARTMENT OF ENERGY.

Not later than 24 months after the date of the enactment of this Act, the Secretary of Energy shall conduct such monitoring as the Administrator determines is necessary to ascertain compliance with the standards issued under section 101.

SEC.103. INFORMATION AND INSPECTIONS.

(a) SUBMISSION OF INFORMATION.—Any owner or operator of a facility subject to the standards issued under section 101 shall, upon request of the Administrator, submit such information as the Administrator determines to be necessary to carry out this title.

(b) INSPECTIONS BY ADMINISTRATOR.—The Administrator may conduct such onsite and offsite inspections of facilities subject to the standards issued under section 101 as the Administrator determines to be necessary to carry out this title. The Administrator shall comply with such applicable legal procedures (including, if necessary, the obtaining of a warrant) as are necessary to obtain samples of wastes or discharges from public or private property.

SEC. 104. ENFORCEMENT.

(a) IN GENERAL.—Whenever the Administrator determines that any person is in violation of any standard issued under section 101, the Administrator may—

(1) issue an order assessing a civil penalty for such violation, requiring compliance immediately or within a specified time, or both, or

(2) commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief.

(b) CIVIL PENALTIES IMPOSED BY ADMINISTRATOR.—

(1) Any order issued under this section shall state the nature of the violation. Any civil penalty assessed in the order shall not exceed $1,000,000.

(2) After making a finding of a violation by any person, the Administrator may suspend action on any request for a permit or a license by the person or the Federal agency employing the person pending before the Administrator under any law. The Administrator may continue such suspension until the person is no longer in violation and has complied with all administrative and judicial orders issued under this section.

(3) Any order issued under this subsection shall become final unless, not later than 30 days after the order is served, the person or persons named in such order request a public hearing.

(4) The Administrator may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and may promulgate rules for discovery procedures in connection with any proceeding under this subsection.

(5) If a person in violation of any standard issued under section 101 fails to take corrective action within the time specified in a compliance order, the Administrator may assess a civil penalty of not more than $25,000 for each day of continued noncompliance.

(c) CIVIL PENALTIES IMPOSED BY COURT.—Any person who violates any standard issued under section 101 shall be liable to the United States for a civil penalty in an amount not to exceed $1,000,000.

(d) LIMITATION.—No amount assessed against any contractor of the Department of Energy (or any subcontractor or supplier of such contractor) under this section may be reimbursed directly or indirectly by the Secretary of Energy.

SEC. 105. APPLICABILITY OF STANDARDS TO FEDERAL FACILITIES.

Neither the United States nor any agent, employee, or officer of the United States shall be exempt or immune from any process or sanction of any Federal or State court

for violation of any standard issued under section 101.

SEC. 106. COOPERATION OF FEDERAL AGENCIES.

All Federal agencies shall assist the Administrator in carrying out the functions of the Administrator under this title and shall promptly make available any requested information concerning radioactive materials management activities in such form as is determined by the Administrator to be appropriate.

SEC. 107. COOPERATION WITH STATES.

(a) AGREEMENT.—The Administrator may, by agreement with the Governor of any State, authorize such State to exercise the powers of the Administrator under sections 103 and 104.

(b) LIMITATION.—The Administrator shall enter into an agreement under subsection (a) only if the Administrator finds that the State is able to devote adequate resources to the program to protect the public health and safety and the environment. The Administrator shall reserve the right to terminate such an agreement upon a finding by the Administrator that the State is not adequately protecting the public health and safety and the environment.

(c) STATE ENFORCEMENT AND INSPECTION POWERS.—A State acting under an agreement under subsection (a) shall share the inspection and enforcement powers and duties granted to the Administrator under this title, including—

(1) the power to make findings of violation;

(2) the power to issue an order assessing a civil penalty for such violation (payable to the Treasury of the United States), requiring compliance immediately or within a specified time, or both;

(3) the duty to hold hearings on any such assessment; and

(4) the power to commence a civil action in the United States district court in the district in which the violation occurred for appropriate relief.

TITLE II—COMPLIANCE OF FACILITIES OF DEPARTMENT OF ENERGY WITH FEDERAL AND STATE ENVIRONMENTAL PROTECTION REQUIREMENTS

SEC. 201. MONITORING BY ENVIRONMENTAL PROTECTION AGENCY.

(a) IN GENERAL.—The Administrator shall conduct such monitoring activities as the Administrator determines to be necessary to assess the extent of compliance of all facilities of the Department of Energy with Federal and State environmental laws. If the Administrator has delegated the implementation of any Federal law to a State, the Administrator may also delegate to such State any monitoring functions necessary to ensure compliance with such law.

(b) SPECIFIC MONITORING ACTIVITIES.—The monitoring conducted under this section shall include the monitoring of—

(1) onsite stack, effluent, and leachate;

(2) offsite areas, including surface waters, for radiation;

(3) cumulative levels of radioactive or hazardous substances in sediments of offsite surface waters; and

(4) any additional parameters that the Administrator determines to be necesssary to protect the public health and safety and the environment.

(c) UNANNOUNCED INSPECTIONS.—The Administrator shall conduct unannounced, onsite inspections at each of the facilities subject to the standards issued under section 101.

(d) ANNUAL REPORT.—The Administrator shall annually submit to the Congress a report on the findings and conclusions of the Administrator as a result of the monitoring conducted under this section. Each report shall include—

(1) a brief description of the actions taken to comply with subsection (a);

(2) a summary of the data, findings, assessments, and characterizations made by the Administrator under this section;

(3) an analysis of the extent of compliance of facilities subject to the standards issued under section 101 with Federal and State environmental laws; and

(4) any recommendations of the Administrator for legislative or other action to ensure compliance with such laws.

(e) REIMBURSEMENT.—The Secretary shall reimburse the Administrator for any expense certified by the Administrator to have been incurred by the Environmental Protection Agency in carrying out the provisions of this section. The Secretary shall not be responsible for costs incurred by the States in carrying out any delegated duties under this section.

SEC. 202. TERMINATION OF USE OF SOIL COLUMNS FOR DISPOSAL OF WASTES.

(a) TERMINATION.—Not later than 1 year after the date of enactment of this Act, the Secretary shall terminate the use of soil columns as a method for the disposal of liquid radioactive waste or hazardous waste at facilities of the Department of Energy.

(b) REPORT.—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit to the Congress an estimate of the cost of complying with this section and a report on technological alternatives to soil disposal of liquid wastes.

SEC. 203. ENVIRONMENTAL AUDIT AND DISCLOSURE OF COSTS.

(a) AUDIT AND DISCLOSURE OF PRESENT OBLIGATIONS.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report describing—

(1) all sites that present a threat to the public health and safety or the environment due to past disposal of hazardous wastes of radioactive wastes from activities carried out by the Department of Energy or its predecessors, including an estimate of the costs of abating the hazards posed by such sites and schedule under which the Secretary shall abate such hazards;

(2) the estimated costs of safe treatment, storage, and ultimate disposal of the current annual production of hazardous wastes and radioactive wastes at facilities of the Department of Energy; and

(3) for existing facilities of the Department of Energy, the estimated costs of safe disposal of any hazardous waste or radioactive waste, including contaminated structures, equipment, or soils, remaining after the end of the useful life of the facility.

(b) DISCLOSURE OF FUTURE COSTS.—

(1) When making a request to Congress for funds for the Department of Energy for an improvement to real property that may be used to generate either radioactive waste or hazardous waste, the President shall submit to the Congress—

(A) an estimate of the total cost of the safe disposal of such waste generated during the useful life of the improvement; and

(B) an estimate of the total cost of the safe disposal of such waste, including contaminated structures, equipment, or soils, remaining after the end of the useful life of the improvement.

(2) For purposes of this subsection, the terms "radioactive waste" and "hazardous waste" do not include materials contaminated—

(A) by military use of weapons;

(B) during an extraordinary nuclear occurrence, as defined in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014); or

(C) by unintentional release of hazardous substances, as such term is defined in section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601).

SEC. 204. QUALITY ASSURANCE OF ENVIRONMENTAL COMPLIANCE.

(a) GENERAL AUTHORITY.—In order to maintain and improve safety and compliance with environmental laws, the Secretary shall establish and operate, for all activities of the Department of Energy that may affect the public health and safety or the environment, quality assurance programs that provide for internal independent reviews to identify problems that may affect the public health and safety or the environment, determine the causes of such problems, provide for remedies for such problems, and ensure that such remedies are carried out.

(b) PERSONNEL POLICIES.—

(1) The Secretary may not allow personnel performing an activity subject to a quality assurance program to also carry out the quality assurance reviews of such activity.

(2) The Secretary shall provide persons performing quality assurance functions sufficient authority and organizational freedom to identify problems, to initiate, recommend, or provide solutions, and to verify implementation of solutions. The Secretary shall ensure that persons and organizations performing quality assurance functions have sufficient authority and organizational freedom, including sufficient independence from cost, schedule, and production pressure, to effectively protect the public health and safety and the environment. Such authority shall include the power to order immediate cessation of an activity that poses an imminent threat to the public health and safety or the environment. Such orders may subsequently be rescinded by the Secretary, but the Secretary may not delegate the authority to rescind such orders to persons directly or indirectly responsible for carrying out the activity posing the threat.

(c) CHARTER OF QUALITY ASSURANCE PROGRAMS.—

(1) The Secretary shall establish written policies, procedures, or instructions governing quality assurance programs within the Department of Energy.

(2) For each quality assurance program, the Secretary shall identify in writing the activities to be overseen by the program, the persons or organizations responsible for carrying out the activities, and the persons or organizations responsible for the quality assurance program. If a quality assurance program is to be implemented by 2 or more independent persons or organizations, the Secretary shall also identify the designated functions of each implementor.

(d) REVIEW OF ACTIVITIES.—In implementing quality assurance programs, the Secretary shall examine activities affecting or potentially affecting the public health and safety or the environment to detemine, at a minimum—

(1) whether personnel are sufficiently indoctrinated and trained to ensure that they achieve and maintain proficiency in their duties;

(2) whether personnel are conforming with the documented instructions and procedures for accomplishing the activity;

(3) whether tools, gauges, instruments, and other measuring and testing devices are properly controlled, calibrated, and adjusted at specified periods to maintain accuracy within necessary, specified limits;

(4) whether the products, wastes, or other outputs from the activity are handled in a manner necessary to achieve compliance with applicable environmental quality standards; and

(5) whether accidents and unexpected events are duly recorded, documents, investigated, explained, and subject to adequate remedial actions.

(e) CORRECTIVE ACTION.—

(1) When a condition adverse to quality is identified (including accidents and unexpected events whose direct effect on quality is not apparent), the Secretary shall determine and make a record of the cause of the condition, including the root or programmatic cause.

(2) The Secretary shall—

(A) promptly correct any condition adverse to quality; and

(B) take reasonable steps to seek out and correct similar conditions and to preclude repetition of the problem at the facility involved and at any other facility of the Department of Energy where the finding may be applicable.

(f) RECORDS.—

(1) The Secretary shall maintain records, and indexes of records, furnishing evidence of activities affecting environmental quality. Such records shall include inspection and test records identifying the inspector or data recorder, the type of observation, the results, the acceptability, and the corrective and other action taken in connection with any deficiencies noted.

(2) The Secretary shall establish requirements concerning recordkeeping. Such requirements shall assign responsibility for creating and holding the records and shall specify how long and where the records will be retained.

(g) AUDITS.—

(1) The Secretary shall establish a comprehensive system of planned and periodic audits of departmental quality assurance programs to determine the effectiveness of the programs. The Secretary shall conduct such audits in accordance with written procedures using appropriately trained personnel not having direct responsibilities in the work or inspections of work being audited. As part of such audits, the Secretary shall invite public commentary on the quality of environmental protection efforts involved.

(2) The Secretary shall document and retain audit results, and indexes of such results, and shall require management in the area being audited to review and respond to the audits. The Secretary shall take follow-up action, including reaudit of deficient areas, where indicated.

SEC. 205. CITIZEN ADVISORY GROUPS.

(a) ESTABLISHMENT.—At the request of the Governor of any State, the Secretary shall establish a citizen advisory group to assist the Secretary in maintaining environmental quality at any Federal site at which there is located 1 or more facilities of the Department of Energy. An advisory group shall not be considered to be a Federal advisory committee or other Federal entity.

(b) MEMBERSHIP.—An advisory group established under subsection (a) shall consist of not more than 10 citizens appointed by the Governor of the State involved. If 2 or more States request to participate in an advisory group, the Governors of such States shall appoint such members jointly.

(c) MEETINGS AND EXPENSES.—The Secretary shall provide meeting space for monthy meetings of each advisory group established under subsection (a). The Secretary may require participating States to defray the expenses of an advisory group, except that the Secretary may not require reimbursement for services the Department of Energy provides to an advisory group.

(d) REPRESENTATIVE OF DEPARTMENT OF ENERGY.—The Secretary shall send a representative to the meetings of each advisory group established under subsection (a) to provide such advisory group with all possible information and to transmit to the Secretary the concerns and suggestions of the advisory group regarding the management of the facilities involved.

(e) WRITTEN RESPONSE.—The Secretary shall respond promptly in writing to all concerns of advisory groups transmitted to the Secretary in writing.

SEC. 206. GRANTING OF EXEMPTIONS.

(a) IN GENERAL.—The President may exempt any facility of the Department of Energy from any requirement established under this Act, if the President determines such exemption to be in the paramount interest of the United States. No such exemption may be granted due to lack of an appropriation, unless the President shall have specifically requested such appropriation as part of the budgetary process and the Congress shall have failed to make available such requested appropriation. Any exemption under this section shall be for a period of not more than 1 year, but additional exemptions may be granted for periods not to exceed 1 year upon a determination by the President that an additional exemption is in the interest of the United States.

(b) ANNUAL REPORT.—The President shall submit to the Congress in January of each year a report setting forth all exemptions granted under this section during the preceding calendar year, together with the reasons of the President for granting each such exemption.

TITLE III—REGULATION OF SOLID WASTE MIXED WITH RADIOACTIVE MATERIALS

SEC. 301. FINDINGS AND PURPOSE.

(a) CONGRESSIONAL FINDINGS.—The Congress finds that—

(1) the generation, transportation, treatment, and storage of solid waste mixed with radioactive material poses potential hazards to public health and safety unless carefully planned and managed;

(2) the Atomic Energy Act facilities of the Department of Energy are real or potential producers of such solid waste mixed with radioactive material; and

(3) the authority of the Environmental Protection Agency to regulate the disposal of solid waste mixed with radioactive material at the Atomic Energy Act facilities of the Department of Energy should be clarified.

(b) STATEMENT OF PURPOSE.—The purpose of this title is to clarify the intent of the Congress that—

(1) the generation, transportation, treatment, and storage of solid waste mixed with radioactive material is subject to the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.); and

(2) the disposal of solid waste mixed with radioactive material at the Atomic Energy Act facilities of the Department of Energy, and at other facilities not licensed for the disposal of radioactive materials, is subject to the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.).

SEC. 302. AMENDMENT TO SOLID WASTE DISPOSAL ACT.

Section 1004(27) of the Solid Waste Disposal Act (42 U.S.C. 6903(27)) is amended—

(1) by inserting "(A)" after "(27)";

(2) by striking the following: ", or source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954, as amended (68 Stat. 923)"; and

(3) by adding at the end the following new subparagraphs:

"(B) Except as otherwise provided in subparagraph (C), the term 'solid waste' does not include source material, special nuclear material, or byproduct material, as such terms are defined in section 11 of the Atomic Energy Act of 1954 (42 U.S.C. 2014).

"(C) The term 'solid waste' includes materials described in subparagraph (B) if—

"(i) such materials are part of any mixture or combination, if the other constituent part of such mixture or combination is a solid waste within the meaning of subparagraph (A); and

"(ii) such materials (I) are in the stage of generation, transportation, storage, or treatment; or (II) are disposed of at an Atomic Energy Act facility of the Department of Energy or other unlicensed location;

except that this subparagraph shall not apply to wastes disposed of at a repository, as defined in section 2(18) of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101(18)).".

SEC. 303. APPLICABILITY.

The provisions of, and amendments made by, this title may not be construed—

(1) to alter the intent of the Congress as to whether the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.), as in effect prior to the amendments made by this title, applies to mixtures and combinations of solid waste that contain radioactive materials that are disposed of at facilities licensed by a State or by the Nuclear Regulatory Comission;

(2) to alter the applicability of any standards or requirements issued pursuant to the Solid Waste Disposal Act (42 U.S.C. 6901 et seq.); or

(3) to affect, modify, or amend the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901 et seq.).●

By Mr. HATFIELD:

S. 2931. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Umatilla Basin project, Oregon, and for other purposes; to the Committee on Energy and Natural Resources.

UMATILLA BASIN PROJECT ACT

● Mr. HATFIELD. Mr. President, today I am introducing legislation authorizing the Umatilla Basin Project in my home State. The Umatilla Basin lies in the northeastern section of Oregon, near the Columbia River, and is an area long known for its bountiful agricultural production. As with all other fertile areas on this Earth, the Umatilla Basin is dependent upon a fresh and abundant supply of water for irrigation. While this need has been met for the farming community through access to the water in the Umatilla River—a tributary to the Columbia River—the use of this vital re-

source has been the cause of considerable conflict for the past several decades between the irrigators and the Umatilla Indians, whose reservation lies within the Umatilla Basin.

This water distribution dispute stems from conflicting commitments made by the Federal Government over the last 131 years. In 1855, the U.S. Government, in exchange for vast areas of the Umatilla Indians' tribal land, promised to protect Indian hunting and fishing rights within the reservation and at the "usual and accustomed" places outside the reservation. However, at the turn of the century, the Department of the Interior's Bureau of Land Reclamation, began an irrigation project in the Umatilla Basin which strained the water resources of the area and has severely reduced the salmon and steelhead runs upon which the Umatilla Indians depend, and the Federal Government guaranteed.

The Pacific Northwest long has been known for its plentiful anadromous fish runs, and the Indian tribes in the area have based their traditional lifestyles, at least partly, on their ability to take advantage of salmon and steelhead runs in the Columbia River and its tributaries. Resource development in the Columbia and Umatilla River basins has adversely affected habitat once available to salmon and steelhead. These developments have reduced Umatilla River fish runs to a mere fraction of what they once were, and many of the traditional Indian fisheries throughout the area have been depleted.

Over the years, the Federal courts have confirmed the intent of Indian treaty reserved rights. For example, in 1980, the court held that a treaty right to fish is meaningless if most of the fish are destroyed by a hostile environment such as a dewatered stream channel. The court emphasized that the States, the Federal Government and others have the obligation to refrain from degrading habitat to the extent that tribes would be deprived of moderate living needs. With this in mind, it is admirable that the Umatilla Indians have continued to work together with competing interest groups to arrive at an acceptable solution for all involved parties. The Indians and other interested groups have cooperated in the development of this proposed project and see its implementation as a major step toward overcoming the water supply conflicts that trouble the Umatilla Basin.

The project authorized by this legislation would be completed in accordance with the recommended plan developed by the U.S. Department of the Interior, Bureau of Reclamation, and presented in the proposed planning report/draft environmental statement, "Umatilla Basin Project," dated July 21, 1986. Construction of this project would ease the tensions between the agriculture community and the Umatilla Indians by providing the mechanisms whereby approximately 38,000 acre-feet of water per year would be pumped from the Columbia River into existing irrigation storage and distribution facilities. This would permit some Umatilla River water now diverted or stored for irrigation to remain in the river to improve flow conditions for fish, while at the same time meeting Federal commitments to supply irrigation water.

The structural features authorized would include a major pumping plant on the Columbia River, a relift pumping station and water carriage facilities. Smaller pumping facilities would be installed downstream of the existing Three Mile Falls Diversion Dam to further improve flows in the lower section of the river. In addition to the pumping facilities, improvements would be made to fish passage and screen installations at several existing irrigation diversions, and a seasonal fish barrier would be installed at the mouth of McKay Creek.

Fishery agencies have reported that the projected level of flow in the Umatilla River and the fish passage and screen improvements resulting from this undertaking would make restoration fall and spring chinook salmon runs possible and improve steelhead runs. The economic benefits of reviving these salmon runs are substantial. The Umatilla Tribe would receive an estimated $4.9 million per year from restored fish runs, and sport and commercial fisheries on the Umatilla and Columbia Rivers and on the Pacific coast could expect $2.2 million per year in additional revenue. Moreover, by securing a water supply for the farmers of the Umatilla Basin, the project would support an $8 million per year farm economy.

Mr. President, I want to emphasize that substantial non-Federal funding commitments are being made for this project under the Pacific Northwest Electric Power Planning and Conservation Act of 1980 and programs of the State of Oregon and other entities. For example, the Bonneville Power Administration is considering a potential investment of approximately $15 million for fish passage and production measures under the Northwest Power Planning Council's Columbia River Basin Fish and Wildlife Program. To date, $1.7 million of non-Federal funds have been expended, and additional projects costing about $5 million are in the final design stages.

There is no doubt that this is a very ambitious project, Mr. President, but it is a vital blueprint for the well-being of the economy of the Umatilla Basin and the proper recognition of the original treaty rights of the Umatilla Indians. Both the farmers and the tribe are exercising patience in this matter while they wait for Federal aid to ease the situation. While I do not preclude the possibility that future input may make it necessary to amend some aspects of this bill, I do believe that this legislation provides a good starting point for discussion on this subject.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2931

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Umatilla Basin Project Act".

SEC. 2. AUTHORIZATION OF PROJECT.

For the purposes of mitigating losses to anadromous fishery resources and continuing irrigation water service to lands of the Umatilla Project authorized on December 4, 1905, the Secretary of the Interior, acting pursuant to the Federal reclamation laws (Act of June 17, 1902, and Acts amendatory thereof and supplementary thereto), is authorized to construct, operate, and maintain the Umatilla Basin Project, Oregon, substantially in accordance with the recommended plan presented in the proposed planning report/draft environmental statement Umatilla Basin Project dated July 21, 1986. The principal works of the project shall consist of—

(1) pumping plants and related conveyance and distribution features;

(2) works incidental to the rehabilitation or modification of existing irrigation systems necessary to accomplish a water exchange;

(3) fish passage and protective facilities and other necessary fishery resources mitigation measures;

(4) a program to monitor and regulate project operations; and

(5) a program to evaluate fishery resource mitigation measures.

SEC. 3. INTEGRATION AND OPERATION OF PROJECT.

Project facilities and features authorized by this Act shall be integrated and coordinated, from an operational standpoint, into other features of the existing Umatilla Project, and shall be operated in a manner consistent with Federal reclamation laws and water rights established pursuant to State law including the contract rights of water users. Prior to the initiation of project construction, the Secretary shall secure the necessary State and local permits and other authorities for the operation of project facilities, and through the conclusion of appropriate agreements with the State of Oregon provide for the monitoring and regulation of project-related water supplies for the purposes herein identified.

SEC. 4. POWER FOR PROJECT PUMPING.

Power for project pumping shall be made available through the Federal Columbia River Power System at charges determined by the Secretary of Energy.

SEC. 5. RATE FOR CONSTRUCTION CHARGES.

The rate used for computing interest during construction, and where appropriate, interest on the unpaid balance of the reimbursable cost of the project, shall be deter-

mined by the Secretary of the Treasury, as of the beginning of the fiscal year in which funds for construction of the project are first disbursed, taking into consideration the computed average market yields on outstanding marketable obligations of the United States which are neither due nor callable for 15 years from date of issue.

SEC. 6. FISHERY RESOURCE FACILITIES.

Facilities and any other project features which furnish fishery resource benefits in connection with the project shall be constructed, operated, and maintained in accordance with the Federal Water Project Recreation Act (Public Law 89-72; 79 Stat. 213), as amended, except that costs allocated to the mitigation of anadromous fish species shall be nonreimbursable.

SEC. 7. NON-FEDERAL OBLIGATIONS.

The Secretary shall negotiate and enter into agreements which specify appropriate non-Federal obligations for the operation and maintenance of project facilities authorized in this Act. The Federal responsibility for operation and maintenance shall be limited to those costs in excess of non-Federal obligations as established by such agreements.

SEC. 8. INTERIM FLOW AUGMENTATION.

Until the facilities authorized in this Act are constructed and in operation, and as an interim measure to provide flow augmentation in the Umatilla River, funds are authorized to be appropriated to the Secretary for that portion of the operation and maintenance, including power, of the existing West Extension Irrigation District pumping facility allocated to anadromous fish and resulting from the interim operation.

SEC. 9. NON-FEDERAL COSTS.

(a) CREDIT FOR NON-FEDERAL FISHERY RESOURCE IMPROVEMENTS.—The Umatilla Basin Project authorized by this Act is a Federal action to improve streamflow and fish passage conditions, and shall be considered part of a comprehensive program to restore Umatilla River Basin anadromous fishery resource. Related fishery resource improvement facilities which utilize non-Federal funding sources under the Pacific Northwest Electric Power Planning and Conservation Act of 1980 (Public Law 96-501; 94 Stat. 2697) and programs of the State of Oregon and other entities, shall be consolidated in any final calculation of required cost-sharing.

(b) TREATMENT OF NON-FEDERAL COSTS INCURRED BEFORE APPROPRIATION.—Where any public or private entity shares in the cost of or constructs any feature of the authorized project or portion thereof prior to the appropriation of funds for construction of such feature, the costs incurred shall be credited to the total amount of any non-Federal costs required to be borne for the project, except that no credit may be given without prior approval of the Secretary. The Secretary shall grant such approval upon a determination that the proposed action would be in connection with a feature that will constitute an integral part of the project. The Secretary is authorized to accept title to facilities appropriate to the project without compensation and thereafer to operate and maintain such facilities.

SEC. 10. STUDY ON GROUND WATER CONDITIONS.

The Secretary is directed to evaluate measures and programs to address ground water conditions within the Umatilla River Basin, including conjunctive uses of ground and surface waters, and to report findings and recommendations to the President and the Congress within three years after the date of enactment of this Act.

SEC. 11. AUTHORIZATION.

There is hereby authorized to be appropriated for construction of the Umatilla Basin Project, the sum of $37,700,000 (October 1985 prices), plus or minus such amounts as may be required by reason of changes in the cost of construction work of the types involved therein as shown by applicable engineering cost indexes. There are also authorized to be appropriated such sums as may be required for the operation and maintenance of the project.●

By Mr. DOMENICI (for himself and Mr. BINGAMAN):

S. 2932. A bill to establish the El Malpais National Monument, the Masau Trail, and the Grants National Conservation Area in the State of New Mexico, and for other purposes; to the Committee on Energy and Natural Resources.

MASAU TRAIL ACT

● Mr. DOMENICI. Mr. President, today, I am introducing the Masau Trail Act. This act, which will establish the Masau Trail, the El Malpais National Monument, and the Grants National Conservation Area, will provide protection to some of New Mexico's most unique natural resources and also will promote tourism in the Grants, NM area, which has suffered greatly from the decline in the energy industries, especially the uranium industry.

The act is named after Masau, the great God-Man who welcomed the Indian people to the Earth from the underworld as they came through the sipapu, or place of emergence. According to the history of the Pueblo Indians, mankind has existed since the beginning of time, but they lived for a long, long time underground. Eventually, they emerged from the underworld and were welcomed by Masau. The Pueblo people then followed Masau's huge footprints, which were as large as a man's arm, across the Earth.

It is fitting that the act be named after Masau, as modern day travelers will be able to follow in the footprints of the Indian people who traveled across northwestern New Mexico in ancient times as they travel along the Masau Trail, which will be created by this legislation.

Masau has characteristics similar to the legislation that I am introducing. Masau means many things to many people. He is god of life; the god of death; the god of travelers; the god of boundaries; the god of fertility; the god of war. Likewise, this legislation will mean many things to many people. It will accomplish several very important objectives for the State of New Mexico:

First. It will establish the Masau Trail, an automobile touring route linking a number of historic and cultural sites in northwestern New Mexico;

Second. It will provide a significant tourist attraction for the Grants area in the form of a new unit of the National Park Service to be called the El Malpais National Monument;

Third. It will provide Federal protection to over 379,000 acres of lands; and

Fourth. It will place over 115,000 acres of Federal land in wilderness status.

Mr. President, I am compelled to point out that renowned travel expert Arthur Frommer has recently declared New Mexico to be one of the 10 best vacation spots in the world. It is an area of magnificent beauty and proud history. This bill will increase New Mexico's attraction to travelers from all over the world. Additionally, this bill will help the community of Grants, NM, which has lost 7,000 jobs in recent years due to the collapse of the uranium industry.

THE MASAU TRAIL

The Masau Trail will be an automoble touring route which will link a number of prehistoric and historic sites in northwestern New Mexico. These sites will include Aztec Ruins, Bandelier, Canyon de Chelly, Chaco Canyon, El Malpais, El Morro, Salinas National Monuments, as well as other national, State, and local sites of interest. The trail is a multigovernmental, multiagency concept. On the Federal level, the National Park Service, the Bureau of Land Management, and the National Forest Service include lands under their control in the trail. The State of New Mexico and various local governments, as well as the Indian tribes in the area, will be invited to participate in the trail.

The purpose of this trail is to introduce visitors to the wealth of historic, cultural, and natural sites in northwestern New Mexico and to give them a comprehensive perspective on the history of the Indian peoples who populate the region. It will allow visitors to the region to appreciate the continuum of history and culture, from ancient times to modern day, which is represented in the region. The Masau Trail will emphasize the interrelationship of all of the sites along the trail.

The trail will be marked by signs with giant footprints, the footprints of Masau. One can see examples of Masau's footprints in the ancient petroglyphs which cover the volcanic escarpment on the west side of Albuquerque. I have been working on finding ways to provide protection to this area, which includes over 10,000 ancient Indian and Hispanic rock carvings in a 17-mile stretch, and hopefully in the coming year we will be able to incorporate the Albuquerque petroglyphs into the Masau Trail.

A multigovernmental, multiagency visitors center, bringing together all of the entities that are participating in the trail, will be constructed along

Interstate 40 near Grants. This center will introduce travelers to the Masau Trail and give them an overview of the history and culture of this fascinating region. It also will provide tourists with information on the various components of the trail and directions on how to reach those sites.

EL MALPAIS NATIONAL MONUMENT

This legislation will also create a new unit of the National Park Service, the El Malpais National Monument, at the lava flows south of Grants known as El Malpais.

Last summer, I had the opportunity to tour El Malpais with William Mott, the Director of the National Park Service. Following that visit, Mr. Mott recommended to me that Congress designate approximately 126,000 acres of the El Malpais lava flows and surrounding lands as a National Monument under the supervision of the Park Service. The bill I introduce today will do that. The Monument will encompass the Bandera, Laguna, and McCarty's lava flows, the ice caves, Bandera Crater, the Sandstone Bluffs overlook, the Dominquez-Escalante Trail, the natural sandstone arch, the Narrows, La Vieja rock formation, McCarty's Crater, and a multitude of other resources. A visitors center will be constructed in the vicinity of Bandera Crater and the ice caves, where most of the visitor use is expected to be concentrated.

El Malpais is a large volcanic region located near Grants, NM, approximately 75 miles west of Albuquerque. "El Malpais," which means "bad country," is the historic Spanish name for the lava formation.

El Malpais consists of at least 5 different lava flows, the most recent of which is estimated to be only 600 to 1,300 years old, making it one of the most recent lava flows in the continental United States. The lava flows contain a number of unusual and unique physical features of lava eruptions, including pahoehoe, aa, blocky flows, grooved lava, squeeze ups, collapsed depressions, pressure ridges, kipukas, spatter cones, lava tubes, ice caves, and large cinder cones. El Malpais contains the longest known lava tubes in North America. One tube has been measured to be 16 miles in length.

The Bandera Crater area and associated lava flows and ice caves have been characterized by many geologists as outstanding geological features with superior interpretive and educational value. Bandera Crater is nearly a half a mile wide, 1,000 feet deep, and is considered a classic example of its type of volcanic activity. Ice caves occur within the flow associated with the Bandera Crater area. Some ice caves have magnificent 30- to 50-foot ice crystals on the ceilings.

The eastern edge of the El Malpais area includes a high-sandstone ridge and bluff area which encompasses a highly scenic landscape with tremendous contrast between the black lava flows and the pink sandstone bluffs. This bluff area contains the largest and most dramatic natural arch in New Mexico. Also found in this area is the Las Ventanas site, an established unit of the Chaco Culture Archeological Protection Site System, and La Vieja ("The Old Woman"), a rock formation that looks like the profile of a woman.

The Dominquez-Escalante Trail crosses the lava flow. This was the route pioneered by Father Silvestre Velez de Escalante and his Franciscan superior, Francisco Atanasio Dominguez, as they sought a route from Santa Fe to California in 1776, in order to unite the northern and western portions of Spain's American empire. This marked trail offers interpretive opportunities and an excellent cross-lava trail corridor.

The establishment of the El Malpais National Monument will provide visitors with a magnificent window on the unique geologic, natural, and cultural features of the El Malpais area. I am happy that the National Park Service, the premier agency in the world for presenting natural resources to the public, will be administering this area. They will bring their expertise to this project and will assure that visitors to this area get a first-class experience.

THE GRANTS NATIONAL CONSERVATION AREA

The legislation I introduce today also will designate approximately 253,000 acres of land surrounding the El Malpais National Monument as the Grants National Conservation Area.

This area will be administered by the Bureau of Land Management. The Bureau has protected this area, including the area to be designated as a national monument, for a number of years. They have done an excellent job and this will allow them to continue to manage the majority of these lands.

The conservation area will encompass the string of volcanic craters known as Chain of Craters, portions of the various lava flows, the areas known as Hole in the Wall and Little Hole in the Wall, and surrounding grazing lands.

This area lies within the the zone known as the Acoma cultural province. It is aproximately 25 miles from the famed Acoma Pueblo and its Sky City. The conservation area contains extremely high value, high density archeological resources in thousands of separate archeological sites. Many of these sites are associated with the prehistoric Chacoan system and the related, but more recent, Acoma cultural province. This region was an area of interface between the prehistoric Mogollon and Anasazi cultures.

The conservation area contains numerous sites and site communities, including pithouses, single room field house, water control features, and abundance of rock art, Chacoan road segments, Chacoan outliers with attendant surrounding communities, great kivas, and large pueblo masonry strutures.

The high density and diversity of cultural resources along the east side of the lava combined with the relative short distances created by the physical features that concentrated settlement between the lava flows to the west and the high-rugged sandstone mesas to the east create a major research and visitor use opportunity. The bill provides direction to the Bureau of Land Management to develop special management plans for the protection and study of these archeological resources. A similar directive is provided to the National Park Service for those archeological resources within the El Malpais National Monument.

This legislation will designate approximately 115,000 acres of BLM wilderness within the conservation area. These areas, known as the Rimrock, Little Rimrock, Sand Canyon, Pinyon, and West Malpais Wilderness Study Areas, as well as the area known as Hole in the Wall. These areas contain some of the most stunning natural resources in New Mexico and deserve to be protected for the enjoyment of future generations.

Mr. President, I am extremely excited about this legislation. I believe that it will provide much-needed protection to one of the most unusual and unique natural and cultural areas of the United States. It also will provide visitors to northwestern New Mexico with an incredibly comprehensive and rewarding education on the history of this region. Finally, it will give an area of the State of New Mexico which has suffered much from the collapse of the uranium industry a much-deserved shot in the arm in the form of increased tourism. The magificient thing about this legislation is that it can do each of these things without excluding the others.

This proposal is the product of much work. My colleague from New Mexico, Senator BINGAMAN, and I have worked with the Representative from this area in order to fashion legislation which will achieve the ambitious goals that we have set. I am pleased that we have met these goals. This legislation is the product of some very tough negotiations and I think it is the better for it.

However, this proposal is by no means perfect. When hearings are held on this legislation in the next Congress, we must address the issue of water rights. Although very little, if any, water is present in this area, the withdrawal of lands for a national monument and for the creation of wilderness units brings into question the status of water rights in the area. This

has become a very contentious issue. I am aware that some Members of the Senate feel that any legislation creating a national monument or wilderness units must include language addressing water rights. The bill that I am introducing today, however, does not address the issue of water rights. Therefore, as I introduce this legislation today, I am also filing an amendment (No. 3478) to clarify the status of existing water rights in the lands covered by this bill. Hopefully, this amendment will serve as the basis of further discussions on this issue.

Another area that will need close examination is grazing. A number of individuals have historically conducted grazing in the areas covered by this bill. The Park Service boundaries have been drawn so as to exclude grazing areas to the maximum extent possible without diminishing the resource to be protected, as grazing within the national monument will be phased out within 10 years. However, we must closely examine the boundaries to make sure that we haven't overlooked anything in this area.

Additionally, this legislation does not address the future of subsurface mineral rights which underlie lands to be designated as wilderness. The creation of wilderness effectively denies the owner of the subsurface estate the possibility of ever developing the mineral potential of the land or even of discovering what minerals are present there. I believe that Congress must treat the owners of the subsurface estate fairly and provide an efficient process for exchanging mineral rights which underlie wilderness lands for other Federal mineral rights.

Of course, I am under no illusion that we can enact this legislation into law in the short time left in this Congress. This is a major piece of legislation and it deserves to have full hearing and an opportunity for refinement. I intend to reintroduce this legislation in the 100th Congress when it convenes in January. I look forward to holding hearings in New Mexico, so that all interested parties, including the citizens of the Grants area, local landowners, ranchers, the environmental community, the State of New Mexico, Indian tribes, and others, have the opportunity to contribute to this legislation. I am pleased that the staff of the Senate Energy Committee will be travelling to the Grants area after Congress recesses in order to view the area and pave the way for quick approval of this legislation next Congress.

Finally, Mr. President, I would like to thank Mr. Mott and his staff at the National Park Service and Robert Burford, the Director of the Bureau of Land Management, and his staff for their assistance in putting this package together. Without their help, it would not have been possible to create this legislation.

Mr. President, I ask unanimous consent to print the bill in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—EL MALPAIS NATIONAL MONUMENT

SECTION 101. (a) In order to preserve for the benefit and enjoyment of present and future generations that area in western New Mexico containing the nationally significant Grants Lava Flow, the Las Ventanas Chacoan Archeological Site, and other significant natural and cultural resources, there is hereby established the El Malpais National Monument (hereinafter referred to as the "monument"). The monument shall consist of approximately 126,000 acres as generally depicted on the map entitled "Boundary Map, El Malpais National Monument" numbered NM-ELMA-80000-A and dated October 1986. The map shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior.

(b) As soon as practicable after the enactment of this Act, the Secretary of the Interior (hereinafter in this title referred to as the "Secretary") shall file a legal description of the monument designated under this section with the Committee on Interior and Insular Affairs of the United States House of Representatives and with the Committee on Energy and Natural Resources of the United States Senate. Such legal description shall have the same force and effect as if included in this Act, except that the Secretary may correct clerical and typographical errors in such legal description and in the map referred to in subsection (a). The legal description shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior.

SEC. 102. Lands and waters, and interests therein, within the boundaries of the monument which were administered by the Forest Service, United States Department of Agriculture, prior to the date of enactment of this Act are hereby transferred to the administrative jurisdiction of the Secretary to be administered as part of the monument in accordance with this Act. The boundaries of the Cibola National Forest shall be adjusted accordingly.

SEC. 103. The Secretary, acting through the Director of the National Park Service, shall administer the monument in accordance with the provisions of this Act and the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 1 et seq.). The Secretary shall protect, manage, and administer the monument in such a manner as to preserve the scenery, the natural, historic, and cultural resources of the monument and to provide for the public understanding and enjoyment of the same in such a manner as to perpetuate these qualities for future generations.

SEC. 104. Where any lands included within the boundary of the monument on the map referred to in section 101(a) are legally occupied or utilized on the date of enactment of this Act for grazing purposes, pursuant to a lease, permit, or license which is—

(1) for a fixed term of years issued or authorized by any department, establishment, or agency of the United States, and

(2) scheduled for termination before December 31, 1996,

the Secretary shall allow, notwithstanding any other provision of law, the persons holding such grazing privileges (or their heirs) to retain such grazing privileges until December 31, 1996, subject to such limitations, conditions, or regulations as the Secretary may prescribe to insure proper range management.

TITLE II—MASAU TRAIL

SEC. 201. In order to provide for public appreciation, education, understanding, and enjoyment of certain nationally significant sites of antiquity in western New Mexico which are accessible by public road, the Secretary of the Interior (hereinafter in this title referred to as the "Secretary"), with the concurrence of the agency having jurisdiction over such roads, is authorized to designate, by publication of a description thereof in the Federal Register, a vehicular tour route along existing public roads linking prehistoric and historic cultural sites in western New Mexico. Such route shall be known as the Masau Trail (hereinafter referred to as the "trail"), and shall be marked with an appropriate marker to guide members of the visiting public. With the concurrence of the State or local entity having jurisdiction over such roads so designated, the Secretary may erect thereon and maintain signs and other informational devices displaying the Masau Trail Marker.

SEC. 202. The trail as initially designated shall include public roads linking El Malpais National Monument as established pursuant to title II of this Act, El Morro National Monument, Chaco Culture National Historical Park, Aztec Ruins National Monument, Salinas National Monument, Bandelier National Monument, and Canyon De Chelly National Monument. The Secretary may, in the manner set forth in section 201, designate additional segments of the trail from time to time as appropriate to link the foregoing sites with other cultural sites or sites of natural significance when such sites are designated and protected by Federal, State, or local governments, Indian tribes, or nonprofit entities. With respect to sites linked by segments of the trail which are administered by other Federal, State, local, tribal, or nonprofit entities, the Secretary may, pursuant to cooperative agreements with such entities, provide technical assistance in the development of interpretive devices and materials in order to contribute to public appreciation of the natural and cultural resources of the sites along the trail.

TITLE III—GRANTS NATIONAL CONSERVATION AREA

SEC. 301. (a) In order to protect for the benefit and enjoyment of future generations that area in Western New Mexico containing the unique and nationally important geological, archeological, ecological, cultural, scenic, scientific, and wilderness resources of the public lands surrounding the Grants Lava Flow, there is hereby established the Grants National Conservation Area (hereinafter referred to as the "conservation area"). The conservation area shall consist of approximately 253,000 acres of publicly owned land as generally depicted on a map entitled "Grants National Conservation Area—Proposed", dated October 1986.

(b) As soon as practicable after the enactment of this Act, the Secretary of the Interior (hereinafter in this title referred to as the "Secretary") shall file a map and legal

description of the conservation area designated under this section with the Committee on Interior and Insular Affairs of the United States House of Representatives and with the Committee on Energy and Natural Resources of the United States Senate. Such map and legal description shall have the same force and effect as if included in this Act, except that the Secretary may correct clerical and typographical errors in such map and legal description. The map and legal description shall be on file and available for public inspection in the offices of the Director of the Bureau of Land Management, Department of the Interior.

SEC. 302. (a) In order to protect for the benefit and enjoyment of future generations that area in Western New Mexico containing the unique and nationally important geological, archeological, ecological, cultural, scenic, scientific, and wilderness resources of the public lands surrounding the Grants Lava Flow, the Secretary, acting through the Director of the Bureau of Land Management, shall administer the conservation area as a unit within the Albuquerque District in accordance with this Act and in accordance with the laws pertaining to the public lands managed by the Bureau of Land Management, including those provisions relating to grazing on public lands.

(b) The Secretary shall permit hunting and trapping within the conservation area in accordance with applicable laws and regulations of the United States and the State of New Mexico; except that the Secretary, after consultation with the New Mexico Department of Game and Fish, may issue regulations designating zones where and establishing periods when no hunting or trapping shall be permitted for reasons of public safety, administration, or public use and enjoyment.

(c) Collection of green or dead wood for sale or other commerical purposes shall not be permitted in the conservation area.

TITLE IV—WILDERNESS DESIGNATION

SEC. 401. (a) In furtherance of the purposes of the Wilderness Act (78 Stat. 890; 16 U.S.C. 131), there is hereby designated as wilderness, and, therefore, as components of the National Wilderness Preservation System, approximately 115,000 acres as generally depicted on the map entitled "Grants National Conservation Area—Proposed Wilderness and dated October 1986.

(b) As soon as practicable after the enactment of this Act, the Secretary shall file a map and legal description of each wilderness area designated by this Act with the Committee on Interior and Insular Affairs of the United States House of Representatives and with the Committee on Energy and Natural Resources of the United States Senate. Such map and legal description shall have the same force and effect as if included in this Act, except that the Secretary may correct clerical and typographical errors in such map and legal description. The map and legal description shall be on file and available for public inspection in the office of the Director of the Bureau of Land Management, Department of the Interior.

SEC. 402. (a) Subject to valid existing rights, each wilderness area designated under this section shall be administered by the Secretary, through the Director of the Bureau of Land Management, in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the date of enactment of this Act.

(b) Within the wilderness area designated by this Act, the grazing of livestock, where established prior to the enactment of this Act, shall be permitted to continue subject to such reasonable regulations, policies, and practices as the Secretary deems necessary, as long as such regulations, policies, and practices fully conform with and implement the intent of Congress regarding grazing in such areas as such intent is expressed in the Wilderness Act and section 108 of Public Law 96-560 (16 U.S.C. 1133 note).

TITLE V—GENERAL PROVISIONS

SEC. 501. (a) Within two years from the date of enactment of this Act, the Secretary shall develop and transmit to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate separate general management plans for the monument and the conservation area which shall describe the appropriate uses and development of the monument and the conservation area consistent with the purposes of this Act. The plans shall include but not be limited to each of the following:

(1) Implementation plans for a continuing program of interpretation and public education about the resources and values of the monument and the conservation area.

(2) Proposals for public facilities to be developed for the conservation area or the monument, including a visitors center in the vicinity of Bandera Crater and a multiagency orientation center, to be located in or near Grants, New Mexico, and adjacent to Interstate 40, to accommodate visitors to western New Mexico.

(3) Natural and cultural resources management plans for the monument and the conservation area, with a particular emphasis on the preservation of archeological resources, giving high priority to the enforcement of the provisions of the Archeological Resources Protection Act of 1979 and the National Historic Preservation Act within the monument and the conservation area.

The natural and cultural resources management plans shall be prepared in close consultation with the Advisory Council on Historic Preservation, the New Mexico State Historic Preservation Office, and the Pueblo of Acoma and their traditional cultural and religious authorities, and shall provide for long-term scientific use of archeological resources in the monument and the conservation area, including the wilderness areas designated by this Act.

(b)(1) The general management plan for the conservation area shall review and recommend the suitability or nonsuitability for preservation as wilderness those lands comprising approximately 16,600 acres, identified as "Bureau of Land Management Wilderness Study Area 020-001C" (hereinafter in this title referred to as the "WSA") in the Draft Environmental Impact Statement and Wilderness Study Report for Wilderness Designation of El Malpais, as filed with the Environmental Protection Agency on August 9, 1981.

(2) Pending submission of a recommendation and until otherwise directed by Act of Congress, the Secretary, acting through the Director of the Bureau of Land Management, shall manage the lands within the WSA so as to maintain their potential for inclusion within the national wilderness preservation system.

(c)(1) The general management plan for the monument shall review and recommend the suitability or nonsuitability for preservation as wilderness those roadless lands within the boundaries of the monument.

(2) Pending the submission of a recommendation and until otherwise directed by Act of Congress, the Secretary, through the Director of the National Park Service, shall manage those roadless lands within the boundaries of the monument so as to maintain their potential for inclusion in the National Wilderness Preservation System.

SEC. 502. (a) Within the monument and the conservation area, the Secretary is authorized to acquire lands and interests in lands by donation, purchase with donated or appropriated funds, exchange, or transfer from any other Federal agency, except that lands or interests therein owned by the State of New Mexico or a political subdivision thereof may be acquired only by donation or exchange.

(b) The Secretary of the Interior shall exchange such public lands or interests in lands, as are of approximately equal value and selected by the State of New Mexico, acting through its Commissioner of Public Lands, for any State lands or interests therein located within the boundaries of the monument or the conservation area.

(c) Within 6 months after enactment of this Act, the Secretary of the Interior shall notify the New Mexico Commissioner of Public Lands what State lands or interests therein are within the monument or the conservation area. The notice shall include notice of the Secretary's duty to exchange public lands selected by the State for any State land contained within the boundaries of the monument or conservation area. The notice shall contain a listing of all public lands within the boundaries of the State, which have not been withdrawn from entry and which the Secretary identifies as available to the State in exchange for State lands within the monument or the conservation area.

(d) After the receipt of the list of available public lands, if the Commissioner of Public Lands gives notice to the Secretary of the State's selection of lands, the Secretary shall notify the State in writing as to whether the Department of the Interior considers the State Federal lands to be of approximately equal value. In case of disagreement between the Secretary and the Commissioner as to relative value of the acquired and selected lands, the Secretary and the Commissioner shall agree on the appointment of a disinterested independent appraiser who will review valuation data presented by both parties and determine the amount of selected land which best represents approximate equal value. Such determination will be binding on the Secretary and the Commissioner. The transfer of title to lands or interests therein to the State of New Mexico shall be completed within 2 years after the enactment of this Act.

SEC. 503. Subject to valid existing rights, all Federal lands within the monument and the conservation area, and all Federal lands and mineral rights acquired within the monument and conservation area, are hereby withdrawn from all forms of entry, appropriation, or disposal under the public land laws, and from location, entry, and patent under the United States mining laws, and from disposition under all laws pertaining to mineral and geothermal leasing and all amendments thereto. Any activity carried out pursuant to valid existing mineral rights shall be conducted in accordance with applicable Federal and State law.

SEC. 504. In recognition of the past use of the monument and the conservation area by Indian people for traditional cultural and religious purposes, the Secretary shall insure nonexclusive access to the monument and the conservation area by Indian people for such traditional cultural and religious purposes, including the harvest of pine nuts. Such direction shall be consistent with the purpose and intent of the American Indian Religious Freedom Act of August 11, 1978 (42 U.S.C. 1996). As a part of the plans prepared pursuant to section 501, the Secretary shall, in consultation with appropriate Indian tribes and their traditional cultural and religious authorities, define the past cultural and religious uses of the monument and the conservation area by Indian people.

SEC. 505. In order to encourage unified and cost effective interpretation of prehistoric and historic civilizations in western New Mexico, the Secretary is authorized and encouraged to enter into cooperative agreements with other Federal, State, and local public departments and agencies, Indian tribes, and nonprofit entities providing for the interpretation of prehistoric and historic civilizations in western New Mexico. The Secretary may, pursuant to such agreements, cooperate in the development and operation of a multiagency orientation center and programs on lands and interests in lands inside and outside of the boundaries of the monument and the conservation area generally, with the concurrence of the owner or administrator thereof, and specifically in or near Grants, New Mexico, adjacent to Interstate 40 in accordance with the plan required pursuant to section 501.

TITLE VI—APPROPRIATION AUTHORIZATION

SEC. 601. There is hereby authorized to be appropriated such sums as may be necessary for the purposes of this Act.●

● Mr. BINGAMAN. Mr. President, I am pleased to join the distinguished senior Senator from New Mexico in introducing the El Malpais/Masau Trail bill.

This legislation is identical to legislation being introduced in the House of Representatives today by Congressman RICHARDSON. The bill is the result of several weeks' work to reach compromise language.

The proposal establishes a 126,000-acre El Malpais National Monument to be administered by the National Park Service. It includes an El Malpais Visitor Center. It calls for the designation of the Masau Trail, an auto-touring route to link prehistoric and historic cultural sites in western New Mexico. It authorizes a Masau Trail Visitors Center in Grants, NM.

The bill creates a 254,000-acre National Conservation Area to be administered by the Bureau of Land Management. Grazing, hunting, trapping, and noncommercial wood gathering would be permitted in the BLM area. The bill also creates 115,000 acres of BLM wilderness, including Rimrock, Little Rimrock, Sand Canyon, Pinon, and West Malpais wilderness study areas, and an area known as the Hole-In-The-Wall. The bill calls for the study of roadless areas of the National Monument and the restudy of the Chain of Craters Wilderness Study Area for possible designation as wilderness. The legislation also protects Native American uses and directs the BLM and the Park Service to develop management plans for the protection of areas with valued archeological resources.

This bill is a delicate balance which will foster important economic development and increased tourism in the Grants area and provides important environmental protection of this region of the country.

The Malpais is a unique area of the State of New Mexico and the Nation and it is deserving of Park Service and wilderness protection. The name Malpais is the historic Spanish name meaning "bad country." It is the name of the lava formation located in western New Mexico also known as the Grants Lava Flow. It actually consists of three flows which have been described by the Park Service as "a beautiful, fresh, black lava flow * * * as fresh and unweathered as the historic flows of the Hawaiian Islands, Vesuvius and other areas." It also contains a variety of "beautiful volcanic features, including some of the largest and most extensive lava tubes reported in the United States; many cinder cones of classic symmetry; and some astonishingly magnificent ice caves, full of ice stalagmites crystalline ceilings, and other unique formations." It also contains lava tube sinkholes and uniquely angled formations not found anywhere else on the North American Continent.

The surrounding wilderness areas are also deserving of protection as they shield beautiful natural areas of tall pines and pinons, as well as sandstone bluffs and extinct volcanoes.

There is much local, public support for protecting these scenic areas. The package that has been developed takes the best features of the proposals by the Park Service and the BLM and combines them into a well-organized management plan for the area.

I strongly support the measure and I encourage its immediate passage.●

By Mr. MOYNIHAN (for himself and Mr. HEINZ):

S. 2933. A bill to charter the National Academy of Social Insurance; to the Committee on the Judiciary.

NATIONAL ACADEMY OF SOCIAL INSURANCE

● Mr. MOYNIHAN. Mr. President, I rise today to offer a bill to grant a Federal charter to the National Academy of Social Insurance. The Academy was established in May 1986 by a distinguished group of individuals from business, labor, government, and the academic community. Although their professional backgrounds are diverse, each has achieved distinction in the field of social insurance. I am honored to serve as a member of the Academy's organizing committee, together with my colleague, and the cosponsor of this bill, Senator HEINZ.

Mr. President, the Social Security Act of 1935 is perhaps the greatest piece of domestic legislation of this century. The original act and its subsequent amendments—including Survivors, Disability, and Health Insurance—affect nearly every American family.

In 1986, our Social Security System will pay nearly $200 billion in benefits to an average of 37 million retired and disabled individuals, their spouses and children, and to survivors of deceased workers. Annual payroll tax contributions of some $210 billion will be collected this year from about 125 million workers and 6 million employers. Together, the Old Age, Survivors, Disability, and Health Insurance [OASDHI] programs account for approximately 48 percent of all domestic expenditures made by the Federal Government.

The Social Security Act, Mr. President, represents a deliberate Federal policy to strengthen American families. In the not-so-distant past, the family that lost a breadwinner through death, disability, or advanced age was left to fend for itself. The very fortunate might manage on their own savings or with the help of relatives and friends. Charitable contributions and locally funded public assistance, if available, might help. But when these alternatives failed—as they too often did—families broke down and frequently broke up.

It was to these problems that the Social Security Act addressed itself. In the original act and in succeeding amendments, Congress sought to help insulate family members from the disruption caused by the loss of a worker's earned income. This objective is laudable. It deserves great effort. Our social insurance programs make that effort, Mr. President, and they succeed. How else can we explain the unprecedented public and bipartisan political support enjoyed by a system that raises Federal revenues in sums second only to those raised by the income tax?

But neither problems nor solutions remain static. Today, Mr. President, our social insurance programs operate in an environment vastly changed from that of 50 years ago: changes in our economy and labor market, changes in our expectations concerning women and work, and perhaps most dramatic, changes in the demography of our population. The aging of America has been much discussed, but less well understood is the fact, that some 14 years ago, the American birthrate dropped below the reproduction level. Well below. It does not take any great insight to realize that this dieing back of the American population has profound implications for the

aged. In a word: who will provide for them? Clearly, all of these changes pose new and serious challenges to our Social Security System.

That is why, Mr. President, the National Academy of Social Insurance is long overdue. Until now, there has been no organization of scholars and experts to plan and carry out a long-term education and research agenda, to promote an exchange of ideas, or to develop informed policy proposals.

If we are to assure the future health of the Social Security System, we ought to bring together experts from diverse disciplines. We ought to provide a forum for unfettered and bipartisan debate. We ought to provide clear, objective information to the millions of Americans who contribute toward and benefit from our social insurance programs.

Finally, Mr. President, we have a group of distinguished individuals intending to do all these things. I ask my colleagues to join with me and Senator HEINZ in formally recognizing and granting a charter to the National Academy of Social Insurance. In doing so, we encourage serious and ongoing study of the maturation and evolution of our Social Security System, we increase the availability of essential information to the public, and we signal congressional resolve to continue our social insurance programs, on a sound basis, into the 21st century and beyond.

Mr. President, I ask unanimous consent that a copy of the bill and a list of the Academy's organizing committee members be printed in the RECORD.

There being no objection, the bill and list were ordered to be printed in the RECORD, as follows:

S. 2933

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CHARTER.

The National Academy of Social Insurance, organized and incorporated under the laws of the District of Columbia, is hereby recognized as such and is granted a charter.

SEC 2. POWERS.

The National Academy of Social Insurance (in this Act referred to as the "Academy") shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

SEC. 3. OBJECTS AND PURPOSES OF CORPORATION.

The objects and purposes of which the Academy is organized shall be those provided in its articles of incorporation and shall include—

(1) promoting an informed and nonpartisan study of, and education with respect to, social insurance,

(2) bringing together experts with diverse backgrounds to consider social insurance issues in an interdisciplinary way,

(3) assisting in the development of social insurance scholars and administrators,

(4) encouraging research and studies on topics of relevance to social insurance, and

(5) sponsoring seminars and other public meetings.

SEC. 4. SERVICE OF PROCESS.

With respect to service of process, the Academy shall comply with the laws of the State or States in which it is incorporated and the State or States in which it carries on its activities in furtherance of its corporate purposes.

SEC. 5. MEMBERSHIP.

Eligibility for membership in the Academy and the rights and privileges of members shall be as provided in the bylaws of the corporation.

SEC. 6. BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES.

The board of directors of the Academy and the responsibilities thereof shall be as provided in the articles of incorporation of the Academy and in conformity with the laws of the State or States in which it is incorporated.

SEC. 7. OFFICERS OF CORPORATION.

The officers of the Academy, and the election of such officers, shall be as is provided in the articles of incorporation of the Academy and in conformity with the laws of the State or States wherein it is incorporated.

SEC. 8. RESTRICTIONS.

(a) No part of the income or assets of the corporation shall inure to any member, officer, or director of the Academy or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers and members of the Academy or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The Academy shall not make any loan to any officer, director, or employee of the corporation.

(c) The Academy and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support, or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The Academy shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The Academy shall not claim congressional approval or Federal Government authority for any of its activities, other than by mutual agreement.

(f) The Academy shall retain and maintain its status as a corporation organized and incorporated under the laws of the District of Columbia.

SEC. 9. LIABILITY.

The Academy shall be liable for the acts of its officers and agents when acting within the scope of their authority.

SEC. 10. BOOKS AND RECORDS; INSPECTION.

The Academy shall keep correct and complete books and records of account and shall keep minutes of any proceeding of the Academy involving any of its members, the board of directors, or any committee having authority under the board of directors. The Academy shall keep at its principal office a record of the names and addresses of all members having the right of vote. All books and records of such corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

SEC. 11. AUDIT OF FINANCIAL TRANSACTIONS.

The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal laws", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(17) National Academy of Social Insurance.".

SEC. 12. ANNUAL REPORT.

The Academy shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as is the report of the audit required by section 11 of this Act. The report shall not be printed as a public document.

SEC. 13. RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER.

The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

SEC. 14. DEFINITION OF "STATE".

For purpose of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

SEC. 15. TAX-EXEMPT STATUS.

The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code. If the corporation fails to maintain such status, the charter granted hereby shall expire.

SEC. 16. TERMINATION.

If the corporation shall fail to compy with any of the restrictions or provisions of this Act the charter granted hereby shall expire.

NATIONAL ACADEMY OF SOCIAL INSURANCE—MEMBERS OF ORGANIZING COMMITTEE

Robert M. Ball, Henry Aaron, William Arnone, Merton C. Bernstein, Lisle Carter, Jr., Wilbur J. Cohen, John Heinz, Erwin Hytner, Eric Kingson, Lane Kirkland.

Nancy Altman Lupu, Theodore Marmor, Daniel Patrick Moynihan, Alicia H. Munnell, Robert J. Myers, Bert Seidman, Lawrence H. Thompson, Alexander B. Trowbridge, Elizabeth Wickenden, Howard Young.●

By Mr. DOLE:

S. 2934. A bill to establish a Commission and National Advisory Committee to study a constitutional amendment regarding impeachment; to the Committee on the Judiciary.

COMMISSION ON A CONSTITUTIONAL AMENDMENT REGARDING IMPEACHMENT ACT

Mr. DOLE. Mr. President, in the wake of the impeachment and removal of Harry T. Claiborne from the Federal bench, it seems appropriate to reflect on the process by which the Congress handled this matter. After all, it was the first in 50 years in which a member of the Federal judiciary was actually impeached, although the first steps of formal impeachment were taken against President Nixon in 1974.

A special set of impeachment rules apply to these proceedings in the Senate. Work had begun in 1974 to revise and streamline the procedures that had been developed across two centuries, but which had been used very sparingly during that period. For the first time the Senate designated a committee of 12 to take testimony and gather evidence. The committee,

under the effective leadership of the delegation from Maryland—Senator MATHIAS as chairman and Senator SARBANES as vice chairman—held 7 days of hearings and amassed a record of more than 2,300 pages. Under the provisions of the rule, the committee had no charter to make recommendations to the Senate.

This delegation of authority by the Senate was not without its critics. In fact almost a third of the Senate voted to take testimony on the Senate floor.

Even without testimony, the Senate floor consideration on the matter took almost 18 hours. The managers on the part of the House presented their case. The respondent and his attorney marshaled the defense then the Senate went into closed session to consider the matter.

I must say, Mr. President, that the debate on this impeachment was of the highest order. It was quite obvious that the Senators individually and the Senate collectively discharged these functions under the Constitution in a most solemn and serious manner. This unique role as both judge and jury was initially met with some concern and uncertainty. Perhaps it was because we were sailing uncharted waters—at least for this generation of the Senate. Perhaps it was because of the novel aspects of the case. Here was a Federal judge, convicted and serving time in a Federal penitentiary, who had not resigned and who was determined to see a full congressional inquiry into his conviction. In any event, more attention was given to removing one judge from the Federal bench than is given to all but the most major issues. Very few legislative proposals receive as much consideration. Having said this, the question arises: "Where do we go from here?"

AMENDING THE IMPEACHMENT RULES

Mr. President, while the details of Claiborne impeachment are still fresh in mind, it seems appropriate that the Senate Rules Committee review the rules which were modernized for the proceeding. Several decisions were made which perhaps should now be reconsidered. For example, is the referral to a committee of 12 appropriate? Should the deliberations of the Senate be in closed session? Is it necessary, after one article of impeachment has been affirmed, for the Senate to vote on subsequent articles?

These and other related questions need to be addressed. Unfortunately it appears that we may face the prospect of yet another impeachment proceeding in the near future. I believe any changes should be made before new articles of impeachment are drawn up against another civil official. I am therefore requesting the Rules Committee to conduct a review at the earliest possible moment.

AMENDING THE CONSTITUTION

In the long run, Mr. President, it seems to me that some hard questions should be posed as to whether impeachment by the Congress is appropriate for Federal judges. It is a time-consuming, expensive and elaborate procedure. It necessarily commands much time and attention if impeachment is to be fair and afford a semblance of due process—even though there is no constitutional requirement for due process as such. Already Senators HEFLIN and DECONCINI are beginning preparations for introduction of appropriate resolutions next year. Several States have independent commissions with removal powers. Others empower judicial tribunals for this purpose. In other States where judges are elected, recall is a remedy available to the voters.

In 1979 and 1980 the Congress processed judicial fitness and tenure legislation under the able leadership of the Senator from Arizona, Mr. DECONCINI, who chaired the Judiciary Subcommittee on Improvements in Judicial Machinery—now the Subcommittee on Courts. During consideration of that legislation attention was given to a possible amendment to the Constitution to establish alternate methods of removing Federal judges. Although nothing more resulted than the building of a hearing record on the issue, it was a good beginning. Now, however, the issues have been framed in sharper focus. It is not a mere academic exercise. One impeachment has been concluded. One or two more are distinct possibilities in the immediate future. The time has arrived to give a proposed amendment very serious consideration.

JUDICIARY COMMITTEE CONSIDERATION

It is my hope that the Committee on the Judiciary would move to give proposals for a constitutional amendment early consideration. I have conferred with the chairmen of the two subcommittees involved, the distinguished Senator from Utah [Mr. HATCH] who chairs the Constitution Subcommittee, and the distinguished Senator from Kentucky [Mr. MCCONNELL] the chairman of the Courts Subcommittee. They assure me that they will give the proposals early and joint consideration. The hearing record from the DeConcini subcommittee is a very good place to start.

IMPEACHMENT AMENDMENT COMMISSION

In addition to the consideration by the Committee on the Judiciary, it may well be appropriate to create a Commission to give a thorough and expeditious consideration to the matter. If the question of a proposed amendment to the Constitution is to be seriously addressed in the short term, it would seem appropriate to authorize an ad hoc group to explore the options of alternative remedies to impeachment and to fashion an appropriate amendment to the Constitution. A joint resolution has been prepared for introduction which would accomplish that end. It creates a 12-member Commission, 3 of whom would be appointed by the Senate, 3 by the House, 3 by the President, and 3 by the Chief Justice. A chairman would be selected from among the group.

In addition an advisory committee of not more than 12 persons could be formed to assist the Commission. This was the format followed in 1966 when created the National Advisory Commission on the Reform of the Federal Criminal Code. This group had an advisory committee of academics and representatives from State and local organizations providing advice and counsel to the Commission. With an undertaking as important as a proposed amendment to the Constitution, it seems like an appropriate step. The resolution calls for the Commission to be appointed within 30 days and for it to begin its work no later than 60 days after enactment. If this occurs, the Commission would be well underway and ready to report to the Congress shortly after the next Congress begins its work. It is my view that this Commission should be truly nonpartisan or rather bipartisan fashion.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2934

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Commission on a Constitutional Amendment Regarding Impeachment Act".

PURPOSE

SEC. 2. It is the purpose of this Act to establish a bipartisan Commission, supported by a National Advisory Committee, to investigate and study the constitutional problems of impeaching an Article III judge, and the advisability of proposing an amendment to the Constitution regarding the possible impeachment of such judges.

ESTABLISHMENT

SEC. 3. There is hereby established a Commission to be known as the "Commission to Study Impeachment of Judges" (hereafter in this Act referred to as the "Commission").

MEMBERSHIP

SEC. 4. (a) The Commission shall be composed of twelve members. Three of such members shall be appointed by the Majority Leader of the Senate, three shall be appointed by the Speaker of the House of Representatives, three shall be appointed by the Chief Justice of the Supreme Court, and three shall be appointed by the President.

(b) Members of the Commission shall be appointed for the life of the Commission.

(c) Six members of the Commission shall constitute a quorum, but a lesser number may conduct meetings.

(d) The members of the Commission shall select one of such members to be the Chairman.

(e) All appointments made pursuant to this Act shall be made within 30 days after the date of enactment of this Act.

(f) The first meeting of the Commission shall be called by the President and shall be held within 60 days after the date of enactment of this Act.

(g) A vacancy on the Commission resulting from the death or resignation of a member shall not affect its powers and shall be filled in the same manner in which the original appointment was made.

ADVISORY COMMITTEE

SEC. 5. (a) There shall be appointed an advisory committee (hereafter in this Act referred to as the "committee") of twelve individuals with expertise or experience in areas being investigated or studied by the Commission. Such Committee shall provide expertise for, and perform such duties as determined by the Commission.

(b) Such Committee shall be appointed in the same manner as the Commission.

DUTIES OF THE COMMISSION

SEC. 6. (a) The Commission shall investigate and study the constitutional problems and issues involved in the impeachment of an Article III judge, evaluate the possibility of a constitutional amendment, and may propose a possible constitutional amendment regarding such impeachments.

(b) The Commission shall prepare and submit to the President and the Congress a report on their investigation and recommendations.

COMPENSATION OF THE COMMISSION AND COMMITTEE

SEC. 7. Each member of the Commission or Committee who is not otherwise employed by the United States Government shall receive compensation at a rate equal to the daily rate prescribed for GS-18 under the General Schedule contained in section 5332 of title 5, United States Code, including traveltime, for each day he or she is engaged in the actual performance of his or her duties as a member of the Commission or Committee. A member of the Commission or Committee who is an officer or employee of the United States Government shall serve without additional compensation. All members of the Commission and Committee shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

POWERS AND ADMINISTRATIVE PROVISIONS

SEC. 8. (a) The Commission is authorized to obtain, in addition to the members of the Committee, the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code.

(b) The Commission is authorized to enter into agreements with the General Services Administration for procurement of necessary financial and administrative services, for which payment shall be made by reimbursement from funds of the Commission in such amounts as may be agreed upon by the Chairman and the Administrator of General Services.

(c) The Commission is authorized to procure supplies, services, and property, and make contracts in any fiscal year, only to such extent or in such amounts as are provided in appropriation Acts.

(d) The Commission is authorized to enter into contracts with Federal or State agencies, private firms, institutions, and agencies for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

(e) The Commission or, on the authorization of the Commission, a member thereof, may, for the purpose of carrying out the provisions of the Act, hold such hearings and sit and act at such times and places, and request the attendance and testimony of such witnesses and the production of books, records, memoranda, papers, and documents as the Commission or such member deems advisable.

(f) The Commission, or on the authorization of the Commission, any member thereof, may, for the purpose of carrying out the provisions of this Act, have such printing and binding done, enter into contracts and other arrangements to such extent or in such amounts as are provided in appropriation Acts, and make such expenditures as the Commission or such member deems advisable.

(g) The Commission may acquire directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality, information, suggestions, estimates, and statistics for the purpose of this Act. Each such department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request by the Chairman.

(h) The Chairman of the Commission is authorized to appoint, terminate, and fix the compensation, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, of an Executive Director and such additional personnel as the Chairman finds necessary to enable the Commission to carry out its duties. The annual rate of compensation of the Executive Director may not exceed a rate equal to the rate provided for level V of the Executive Schedule under section 5316 of such title and the annual rate of compensation of all other personnel may not exceed a rate equal to the maximum rate for GS-18 of the General Schedule under section 5332 of such title.

(i) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to assist the Commission in carrying out its duties under this section, unless the head of such agency determines that overriding reasons will not permit the agency to make such facilities, services, or personnel available to the Commission and so notifies the Chairman in writing.

(j) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(k) Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(l) The Commission may expend funds made available for purposes of this Act for printing and binding, notwithstanding any other provision of law.

REPORT AND TERMINATION

SEC. 9. (a) The Commission shall, within 6 months after the date of its first meeting, transmit a final report to the President and the Congress concerning its study, investigation, findings, and recommendations.

(b) The Commission shall cease to exist on the date 30 days after the date it transmits its final report to the President and the Congress.

AUTHORIZATION OF APPROPRIATIONS

SEC. 10. There are authorized to be appropriated $500,000 to carry out the provisions of this Act, including the printing and binding of the report required to be prepared by the Commission pursuant to this Act.

By Mr. CHAFEE:

S. 2935. A bill to prohibit the use of subtherapeutic doses of penicillin, chlortetracycline, and oxytetracycline in animal feed; to the Committee on Labor and Human Resoources.

ANTIBIOTIC SAFETY ACT

Mr. CHAFEE. Mr. President, today I am introducing legislation to curb a practice which poses a grave threat to the public health—the widespread use of antibiotic drugs to promote growth in livestock. The continuous and heavy use of antibiotics in this way threatens both human and animal health by cultivating bacteria which are resistant to antibiotic treatment.

The use of antibiotic drugs in animal feed has increased dramatically since the 1950's, when it was found that low but continuous—or subtherapeutic—doses of these drugs promote growth in livestock and poultry. Today, according to estimates by the Office of Technology Assessment, most of the livestock raised in the United States receive antibiotic-medicated feed: 60 percent of all cattle, 90 percent of all swine and veal calves, and nearly 100 percent of all poultry. Nearly one-half of all the antibiotics produced in the United States each year goes into animal feed, and it is estimated that only a small fraction of that amount is used to treat actual disease. The bulk goes for subtherapeutic uses— that is, where the intent is simply to promote growth, rather than to treat disease.

Antibiotics have been called wonder drugs, but this uncontrolled and inappropriate use threatens to render them powerless. As recent studies have confirmed, the continuous presence in the bacterial environment of antibiotic drugs in such large quantities fosters the development of highly resistant strains of bacteria. These resistant bacteria lead to conditions—both in humans and in animals—which cannot be treated with antibiotic therapy. Even more alarming is the fact that once resistant bacteria develop, the resistance characteristic can be passed to bacteria of other species—and even to those never exposed to antibiotics.

To treat an infection which is resistant to one or more antibiotics, the physician must try to identify an anti-

biotic to which that infection is susceptible—possibly one of the newer and invariably more costly antibiotics that are being developed at the rate of approximately one per year. But since developing and testing new drugs is a costly process, this treatment can run to eight times the cost of treatment with one of the older, more commonly prescribed antibiotics.

This all adds yet more pressure to the cost of health care: hospital stays are longer, treatment is more complicated, and the drugs needed are more expensive. Where an ordinary infection would yield quite easily to 2 weeks' treatment with antibiotics, a resistant infection is considerably more complicated, resulting more frequently in death or serious illness.

Clearly the solution is not to rely on the development of new antibiotics, but rather to preserve the effectiveness of the antibiotics we now have by using them prudently. This bill would take one small step in that direction by banning the subtherapeutic use in animal feed of the two antibiotics most important to the treatment of human disease: penicillin and tetracycline. Many scientists consider these drugs to be more effective and to have fewer side effects than any of the newer antibiotics, and thus as the most wondrous of the wonder drugs.

The case for banning the subtherapeutic use of penicillin and tetracycline is well documented. This was the course of action initiated in 1977 by the Food and Drug Administration [FDA], when, based on data collected from independent studies and from the drug industry, it found these uses to pose a serious health threat. It began proceedings to ban all feed uses of penicillin and most feed uses of tetracycline. The proposed ban, however, was held in abeyance by Congress pending further study.

Since that time, new studies have offered more conclusive evidence of the link between the subtherapeutic use of antibiotics and the growth of antibiotic resistance. Based on these findings, the Natural Resources Defense Council has estimated the health risk posed by subtherapeutic use of penicillin and tetracycline for one type of resistant infection: salmonella. For each year of continued subtherapeutic feed uses of these two drugs, NRDC projected more than 2,700 reported cases of resistant salmonella, more than 270,000 unreported cases, and between 100 and 300 deaths.

While questions may still remain about the extent of antibiotic resistance and the relative contributions of different uses of antibiotics, prudence would dictate that we resolve these questions on the side of caution. Must the evidence of harm be irrefutable before we take reasonable precautions?

Mr. President, it is time for us to get serious about the problem of antibiotic resistance, and a reasonable place to start is the use of antibiotics as growth promoters. Using our most powerful antibiotic drugs in this way is both unnecessary and highly inappropriate. In short, it squanders one of our most precious resources for fighting disease.

Mr. President, I ask unanimous consent that a copy of the legislation be printed in the RECORD.

There being on objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2935

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Antibiotic Safety Act of 1986".

SEC. 2. (a) Section 501 of the Federal Food, Drug, and Cosmetic Act is amended by adding at the end thereof the following new paragraph:

"(j)(1) If it is an animal feed and it bears or contains a subtherapeutic dose of penicillin, chlortetracycline, or oxytetracycline.

"(2) For purposes of subparagraph (1), the term 'subtherapeutic dose' means a dose of penicillin, chlortetracycline, or oxytetracycline which is administered for a purpose other than the treatment of a specific disease or disorder, including for the purposes of promoting the growth of an animal or preventing disease in an animal.".

(b) Section 201(x) of such Act is amended by inserting "in section 501(j)," before "in section 512".

By Mr. PELL (for himself, Mr. CHAFEE, and Mr. WEICKER):

S. 2936. A bill granting the consent of Congress to the Connecticut, Rhode Island, Massachusetts, and New York Rail Improvements Compact; to the Committee on the Judiciary.

CONNECTICUT, RHODE ISLAND, MASSACHUSETTS, AND NEW YORK RAIL IMPROVEMENTS COMPACT

● Mr. PELL. Mr. President, I am today introducing legislation to authorize an interstate compact between the States of Connecticut, Massachusetts, New York, and Rhode Island for the purpose of undertaking improvements in the Northeast corridor.

My legislation would enable the four States to initiate long overdue capital improvements, curve straightening, and electrification of the main line between New Haven and Boston. As the grandfather of the original Northeast corridor legislation, I am proud of the progress that has been made over the past decade in improving rail service between Washington and Boston. We can point to the success of Metroliner service between New York and Washington—which serves roughly one-third of the heavily traveled commuter market between those two cities—as a model of what can be achieved in making rail transportation a viable and attractive alternative to the overcongested highways and air routes.

Despite the progress made by the Northeast corridor project, much, much more needs to be done, especially in the segment of the corridor north of New York City. Budget cuts in the Northeast corridor project resulted in the eli[illegible] proven[illegible] the competitiveness of rail service in the commuter market between New York and Boston. Among the improvements eliminated from the Northeast corridor project was the electrification of the mainline between New Haven and Boston. The need to avert the changeover from electric to diesel power is crucial to reducing the triptime between New York and Boston, which currently takes almost 5 hours. Also necessary are capital improvements to the tracks themselves. If all the curves between Boston and New York were put together end to end the tracks would spiral through 16¾ full circles. Station improvements and signaling are other areas where rail passenger service is in need of new capital investment.

I believe the Federal Government has a very real responsibility in improving rail passenger service, especially in light of the high level of funding expended annually on air transportation and highways. Ultimately, I would like to see the Federal Government undertake a program of direct loans and loan guarantees for high speed rail improvements in emerging transportation corridors across the country.

Recognizing the very real threat of an airborne and highway gridlock in the Northeast, and as a first step in the direction of making rail service a competitive force in the Boston-New York market, I believe the time has come for the southern New England States and New York to form a compact for rail improvements. My legislation authorizes the compact to issue tax-exempt, State-backed securities to finance rail improvements. My view is that while bonds backed by the four States would be the initial source of capital improvements, the compact would also be empowered to receive Federal funding, loans, or loan guarantees. Under the compact, the States themselves through their representation on the Compact Commission would plan and manage the rail improvements, award contracts, and coordinate scheduling with commuter rail operations in the four States. The powers and duties of the Commission itself I have left purposely vague, because the views of the four States should be paramount in this area. It is my intention in the coming months to seek the advice and counsel of the Governors and to work specifically with the Coalition of Northeastern Governors [CONEG] with the objective of developing a consensus approach in a bill to be introduced at the very outset of the 100th Congress in January.

Here I would like to specifically commend the leadership of Massachusetts Gov. Michael Dukakis, who has spoken out forcefully for rail improvements in New England and who sponsored a resolution in the Coalition of

work toward a Boston-New York rail traveltime of 3 hours. Governor Dukakis will cochair the task force with Gov. William O'Neill of Connecticut, another strong advocate of rail improvements. Both the Rhode Island Gov. Edward DiPrete and New York Gov. Mario Cuomo have signaled their enthusiastic support for further improvements in the Northeast corridor.

As one who has long been concerned with rail service in the Northeast, I firmly believe that future economic growth in our region is tied directly to our ability to provide a viable alternative to the overcrowded highways and air routes. The original vision of a Northeast corridor "megalopolis" I articulated exactly 20 years ago has already materialized. The area between New York and Boston is a chain of interconnected cities and towns stretching along Long Island Sound and extending by the Connecticut River Valley, then moving in an easterly direction through the suburbs of Providence and Boston. Air travelers between New York and Boston sometimes face long delays in the air and even longer delays on the ground. It is not unusual for a business traveler to be hopelessly late, held up for many hours in the air or stuck in traffic trying to get from the airport. Daily commuters and intercity drivers compete with one another for space on the region's roadway bringing motorists to a crawl on an interstate system designed for high speed travel.

For the Northeast, the risks of continuing in this way are too large to ignore. Without a well-thought-out strategy for improving the region's transportation system, our economy may choke itself, strangled by an inadequate transportation network. The initiative for rail improvements must lie, in the final analysis, with the States in our own region. An interstate compact along the lines envisioned in my legislation will spur badly needed capital improvements to our rail transportation system and strengthen the infrastructure that underlies our regional economy. I look forward to working with the Governors of Connecticut, Massachusetts, New York, and Rhode Island in refining this proposal over the next few months and moving ahead early when the 100th Congress convenes in January.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2936

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the consent of Congress is hereby given to the States of Connecticut, Rhode Island, Massachusetts, and New York, to enter into the Connecticut, Rhode Island, Massachusetts, and New York Rail Improvements Compact. Such compact reads substantially as follows:

"CONNECTICUT, RHODE ISLAND, MASSACHUSETTS, AND NEW YORK RAIL IMPROVEMENT COMPACT

"ARTICLE I. PURPOSE

"The purpose of this compact is to promote the undertaking of rail improvements in the Northeast Corridor (as such term is used in the Northeast Rail Service Act of 1981 (45 U.S.C. 1101 et seq.)) of the compacting States, (including capital improvements to the Northeast Corridor between New York, New York and Boston, Massachusetts, and the electrification of certain track between New Haven, Connecticut and Boston, Massachusetts), to reduce travel time for rail passenger service between New York, New York and Boston, Massachusetts, and to establish a joint interstate commission to coordinate and control the implementation of such improvements.

"ARTICLE II. EFFECTIVE DATE

"This compact shall become effective upon the adoption of such into law by the participating States, and shall continue in force and remain binding upon such States until six months after any such State has given notice to each other participating State of the repeal thereof. Such withdrawal shall not be construed to relieve any participating State from any obligation incurred prior to the end of participation by such State in the compact as provided herein.

"ARTICLE III. JOINT INTERSTATE COMMISSION

"(a) The States which are parties to this compact (hereinafter referred to as 'Party States') do hereby establish and create a joint interstate commission which shall be known as the Connecticut, Rhode Island, Massachusetts, and New York Rail Improvements Compact Commission (hereinafter referred to as the 'Commission'). The membership of the Commission shall consist of three members from each of the Party States, to be appointed by the Governor in accordance with the laws of the Party State which each member represents, and such members are subject to removal in accordance with such laws. Each member of the Commission shall be appointed for a term of three years. If a vacancy occurs during the term of a member, the Governor of the Party State from which such member was appointed, shall make an appointment to fill the vacancy for the remainder of such term.

"(b) The Commission shall annually elect from its members a chairman and vice chairman, and appoint such officers or employees necessary to implement the provisions of this compact, and shall fix and determine their qualifications and duties. The Commission shall adopt such by-laws needed for the conduct of its business, and shall meet at times and places as agreed to by a majority of the members of such, but such Commission must meet at least once in each calendar year of its existence.

"(c) A majority of the Commissioners shall constitute a quorum for the purpose of conducting business. each Commissionerer shall have one vote.

"(d) It shall be the duty of the Commission, in general, to promote, encourage, coordinate, and oversee the efforts of the Party States to implement the rail improvements as specified by such Commission, and the Commission shall have the power to undertake planning for rail improvement in consultation with Federal agencies, including the National Railroad Passenger Corporation and the Federal Railroad Administration. The Commission shall also undertake planning with local commuter rail operations in the Party States, and shall assign a high priority to operational considerations, including the coordination of schedules with commuter operations.

"(e) The Commission shall be authorized to issue bonds, not to exceed one billion dollars in value, for the purpose of paying all or any part of the cost of rail improvements, if such authority is conferred upon it jointly by the legislative authority of the Party States. The Party States shall give full faith and credit to any bonds issued by the Commission. When other appropriations for the support of the Commission and its efforts are necessary, the Commission shall allocate the costs evenly among the Party States. The Commission may receive Federal funding for rail transportation purposes.

"ARTICLE IV. COMPACT EFFECT

"Nothing in this compact shall abridge, limit or be construed so as to conflict with any existing State statute, or to repeal or prevent legislation, or to affect any existing or future cooperative arrangement or relationship between any Federal agency and a Party State.".

SEC. 2. The consent to the Connecticut, Rhode Island, Massachusetts, and New York Rail Improvements Compact shall extend to any and all supplementary agreements entered into pursuant to carrying out the purpose of such compact.

SEC. 3. The right to alter, amend, or repeal this Act is expressly reserved.

By Mr. NUNN (for himself and Mr. COCHRAN):

S. 2937. A bill to amend the Food Security Act of 1985 to increase the number of acres placed in the conservation reserve program, and for other purposes: to the Committee on Agriculture, Nutrition, and Forestry.

INCREASE IN NUMBER OF ACRES IN THE CONSERVATION RESERVE PROGRAM

● Mr. NUNN. Mr. President, despite record Government expenditures made to farmers through our commodity programs, the economic crisis in agriculture persists, and may even grow more serious. The 100th Congress will face early in 1987 some very tough budgetary decisions, including the possible need to save the Farm Credit System through a multi-billion-dollar infusion of funds. Regrettably, to address these critical problems, it now appears to me that Congress must reconsider decisions made just a year ago upon passage of the 1985 farm bill.

The programs authorized by that bill have already proven far too costly and ineffective. Moreover, costs will go

up even higher next year without action by Congress. Commodity program expenditures also threaten to set back other vital missions of the Department of Agriculture which would, in the long run, contribute far more to the prosperity and sustainability of U.S. agriculture. We are falling short in export promotion efforts, in research and education, in our grain inspection and other quality assurance programs, and in conservation.

This legislation I introduce today on behalf of myself and Senator COCHRAN would accelerate accomplishment of one long overdue adjustment in our agricultural policy, an adjustment authorized and set in motion in the historic conservation title of the 1985 farm bill. It will both help in our ongoing efforts to control erosion, and contribute to pressing near-term production adjustment and income support efforts.

We introduce this bill today because we are convinced that the Conservation Reserve Program [CRP] authorized by subtitle D of section XII in the Food Security Act of 1985 can play an increasingly vital role in controlling soil erosion, protecting water quality, and supporting farm income. Indeed, the tremendous success of the program to date has led us to propose this legislation. We have three major goals in mind in offering this legislation:

First, accelerating enrollment into the CRP in 1987, with a goal of enrolling at least 35 million additional acres in the reserve;

Second, authorizing expansion of the reserve to 65 million acres, assuming the need exists to draw out of cultivation additional highly erodible cropland; and

Third, mandating the Secretary of Agriculture to begin, at least on a pilot program basis, the use of the reserve in addressing serious regional water quality or supply problems. Critical ground water quality problems in northwestern Iowa, and parts of Nebraska with sandy soils, are prime candidates for pilot projects.

We recognize that passage of this legislation is not possible in the 99th Congress. We are introducing the bill now, however, to alert our colleagues on the Committee on Agriculture, Nutrition, and Forestry and other Senators of our conviction that expansion of the conservation reserve should be vigorously pursued. We are also anxious to hear from the Department of Agriculture regarding this legislation, and encourage the executive branch to advise the Congress as soon as possible about its plans and intentions to expand CRP enrollment in early 1987, while also pursuing the other goals of this legislation.

My hope is that this legislation will help alert the agricultural community to a major opportunity that I believe now exists. Clearly, farmers across the Nation will benefit from strong steps to further reduce acreage planted to surplus crops, particularly in feedgrain producing regions. For this reason, and because the rate of signup has been disappointing in the Midwest, the legislation provides the Secretary with a clear mandate, and new authority to provide prospective CRP enrollees with adequate incentives to assure that the target level of enrollment is reached. This authority includes the following:

First, for producers with Farmers Home Administration financing, debt restructuring plans may include special provisions for advance CRP payments in cash or kind.

Second, the Secretary may offer a base acreage retirement bonus payment in cash or kind, to producers willing to surrender upon signup into the CRP commodity program base acres proportional to the acreage enrolled in the CRP.

Third, the Secretary may offer up to 50 percent of total 10-year CRP payments upon signup, in cash or kind, subject to a suitable mechanism to assure that the provisions of the CRP contract will be enforced.

Fourth, the Secretary may, on a State-by-State basis, authorize the use of CRP lands for grass, hay, and pasture uses, if the Secretary determines that such uses will not have an adverse affect on established operations in the State currently producing livestock, hay, or grass based silage.

We offer this legislation now to give the many individuals or organizations vitally interested in the conservation reserve time to fully study and reflect upon the best ways to achieve the legislation's basic intent, before major farm program changes are debated in early 1987. The shared sense of commitment expressed by a board diversity of groups and agricultural leaders toward the basic goals of the CRP has deeply impressed us, and has been a very positive force in bringing this new program into place. Let's build on this common ground, and follow the sound principles of the CRP in addressing additional problems related to water use and other environmental problems associated with agricultural production. By moving ahead with new ideas, we feel confident that the conservation reserve will meet the very high expectations of the Congress and the agricultural community.

To more fully explain the purpose and need for this legislation, I attach a report by two USDA economists summarizing the results of the first three CRP signup periods and ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks. I ask my colleagues to note the remarkable estimated average reduction in erosion rates on land enrolled in the CRP—about 25 tons per acre—and the net reductions in commodity program supply control costs, estimated by USDA to equal about 40 percent of annual CRP rental payments.

I also wish to direct the attention of interested individuals to an insightful report recently issued by the Board on Agriculture of the National Research Council. This two-volume report, entitled "Soil Conservation: Assessing the National Resources Inventory," includes a convincing discussion of the extent of the erosion problem, and the concepts and policy strategies that should be used in attacking the problems. I wish to commend the Department of Agriculture for largely adopting the recommendations of the distinguished committee of experts who authored the report. Last, I am also attaching a recent speech by the board on agriculture's executive director, Dr. Charles Benbrook, discussing the current situation and directions in Federal soil and water conservation policy, which focuses on options to expand the reserve. I have met with Dr. Benbrook and discussed these matters with him at length. His assistance has been invaluable in preparing this legislation, and I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IMPLEMENTING THE CONSERVATION RESERVE PROGRAM [1]

(By Michael Dicks and Katherine Reichelderfer)

The objectives of the Conservation Reserve Program, as established by Title XII of the 1985 Food Security Act, are to: (1) Reduce water and wind erosion, (2) protect our long-term capability to produce food and fiber, (3) reduce sedimentation, (4) improve water quality, (5) create better habitat for fish and wildlife through improved food and cover, (6) curb production of surplus commodities, and (7) provide needed income support for farmers. Owners/operators of any land defined for the Conservation Reserve Program as "highly erodible" may submit bids for enrollment of their eligible acreage. Appendix A provides detail on the legislation which enables a conservation reserve.

The performance of the Conservation Reserve Program [CRP] has shown both significant erosion reduction and supply control. Sign-ups conducted in March, May, and August 1986 have resulted in enrollment of 8.9 million acres, with about 25 tons of soil erosion saved per acre, and over 60 percent of the acres enrolled were reductions to commodity program acreage bases. The direct CCC commodity program savings from CRP participation offset nearly 40 percent of the rental payments. Analysis of sector-wide effects indicates that direct plus indirect CCC cost savings may remain sufficient to offset the costs of the CRP.

However, the eventual success of the CRP in meeting its multiple objectives depends heavily upon how the program is imple-

[1] This summary is based on research conducted by William Boggess, Michael Dicks, Anthony Grano, and Katherine Reichelderfer.

mented over the remaining 4 years of acreage enrollment. Title XII allows the Secretary of Agriculture a great deal of discretion in implementing the CRP. This report summarizes various analyses of the effects of discretionary factors on the performance of the CRP.

DISCRETIONARY FACTORS IN IMPLEMENTING THE CRP

Among the principal factors that may be manipulated to target or improve effectiveness of the CRP are:

Eligibility requirements for participation;

Bid pool size—the regional delineation of the area(s) that receive allotments for total bid quantities; and

Bid selection criteria.

Decisions regarding CRP eligibility, bid pool size, and bid selection criteria have a direct effect on the program's performance in terms of:

Erosion reduction;

Program crop supply control (or supply control cost savings); and

Program outlays.

Eligibility, bid solicitation, and bid selection criteria may be modified at any point prior to an announced sign-up.

The effects of eligibility and bid selection criteria on CRP performance are interdependent. It is the combination of decisions on these factors that affects the economic efficiency of the program in terms of the degree of erosion and supply control achieved per dollar outlay, and the net program savings of a conservation reserve.

The implications of these discretionary factors for CRP performance are summarized in the following material.

ELIGIBILITY

Popular options for eligibility criteria include the following working definitions of "highly erodible" land:

1. Cropland in Land Capability Classes (LCC) II-V which is eroding at greater than 3 times the tolerance level (T) and all cropland in LCC's VI-VII (to be referred to as "3T"; includes 69 million acres);

2. Cropland in LCC's II-V which is eroding at greater than 2 times the tolerance level (T) and all cropland in LCC's VI-VIII (to be referred to as "2T"; includes 104 million acres);

3. All cropland with an Erodibility Index (EI=RKLS/T) greater than or equal to 8—an indication of potential erosion (includes 118 million acres).

While 3T is a subset of 2T, EI>8 acreage includes land that is not currently eroding at or above 2T. The EI>8 land that does not overlap with the 2T set is land which has the potential to highly erode but which is currently being managed in ways that prevent excessive erosion.

For March, May, and August 1986 CRP sign-up periods, eligibility was restricted to "3T" land. At least two-thirds of the area of any field offered for bid was required to meet the 3T erosion rate or include other eligible land classes.

In general, employment of a restrictive definition of "highly erodible" will limit the number of acres eligible and favor erosion reduction over supply control. However, increasing the number of acres eligible for CRP allows greater flexibility in targeting highly eroding, highly erodible, or highly productive acrege. The greater the number of eligible acres, the greater will be the likely number of bids received, and the range of characteristics of the land associated with those bids. With greater number and variety comes the opportunity for selection of bids most likely to achieve specific goals. Eligibility criteria also have implications for the efficiency of the CRP bidding process and the equity of CRP participation opportunities as explained below.

Broad eligibility encourages competitive bidding: Because the CRP is not an entitlement program, eligibility does not imply selection. However, by widening eligibility as much as is legally possible (either by using a broader definition of "highly erodible" or by reducing the percentage of a field which must be highly erodible in order for the field to be considered eligible) more active and competitive bidding would be encouraged; thereby allowing for selection of those acres most likely to meet program objectives.

Inconsistency with Conservation Compliance raises equity issue: If CRP eligibility is restricted to 3T cropland (69.5 million acres), and the Conservation Compliance provision applies to EI>8 cropland (118 million acres), only 49 million acres will meet both definitions. Under strict adherence to a 1T erosion limit for conservation plans, farmers on 34 million acres will be told that their land is not considered "highly erodible" to the extent necessary for benefits available from the CRP. But, by 1990 these same farmers will be told their land is so "highly erodible" they must implement a conservation plan or forfeit eligibility to all future commodity program benefits. By the same token owner/operators on 20 million acres who are eligible for CRP benefits would not be faced with compliance.

BID POOL ALLOCATION

Because soil erodibility is a regional phenomenon, use of the largest possible bid pool size (a national pool) also provides a high degree of flexibility in targeting acreage with specific characteristics. The most highly erodible (or productive) acres drawn from a national pool could be clustered in relatively few regions. However, as bid pool size is decreased (to State or substate levels), total CRP acres would be more evenly distributed nationwide. As will be demonstrated later in this report, there is a high program cost associated with assuring equitable geographical distribution of CRP benefits.

BID SELECTION CRITERIA

There are many options for establishing bid selection criteria. Bids may be selected on the basis of their contribution to erosion reduction, the degree to which they reduce program crop base acreage or production, their rental cost, or any of numerous combinations of the erosion, supply, and rental cost values. Specific bid selection formulas can be used with or without an upper limit on rental fee bids.

For the March, May, and August 1986 sign-up periods, all bids at or below pool caps on rental cost were accepted. This is consistent with a bid selection strategy which minimizes rental cost of CRP enrollment.

Some alternative bid selection criteria which have been examined include:

Maximize erosion reduction: Select bids on the basis of from highest to lowest erosion on cropland bids until the budget limit (actual expenditures for sign-up periods) is reached.

Maximize supply control: Select bids on the basis of from highest to lowest value of supply control (program crop base acreage reduction) until the budget limit is reached.

Minimize net cost per ton of erosion: Select bids on the basis of lowest to highest net dollar cost of preventing erosion. Net costs are equal to rental costs minus supply control benefits. Supply control benefits equal the value of program crop base reductions achieved through enrollment of commodity program participants' acreage. (These are reductions to the base on which deficiency, diversion, and related commodity program payments would otherwise be made.)

These are only a few of the possibilities for alternative bid selection strategies. Their potential effect on CRP performance is significant.

1. Minimizing rental cost, the strategy followed thus far, enrolls the greatest number of acres for a given program outlay. However, the erosion control and supply control achieved with this strategy are less than that which could be accomplished by the use of alternative bid selection criteria.

2. Focusing on erosion by using the "Maximize Erosion Reduction" selection criterion increases erosion control benefits of a CRP, but these benefits are offset by a loss of supply control cost savings. Also, the administrative costs of strategies relying on erosion measures for bid selection may be greater than for other strategies because of the need to obtain and confirm erosion levels on parcels of cropland bid.

3. Focusing on maximization of supply control benefits involves a tradeoff in erosion reduction.

4. Minimizing net cost per ton of erosion retains high benefits in the form of supply control and low per acre net program costs, but also performs well in achieving high levels of erosion reduction.

Other decisions affect the sensitivity of CRP performance to bid selection criteria: Two basic factors determine the extent to which formulas can be used to increase program effectiveness and efficiency:

1. Number of bid received: The greater the number of bids received, the greater the effectiveness of the formula in targeting desirable acreage for enrollment. The number of bids received is influenced by eligibility as well as by other program benefits and costs. Broadening eligibility, lowering commodity program benefits, and/or better advertising the impending costs of conservation compliance should encourage more CRP bidding.

2. Number of bids which can/must be accepted: If every acre bid is needed to meet acreage constraints or allotments, formula use is a moot point. The smaller the percentage of bids that must be selected, the greater the effectiveness of formulas in targeting appropriate acreage. Thus, constraints imposed by bid pool acreage goals, the 25 percent per county maximum and maximum rental rates accepted are important in determining the effect of a formula.

The key point is that the interactions of eligibility criteria, pool allocation criteria, and use of a formula for bid selection must be taken into account. None of these controls operates in isolation of the others nor can the effects be analyzed in isolation.

INTERDEPENDENCE OF IMPLEMENTATION DECISIONS

Simulation of a 40-million acre reserve under alternative combinations of control variable levels illustrates the extent to which administrative decisions affect program effectiveness. Under the low cost bid selection criteria:

It is the EI>8 definition which provides the greatest erosion control, but this eligibility option also requires high program outlays.

The "2T" definition has the lowest program costs when bids are selected from a national pool, but this advantage is diminished by the selection of bids from State allotments.

The cost of assuring that CRP program benefits are equitably distributed among States is between $6-10 billion.

State bid pooling enhances supply control aspects of the CRP without sacrificing erosion control benefits.

For a nationally pooled Conservation Reserve drawn from "2T" cropland:

Selecting bids to maximize either erosion control or supply control significantly raises program cost over the current strategy of minimizing rental payment. Maximizing supply control is most expensive.

But, if bids were selected to maximize supply control potential, the acreage set aside in the CRP would be highly productive, with average yields 13 percent higher than the national average.

Selecting bids to maximize erosion control would improve program performance by increasing annual soil savings per acre over other bid selection alternatives. Bid selection to maximize erosion reduction for a "2T" eligibility criterion performs better (in controlling erosion) than using either "3T" or EI>8 eligibility definitions when erosion is not targeted.

INTERRELATIONSHIP WITH COMMODITY PROGRAMS

The Conservation Reserve, by retiring highly erodible land, has the potential to offset CCC outlays made in the form of deficiency payments. This potential arises both from:

1. Direct cost savings in the form of base acreage reduction required by CRP enrollment; and

2. Indirect cost savings which may result from commodity market price increases, spurred by reduced production, and consequential reduction in deficiency payment levels.

A complicating factor arises, however, from the fact that when commodity program benefits are high, there is a disincentive for participation in the CRP at current levels of accepted bids. Greater than average cash rent values will be required to compensate many commodity program participants for the loss of base and program benefits they incur as a result of CRP enrollment. As long as CRP benefits are low relative to commodity program benefits, commodity programs will pose strong competition with the CRP and the CRP may not enroll a large quantity of base acreage.

CONCLUSIONS.

It is clear that the CRP can be designed to favor erosion reduction, supply control, or budget reduction to various degrees above one another. However, the use of discretionary factors to weight the program's multiple objectives is neither simple nor straightforward. Decisions regarding eligibility, bid solicitation, and bid selection are interdependent. Each of various strategies for CRP implementation has unique advantages and disadvantages. Furthermore, the operation and success of the CRP are closely linked with other provisions of the Conservation Title as well as with the commodity programs it complements.

APPENDIX A

CONSERVATION RESERVE PROGRAM LEGISLATION

The conservation reserve provision proposes to assist, through contract, owners and operators of highly erodible cropland in conserving and improving the soil and water resources of their farms and ranches. This purpose will be met by establishing a conservation reserve of 40 to 45 million acres by 1990. Highly erodible cropland acreage will be placed into the reserve at the rates shown in table A-1. The Secretary may also include lands not highly erodible, but which pose a serious environmental threat or suffer continued degradation of productivity due to salinity. No more than 25 percent of the cropland in any one county may be placed in the reserve except where it is determined that to do so would have no adverse effect on the local economy. Where practicable, at least one-eighth of the total conservation reserve acreage should be devoted to trees.

Landowners or operators desiring to participate in the conservation reserve must agree to implement a plan approved by the local conservation district to place highly erodible cropland into grasses, trees, and other acceptable vegetative covers for 10 to 15 years. They must further agree not to harvest, graze, or make other commercial use of the forage for the duration of the contract, except where the Secretary permits, as in a drought or similar emergency. The conservation plan must describe the measures and practices required; the commercial use, if any, to be permitted; and the amount of cropland base and allotment history, if any, to be permanently retired. The amount of the reduction in cropland base acreage and allotment history, during the life of the contract, will be based on the ratio between acreage placed in the reserve and total cropland acreage on the farm for those crops which have production adjustment programs in place. The Secretary, however, may preserve the cropland base and allotment history on the acreage placed in the reserve for the purpose of any Federal program unless the owner and operator agree under the contract to retire that cropland base and allotment history permanently.

The Secretary must pay an annual fee sufficient to compensate for the conversion of highly erodible land to grass and trees and the retirement of any cropland base and allotment history. The compensation, in the form of annual rental payments, may be determined through the submission of bids. The acceptability of each bid may be based on the extent of erosion and the productivity of the acreage diverted. Different criteria may be established in various States and regions to determine the extent to which erosion may be abated. Priority may be given to owners and operators with the highest level of economic stress, and where appropriate, for the establishment of shelterbelts, windbreaks, stream borders, filter strips of permanent grass or trees that significantly reduce erosion.

The annual rental payments may be made in cash or in-kind and may be made prior to the implementation of the contract by owners or operators. The total payment may not exceed $50,000 per year, and will not affect the total amount of payments that are available under other programs. USDA must make the payments as soon as possible after October 1 of each year. The Secretary must also provide technical assistance and 50 percent of the cost of establishing conservation practices. These payments must be made as soon after the expenses occur as is feasible.

Land on which ownership has changed in the 3-year period preceding the first year of the contract will be ineligible for the conservation reserve unless the land was acquired by will or succession as a result of death, or prior to January 1, 1985, or where the Secretary determines that the land was acquired under circumstances that provide adequate assurance that it was not purchased for the purpose of being placed in the reserve. Ownership is not a requirement for eligibility provided the person has operated the land for the 3-year period preceding the first year of the contract and will continue to control the land for the duration of the contract.

The Secretary may modify or terminate an individual contract if the owner or operator agrees to the change and if the action is in the public interest. If the contract is violated, the owner or operator forfeits all rights to past, present, and future rental and cost-share payments or must accept adjustments to payments that the Secretary determines appropriate. On transfer of ownership or lease, the new owner or operator has the option to continue the current contract, enter into a new contract, or refuse to participate.

Title XII authorizes the Secretary to carry out the conservation reserve program through the CCC in fiscal years 1986-87. In fiscal year 1988 and subsequent years, the Secretary may use CCC facilities, services, and funds only if the CCC has received funds targeted for the conservation reserve.

TABLE A-1.—CONSERVATION RESERVE ACREAGE, CROP YEARS 1986-90

[In million of acres]

Range	1986	1987	1988	1989	1990
Minimum [1]	5	15	25	35	40
Maximum	45	45	45	45	45

[1] The Secretary may reduce the number of acres placed in the reserve by up to 25 percent if rental payments are likely to be significantly lower in the following year.

FEDERAL SOIL AND WATER CONSERVATION POLICY; CURRENT SITUATION AND DIRECTIONS

(By Charles M. Benbrook)

Soil and water conservation policy tops the list of encouraging developments in the agricultural arena, although that list is indeed a short one. Some analysts have been critical of the progress made to date in implementing the Conservation Reserve Program (CRP)—too critical in my view. Surely some tough problems stand in the way of expanding CRP enrollment in feedgrain producing areas. But there is nothing wrong with the CRP concept. With some 9 million acres and 60,000 farmers already enrolled, the program has thus far been a tremendous success. It is ready to deliver on some very big promises.

I believe that within two years, over 60 million acres could be enrolled in the reserve, of which over 5 million could be enrolled under special, targeted state-federal programs designed to address water quality/quantity problems.

The focus of this conference on information and administrative issues is very timely. Solid, reliable, nationally consistent information, utilized in a practical and fair administrative process is a necessary condition for the CRP to work as intended. The two other essential ingredients—common sense and wisdom in the political and budgetary arenas—are sometimes harder to come by. But so far, so good.

Next February the 100th Congress will be forced to review the projected cost overruns

of the commodity programs. Presumably, steps will have to be taken to reduce the cost of these programs by about one-third, bringing projected costs down from about $25 billion to about $18 billion, the amount provided in the fiscal year 1987 appropriation bill. Alternatively, Congress could pass a supplemental appropriation to cover the cost-overrun—a not too likely prospect.

Assuming program costs are trimmed, the economic attractiveness of the commodity programs will be somewhat reduced relative to enrollment in the CRP. While some steps are likely to cut costs, I also expect that Congress will take other, new steps to address persistent surplus and income problems. In all likelihood, an effort will be made to retire more acreage in 1987 than now called for in the Food Security Act of 1985. As I perceive the political landscape, the only two viable options are a paid diversion, or accelerating enrollment in the CRP. Because of budget considerations, the CRP option could emerge as the preferred course of action. But the question remains—are we really ready to enroll perhaps 35 million additional acres in the CRP in the next six months? The answer will be determined by how well the policy community deals with a half-dozen critical issues.

CRITICAL AND PRESSING ISSUES

1. The size of the eligible pool for CRP enrollment as set by the definition of highly erodible land

Persuasive arguments can—and have—been made for keeping the pool of eligible cropland small relative to CRP enrollments. In recent months, support has grown somewhat for enlarging the pool as a step toward encouraging more competitive bidding and greater enrollments. I question the logic and analysis underlying the notion that expanding the pool of eligible land will bring down bids, since such an expansion would involve more productive land likely to bring somewhat higher acreage rental rates. Notwithstanding uncertainty about this point, the one and only really good reason to expand the pool is expanding the target and rate of CRP enrollment. If the Department and Congress make a firm commitment to enrolling 20 million acres or more in the next 12 months, I would not argue against an EI>8 definition of highly erodible land. Such a definition is attractive on other grounds.

It assures consistency with the conservation compliance and the sodbuster provisions, thereby greatly diminishing future administrative hassles, costs, and challenges.

It is based on the most technically defensible concept for the classification of cropland with respect to inherent erosivity and vulnerability to erosion-induced productivity damages.

The definition can readily accommodate improved USLE data on expected erosion rates, or more accurate T-values based on new data and models involving erosion-productivity impacts. Such improved data could be generated, and incorporated in an EI-based definition at the state or national level.

If such a commitment to expand the CRP fails to materialize, highly erodible land should be restricted to cultivated cropland now eroding more than twice the soil loss tolerance limit, with EI>8. This definition yields a pool of about 65 million acres.

2. Achieving a more even pattern of CRP enrollment

The CRP has done particularly well in arid regions growing cotton, sorghum, and wheat and small grains. It is easy to understand why—CRP rental rates have approached or exceeded cash rental rates. Moreover, enrollees receive their CRP payments every year without the need to summerfallow.

The reason acceptable bid levels reached a level above cash rents in some areas can be explained by looking at USDA's formula for setting maximum accepted bid levels. Cash rental rates are the dominant factor used within a pool in setting maximum acceptable bids. The rent on dryland acres is averaged with the much higher rent on irrigated land in regions with both types of cropland. As a result, USDA allows dryland acreage to enter the reserve at unnecessarily inflated prices. This problem is surfacing in Texas, the West, and the Plains' States.

To get the economics right in the Midwest, the economic attractiveness of reserve enrollment must rise relative to participation in the feedgrain program. This won't happen by natural processes, and is, in my judgment, the most worrisome issue standing in the way of rapid expansion of CRP enrollments.

3. Commodity Program—CRP interactions: Is competition inevitable?

The answer is, no. Without important program reforms, the answer is, yes, Clearly, a balanced approach will involve steps to reduce somewhat the economic attractiveness of the commodity programs, while increasing somewhat the lure of the CRP. Possible and improbable steps toward the first goal are outlined below.

Reducing the economic attractiveness of the commodity programs for land eligible for the CRP:

Continue to require maximum acreage set-asides allowed in law (20 percent for the feedgrain program), or, even increase percentage set-asides.

Driven by budgetary concerns, the Congress may choose to reduce the corn support price to about $1.75, a step which will also be credited with making U.S. commodities more competitive in international markets. At the same time, target prices would also be cut back somewhat more on a percentage basis, to perhaps about $2.50. Deficiency payments would, as a result, fall to perhaps 75 cents per bushel, from about $1.20. Politically, a 53-cent reduction in the corn target price will clearly prove extremely unpalatable, despite over $2 billion in probable savings. Compared to the alternatives though, such a drastic step could emerge as the only course of action that can gain the support of a majority in Congress. Similar changes would probably be adopted in other commodity programs.

Impose and enforce much stricter payment limitation provisions in conjunction with a higher, more realistic cap on payments.

As suggested by Taft and Runge, forbid the use of "highly erodible" land in satisfying set-aside requirements. While novel, this idea could have adverse consequences in areas where a high percent of land meets the definition of highly erodible. It could compel farmers to plant program crops on highly erodible land, while setting aside better cropland. This idea will also require considerable oratorical skills when brought before the Committee on Agriculture.

Strictly monitor established yields and base acreage to assure no increases are allowed in either.

Require cross-compliance—farmers enrolling in one commodity program (say wheat) must comply with the pertinent provisions of other programs (feedgrains) on all farms operated by them.

Adopt program changes that impose equal costs of program participation in areas where acreage is summerfallowed in alternate years, in contrast to regions where continuous cropping patterns are used.

4. Increasing the attractiveness of CRP enrollment for "highly erodible" cropland also eligible for Commodity Program participation

The most direct approach would be raising the acceptable bid levels in pools with a relatively high portion of commodity program base acres. Because of budget exposure, this option may be among the last given serious consideration, and can only be evaluated in terms of net costs once the provisions of the 1987 commodity programs are fully specified. Indeed, higher acceptable bid levels may prove the cheapest alternative to achieve more ambitious 1987 production adjustment goals. The scuttlebut in the halls of USDA on a paid diversion is that a payment on the order of $1.75 to $2.00 per bushel of corn base yield could be required. Such a rich offer would surely have a profound and negative impact on CRP enrollment.

I suppose it would also be possible to modify or eliminate the provision in the CRP which reduces a farm's base acres proportional to CRP enrollment. Since such a change would undercut an important aspect of the supply control benefits of the CRP, this option is not likely to be favorably received, even though it makes sense if the only goal is to increase CRP enrollment.

Another approach would be to convince farmers that the projected 10-year benefit stream from traditional commodity programs will shrink as (if?) the Congress gets serious about budget deficits. Without a cut next year in target prices though, farmers are not likely to take seriously the notion that program benefits are vulnerable politically.

Steps to educate farmers about the consequences in 1990 of conservation compliance could be initiated. (A tough task since it will remain inherently unclear in many regions what the consequences will be, at least until the definition of highly erodible land and other administrative program requirements are settled.)

Several other program reforms merit consideration next spring if a serious effort is made to accelerate CRP enrollment:

Move toward larger substate bidding pools to allow greater flexibility and choice within pools.

Raise the 25 percent cap on CRP acreage enrollment in a county to 50 percent.

Allow in some states, where adverse affects on the cattle industry can be avoided, the use of CRP lands for haying and grazing, in addition to forestry uses. This option is attractive on budgetary grounds since average acceptable bids would probably fall $20 to $30 per acre if haying or grazing were allowed. A recent survey by the American Farmland Trust of farmers considering enrollment in the CRP identified the prohibition against economic use as the most common concern keeping farmers from enrolling more land.

For farmers in serious financial trouble, allow upfront payment of CRP benefits for debt retirement as part of debt-restructuring agreements.

Offer farmers bonus payments for giving up base acres in excess of what is required as a condition of CRP enrollment.

CHALLENGES IN THE FIELD

The conservation title of the farm bill breathes new life into the mission of SCS and conservation districts. For the first time in decades, programs and policies are in place that provide a realistic set of tools to bring soil erosion largely under control. I think the conservation community is gearing up now, and will be able to bear the very heavy burdens which will soon fall upon them.

One key to the success of conservation compliance and sodbuster is the timely development of a new generation of farm conservation plans. Because these plans, and compliance with them, will determine eligibility for government program benefits, farmers and conservationists will have to take them far more seriously. Moreover, they will also need to be realistic and flexible, taking into account the special problems faced by certain farmers in some areas.

I must admit some concern about the future of conservation plans in light of new program needs. The type of a plan needed to make sodbuster/conservation compliance administratively viable is very different from the elaborate, whole farm plans of the past. Yet, there remains considerable hesitancy among some to change conservation plans. Problems could arise if SCS is slow to break with tradition because field personnel will soon become overwhelmed by the workload.

I have another concern. Implementation of sodbuster, swampbuster, and conservation compliance will require clear and strict rules, and adherence to them. Yet, good judgment and a degree of local flexibility will also be necessary to avoid unnecessary and unjustifiably harsh consequences. For example, suppose cotton producers in the panhandle of Texas can bring erosion rates down from an average of 40 tons per acre to 10 tons, on land with T values of 3 tons. Technically, this would fall short by 4 tons of the 2T goal in conservation compliance.

I do not think it makes sense to, in effect, shut down an operator in situations where 20, 30 or more tons of erosion reduction is agreed upon, yet the 2T goal is missed by a few tons. Nonetheless, it is no easy matter to balance the need for equity across regions in achieving consistent national goals, with a degree of flexibility at the local level. Unless a workable accommodation can be reached between these two critical goals, conservation compliance and sodbuster will remain vulnerable to political and/or legal challenge.

Similar concerns have arisen in reference to the definition of "commenced" in the sodbuster/swampbuster regulations. I think these tricky issues can be resolved in a reasonable, timely way without undermining the integrity of the new conservation provisions, or political support for this major new change in direction. At times, antagonists may have to trust each other more than they are accustomed to, but I am convinced common sense can lead to solutions as long as all parties continue to share the goal of conserving our soil and water resources.

There are a host of other, more pragmatic challenges that SCS, ASCS, and conservation district offices now face. They must: identify in the next 24 months what lands meet the definition of "highly erodible," and inform landowners and operators associated with these lands; greatly simplify the content and process of developing a conservation plan; become much more expert in use of the USLE, and in understanding from a farmer's perspective the pros/cons/impacts of various erosion control options; systematically explore the potential role of crop rotations as a valuable, often necessary, erosion control practice; and incorporate water quality concerns and practices into plans.

5. Continue to improve the cost-effectiveness of the targeting effort, particularly in the Agricultural Conservation Program (ACP)

Steady improvement in the cost-effectiveness of ACP remains an untold conservation success story. This program continues to demonstrate the capacity and willingness to meet emerging needs. To the credit of program administrators, problems have been studied and steps taken to overcome shortcomings.

These efforts should continue, and deserve greater support. I hope that OMB will finally recognize and reward the Department for these accomplishments by foregoing the bogus budget savings entailed in zeroing ACP out of the FY 1988 budget. Everyone remotely knowledgeable about this program realizes that the Honorable Mr. Whitten will restore ACP funds if missing when the budget is submitted to Congress.

In summary, the critical issues on the agenda right now that will make heavy information demands on the conservation community are: defining and identifying "highly erodible" lands; getting the economics right to assure adequate CRP enrollment in the Midwest; providing new technical data and analytical concepts to allow a modernization of conservation plans; and developing concepts and data needed to incorporate water quality concerns into the overall conservation policy agenda.

NEW DIRECTIONS

I see many important new directions on the horizon that could markedly change how we, administer soil and water conservation policy. They include:

1. Last week, Senator Sam Nunn introduced legislation to accelerate the rate of enrollment of land into the CRP, and to expand the size of the reserve to 65 million acres. While not a new direction, this legislation suggests a much more immediate and prominent role for the CRP.

2. A strong case can be made for states assuming a leadership role in initiating water quality/water conservation initiatives in the context of the CRP/conservation compliance/sodbuster/swampbuster. I see many possibilities, and sense that a few key states—including Minnesota—are about ready to move ahead. States might:

Cooperate with SCS in improving the accuracy, or adjusting the technical concepts used in identifying highly erodible lands in order to take water quality concerns into account;

Demonstrate how to incorporate water quality into conservation plans; and

Petition USDA to block-grant a portion of CRP funds destined for a state into a special fund to be administered through a targetted federal-state program designed to enroll into the CRP croplands irrigated from threatened aquifers (quality or quantity concerns, or both); or contributing disproportionally to non-point pollution problems (either surface or groundwater).

3. In several parts of the United States, farmers are growing crops that should not be produced, and indeed cannot be produced in a profitable manner given current market conditions. These crops, moreover, are often those associated with some of the most egregious abuses of our natural resources. Sound conservation policies—and the flow of dollars associated with the new programs—could help U.S. agriculture make some difficult adjustments which ultimately could be forced upon the sector by economic forces.

I foresee the prospect for conservation-driven policy to substantially contribute to the resolution of at least some of agriculture's most pressing economic weaknesses. The policies are already proven winners in terms of erosion control. If others come to share this view and see this added potential, we just might deliver on those very big promises made for the conservation title of the 1985 farm bill.

Thanks, I enjoyed the chance to visit with you this afternoon.●

By Mr. SPECTER:

S. 2938. A bill entitled the "Logan Relief Act;" to the Committee on Banking, Housing, and Urban Affairs.

LOGAN RELIEF ACT

Mr. SPECTER. Mr. President, I am today introducing legislation which would authorize the Federal Government to assist residents of the Logan area of Philadelphia by purchasing homes endangered by the disaster that has occurred there.

My purpose in introducing this bill is to focus Congress attention on the urgent plight of Logan residents as a prelude for action next year. Although I understand full well that passage of this bill will not be possible in the 99th Congress, the subject of this bill is of such major importance that I wish to call the attention of my colleagues to it without delay.

Hundreds of homes in the Logan area are situated in low land and a flood plain of the Wingohocking Creek that were filled many years ago with ash and cinders. A recent engineering study contracted by the city of Philadelphia identified 11 homes as imminently dangerous and another 29 as dangerous due to a severe sinking condition caused by the settlement, disintegration and shifting of the ash and cinders. Some 957 homes in all are affected by the subsidence, and many are now or will soon be uninhabitable.

According to the summary of the final report of the Logan geotechnical study, conducted by Lippincott Engineering Associates, one of the contributing factors to the subsidence of the Logan area was mild earthquakes, which caused the "ash and cinder to lose strength and volume."

Since the problem began, I have actively sought assistance for Logan area residents. At my request, Secretary of Housing and Urban Development Samuel Pierce provided mortgage relief to affected homeowners, relieving the debt obligations of FHA-guaranteed loans. I also sought and received a similar commitment from the Veterans' Administration. Clearly,

however, this leaves a great many people in the lurch.

The engineering study estimates that the total cost of resolving the Logan problem—buying the dangerous homes, providing relocation assistance and doing remedial work where possible—is in the range of $30 to $40 million. On Friday, September 26, 1986, Gov. Dick Thornburgh declared the Logan section an emergency and requested Federal disaster assistance. If the President provides the requested assistance, that will be extremely helpful. But it is unlikely to be enough because the usual forms of disaster assistance do not include the authority to purchase the homes and relocate the residents to new houses. My bill would fill this gap by providing the necessary authority to purchase homes.

Logan residents are like many other Americans in that their homes are their primary financial assets. The widely published subsidence problem in the Logan neighborhood has reduced or eliminated the market value of many of these homes. This is a major financial blow to the position in life of many Logan residents. My bill would mitigate this blow by authorizing the Federal Government to purchase the homes at their market value before the subsidence problem began.

There is ample precedent for Federal intervention and legislation in emergency situations such as this one. A case in point is that of the Centralia, PA mine fire. At my urging, the Senate earmarked an appropriation of $42 million for the abandoned mine reclamation fund to provide for the purchase of homes and relocation of Centralia residents. Thus, in addition to providing an example of general Federal involvement in an emergency situation that is partially manmade, the Centralia case also serves as a precedent for Federal involvement in the purchase of homes and provision of relocation assistance. The special appropriation for Centralia was used precisely for these purposes.

In the case of Love Canal, a community endangered by highly toxic waste in the 1970's, a disaster declaration along with an earmarked appropriation sponsored by Senators MOYNIHAN and Javits provided Federal assistance in mitigating the environmental danger. Of course, the Love Canal tragedy ultimately led to the establishment of Superfund, a massive Federal program to respond to certain kinds of man-made environmental problems which neither State nor local authorities can adequately address.

Another instance of Federal involvement in a man-made emergency came in response to a series of sewer explosions in Louisville, KY, in 1981. In that case, President Reagan declared a major disaster to assist homeowners with property damage.

Mr. President, there is, in short, a history of Federal involvement in situations analogous to the one that Logan residents are now facing. This is a worthy subject for legislation at the first available opportunity.

It is my hope that the introduction of this legislation at this time will serve notice to FEMA and the administration about the urgency and seriousness of the conditions of the Logan area.

By Mr. ROCKEFELLER:

S. 2939. A bill to amend the Motor Vehicle Information and Cost Savings Act to provide for the appropriate treatment of methanol; to the Committee on Commerce, Science, and Transportation.

METHANOL VEHICLE PROMOTION ACT

Mr. ROCKEFELLER. Mr. President, I am today introducing the Methanol Vehicle Promotion Act of 1986, an act that would encourage and promote the development of methanol capable automobiles. In this bill, I have collected the ideas of several colleagues, including the chairman of the Commerce Committee, Senator DANFORTH—who initiated the idea of a methanol vehicle incentive program—as well as several of my own. This is an idea that I have been working on at great length this year, and an idea that I feel confident that the next Congress will embrace early in the next session.

Although this is the very end of the session, Mr. President, I am introducing this bill in order to maintain the interest and momentum in this very exciting technology. To some degree this bill is also a progress report on intensive negotiations that have encompassed S. 1097, a bill reported by the Senate Commerce Committee in 1985, during the 99th Congress. I believe that significant progress has been made—both within the Senate, and in discussions with the House. I am convinced that it is merely for the lack of time that we are unable to complete this process this Congress.

The bill I am introducing is more narrow than S. 1097, both with regard to the potential size of the incentive and with regard to the fuels to which it would apply. The earlier bill, S. 1097, included incentives for the production of vehicles using both ethanol and natural gas as well as methanol. I realize that several Members might wish to look at these fuels when we consider this bill next year, but my focus has been the promotion of methanol.

This approach would also not preclude passage of legislation similar to that passed by the other body, H.R. 3355, providing for a methanol vehicle demonstration program, under the very fine leadership of Congressman PHIL SHARP and Chairman JOHN DINGELL. Although it had been my hope that we might pass that bill in the Senate by unanimous consent this session, it now appears that on that matter also, we will have to pick up where we left off next year.

In my view, Mr. President, methanol is the fuel of the future. Not only can it be derived from our plentiful domestic supplies of coal, but its use could also result in a substantial reduction of pollutants from automobiles. In sum, the use of methanol and a push in the transition to the production and use of methanol vehicles is worth the attention of Congress.

Mr. President, ever since 1973, when the Organization of Petroleum Exporting Countries—OPEC—cut oil supplies to the West, our consciousness of energy matters, especially the availability and price of gasoline, has been profound. Throughout most of the 1970's we searched in vain for energy alternatives—greater uses of coal, synthetic fuels, solar energy, conservation, and so forth.

In the 1980's, the availability of energy resources has been relatively stable. There are many reasons for this fact, but it should not keep us from exploring future alternatives, especially alternatives to fuel our transportation sector.

The transportation sector accounts for more than 60 percent of the oil consumption in the United States. To a large extent, the laws and programs passed in the 1970's sought to conserve or find new sources of gasoline to fuel that sector. But little effort went into development of a replacement—or into the massive effort it will take to encourage the production of vehicles that can use alternative fuels.

The Methanol Vehicle Promotion Act of 1986, without any cost to the Government, seeks to break the so-called chicken and egg problem of transition to the alternative fuel of methanol. As it stands, the auto companies won't build methanol capable or dual fuel—cars that can adjust to any blend of methanol and gasoline—automobiles until methanol is being sold in the corner service station. On the other hand, the local service station isn't going to make the investment in the pumps, hoses, and tanks, to offer methanol, or a methanol blend, until these vehicles are on the road.

This bill builds on the foundation of S. 1097, the Methanol and Ethanol Vehicle Incentives Act of 1985. It uses the incentive of modest relief from one Federal energy statute; namely, the Motor Vehicle Information and Cost Savings Act—the so-called CAFE [corporate average fuel economy] law, in order to promote the development of vehicles that will reduce our use of, and dependence on gasoline.

My approach in this bill is to hold out a substantial incentive for the auto companies to build both methanol only and dual fuel automobiles, but to stay away from, and neutral to the debate about the underlying CAFE law. My bill would allow automobiles that run on methanol exclusively, and dual fuel automobiles—those that are designed to adjust to a combination of gasoline and methanol—to receive a miles-per-gallon rating based on an assumed 15 percent fuel content. Such a formula provides a powerful incentive to an auto maker to invest in methanol in order to avoid any application of penalties from the CAFE law on the rest of its fleet.

Mr. President, what distinguishes my bill from S. 1097 is that it effectively deals with numerous concerns that have been raised about the open-ended approach taken in that bill regarding the dual fuel automobile. By placing a cap on the amount of maximum credit that can be received by an automobile manufacturer as well as phasing out and phasing down the credit over a 10-year period, my bill prevents the circumstance where a relatively small amount of automobile production could undermine the existing CAFE statute.

In my bill, I have also included a provision to prevent a double counting of benefit, another concern raised about earlier proposals. This provision would reduce by an equivalent level the amount of benefit from the methanol incentive if the Secretary of Transportation reduces the corporate average fuel economy standard below the current statutorily mandated level.

Mr. President, I have also tried to improve upon the definition of the dual fuel automobile that was contained in S. 1097. To address the concern that such a definition might give auto manufacturers a loophole to produce cars that might not actually use methanol, I have tried to make it clear that their design and operation must allow for operation over the entire range of methanol and gasoline blends.

Mr. President, legislating in this area is difficult because it touches an area of the law and regulation already extremely complex. Nevertheless, I think it is an effort worth making. I think with this concept and with the protections of this bill, there is the opportunity to promote a very fundamental change in the transportation and energy sectors of our economy. Our declining domestic supply of oil, the continued reliance on foreign oil supplies, and the growing need to use a fuel for transportation that will result in cleaner air, all point in the direction of methanol.

Mr. President, I intend to continue my work on this bill and to forge a compromise among the differing but legitimate points of view. I am optimistic about the prospects for passage in the next Congress, and it is my hope that by introducing legislation at this time, we will continue to make progress prior to the beginning of the 100th Congress.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2939

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Methanol Vehicle Promotion Act of 1986".

FINDINGS

SEC. 2. The Congress finds that—

(1) transportation uses account for more than 60 percent of the oil consumption of the Nation;

(2) continued reliance on imported oil is detrimental to the economy and security of the United States;

(3) methanol is a proven transportation fuel that burns more cleanly and efficiently than gasoline; and

(4) conversion of a portion of the transportation fleet of the Nation to methanol would stimulate development of a domestic coal-to-methanol industry, create jobs, reduce air pollution, and enhance national security.

PURPOSES

SEC. 3. The purposes of this Act are to—

(1) provide for the appropriate application of fuel economy standards to methanol powered automobiles; and

(2) increase the use of methanol by consumers and the production of methanol powered vehicles.

MANUFACTURING INCENTIVES FOR AUTOMOBILES

SEC. 4. (a) Section 501 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2001) is amended—

(1) in paragraph (1), by inserting immediately after "fuel" the first time it appears the following: "or methanol mixture"; and

(2) by adding at the end thereof the following new paragraphs:

"(15) The term 'methanol mixture' means the mixture of methanol with other fuel, if any, used to operate a methanol powered automobile.

"(16) The term 'methanol powered automobile' means an automobile designed to operate on not less than 85 percent methanol.

"(17) The term 'dual fuel automobile' means an automobile which—

"(A) is capable of operating on methanol and which is designed to make appropriate instantaneous adjustments to the air-fuel ratio for the entire range of blends (from 0.0 percent methanol to at least 85 percent methanol) of gasoline and methanol; and

"(B) achieves a driving range of at least 250 miles, based upon the combined EPA city/highway fuel economy, as determined for Corporate Average Fuel Economy purposes for such automobile when operating on an 85 percent methanol mixture.".

(b) Section 502(l)(1) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2002(l)(1)) is amended—

(1) by redesignating subparagraph (E) as subparagraph (H); and

(2) by inserting immediately after subparagraph (D) the following new subparagraphs:

"(E) As specified in this subparagraph, for any 10 consecutive model years between 1993 and 2005, a manufacturer of dual fuel automobiles shall receive a Corporate Average Fuel Economy increase in accordance with section 503(d)(4)—

"(i) for the initial five model years, up to 1.2 miles-per-gallon or a Corporate Average Fuel Economy increase based on 100,000 dual fuel automobiles, whichever is higher, but in no event shall such Corporate Average Fuel Economy increase be greater than 1.5 miles per gallon;

"(ii) for the period of 2 years after such five model years, up to 1.0 miles-per-gallon or a Corporate Average Fuel Economy increase based on 100,000 dual fuel automobiles, whichever is higher, but in no event shall such Corporate Average Fuel Economy increase be greater than 1.5 miles-per-gallon; and

"(iii) for the period of 3 years after such 2-year period, up to 0.8 mile-per-gallon or a Corporate Average Fuel Economy increase based on 100,000 dual fuel automobiles, whichever is higher, but in no event shall such Corporate Average Fuel Economy increase be greater than 1.0 mile-per-gallon.

"(F) Notwithstanding the provisions of subparagraph (E) of this paragraph, if the Secretary reduces the Corporate Average Fuel Economy standard for any model year below 27.5 miles per gallon, the Corporate Average Fuel Economy increase to which any manufacturer of dual fuel automobiles would otherwise be entitled under this subsection in any model year shall be reduced by the amount of the reduction in the Corporate Average Fuel Economy standard.".

"(c) Section 503(d) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2003(d)) is amended by adding at the end thereof the following new paragraph:

"(4) If a manufacturer manufactures methanol powered automobiles or dual fuel automobiles specified in section 501(21)(A), the fuel economy shall be based on the fuel content of the methanol mixture used to operate such automobiles. For purposes of this section, a gallon of the methanol mixture used to operate such automobiles shall be considered to contain 15 one-hundredths of a gallon of fuel.".

AUTOMOBILE LABELING

SEC. 5. Section 506(a)(1)(A) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2006(a)(A)) is amended—

(1) by striking "and" in clause (ii); and

(2) by inserting immediately after clause (iii) the following:

"(iv) in the case of a methanol powered automobile the fuel economy of such automobile when operated on the methanol mixture calculated under section 503(d)(4) multiplied by 15 percent, and

"(v) in the case of a dual fuel automobile, the fuel economy of such automobile calculated under section 503(d)(4) multiplied by 15 percent, as well as the fuel economy of such automobile when operated on gasoline,".

REPORT

SEC. 6. Section 512 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2012) is amended by adding at the end thereof the following new subsection:

"(d)(1) Beginning in January 1993 and annually thereafter, the Secretary, after consultation with the Secretary of Energy, shall submit to the Congress a report which

contains the information specified in paragraph (2) of this subsection, together with such other information and recommendations as the Secretary considers necessary or appropriate to carry out the purposes of the Methanol Vehicle Promotion Act of 1986.

"(2) As part of such report, the Secretary shall—

"(A) include information regarding the effects, if any, of the amendments made by such Act on the consumption of methanol and gasoline on an industrywide and manufacturer-specific basis;

"(B) in consultation with the EPA Administrator, include information regarding the effects, if any, of the amendments made by such Act on the achievement of fuel economy standards specified in section 502 on an industrywide and manufacturer-specific basis; and

"(C) in consultation with the EPA Administrator, recommend changes in the definition of 'dual fuel automobile' in section 501(21) as technological developments warrant, in order to promote the actual use of methanol and ethanol, and to further the purposes of the Methanol Vehicle Promotion Act of 1986.".

CONFORMING AMENDMENT

SEC. 7. The determination under section 4064(b) of the Internal Revenue Code of 1954 (26 U.S.C. 4064(b)) with respect to a methanol powered automobile or dual fuel automobile shall be based on the fuel economy rating established under section 503(d)(4) of the Motor Vehicle Information and Cost Savings Act.

ADDITIONAL COSPONSORS

S. 2222

At the request of Mr. GORTON, the name of the Senator from Idaho [Mr. MCCLURE] was added as a cosponsor of S. 2222, a bill to amend the Tariff Schedules of the United States to clarify the duty treatment of certain types of plywood.

S. 2597

At the request of Mr. DANFORTH, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 2597, a bill to amend the Tariff Schedules of the United States to provide a temporary suspension of the duties imposed on certain extracorporeal shock wave lithotripters.

S. 2611

At the request of Mr. STEVENS, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 2611, a bill to improve efforts to monitor, assess, and reduce the adverse impacts of driftnets.

S. 2857

At the request of Mr. GRAMM, the names of the Senator from North Dakota [Mr. ANDREWS] and the Senator from Oklahoma [Mr. BOREN] were added as cosponsors of S. 2857, a bill to revitalize oil and gas production in the United States.

SENATE JOINT RESOLUTION 112

At the request of Mr. PELL, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of Senate Joint Resolution 112, a joint resolution to authorize and request the President to call a White House Conference on Library and Information Services to be held not later than 1989, and for other purposes.

SENATE JOINT RESOLUTION 403

At the request of Mr. ROTH, the name of the Senator from Hawaii [Mr. MATSUNAGA] was added as a cosponsor of Senate Joint Resolution 403, a joint resolution to designate 1988 as the "National Year of Friendship with Finland".

SENATE JOINT RESOLUTION 408

At the request of Mr. DOLE, the names of the Senator from Alabama [Mr. DENTON], the Senator from California [Mr. CRANSTON], the Senator from California [Mr. WILSON], the Senator from Florida [Mr. CHILES], the Senator from Florida [Mrs. HAWKINS], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Illinois [Mr. SIMON], the Senator from Illinois [Mr. DIXON], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Kentucky [Mr. FORD], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Massachusetts, [Mr. KERRY], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from North Dakota [Mr. BURDICK], the Senator from Rhode Island [Mr. CHAFEE], the Senator from South Dakota [Mr. ABDNOR], the Senator from Utah [Mr. GARN], the Senator from Utah [Mr. HATCH], the Senator from Vermont [Mr. STAFFORD], the Senator from Virginia [Mr. WARNER], and the Senator from Virginia [Mr. TRIBLE] were added as cosponsors of Senate Joint Resolution 408, a joint resolution designating "American Physiologists Week".

SENATE CONCURRENT RESOLUTION 163

At the request of Mr. DECONCINI, the name of the Senator from New York [Mr. D'AMATO] was added as a cosponsor of Senate Concurrent Resolution 163, a concurrent resolution expressing the sense of the Congress that the total number of Soviet diplomatic agents and consular officers in Washington, DC, and San Francisco should be reduced to equal the total number of American diplomatic agents and consular officers in Moscow and Leningrad.

SENATE CONCURRENT RESOLUTION 171—CORRECTING THE ENROLLMENT OF HOUSE JOINT RESOLUTION 626

Mr. SIMPSON (for Mr. MCCLURE) submitted the following concurrent resolution, which was considered and agreed to:

S. CON. RES. 171

Resolved by the Senate (the House or Representatives concurring), That in the enrollment of the joint resolution (H.J. Res. 626) to approve the "Compact of Free Association" between the United States and the Government of Palau, the following corrections shall be made:

(1) In section 101(d)(1)(B), insert "the Committees on Interior and Insular Affairs and Foreign Affairs and other" before "appropriate Committees of the House of Representatives".

(2) In section 101(d)(2) strike "(B)" and insert "(C)".

(3) In section 102(b), add "as amended," after "Public Law 99-239,".

(4) In section 104(c), strike "fiscal year 1985" each time such words occur and in each instance insert in lieu thereof "fiscal year 1986".

(5) In section 104(f), strike "Public Law 99-396" and in lieu thereof insert "Public Law 99-366".

(6) In section 104(g), strike "preclude" and in lieu thereof insert "exclude, limit".

(7) In section 242(c)(4) of Title II, strike "chapter V" and insert "title V".

(8) Following section 104(j) insert new subsection (k) as follows:

"(k) The Departments of Energy and Interior are directed to provide the Committees on Appropriations of the House and Senate with a report by Decemeber 1 of each fiscal year detailing how funds were spent during the previous fiscal year for the special medical care and logistical support program for Rongelap and Utrik and for the agriculture and food programs for Enewetak and Bikini as referenced in Section 103(h) of Public Law 99-239. The report shall also specify the anticipated needs during the current and following fiscal years in order to meet the radiological health care and logistical support program for Rongelap and Utrik and the planting, agricultural maintenance, and food programs for Enewetak and Bikini. It is the sense of the Congress that the special medical care and logistical support program for Rongelap and Utrik and for the agriculture and food programs for Enewetak and Bikini described in section 103(h) of Public Law 99-239 represent special and continuing moral commitments of the United States which will be annually funded to the extent of the need of the populations of such atolls for such assistance."

SENATE CONCURRENT RESOLUTION 172—TO PROVIDE FOR A SESSION OF THE CONGRESS IN PHILADELPHIA, PA, ON JULY 16, 1987

Mr. SIMPSON (for Mr. THURMOND, for himself, Mr. DOLE, Mr. BYRD, Mr. STENNIS, Mr. HATFIELD, Mr. SIMON, and Mr. KASSEBAUM) submitted the following concurrent resolution which was considered and agreed to:

S. CON. RES. 172

Whereas 1987 marks the two hundredth anniversary of the meeting of the Constitutional Convention in the City of Philadelphia, Pennsylvania from May 25 to September 17, 1787;

Whereas on July 16, 1787, the framers of the Constitution agreed to the "Great Compromise", which provided for States to be represented equally in the Senate and in the proportion to their populations in the House of Representatives;

Whereas the compromise established fundamental nature of the Senate and the House of Representatives;

Whereas the City of Philadelphia's "We the People 200" committee, an organization planning a year-long national celebration of

the United States Constitution bicentennial, has invited the Congress of the United States to convene a special legislative session on July 16, 1787, at Independence National Historical Park; and

Whereas it is appropriate for Congress, as the First Branch of the Government under the Constitution, to provide for suitable commemoration of this significant anniversary to focus public attention on the unique role of the national legislature as a coequal branch of the Federal Government: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall convene for the day of July 16, 1987, in the city of Philadelphia, Pennsylvania, in the Independence National Historical Park.

SENATE RESOLUTION 509—PROVIDING FOR A POINT OF ORDER AGAINST EXTRANEOUS MATERIAL IN CERTAIN RECONCILIATION MEASURES

Mr. SIMPSON (for Mr. ROTH, for himself, Mr. DOMENICI, and Mr. CHILES) submitted the following resolution, which was considered and agreed to:

S. RES. 509

That Senate Resolution 286 (99th Congress, 2d Session), adopted December 19, 1985, is amended by striking out all after the resolving clause and inserting in lieu thereof the following:

"That (a) when the Senate is considering a conference report on, or an amendment between the Houses in relation to, a reconciliation bill or reconciliation resolution pursuant to section 310 of the Congressional Budget Act of 1974, upon—

"(1) a point of order being made by any Senator against extraneous material meeting the definition of subsections (d)(1)(A) or (d)(1)(D) of section 20001 of the Consolidated Omnibus Budget Reconciliation Act of 1985, and

"(2) such point of order being sustained, such material contained in such conference report or amendment shall be deemed stricken, and the Senate shall proceed, without intervening action or motion, to consider the question of whether the Senate shall recede from its amendment and concur with a further amendment, or concur in the House amendment with a further amendment, as the case may be, which further amendment shall consist of only that portion of the conference report or House amendment, as the case may be, not so stricken. Any such motion in the Senate shall be debatable for 2 hours. In any case in which such point of order is sustained against a conference report (or Senate amendment derived from such conference report by operation of this resolution), no further amendment shall be in order.

"(b) An affirmative vote of three-fifths of the Members, duly chosen and sworn, shall be required to sustain an appeal of the ruling of the Chair on a point of order raised under this resolution, as well as to waive or suspend the provisions of this resolution.

"(c) The provisions of this resolution shall remain in effect until the date of termination of section 20001 of the Consolidated Omnibus Budget Reconciliation Act of 1985.".

SENATE RESOLUTION 510—AUTHORIZING CERTAIN APPOINTMENTS DURING SINE DIE ADJOURNMENT

Mr. SIMPSON. (for Mr. DOLE, for himself, and Mr. BYRD) proposed the following resolution, which was considered and agreed to:

S. RES. 510

Resolved, That notwithstanding the sine die adjournment of the present session of the Congress, the President of the Senate, the President of the Senate pro tempore, the Majority Leader of the Senate, and the Minority Leader of the Senate be, and they are hereby, authorized to make appointments to commissions, committees, boards, conferences, or interparliamentary conferences authorized by law, by concurrent action of the two Houses, or by order of the Senate.

SENATE RESOLUTION 511—RELATING TO STRATEGIC COOPERATION BETWEEN THE UNITED STATES AND ISRAEL

Mr. BOSCHWITZ submitted the following resolution, which was referred to the Committee on Foreign Relations:

S. RES. 511

Whereas President Reagan has declared that a strong relationship with Israel is a strategic asset of the foreign policy of the United States;

Whereas the United States and Israel have established a Joint Political-Military Group to facilitate and promote cooperation between our two countries;

Whereas the Joint Political-Military Group has contributed to strategic cooperation between, and promoted the mutual interests of, the United States and Israel; and

Whereas the United States and other nations with which we share a strategic interest benefit from consultation in defense research programs, cooperation in the production of defense material, competition in defense acquisition policies, and access to mutual defense industries and manfacturers: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the Joint Political-Military Group should develop and recommend additional policies and programs which would promote further defense cooperation between the United States and Israel and establish a relationship between the United States and Israel similar to the relationship that exists between the United States and its other allies; and

(2) the Secretary of State and the Secretary of Defense should report to the Chairman of the Senate Committee on Foreign Relations and the Chairman of the Senate Committee on Armed Services on what actions have been taken to implement the recommendations of the Joint Political-Military Group and what additional legislation might be required to implement those recommendations.

● Mr. BOSCHWITZ. Mr. President, I am submitting today a Senate resolution that would encourage the United States-Israel Joint Political-Military Group to pursue new avenues to strengthen the strategic cooperation between our two countries. The resolution serves as a companion resolution to the one introduced by Congressman ED ZSCHAU of California.

The Joint Political-Military Group has played a helpful role in promoting our mutual interests. It is an important mechanism that provides benefits to both countries. It does seem to me, however, that the time has come to recognize Israel's value to us in a way consistent with those nations with whom we may have a more formal alliance.

It would be my hope that the Joint Political-Military Group will explore areas with Israel that would provide the benefits extended to such other close friends. This resolution is intended to encourage that end.●

SENATE RESOLUTION 512—AUTHORIZING REPRESENTATION BY THE SENATE LEGAL COUNSEL

Mr. SIMPSON (for Mr. DOLE, for himself and Mr. BYRD) submitted the following resolution, which was considered and agreed to:

S. RES. 512

Whereas, in the case of *United States* v. *Michael Evan Bardoff, et al.,* Crim. No. M-9508-86, *et al.,* pending in the Superior Court of the District of Columbia, the United States Attorney has requested the testimony of Elizabeth Meyer, Mariam Bechtel, Janeal Cabbage and Jennifer Schumacher of the personal office staff of Senator Dole;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a)(2) (1982), the Senate may direct its counsel to represent employees of the Senate with respect to testimony requests made of them in their official capacity;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that the testimony of employees of the Senate is or may be needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges and rights of the Senate; Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to represent Elizabeth Meyer, Mariam Bechtel, Janeal Cabbage, Jennifer Schumacher and any other staff assistant of Senator Dole who may be asked to testify in the case of *United States* v. *Michael Evan Bardoff, et al.,* or subsequent related proceedings.

SEC. 2. That Elizabeth Meyer, Mariam Bechtel, Janeal Cabbage, Jennifer Schumacher, and any other staff assistant of Senator Dole who may be asked is authorized to testify in the case of *United States* v. *Michael Evan Bardoff, et al.,* except concerning matters which may be privileged.

AMENDMENTS SUBMITTED

TECHNICAL CORRECTIONS ON THE ENROLLMENT OF THE BILL H.R. 3838

PACKWOOD AMENDMENT NO. 3467

Mr. PACKWOOD proposed an amendment to the concurrent resolution (H. Con. Res. 395) to correct technical errors in the enrollment of the bill H.R. 3838, as follows:

Viz:

On page 3, strike lines 9 through 18.

On page 6, strike lines 1 through 7, and insert:

comma and "and", and add at the end thereof the following new subparagraph:

(D) such facility is to serve Haverhill, Massachusetts.

On page 10, line 9, strike "1983" and insert "1993".

On page 13, line 20, strike "or (C)".

On page 14, line 10, strike "Samuel A. Hardage Enterprises" and insert "Interests of Samuel A. Hardage".

On page 16, between lines 16 and 17, insert:

(E) Subsections (c) and (d) of section 49 of the Internal Revenue Code of 1986 shall not apply to property described in section 204(a)(4) of this Act.

On page 19, line 10, insert "Pittsburgh," after "in".

On page 19, between lines 17 and 18, insert:

(NN) Old Louisville Trust Project, Louisville, Kentucky.

(OO) Stewarts Rehabilitation Project, Louisville, Kentucky.

(PP) Bernheim Officenter, Louisville, Kentucky.

On page 25, after line 24, insert the following flush sentence:

In no event shall sections 382(a) and (b) of such Code (as so in effect) apply to any ownership change described in subparagraph (A).

On page 27, line 9, strike "stock in such corporation" and insert "such stock".

On page 27, line 20, after "1989" insert ", without regard to whether such corporation is completely liquidated".

On page 36, strike lines 16 through 18.

On page 38, beginning with line 21, strike through page 39, line 19, and insert:

(116) On page 322, in subsection (d) (relating to treatment of certain market discount bonds)—

(A) strike "28 percent" in paragraph (1) and insert "32 percent", and

(B) strike paragraph (2) and insert:

(2) QUALIFIED LIFE INSURANCE COMPANY.—For purposes of paragraph (1), the term "qualified life insurance company" means any life insurance company subject to tax under part I of subchapter L of chapter 1 of the Internal Revenue Code of 1986.

On page 40, between lines 21 and 22, insert:

(c) REVENUE LOSS LIMITED.—The decrease in the amount of Federal revenue by reason of the amendment made by this section shall not exceed $300,000.

On page 41, strike lines 1 through 4, and insert:

(B) in subparagraph (A)—

(i) strike out "a deferred compensation plan" and insert "employees on August 16, 1986,", and

(ii) insert "maintaining a deferred compensation plan" after "Alabama", and

On page 41, line 7, insert "to" before "individuals".

On page 47, line 8, strike "(b)(2)(D)" and insert "(b)(2)(B)".

On page 47, line 9, strike "884(b)(2)" and insert "884(d)(2)".

On page 52, strike lines 4 through 18.

On page 60, line 25, before "projects" insert "the construction of such diagnostic and treatment center, or to finance construction and renovation".

On page 62, beginning with line 21, strike through page 63, line 25.

On page 66, line 17, strike "subparagraphs (A) and (B)" and insert "subparagraphs (A), (B), and (C)".

On page 71, strike lines 4 through 7, and insert:

(243) On page 76, in paragraph (11) (relating to certain aircraft)—

(A) strike "aircraft" each place it appears in the text and heading and insert "airplane",

(B) strike "Kansas, Florida, Georgia, or Texas" in subparagraph (A) and insert "the United States";

(C) strike ", the date of conference committee action)" in subparagraph (B); and

(D) strike subparagraph (C) and insert:

(C) The aircraft is—

(i) purchased on or after August 16, 1986, and before January 1, 1987, or

(ii) is subject to a binding contract which was in effect on August 16, 1986, or entered into after August 16, 1986, and before January 1, 1987, and

is delivered and placed in service pursuant to such purchase or contract before July 1, 1987.

Any airplane which is one of 7 airplanes with respect to which an airline signed an airplane purchase agreement on January 20, 1986 (with respect to which the financing contingency was removed no later February 7, 1986), the estimated cost of which is $2,900,000, and which was delivered before May 23, 1986, and placed in service by May 27, 1986, shall be treated as described in this paragraph.

On page 72, line 4, after "Industries" insert "after December 31, 1988".

On page 72, line 8, strike "paragraph" and insert "paragraphs".

On page 73, after line 25, insert the following:

(39) The amendments made by section 201 shall not apply to any facility for the manufacture of an improved particle board if a binding contract to purchase such equipment was executed March 3, 1986, such equipment will be placed in service by January 1, 1988, and such facility is located in or near Moncure, North Carolina.

On page 74, line 16, insert "(including repairs and maintenance)" before "of".

On page 74, line 20, strike "during 1986" and insert "(and allowable as a deduction) during 1986 and shall be treated as qualified rehabilitation expenditures made during 1986".

On page 76, between lines 17 and 18, insert:

(W) South Carolina Family Farm Development Authority.

(X) Clemson University Continuing Education and the Component Housing Project.

On page 78, strike lines 1 through 16, and insert after "1986" in line 17 "and the amendments made by section 1301 of the Tax Reform Act of 1986".

On page 80, line 12, strike "each place it appears" and insert "the second place it appears".

On page 80, between lines 19 and 20, insert the following:

( ) On page 31, in paragraph (4) of subsection (b) (relating to miscellaneous itemized deductions)—

(A) strike "deduction" and insert "deductions", and

(B) strike the comma at the end and insert "and section 642(c) (relating to deduction for amounts paid or permanently set aside for a charitable purpose),".

( ) On page 32, in the heading of subsection (e), strike "DETERMINATION OF ADJUSTED GROSS INCOME IN CASE OF" and insert "SPECIAL RULES FOR".

( ) On page 32, after the period at the end of subsection (e) and before the close quotation marks, insert "For purposes of this section and section 56(b)(1), the deductions allowable to an estate or trust under sections 651 and 661 shall not be treated as itemized deductions.".

( ) On page 56, in subsection (b) (relating to system used for purposes of earnings and profits)—

(A) strike "Paragraph (3)" and insert:

(1) IN GENERAL.—Paragraph (3), and

(B) insert at the end the following new paragraph:

(2) CONFORMING AMENDMENT.—Section 312(k)(4) is amended—

(A) by striking out "paragraphs (1) and (3)" and inserting in lieu thereof "paragraph (1)", and

(B) by striking out the last sentence.

( ) On page 61, immediately before section 202 (relating to expensing of depreciable assets), insert the following new paragraph:

(15) Subparagraph (D) of section 46(e)(4) is amended by striking out "paragraphs (8) and (9) of section 168(j)" and inserting in lieu thereof "paragraphs (5) and (6) of section 168(h)".

( ) On page 62, the last line, insert after the end period the following new sentence: "No election may be made under this subparagraph with respect to property to which section 168 of the Internal Revenue Code of 1986 does not apply by reason of section 168(f)(5) of such Code."

( ) On page 65, at the end of subsection (d) (relating to mid-quarter convention), insert: "The preceding sentence shall only apply to property which would be taken into account if such amendments did apply."

( ) On page 67, in subparagraph (F), insert "either" after "if".

( ) On page 68, in the 21st line, strike "1993" and insert "1998".

( ) On page 81, in paragraph (29)—

(A) strike "January 18" in subparagraph (A) and insert "January 25", and

(B) strike "law suits filed on June 22, 1984, and November 21, 1985" in subparagraph (B) and insert "a law suit filed on October 25, 1985".

( ) On page 84, strike subparagraph (J) and insert the following:

(J) a 25.85 megowatt alternative energy facility located in Deblois, Maine, with respect to which certification by the Federal Energy Regulatory Commission was made on April 3, 1986, and".

( ) On page 84, immediately before subsection (b), insert the following new paragraph:

(40) The amendments made section 201 shall not apply to trucks, tractor units, and trailers which a privately held truck leasing company headquartered in Des Moines, Iowa, contracted to purchase in September 1985 but only to the extent the aggregate

reduction in Federal tax liability by reason of the application of this subparagraph does not exceed $8,500,000.

( ) On page 85, the first 12 lines—

(A) insert "and" at the end of subparagraph (B),

(B) strike subparagraph (C), and

(C) redesignate subparagraph (D) as subparagraph (C).

( ) On page 108, in subparagraph (B) of paragraph (3) (relating to certain additional rehabilitations), strike "Pontabla" and insert "Pontalba".

( ) On page 110, in subparagraph (T) of paragraph (4), strike "Louisville" and insert "Covington".

( ) On page 124, in paragraph (1) of subsection (k) (relating to application of at-risk rules)—

(A) strike "subparagraph (D)(iv)(I)" and insert "subparagraphs (D)(ii)(II) and (D)(iv)(I)", and

(B) strike "qualified basis" and insert "eligible basis".

( ) On page 125, the 5th line, before the end period insert: ", except that this subparagraph shall not apply in the case of a Federally-assisted building described in subsection (d)(6)(B) if—

"(i) a security interest in such building is not permitted by a Government agency holding or insuring the mortgage secured by such building, and

"(ii) the proceeds from the financing (if any) are applied to acquire or improve such building."

( ) On page 127, in the third line, strike the period and insert ", and except for any building described in paragraph (2)(B), subsection (h)(4) shall not apply to any building placed in service after 1989.".

( ) On page 141, immediately before subsection (c) (relating to effective date) insert:

(14) Subparagraph (B) of section 172(d)(4) is amended by striking out ", (2)(B),".

( ) On page 167, between the fourth and fifth lines, insert:

(4) SPECIAL RULE FOR CERTAIN RURAL HOUSING.—In the case of any interest in a qualified low-income housing project which—

(A) is assisted under section 515 of the Housing Act of 1949 (relating to the Farmers Home Administration Program), and

(B) is located in a town with a population of less than 10,000 and which is not part of a metropolitan statistical area,

paragraph (1)(B) shall be applied by substituting "35 percent" for "50 percent" and subsection (b)(1) shall be applied by substituting "5th taxable year" for "6th taxable year". The preceding sentence shall not apply to any interest unless, on December 31, 1986, at least one-half of the number of payments required with respect to such interest remain to be paid.

( ) On page 177, the 11th line, insert "amount or" before "payment".

( ) On page 177, strike the last 4 lines, and insert:

"(B) except as provided in regulations, the only earnings and profits of such corporation were earnings and profits—

"(i) accumulated by such corporation (or any predecessor corporation) during such period, and

"(ii) not attributable to distributions from any other corporation unless the stock of such other corporation (or of any predecessor corporation) was held by such corporation during the entire period such other corporation (or predecessor corporation) was in existence, and

( ) On page 190, lines 8 and 9, strike "deposits described in subclause (II)" and insert "the amount of deposits in the new loss corporation immediately after the change".

( ) On page 190, in paragraph (6) (relating to special rule for insolvency transactions), strike "be the value of the new loss corporation immediately after the ownership change" and insert "shall reflect the increase (if any) in value of the old loss corporation resulting from any surrender or cancellation of creditor's claims in the transaction".

( ) On page 193, in the sentence immediately preceding paragraph (5) (relating to bankruptcy proceedings) strike "with respect to domestic building and loan transactions" and insert "with respect to transactions (including firm commitment underwritings) by institutions described in section 591 of such Code".

( ) On page 201, immediately before section 632 (relating to treatment of C corporations electing subchapter S status), insert the following new paragraph:

(18) Section 334(b)(2) is amended by striking out "332(c)" each place it appears in the text and heading and inserting in lieu thereof "337(b)(1)".

( ) On page 203, immediately before subsection (b) (relating to treatment of distributions), strike the end quotation marks and insert the following new paragraph:

"(5) TREATMENT OF TRANSFER OF ASSETS FROM C CORPORATION TO S CORPORATION.—

"(A) IN GENERAL.—Except to the extent provided in regulations, if—

"(i) an S corporation acquires any assets from a C corporation, and

"(ii) the S corporation's basis in such assets is determined (in whole or in part) by reference to the basis in the hands of the C corporation,

then this section (other than subsection (c)(1)) shall apply to any recognized built-in gain on the disposition of any such asset.

"(B) SPECIAL RULES.—For purposes of subparagraph (A)—

"(i) paragraphs (1), (2), and (3) shall be applied by substituting the taxable year in which the assets were acquired for the taxable year referred to in such paragraphs, and

"(ii) the net unrealized build-in gain shall be computed by taking into account only such assets."

( ) On page 206, in paragraph (8), strike "becomes an S corporation for a taxable year beginning" and insert "makes an election to be an S corporation under section 1362 of such Code".

( ) On page 206, redesignate subsections (d) and (e) as subsections (e) and (f), respectively.

( ) On page 208, redesignate subsection (f) as subsection (g).

( ) On page 225, the 10th line, strike "contractual option" and insert "contractual obligation".

( ) On page 253, strike subparagraph (E) (relating to standard deduction not allowed) and insert:

"(E) STANDARD DEDUCTION AND PERSONAL EXEMPTION NOT ALLOWED.—The standard deduction under section 63(c) and the deduction for personal exemptions under section 151 shall not be allowed.

( ) On page 264, in paragraph (6)(A) (relating to appreciated property charitable deduction) insert "or 642(c)" after "section 170".

( ) On page 268, the 5th line from the bottom, strike the end quotation marks.

( ) On page 268, between the 4th and 5th lines from the bottom, insert:

"(j) TAXABLE INCOME FOR CERTAIN ORGANIZATIONS.—If the tax imposed by chapter 1 on any organization is determined by reference to an amount other than taxable income, such amount shall be treated as the taxable income of such organization for purposes of this part."

( ) On page 269, fifth line from the bottom, strike "earnings and profits" and insert "current earnings".

( ) On page 273, before the last line, insert:

(L) Section 511 is amended by striking out subsection (d).

( ) On page 295, the 7th line from the bottom, strike "Section 267(a)" and insert "Section 267(a)(2)".

( ) On page 313, in paragraph (3)(C) (relating to limitation on issuer), strike "qualified" the second place it appears.

( ) On page 315, strike subparagraph (P) and insert:

(P) Homewood, Alabama, the Club Apartments.

( ) On page 321, the 3rd, 4th, and 6th line, strike "June 20, 1986" and insert "the date of the enactment of this Act".

( ) On page 349, in clause (iv) of paragraph (4)(B) (relating to information required to be supplied), strike "with or within which the taxable year ends" and insert "in which the taxable year begins".

( ) On page 350, in subparagraph (C) of paragraph (2) (relating to special rules for applying section 72), strike "with or within which the taxable year ends" and insert "in which the taxable year begins".

( ) On page 383, the 9th line from the bottom, strike "414(f)(1)(B)" and insert "3(37)(A)(ii)".

( ) On page 384, the first line, strike "Section 202(B)(i)" and insert "Section 202(a)(1)(B)(i)".

( ) On page 398, in section 4979(c) (defining excess contributions), strike "408(k)(8)(B)" and insert "408(k)(6)(C)".

( ) On page 419, line 11, strike "at the end thereof" and insert "after section 4981".

( ) On page 419, line 13, strike "SEC. 4981." and insert "SEC. 4981A.".

( ) On page 421, line 18, strike "at the end thereof" and insert "after the item relating to section 4981".

( ) On page 421, in the matter following line 18, strike "Sec. 4981." and insert "Sec. 4981A.".

( ) On page 429, the 9th line, strike "(E)" and insert "(D)".

( ) On page 448, immediately before part II (relating to other provisions), insert:

(6) CERTAIN PLANS MAINTAINED BY EDUCATIONAL INSTITUTIONS.—If an educational organization described in section 170(b)(1)(A)(ii) of the Internal Revenue Code of 1986 makes an election under this paragraph with respect to a plan described in section 125(c)(2)(C) of such Code, the amendments made by this section shall apply with respect to such plan for plan years beginning after the date of the enactment of this Act.

( ) On page 451, in section 134(b)(1) of the Internal Revenue Code of 1986, as added by section 1168(a) of the Act, insert "(other than personal use of a vehicle)" after "in-kind benefit".

( ) On page 453, in paragraph (1) of section 2057(b) (relating to qualified sale), strike "is".

( ) On page 455, in subclause (II) of paragraph (2)(B)(i) (relating to effective date for subsection (b)), strike "July 18" and insert "May 23".

( ) On page 463, in clause (ii) of subparagraph (I) (relating to transitional rule), strike "1986" and insert "1987".

( ) On page 484, immediately above subsection (d) (relating to effective dates), insert the following new subparagraph:

(D) Paragraph (1) of section 2105(b) (relating to bank deposits and certain other debt obligations) is amended by striking out "section 861(c), if any interest thereon would be treated by reason of section 861(a)(1)(A) as income from sources without the United States" and inserting in lieu thereof "section 871(i)(3), if any interest thereon would not be subject to tax by reason of section 871(i)(2)".

( ) On page 488, in subparagraph (C) (relating to special rule), strike "to interest expenses paid or accrued".

( ) On page 511, in paragraph (2) of subsection (e) (relating to certain basis, etc. rules made applicable), strike "who was not" and insert "who was".

( ) On page 517, in the matter added by subsection (b) (relating to coordination of section 1246 with section 1248), strike "section 1248(g)(3)" and insert "section 1248(g)(2)".

( ) On page 543, immediately before part III (relating to cover over of income taxes), insert the following new paragraph:

(9) Section 1444 is amended by striking out "(as modified by section 934A)".

( ) On page 546, insert immediately after subsection (e) the following new subsection:

(f) EXEMPTION FROM WITHHOLDING.—Notwithstanding subsections (b) and (c), the modification of section 884 of the Internal Revenue Code of 1986 by reason of the amendment to section 881 of such Code by section 1273(b)(1) of this Act shall apply to taxable years beginning after December 31, 1986.

( ) On page 606, in paragraph (2) of subsection (b) (relating to section 1301(f)), insert "with respect to non-issued bond amounts elected" after "issued".

( ) On page 610, immediately after subparagraph (F), insert the following new subparagraph:

(G) Except as provided in the last sentence of subsection (c)(2) of this section, the requirements of section 145(b) (relating to $150,000,000 limitation on bonds other than hospital bonds).

( ) On page 615, in line 8, insert "and as having a carryforward purpose described in section 146(f)(5) of such Code," immediately before "but".

( ) On page 653, in clause (ii) of paragraph (33)(A) (relating to application of $150,000,000 limitation for certain qualified 501(c)(3) bonds)—

(A) strike "on" in subclause (II) thereof and insert "dated", and

(B) insert "dated on December 1, 1985" after "(Series 1985 A and 1985 B)" in subclause (III) thereof.

( ) On page 656, the last line, strike "$80,000,000" and insert "$400,000,000".

( ) On page 658, in the second item in the table in paragraph (44) (relating to New Mexico Hospital pool bonds), strike "Bonds Pool" and insert "Equipment Loan Council".

( ) On page 662, strike the end quotation marks at the end of section 673 (relating to reversionary interests).

( ) On page 662, immediately before section 1402(b) (relating to conforming amendments), insert:

"(c) SPECIAL RULE FOR DETERMINING VALUE OF REVERSIONARY INTEREST.—For purposes of subsection (a), the value of the grantor's reversionary interest shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of the grantor."

( ) On page 682, the fifth line, insert "(or revocable trust)" after "will".

( ) On pages 723 and 724, strike section 1608 and conform the table of contents.

( ) On page 744, in the matter inserted by subparagraph (G)—

(A) strike "Registry of Deeds" each place it appears and insert "Register of Deed", and

(B) strike "May 7, 1985" and insert "May 7, 1984".

( ) On page 758, in paragraph (9)(B), strike "1986" and insert "1954".

On page 784, sixth line from the bottom, strike "1985" and insert "1986".

( ) On page 833, in clause (i) of subparagraph (B) (relating to operating corporation), strike "placement period" and insert "replacement period".

( ) On page 886, strike paragraph (8) (the first 31 lines).

( ) On page 910, the 13th line, strike "401(a)(11)" and insert "205".

( ) On page 910, in subparagraph (B) of paragraph (7) (relating to clarification of nonforfeitable accrued benefit), strike "Subparagraph (C) of section 205(b)(1)" and insert "Clause (i) of section 205(b)(1)(C)".

( ) On page 911, in clause (i) of subparagraph (B) of paragraph (9) (relating to amendments of ERISA), strike "nonforfeitable accrued benefit" and insert "nonforfeitable right (within the meaning of section 203)".

( ) On page 917, the 10th line, strike "means earlier of" and insert "means the earlier of".

( ) On page 917, the 12th line, strike "in".

( ) On page 917, the 14th line, strike "in".

( ) On page 918, the 7th line, strike "section 203" and insert "section 203(e)".

COAST GUARD AUTHORIZATION

STEVENS AMENDMENT NOS. 3468 AND 3469

Mr. SIMPSON (for Mr. STEVENS) proposed two amendments to the bill (H.R. 4208) to authorize appropriations for the Coast Guard for fiscal year 1987, and for other purposes.

AMENDMENT No. 3468

Strike subsection (d) of section 5, and redesignate subsection (e) of section 5 as subsection (d).

AMENDMENT No. 3469

On page 31, line 5, strike "2102(11b)" and insert in lieu thereof "2101(11b)".

WALLOP AMENDMENT NO. 3270

Mr. SIMPSON (for Mr. WALLOP) proposed an amendment to the bill H.R. 4208, supra, as follows:

Strike Section 7 and insert in lieu thereof the following:

SEC. 7. (a) Section 9503(c)(4) of title 26, United States Code, is amended—

(1) in subparagraph (A), by striking "45,000,000" each place it appears and inserting in lieu thereof "60,000,000" for Fiscal Year 1987 only and $45,000,000 for each Fiscal Year thereafter;" and (2) by adding at the end thereof the following:

"(E) DETERMINATION.—The amount of payments made under this paragraph after October 1, 1986 shall be determined by the Secretary in accordance with the methodology described in the Treasury Department's Report to Congress of June 1986 entitled 'Gasoline Excise Tax Revenues Attributable to Fuel Used in Recreational Motorboats.' Further, a portion of the payments made by the Secretary from Fiscal Year 1987 motorfuel excise tax receipts shall be used to increase the funding for boating safety programs during Fiscal Year 1987 only."

(b) Section 13106(c) of Title 46, United States Code, is amended by striking "one-third" and inserting in lieu thereof "one-half for Fiscal Year 1987 and one-third for each Fiscal Year thereafter."

(c) Section 13106(a) of title 46, United States Code, is amended by striking "two-thirds" and inserting in lieu thereof "one-half for Fiscal Year 1987 and two-thirds for each Fiscal Year thereafter."

"(d) Before making any allocation under this section for a fiscal year, the Secretary shall retain not less than one percent nor more than two percent of the amount appropriated for that year for State recreational boating safety programs for the payment of costs of administration of this chapter."

PUBLIC DOMAIN LANDS FOR THE PUEBLO OF ZIA

BINGAMAN (AND DOMENICI) AMENDMENT NO. 3471

Mr. SIMPSON (for Mr. BINGAMAN and Mr. DOMENICI) proposed an amendment to the bill (H.R. 5167) to declare that the United States holds certain public domain lands in trust for the Pueblo of Zia as follows:

1. On page 1, line 10, strike "situated within Sandolval County, New Mexico, which is under the jurisdiction of the Bureau of Land Management of the Department of the Interior," and insert in lieu thereof "under the jurisdiction of the Bureau of Land Management of the Department of the Interior situated within Sandoval County, New Mexico,".

2. On page 4, strike lines 8 through 16 and insert in lieu thereof:

"(2) Plains Electric Generation and Transmission Cooperative, Inc. and its successors and assigns, shall be permitted to renew the right-of-way described in paragraph (1) under rules and regulations of the Secretary to the same extent and in the same manner that such permit could have been renewed if this Act had not been enacted.".

3. On page 5, line 8, strike the word "subsisting" and insert in lieu thereof "existing".

4. On pages 5 and 6, strike paragraph (2) and insert in lieu thereof:

"(2) Subject to valid existing rights, the leases described in subsection 4(d)(1) shall be administered under rules and regulations of the Secretary to the same extent and in the same manner that such leases would be administered if this Act has not been enacted.".

TRANSFER OF ROBERT F. KENNEDY MEMORIAL STADIUM

McCLURE AMENDMENT NO. 3472

Mr. SIMPSON (for Mr. MCCLURE) proposed an amendment to the bill (H.R. 2776) to amend the District of Columbia Stadium Act of 1957 to

direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia; as follows:

On page 2, beginning with line 7, strike out all through line 16 on page 4 and insert in lieu thereof the following:

"(b)(1) Not later than 180 days after the date of enactment of this subsection, the Secretary of the Interior shall—

"(A) convey without consideration to the government of the District of Columbia all right, title, and interest of the United States in and to the building comprising the stadium constructed under this Act; and

"(B) lease without consideration to the government of the District of Columbia—

"(i) the ground under; and

"(ii) the parking facilities associated with the stadium constructed under this Act.

"(2) The lease authorized by paragraph (1)(B) shall be for a period of 50 years.

"(c) The conveyance and lease of real property under subsection (b) shall be subject to such terms and conditions (which shall be set forth in the instrument of conveyance) as will ensure that title to the property shall not be transferred by the District to any person or entity other than the United States or any political subdivision or agency of the District of Columbia or the United States and that the property will be used only for—

"(1) stadium purposes;

"(2) providing recreational facilities, open space, or public outdoor recreation opportunities;

"(3) such other public purposes for which the property was used prior to June 1, 1985; and

"(4) such other public purposes for which the property was approved for use by the Secretary with the concurrence of the National Capital Planning Commission prior to June 1, 1985.

"(d)(1) The instrument of conveyance and the lease referred to in subsection (c) shall provide that all right, title, and interest conveyed to the District of Columbia pursuant to such instrument of conveyance shall revert to the United States and the lease shall terminate if—

"(A) the terms and conditions referred to in subsection (c) have not been complied with, as determined by the Secretary, and

"(B) such noncompliance has not been corrected within ninety days after written notice of such noncompliance has been received by the Mayor of the District of Columbia.

Such noncompliance shall be treated as corrected if the District of Columbia and the Secretary enter into an agreement, with the concurrence of the National Capital Planning Commission, which the Secretary considers adequate to ensure that the property will be used in a manner consistent with the purposes referred to in subsection (c).

"(2) No person may bring an action respecting a violation of any term or condition referred to in subsection (c) before the expiration of ninety days after the date on which such person has notified the Mayor of the District of Columbia of the alleged violation. The notice shall include notice of such person's intention to bring an action to declare a reversion and termination of the lease under paragraph (1) of this subsection.

"(3) The conveyance of real property under subsection (b) shall be made subject to the condition that the District of Columbia shall bear the cost of removing structures or rehabilitating the land or stadium should the stadium revert to the United States pursuant to this subsection.

"(4) Any property which reverts to the Secretary under this subsection shall be administered by the Secretary as part of the Park System of the Nation's Capital in accordance with the provisions of the Act of August 25, 1916 (16 U.S.C. 1, 2-4), and other provisions of law generally applicable to units of the national park system.".

SEC. 2. TECHNICAL AMENDMENT.

Section 11 of the District of Columbia Stadium Act of 1957 (D.C. Code, sec. 2-330) is amended by inserting "(including any area designated A, B, C, D, or E on the revised map entitled 'Map to Designate Transfer of Stadium and Lease of Parking Lots to the District', prepared jointly by the National Park Service (National Capital Region) and the District of Columbia Department of Public Works for site development and dated October 1986 (NPS drawing number 831/87284-A))," after "property of any kind".

HEALTH STATUS IMPROVEMENTS FOR NATIVE HAWAIIANS

INOUYE (AND MATSUNAGA) AMENDMENT NO. 3473

Mr. BYRD (for Mr. INOUYE and Mr. MATSUNAGA) proposed an amendment to the bill (S. 2243) to improve the health status of Native Hawaiians, and for other purposes, as follows:

At the appropriate place in the committee amendment, insert the following:

PACIFIC BASIN DISEASE RESEARCH INSTITUTE

SEC. . (a) The Secretary shall make a grant under section 720(a)(1) of the Public Health Service Act to the University of Hawaii in Honolulu, Hawaii, for the construction of a building for a Pacific Basin disease research institute. Notwithstanding sections 702(b) and 721(c) of such Act, the Secretary is not required to secure the advice of the National Advisory Council on Health Professions Education with respect to such grant.

(b) The Federal share of the necessary costs of construction, as determined by the Secretary, of the building described in subsection (a), shall be 50 percent.

(c) To carry out this section, there are authorized to be appropriated $5,000,000. Amounts appropriated under this section shall remain available until expended.

BICENTENNIAL COMMEMORATIVE COINS

GARN AMENDMENT NO. 3474

Mr. SIMPSON (for Mr. GARN) proposed an amendment to the bill (H.R. 3415) to authorize the minting of coins in commemoration of the bicentennial of the United States Constitution, as follows:

On page 4, line 22, strike out "December 31, 1987" and insert in lieu thereof "June 30, 1988."

At the end of the bill, add the following new section:

No provision of law governing procurement or public contracts shall be applicable to the procurement of goods or services necessary for carrying out the provisions of this title. Nothing in this section shall relieve any person entering into a contract under the authority of this title from complying with any law relating to equal employment opportunity.

ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT

MURKOWSKI AMENDMENT NO. 3475

Mr. SIMPSON (for Mr. MURKOWSKI) proposed an amendment to the bill (S. 485) to amend the Alaska National Interest Lands Conservation Act of 1980 to clarify the treatment of submerged lands and ownerhip by the Alaskan Native Corporation, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That subsection (a) of section 901 of the Alaska National Interest Lands Conservation Act (Public Law 96-487), as amended, is hereby amended by striking out the word "six years after the date of execution" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "eight years after the date of execution", and by striking the words "seven years after the date of enactment" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "nine years after the date of enactment".

CONTINUING APPROPRIATIONS, FISCAL YEAR 1987

ABDNOR AMENDMENT NO. 3476

Mr. ABDNOR (for himself and Mr. DECONCINI) proposed an amendment to the amendment of the House to the amendment of the Senate numbered 59 (in disagreement) to the joint resolution (H.J. Res. 738) making continuing appropriations for the fiscal year 1987, and for other purposes as follows:

In lieu of the matter proposed by said amendment, insert the following:

SEC. 115. GENERAL SERVICES ADMINISTRATION.

FEDERAL BUILDINGS FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

The revenues and collections deposited into the Fund established pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f), shall be available for necessary expenses of real property management and related activities not otherwise provided for, including operation, maintenance, and protection of federally owned and leased buildings; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation and transfer of space; contractual services incident to cleaning or servicing buildings and moving; repair and alteration of federally owned buildings, including grounds, approaches and appurtenances; care and safeguarding of sites; maintenance, preservation, demolition, and equipment; acquisition

of buildings and sites by purchase, condemnation, or as otherwise authorized by law; conversion and extension of federally owned buildings; preliminary planning and design of projects by contract or otherwise; construction of new buildings (including equipment for such buildings); and payment of principal, interest, taxes, and any other obligations for public buildings acquired by purchase contract, in the aggregate amount of $2,279.862,000 of which (1) not to exceed $120,672,000 shall remain available until expended for construction of additional projects as authorized by law at locations and at maximum construction improvement costs (including funds for sites and expenses) as follows:

New Construction:

New Mexico:

Columbus, Border Station, $2,680,000

Pennsylvania:

Wilkes-Barre, Federal Building (Social Security Administration),$20,672,000

South Carolina:

Columbia, Federal Building, Courthouse, Claim, $1,057,000

Construction Projects, less than $500,000, $1,000,000: Purchase:

New York:

Wellesley Island, Border Station, $1,925,000

Other Selected Purchases, including options to purchase, $93,338,000: *Provided*, That each of the immediately foregoing limits of costs on new construction projects may be exceeded to the extent that savings are effected in other such projects, but by not to exceed 10 per centum: *Provided further*, That all funds for direct construction projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date: *Provided further*, That claims against the Government of less than $50,000 arising from direct construction projects, acquisitions of buildings and purchase contract projects pursuant to Public Law 92-313, be liquidated with prior notification to the Committees on Appropriations of the House and Senate to the extent savings are effected in other such projects; (2) not to exceed $180,166,000, which shall remain available until expended, for repairs and alterations: *Provided further*, That funds in the Federal Buildings Fund for Repairs and Alterations shall, for prospectus projects, be limited to the amount by project as follows, except each project may be increased by an amount not to exceed 10 per centum unless advance approval is obtained from the Committees on Appropriations of the House and Senate for a greater amount:

Repairs and Alterations:

District of Columbia:

Federal Building #6, $1,213,000

Federal Building #8, $1,886,500

Federal Building #9, $1,712,500

Federal Building #10A, $1,121,000

General Accounting Office, $3,552,000

Justice, $599,000

State, $2,765,000

Steam Distribution System, $8,796,000

Missouri:

St. Louis, Federal Building (Mart), Phase I, $20,000,000

Kansas City, 601 E. 12th, $997,000

Kansas City, 1500 Bannister, $2,560,000

St. Louis, 4300 Goodfellow, $2,176,000

Minor Repairs and Alterations, $141,584,000:

Provided further, That additional projects for which prospectuses have been fully approved may be funded under this category only if advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further*, That all funds for repairs and alterations prospectus projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date; (3) not to exceed $131,442,000 for payment on purchase contracts entered into prior to July 1, 1975; (4) not to exceed $985,000,000 for rental of space; (5) not to exceed $753,219,000 for real property operations; (6) not to exceed $57,090,000 for program direction and centralized services; and (7) not to exceed $52,273,000 for design and construction services which shall remain available until expended: *Provided further*, That for the purposes of this authorization, buildings constructed pursuant to the Public Buildings Purchase Contract Act of 1954 (40 U.S.C. 356), the Public Buildings Amendments of 1972 (40 U.S.C. 490), and buildings under the control of another department or agency where alterations of such buildings are required in connection with the moving of such other department or agency from buildings then, or thereafter to be, under the control of the General Services Administration shall be considered to be federally owned buildings: *Provided further*, That none of the funds available to the General Services Administration shall be available for expenses in connection with any construction, repair, alteration, and acquisition project for which a prospectus, if required by the Public Buildings Act of 1959, as amended, has not been approved, except that necessary funds may be expended for each project for required expenses in connection with the development of a proposed prospectus: *Provided further*, That funds available in the Federal Buildings Fund may be expended for emergency repairs when advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further*, That amounts necessary to provide reimbursable special services to other agencies under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)(6)) and amounts to provide such reimbursable fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control as may be appropriate to enable the United States Secret Service to perform its protective functions pursuant to 18 U.S.C. 3056 as amended, shall be available from such revenues and collections: *Provided further*, That revenues and collections and any other sums accruing to this fund during fiscal year 1987 excluding reimbursements under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(f)(6)) in excess of $2,279,862,000, shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts: *Provided further*, That not withstanding this or any other provision of this Act, Section 623 of the Treasury, Postal Service, and General Government Appropriations Act as contained in this Act shall apply only to the rural electrification program in the State of Alaska.

GOLDWATER AMENDMENT NO. 3477

Mr. GOLDWATER proposed an amendment to amendment No. 3476 proposed by Mr. ABDNOR to the amendment of the House to the amendment of the Senate numbered 59 (in disagreement) to the joint resolution (H.J. Res. 738), supra, as follows:

At the end of the amendment add the following:

Notwithstanding any other provision in this or any other Act, none of the funds appropriated by this or any other Act shall be available for the procurement of T-46 trainer aircraft. No funds appropriated to or for the use of the Department of Defense for fiscal year 1986 may be obligated or expended for the procurement of T-46 trainer aircraft until the Secretary of the Air Force has complied with all requirements relating to the T-46 aircraft contained in section 202(e) of the Department of Defense Authorization Act, 1987.

MASAU TRAIL ACT

DOMENICI (AND BINGAMAN) AMENDMENT NO. 3478

(Ordered referred to the Committee on Energy and Natural Resources.)

Mr. DOMENICI (for himself and Mr. BINGAMAN) submitted an amendment intended to be proposed by them to the bill (S. 2932 to establish the Malpais National Monument, the Masau Trail, and the Grants National Conservation Area in the State of New Mexico, and for other purposes, as follows:

At the end of the bill, insert the following:

TITLE VII—WATER RIGHTS

SEC. 701. Nothing in this Act shall be construed to a new express or implied reservation to the United States of any water or water-related right with respect to the lands described in this Act. No provision of this Act shall be construed as authorizing the appropriation of water, except in accordance with the substantive and procedural law of the State of New Mexico.

CONTINUING APPROPRIATIONS, FISCAL YEAR 1987

METZENBAUM (AND BUMPERS) ADMENDMENT NO. 3479

Mr. METZENBAUM (for himself and Mr. BUMPERS) proposed an amendment to amendment No. 3476 proposed by Mr. ABDNOR to the amendment of the House to the amendment of the Senate numbered 59 (in disagreement) to the joint resolution (H.J. Res. 738), supra, as follows:

Add at the end of the pending amendment:

SECTION 1. PATTERN OF ILLICIT ACTIVITY.

(a) CHAPTER 96 HEADING.—The heading for chapter 96 of title 18, United States Code, is amended by striking out "RACKETEER, INFLUENCED AND CORRUPT ORGANIZATIONS" and inserting in lieu thereof "PATTERN OF ILLICIT ACTIVITY".

(b) SECTION 1961.—Section 1961 of title 18, United States Code, is amended—

(1) in paragraph (1), by striking out "racketeering" the first place it appears and inserting "illicit" in lieu thereof;

(2) in paragraph (5), by striking out "racketeering" each place it appears and inserting "illicit" in lieu thereof

(3) in paragraph (7), by striking out "racketeering" each place it appears and inserting "criminal" in lieu thereof; and

(4) in paragraph (8)—

(A) by striking out "racketeering" the first place it appears and inserting "illicit activity" in lieu thereof; and

(B) by striking out "racketeering" the second place it appears and inserting "criminal" in lieu thereof.

(c) SECTION 1962.—Section 1962 of title 18, United States Code, is amended by striking out "racketeering" each place it appears and inserting "illicit" in lieu thereof.

(d) SECTION 1963.—Paragraph (3) of section 1963(a) of title 18, United States Code, is amended by striking out "racketeering" and inserting "illicit" in lieu thereof.

(e) SECTION 1968.—Section 1968 of title 18, United States Code, is amended—

(1) in subsection (a), by striking out "a racketeering investigation" and inserting "an illicit activity investigation" in lieu thereof;

(2) in subsection (b), by striking out "racketeering" each place it appears and inserting "illicit activity" in lieu thereof;

(3) in subsection (c), by striking out "racketeering" each place it appears and inserting "illicit activity" in lieu thereof; and

(4) in subsection (f)—

(A) by striking out "racketeering" the first, second, and fifth places it appears and inserting "criminal" in lieu thereof;

(B) by striking out "racketeering" each other place it appears and inserting "illicit activity" in lieu thereof; and

(C) by striking out "racketeer" and inserting "illict activity" in lieu thereof.

* * * * *

Subsection (c) of section 1964 of title 18, United States Code, is amended to read as follows:

"(c)(1)(A) A governmental entity whose business or property is injured by conduct in violation of section 1962 of this title may bring, in any appropriate United States district court, a civil action against the person who engaged in such conduct to recover threefold the actual damages that the governmental entity sustained by reason of such injury, and the costs of the civil action, including a reasonable attorney's fee.

"(B) A civil action under subparagraph (A) of this paragraph must be brought by—

"(i) the Attorney General, if the injury is to the business or property of a governmental entity of the United States;

"(ii) the chief legal officer of the State, if the injury is to the business or property of a governmental entity of the State; or

"(iii) the chief legal officer of a subdivision of a State, if the injury is to the business or property of the subdivision and if such officer is specifically authorized by statute of the State to bring actions under this subsection.

"(2) A person, other than a governmental entity, whose business or property is injury by conduct in violation of section 1962 of this title may bring, in any appropriate United States district court, a civil action against the person who engaged in the conduct and shall recover—

"(A) threefold the actual damages that such person whose property or business is injured sustained by reason of such injury, and the costs of the civil action, including a reasonable attorney's fee, if the person who engaged in the conduct was, with respect to such conduct, convicted of an illicit activity or of a violation of section 1962 of this title; or

"(B)(i) the actual damages that such person whose property or business is injured sustained by reason of such injury, and the costs of the civil action including a reasonable attorney's fee, and

"(ii) punitive damages of up to twice the actual damages if—

"(I) the person whose business or property is injured is a natural person and the injury occurred in connection with a purchase or lease, for personal or household use or investment, of a product, services, investment, or other property; or a contract for personal or household use or investment;

"(II) neither State nor Federal securities laws make available an express or implied remedy for the type of behavior on which the claim of the plaintiff is based; and

"(III) the defendant acted in wanton disregard of plaintiff's rights (but conduct of the defendant in good faith and in reliance upon a directly applicable regulatory action, approval, or interpretation of law by an authorized State agency is not in wanton disregard of plaintiff's rights for the purposes of this subclause).

* * * * *

"(I) the degree of culpability of the defendant;

"(II) the vulnerability of the victim;

"(III) any history of similar conduct by the defendant;

"(IV) the benefits derived from the unlawful conduct by the defendant;

"(V) the number of persons victimized;

"(VI) any prior decision by a court or State or Federal agency as to whether the defendant violated applicable law or acted in bad faith; and

"(VII) any other factor the court deems to be an equitable consideration bearing on the appropriate amount of punitive damages.

"(4) For a civil action under paragraph (2) of this subsection seeking damages under subparagraph (B) of such paragraph (2), the term "pattern of illicit activity" requires at least two acts of illicit activity—

"(A) one of which occurred not more than five years after the prior act of illicit activity;

"(B) that are not so closely related in time and place that together the acts constitute a single episode; and

"(C) (for actions based on a violation of section 1962(c) of this title) each of which is related to the affairs of the enterprise.

"(5)(A) A civil action under this subsection may not be commenced after the latest of—

"(i) three years after the date the cause of action accrues;

"(ii) three years after the conduct causing injury to the plaintiff terminates; or

"(iii) two years after the date of the criminal conviction required for an action under paragraph (2)(A) of this subsection.

"(B) The period of limitation provided in subparagraph (A) of this paragraph on a cause of action does not run during the pendency of a government civil action or criminal case relating to the conduct upon which such cause of action is based.

"(6) As used in this subsection, the term 'governmental entity' means the United States or a State, and includes any department, agency, or government corporation of the United States or a State, any political subdivision of a State, and any enterprise for which a trustee has been appointed by a United States district court under section 1964(a) of this title (but only during the tenure of such trustee).

"(7) The court shall award a reasonable attorney's fee to a prevailing plaintiff in a cause of action under paragraph (2)(B) of this subsection."

SEC. 3. FEDERAL RULES OF CIVIL PROCEDURES AMENDMENTS.

Rule 9(b) of the Federal Rules of Civil Procedure is amended—

(1) in the caption, by inserting ", and Suits under 18 U.S.C. 1904(c)" after "Mind"; and

(2) by inserting after the first sentence the following: "In an action under 18 U.S.C. 1964(c), facts supporting the claim against each defendant shall be averted with particularity.".

SEC. 4. EFFECTIVE DATE.

(a) GENERAL RULE.—The amendments made by this Act shall apply to any civil action commenced after the date of enactment.

(b) EXCEPTION.—In any pending action under section 1964(c) of title 18, United States Code, in which a person would be eligible to recover only under paragraph (2)(B)(ii) of section 1964(c) as amended by this Act, if this Act had been enacted before the commencement of that action, the recovery of that person shall be limited to the recovery provided under such paragraph (2)(B)(ii), unless in the pending action—

(1) there has been a jury verdict or district court judgment, establishing the defendant's liability, or settlement has occurred; or

(2) the court determines that, in light of all the circumstances, such limitation of recovery would be clearly unjust.

MELCHER (AND OTHERS) AMENDMENT NO. 3480

Mr. MELCHER (for himself and Mr. BURDICK) proposed an amendment to amendment No. 3476 proposed by Mr. ABDNOR to the amendment of the House to the amendment of the Senate numbered 59 (in disagreement) to the joint resolution (H.J. Res. 738), supra as follows:

At the end of the amendment, insert the following new section:

"SEC. . Notwithstanding any other provisions of this Act, in addition to any sales required under any other Act, the Secretary of Agriculture, under such terms as the Secretary may prescribe, shall sell notes and other obligations held in the Rural Development Insurance Fund established under section 309A of the Consolidated Farm and Rural Development Act in such amounts as to realize net proceeds to the Government of not less than $50,000,000, and funds for necessary expenses to carry out Temporary Emergency Food Assistance Act of 1983, as amended, shall be $100,000,000.".

MEMORIAL TO WOMEN WHO HAVE SERVED IN THE ARMED SERVICES

McCLURE AMENDMENT NO. 3481

Mr. SIMPSON (for Mr. McCLURE) proposed an amendment to the joint resolution (H.J. Res. 36) authorizing establishment of a memorial to honor women who have served in or with the

Armed Forces of the United States, as follows:

On page 2, line 22, of H.J. Res. 36 as reported by the Committee on Energy and Natural Resources, strike "There is hereby authorized to be established on Federal land in the District of Columbia and its environs, by any organization or organizations approved by the Secretary of the Interior, a memorial" and insert in lieu thereof "The Women in Military Service for America Memorial Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs".

On page 3, line 2, of H.J. Res. 36 as reported by the Committee on Energy and Natural Resources, strike "Senate on September 10, 1986 (S. Rept. 99-421)" and insert in lieu thereof "House of Representatives on September 29, 1986".

On page 3, line 5 of H.J. Res. 36, as reported by the Committee on Energy and Natural Resources, strike "The organization or organizations approved by the Secretary" and insert in lieu thereof "The Women in Military Service for America Memorial Foundation".

MEMORIAL TO BLACK HEROES OF THE AMERICAN REVOLUTION

McCLURE AMENDMENT NO. 3482

Mr. SIMPSON (for Mr. McCLURE) proposed an amendment to the joint resolution (H.J. Res. 142) authorizing establishment of a memorial to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom; as follows:

On page 3, line 14, strike all after "the" and insert "House of Representatives on September 29, 1986".

DECLARATION OF TAKING ACT

DURENBERGER (AND OTHERS) AMENDMENT NO. 3483

Mr. SIMPSON (for Mr. DURENBERGER, Mr. BOSCHWITZ, and Mr. THURMOND) proposed an amendment to the bill (S. 2424) to amend the interest provisions of the Declaration of Taking Act as follows:

At the end of the bill add the following:

SEC. 2. (a) Notwithstanding any other provision of chapter 11 of title 11, United States Code, the bankruptcy trustee in each case described in subsection (b) shall pay benefits until May 15, 1987, to retired former employees under a plan, fund, or program maintained or established by the debtor in such case prior to filing a petition (through the purchase of insurance or otherwise) for the purpose of providing medical, surgical, or hospital care benefits, or benefits in the event of sickness, accident, disability, or death.

(b) This section is effective with respect to—

(1) cases commenced under chapter 11 of title 11, United States Code, in which a plan for reorganization has not been confirmed by the court and in which any such benefit is still being paid on October 2, 1986;

(2) in cases under which an order for relief is entered under chapter 11 of title 11, United States Code, after October 2, 1986, while such case is a case under chapter 11; or

(3) in cases under title 11, United States Code, involving a partnership which was in existence prior to July 17, 1986, and was the subject of a petition under chapter 11 of title 11, United States Code, upon which an order for relief was entered by a bankruptcy court on August 7, 1986, and where one of the partners received bankruptcy court authorization on August 6, 1986, approving rejection of a partnership agreement.

(c) If any provision of this section or the application thereof to any person of circumstance is held invalid, the provisions of every other part of this section and the first section shall not be affected thereby.

On page 3, line 14, of H.J. Res. 142 as reported by the Committee on Energy and Natural Resources, strike "Senate on September 10, 1986 (S. Rept. 99-421)" and insert in lieu thereof "House of Representatives on September 29, 1986".

AGE DISCRIMINATION IN EMPLOYMENT ACT

HEINZ (AND OTHERS) AMENDMENT NO. 3484

Mr. SIMPSON (for Mr. HEINZ, Mr. METZENBAUM, Mr. FORD, Mr. BRADLEY, Mr. KENNEDY, Mr. GRASSLEY, Mrs. HAWKINS, and Mr. COHEN) proposed an amendment to the bill (H.R. 4154) to amend the Age Discrimination in Employment Act of 1967 to remove the maximum age limitation applicable to employees who are protected under such Act, and for other purposes, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Age Discrimination in Employment Amendments of 1986".

SEC. 2. AMENDMENTS RELATING TO MAXIMUM AGE.

(a) COVERAGE UNDER GROUP HEALTH PLANS.—Subsection (g)(1) of section 4 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623(g)(1)), as added by section 116(a) of the Tax Equity and Fiscal Responsibility Act of 1982, is amended by striking out "through 69" each place it appears and inserting in lieu thereof "or older".

(b) TECHNICAL AMENDMENT.—Subsection (g) of section 4 of the Age Discrimination in Employment Act of 1967, as added by section 802(b)(2) of the Older Americans Act Amendments of 1984, is amended by striking out "(g)(1)" in inserting in lieu thereof "(h)(1)".

(c) REMOVAL OF MAXIMUM AGE LIMITATION.—Section 12 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631) is amended—

(1) in subsection (a) by striking out "but less than seventy years of age", and

(2) in subsection (c)(1) by striking out "but not seventy years of age,".

SEC. 3. EMPLOYMENT AS FIREFIGHTER OR LAW ENFORCEMENT OFFICER.

(a) GENERAL RULE.—Section 4 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623) is amended by adding at the end thereof the following new subsection:

"(i) It shall not be unlawful for an employer which is a State, a political subdivision of a State, an agency or instrumentality of a State or a political subdivision of a State, or an interstate agency to fail or refuse to hire or to discharge any individual because of such individual's age if such action is taken—

"(1) with respect to the employment of an individual as a firefighter or as a law enforcement officer and the individual has attained the age of hiring or retirement in effect under applicable State or local law on March 3, 1983, and

"(2) pursuant to a bona fide hiring or retirement plan that is not a subterfuge to evade the purposes of this Act.".

(b) TERMINATION PROVISION.—The amendment made by subsection (a) of this section is repealed December 31, 1993.

SEC. 4. DEFINITIONS.

Section 11 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 630) is amended by adding at the end thereof the following new subsections:

"(j) The term 'firefighter' means an employee, the duties of whose position are primarily to perform work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment, including an employee engaged in this activity who is transferred to a supervisory or administrative position.

"(k) The term 'law enforcement officer' means an employee, the duties of whose position are primarily the investigation, apprehension, or detention of individuals suspected or convicted of offenses against the criminal laws of a State, including an employee engaged in this activity who is transferred to a supervisory or administrative position. For the purpose of this subsection, 'detention' includes the duties of employees assigned to guard individuals incarcerated in any penal institution.".

SEC. 5. STUDY AND PROPOSED GUIDELINES RELATING TO POLICE OFFICERS AND FIREFIGHTERS

(a) STUDY.—Not later than 4 years after the date of enactment of this Act, the Secretary of Labor and the Equal Employment Opportunity Commission, jointly, shall—

(1) conduct a study—

(A) to determine whether physical and mental fitness tests are valid measurements of the ability and competency of police officers and firefighters to perform the requirements of their jobs,

(B) if such tests are found to be valid measurements of such ability and competency, to determine which particular types of tests most effectively measure such ability and competency, and

(C) to develop recommendations with respect to specific standards that such tests, and the administration of such tests should satisfy, and

(2) submit a report to the Speaker of the House of Representatives and the President pro tempore of the Senate that includes—

(A) a description of the results of such study, and

(B) a statement of the recommendations developed under paragraph (1)(C).

(b) Consultation Requirement.— The Secretary of Labor and the Equal Employment

Opportunity Commission shall, during the conduct of the study required under subsection (a) and prior to the development of recommendations under paragraph (1)(C), consult with the United States Fire Administration, the Federal Emergency Management Agency, organizations representing law enforcement officers, firefighters, and their employers, and organizations representing older Americans.

(c) Proposed Guidelines.—Not later than 5 years after the date of the enactment of this Act, the Equal Employment Opportunity Commission shall propose, in accordance with subchapter II of chapter 5 of title 5 of the United States Code, guidelines for the administration and use of physical and mental fitness tests to measure the ability and competency of police officers and firefighters to perform the requirements of their jobs.

SEC. 6. SPECIAL RULE AND TENURED FACULTY.

(a) Special Rule.—Section 12 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631) is amended by adding at the end thereof the following new subsection:

"(d) Nothing in this Act shall be construed to prohibit compulsory retirement of any employee who has attained 70 years of age, and who is serving under a contract of unlimited tenure (or similar arrangement providing for unlimited tenure) at an institution of higher education (as defined by section 1201(a) of the Higher Education Act of 1965).".

(b) TERMINATION PROVISION.—The amendment made by subsection (a) of this section is repealed December 31, 1993.

(c) STUDY REQUIRED.—(1) The Equal Employment Opportunity Commission shall, not later than 12 months after the date of enactment of this Act, enter into an agreement with the National Academy of Sciences for the conduct of a study to analyze the potential consequences of the elimination of mandatory retirement on institutions of higher education.

(2) The study required by paragraph (1) of this subsection shall be conducted under the general supervision of the National Academy of Sciences by a study panel composed of 9 members. The study panel shall consist of—

(A) 4 members who shall be administrators at institutions of higher education selected by the National Academy of Sciences after Consultation with the American Council of Education, the Association of American Universities, and the National Association of State Universities and Land Grant Colleges;

(B) 4 members who shall be teachers or retired teachers at institutions of higher education (who do not serve in an administrative capacity at such institutions), selected by the National Academy of Sciences after consultation with the American Federation of Teachers, the National Education Association, the American Association of University Professors, and the American Association of Retired Persons; and

(C) one member selected by the National Academy of Sciences.

(3) The results of the study shall be reported, with recommendations, to the President and to the Congress not later than 5 years after the date of enactment of this Act.

(4) The expenses of the study required by this subsection shall be paid from funds available to the Equal Employment Opportunity Commission.

SEC. 7. EFFECTIVE DATE; APPLICATION OF AMENDMENTS.

(a) IN GENERAL.—Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on January 1, 1987, except that with respect to any employee who is subject to a collective-bargaining agreement—

(1) which is in effect on June 30, 1986,

(2) which terminates after January 1, 1987,

(3) any provision of which was entered into by a labor organization (as defined by section 6(d)(4) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206(d)(4)), and

(4) which contains any provision that would be superseded by such amendments, but for the operation of this section,

such amendments shall not apply until the termination of such collective bargaining agreement or January 1, 1990, whichever occurs first.

(b) Effect on Existing Causes of Action.—The amendments made by sections 3 and 4 of this Act shall not apply with respect to any cause of action arising under the Age Discrimination in Employment Act of 1967 as in effect before January 1, 1987.

RELIEF OF AUDREY LEWIS AND EMERSON VEREEN

THURMOND AMENDMENT NO. 3485

Mr. SIMPSON (for Mr. THURMOND) proposed an amendment to the bill (H.R. 1010) for the relief of Audrey O. Lewis and Emerson B. Vereen, as follows:

On page 1, line 6, strike out "$140,500" and insert in lieu thereof "$70,250".

On page 1, line 8, strike out "$43,750" and insert in lieu thereof "$18,275".

On page 2, line 23, strike out "$9,100" and insert in lieu thereof "$4,550".

NATIONAL WILDERNESS PRESERVATION SYSTEM

HELMS AMENDMENT NO. 3486

Mr. SIMPSON (for Mr. HELMS) proposed an amendment to the bill (H.R. 4685) to adjust the boundaries of areas of the National Wilderness Preservation System in the State of Texas, as follows:

On page 1, line 10, strike out "June" and insert in lieu thereof "October".

EXCEPTION TO BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT

McCLURE AMENDMENT NO. 3487

Mr. SIMPSON (for Mr. MCCLURE) proposed an amendment to the bill (S. 2921) to amend the Public Law 99-396 exception to the Balanced Budget and Emergency Deficit Control Act of 1985, and for other purposes, as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

"Section 19(b) of Public Law 99-396 (100 Stat. 837, 844) is amended by:

"(1) inserting 'section 30 of' immediately before 'the Organic Act of Guam';

"(2) inserting 'section 3 of' immediately before 'the Joint Resolution to approve';

"(3) inserting 'section 4 of the Act of April 12, 1900 (31 Stat. 78, 48 U.S.C. 740), as amended, and section 9 of the Act of March 2, 1917 (39 Stat. 954, 48 U.S.C. 734), as amended, which became a part of' immediately before 'The Puerto Rican';

"(4) inserting 'section 28 (a) and (b) of' immediately before 'the Revised Organic'; and

"(5) inserting 'section 4(c)(2) of' immediately before 'an Act to authorize'."

INDIANA DUNES NATIONAL LAKESHORE

QUAYLE (AND LUGAR) AMENDMENT NO. 3488

Mr. SIMPSON (for Mr. QUAYLE and Mr. LUGAR) proposed an amendment to the bill (H.R. 4037) relating to the Indiana Dunes National Lakeshore, and for other purposes, as follows:

Strike out all after the enacting clause and insert:

SECTION 1. INDIANA DUNES NATIONAL LAKESHORE.

(a) BOUNDARY CHANGES.—The first section of the Act entitled "An Act to provide for the establishment of the Indiana Dunes National Lakeshore, and for other purposes", approved November 5, 1966 (16 U.S.C. 460u), is amended by striking out "December 1980, and bearing the number 626-91014" and inserting in lieu thereof "October 1986, and numbered 626-80,033-B".

(b) DEFINITION OF IMPROVED PROPERTY.—Section 4 of such Act is amended by striking out the first sentence and substituting "As used in this Act, the term 'improved property' means a detached, one-family dwelling which meets each of the following criteria:

"(1) The construction of the dwelling began before the date (shown in the table contained in this section) corresponding to the appropriate map.

"(2) The property is located within the boundaries delineated on the map described in such table which corresponds to such date.

"(3) The property is not located within the boundaries of any other map referred to in such table which bears an earlier date.

The term 'appropriate map', means a map identified as 'Boundary Map—Indiana Dunes National Lakeshore' (or 'A Proposed Indiana Dunes National Lakeshore' in the case of a dwelling the construction of which was begun before January 4, 1965) which is dated and numbered as provided in the following table.

Property within boundaries of map	Construction began before
Dated October 1986, #626-80,033-B.	February 1, 1986
Dated December 1980, #626-91014.	January 1, 1981
Dated September 1976, #626-91007.	February 1, 1973
Dated September 1966, #LNPNE-1008-ID.	January 4, 1965

the term 'improved property' also includes the lands on which the dwelling is situated which meets both of the following criteria:

"(A) The land is in the same ownership as the dwelling.

"(B) The Secretary has designated the lands as reasonably necessary for the enjoyment of the dwelling for the sole purpose of noncommercial residential use.

Such term also includes any structures accessory to the dwelling which are situated on the lands so designated. The maps referred to in this section shall be on file and available for public inspection in the Office of the Director of the National Park Service, Department of the Interior. The Secretary shall designate the land referred to in subparagraph (B).".

(c) RETAINED RIGHTS.—Section 5(a) of such Act (16 U.S.C. 460u-5a) is amended as follows:

(1) Strike out "the first section" and insert in lieu thereof "section 4, dated December 1980, and numbered 626-91014."

(2) Strike out "; *Provided*, That" and substitute a period followed by "In the case of improved property within the boundaries of the map dated December 1980 and numbered 626-91014".

(3) After "(a)" strike "Except for" and insert "(1) Except for owners described in paragraph (2) and".

(4) Strike "(1)" in each place it appears and substitute "(A)" and strike "(2)" and substitute "(B)".

(5) Add the following at the end thereof:

"(2)(A) In the case of property included within the boundaries of the lakeshore after 1980, any owner or owners of record of improved property may retain a right of use and occupancy for noncommercial residential purposes for a term ending at either of the following:

"(i) A fixed term not to extend beyond September 30, 2010, or such lesser fixed term as the owner or owners may elect at the time of acquisition.

"(ii) A term ending at the death of any owner or of a spouse of any owner, whichever occurs last.

The owner shall elect the term to be reserved.

"(B) The retention of rights under subparagraph (A) shall be available only to individuals who are homeowners of record as of July 1, 1986, who have attained the age of majority as of that date and who make a bona fide written offer not later than July 1, 1991, to sell to the Secretary.".

(d) AUTHORIZATION.—Section 9 of such Act (16 U.S.C. 460u-9) is amended as follows:

(1) In the first sentence strike "$11,000,000" and insert in lieu thereof "$20,000,000".

(2) Add after the last paragraph "In addition to any other sums authorized for the acquisition of lands and interests in lands pursuant to the provisions of this Act there are authorized to be appropriated an additional $3,500,000 to be used for such purposes. The Secretary shall conduct a feasibility study of establishing United States Highway 12 as the 'Indiana Dunes Parkway' under the jurisdiction of the National Park Service. The Secretary shall submit the results of such study to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate within two years after the enactment of this sentence. Effective October 1, 1986, there is authorized to be appropriated such sums as may be necessary for the purposes of conducting the feasibility study.".

(e) EXISTING PROPERTY RIGHTS.—Section 10 of such Act (16 U.S.C. 460u-16) is amended by inserting at the end thereof: "Nothing in this Act shall be construed to diminish the existing property rights of Northern Indiana Public Service Company (as of October 1, 1986) with respect to—

"(1) a parcel of land owned in fee by the Northern Indiana Public Service Company and used for high voltage electrical transmission lines, pipelines, and utility purposes, beginning at said Company's Dune Acres substation and extending east to said Company's Michigan City Generating Station, which parcel by this Act is included within the boundaries of the Indiana Dunes National Lakeshore and herein designated as area II-I on National Park Service Boundary Map No. 626-80033-B, dated October 1986, excluding that certain parcel of approximately 6.0 acres adjacent Mineral Springs Road in areas II-I, and

(2) land owned in fee by the Northern Indiana Public Service Company and used for high voltage electrical transmission lines, pipelines, and utility purposes as has by this Act been included within the boundaries of the Indiana Dunes National Lakeshore and herein designated as area II-B on said National Park Service Boundary Map No. 626-80,033-B."

(f) OWNER CONSENT REQUIRED.—Section 13 of such Act (16 U.S.C. 460u-13) is amended by changing "Sec. 13." to "Sec. 13. (a)", by striking out "the first section" and inserting in lieu thereof, "section 4, dated December 1980 and numbered 626-91014", and by adding a new subsection (b) as follows:

"(b) The Secretary may acquire that portion of area IV-B in private ownership on the map referred to in section 1 of this Act only with the consent of the owner: *Provided*, That the Secretary may acquire an agricultural easement should the owner change the use in existence as of September 19, 1986, through eminent domain.".

(g) MAP REFERENCE.—Section 16 of such Act (16 U.S.C. 460u-16) is amended by inserting at the end of the first sentence "on the map referred to in section 4, dated October 1976, and numbered 626-9100".

(h) RIGHTS-OF-WAY.—Section 15 of such Act is amended by adding the following at the end thereof: "The Secretary may acquire only such interest in the rights-of-way designated 'Crossing B' and 'Crossing C' on the map dated October 1986 and numbered 626-80, 033-B as he determines to be necessary to assure public access to the banks of the Little Calumet River and the banks of Salt Creek within fifty feet on either side of the centerline of said river and creek.".

(i) COOPERATIVE AGREEMENT AND STUDY.—Add the following new section at the end of such Act:

"SEC. 24. LITTLE CALUMET RIVER AND BURNS/PORTAGE WATERWAY.

"(a) COOPERATIVE AGREEMENT.—The Secretary may enter into a cooperative agreement with the Little Calumet River Basin Development Commission, the State of Indiana or any political subdivision thereof for the planning, management, and interpretation of recreational facilities on the tract within the boundaries of Indiana Dunes National Lakeshore identified as tract numbered 09-117 or on lands under the jurisdiction of the State of Indiana or political subdivision thereof along the Little Calumet River and Burns Waterway. The cooperative agreement may include provision for the planning of public facilities for boating, canoeing, fishing, hiking, bicycling, and other compatible recreational activities. Any recreational developments on lands under their jurisdiction of the National Park Service planned pursuant to this cooperative agreement shall be in a manner consistent with the purposes of this Act, including section 6(b).

"(b) STUDY.—The Secretary shall conduct a study regarding the options available for linking the portions of the lakeshore which are divided by the Little Calumet River and Burns/Portage Waterway so as to coordinate the management and recreational use of the lakeshore. The Secretary shall submit the results of the study to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate within two years after the enactment of this section. Effective October 1, 1986, there is authorized to be appropriated such sums as may be necessary for the purpose of conducting the study.".

ADDITIONAL STATEMENTS

TRIBUTE TO MAYOR RICHARD E. NEAL OF SPRINGFIELD, MA

● Mr. KERRY. Mr. President, I would like to pay tribute today to Richard E. Neal, mayor of Springfield, MA, for his distinguished community leadership. Mayor Neal will be honored at a State of Israel Bonds Tribute Dinner on October 26 in Springfield, for his outstanding leadership and long-time support of the State of Israel. Mayor Neal will be the recipient of the Medal of Peace, Israel's highest award.

Mayor Richard Neal has served the citizens of Springfield for over a decade, and has been an outstanding and dedicated public servant. He has a well-deserved reputation for high integrity, quality, and for a deep commitment to humanitarian causes.

Richard Neal began his career in public service in 1973, as an assistant to the mayor of Springfield, MA. He served as a city councillor in Springfield from 1978 to 1983, and was president of the city council in 1979. From 1979 to 1983, Mr. Neal also served as an instructor at Western New England College, Springfield College, and American International College. He also worked as a grant director for Springfield Technical Community College.

In 1984, Richard Neal was elected mayor of Springfield, MA. He currently serves as president of the Massachusetts Mayors' Association.

Mayor Neal took part in 1984 in an interfaith mission to Israel. In Israel, he made a visit to Kiryat Ata, which is Springfield's sister city in Israel. The mayor of Kiryat Ata, the Honorable Yaacov Ben Daniel, will be present and participate in the award of the Medal of Peace to Mayor Neal next week in Springfield.

This award to Mayor Neal is highly appropriate and well deserved. Mayor Neal has demonstrated a deep commitment to the State of Israel, and to the special relationship which exists between the peoples of Israel and the United States.

71-059 O-87-44 (Pt. 22)

The Medal of Peace is a prestigious award, and is not bestowed lightly. In this year which marks the 350th anniversary of the founding of Springfield, MA, it is especially appropriate that Richard Neal should be honored for his work in establishing and furthering ties between the people of Springfield and the people of Israel. I congratulate Mayor Neal on this important award. I look forward to being present with Mayor Neal next week for the occasion of the bestowing of the Medal of Peace.

RECOGNITION OF THE RCA SCHOOL OF BENSALEM, PA

● Mr. SPECTER. Mr. President, I wish to give special recognition and acknowledgement to the staff of the RCA School at the Youth Development Center in Bensalem, PA, for their outstanding efforts to provide quality educational services for adjudicated delinquents throughout Philadelphia and southeastern Pennsylvania. This school has a history of excellent achievement and has received two national awards including the Phi Delta Kappa Award for excellence in discipline. RCA is the only correctional school in the Commonwealth of Pennsylvania where security and open residential students attend school together. The school provides basic, vocational, bilingual, computer and special education, and varsity sports. Through the dedication of the teachers and the assistance of the Bucks County Intermediate Unit No. 22, under the direction of Dr. A. William Vantine, who has rendered tremendous support throughout the school's history, many young lives are getting back on the right track. Utilizing individual instruction combined with small classes, many learning barriers are removed and student motivation is stimulated.

Mr. President, in our information oriented, highly mechanized society, young people who are functionally illiterate, who do not have basic cognitive and reasoning skills, and who lack technical skills and motivation will be unable to compete for jobs and will therefore be locked out of the labor pool. Without steady employment and the hope of a better life, juvenile delinquents are likely to become adult offenders. My dear friend, Harvey N. Schmidt, retired judge of the court of common pleas in Philadelphia, and crusader for academic excellence at this facility, has acclaimed this program for its success in improving math and reading levels as well as teaching "respect for others, self-respect, honor, self-discipline, spiritual development, and dignity." This is why the educational program at the RCA School is so vital. The teachers and administrators at the school are committed to helping students gain the educational skills which will enable them to seek and maintain steady employment. The primary goal is to send students back into society with the skills, habits, and attitudes which will enable them to be a productive member of society.

Mr. President, as chairman of the Senate Juvenile Justice Subcommittee and cochairman of the Senate children's caucus, I know the importance of the work taking place at the RCA School. Without the dedication and commitment of the faculty along with the guidance and support of RCA Service Co. administrators Al Androlewicz, Dr. Laverne C. Cook, and Valaida W. Randolph, many adjudicated delinquents from Philadelphia and southeastern Pennsylvania would have no hope for the future.

I extend my warm regards and thanks to the RCA School for the service being rendered to the Commonwealth of Pennsylvania.

Mr. President, I ask that the names of the staff of the RCA School appear in the RECORD immediately following my statement:

STAFF OF RCA SCHOOL

Chief school administrator, Wylie J. Hinson, Jr.; vice principal, Bryant L. Horsley, Sr.; dean of students, William F. Brown; supervisors, Jeanene I. Anker, Nina Apfelbaum, Jeffrey Brown, Thomas C. Burst, Ronald V. Edwards, and William Simmons; guidance counselors, Victoria Meyers, Michelle Roberts, and Carol Thompson; instructors, Jack Boyd, Bobby Clark, Samuel Cook, Mary Dunbar, Cindy Golden, Warren Hartz, III, Tanya Morgan, Carl Penxa, Valerie Slott, Steven Snyderman, Rhoda Stein, William Stokes, and Leroy White; and teacher aides, Walker Boardley, Craig Hodges, Norman Hodo, James Nash, and Norman Whitehead.●

FUTURE ISSUES IN EMPLOYMENT AND TRAINING

● Mr. QUAYLE. Mr. President, on Monday, October 13, I celebrated the fourth anniversary of the enactment of the Job Training Partnership Act [JTPA] in Indianapolis, IN with a gathering of employment and training policymakers from around the State. In addition to recognizing the achievements of the State and the 17 awards for exceeding their performance standards, we discussed future challenges.

In my remarks, I focused on three areas which present a challenge to the employment and training community as future issues of national concern. These problems are not really addressed by JTPA and they have been with us for some time. I believe that in order to solve them we must take a fresh approach. I ask to have the text of my remarks inserted in the RECORD because, on this anniversary of JTPA, I want to share these thoughts with my colleagues as we begin to look at the challenges we will face in the next Congress.

The remarks follow:

A LOOK AT THE FUTURE

Today we come together to commemorate an event of the past. Just four years ago, President Reagan signed the Job Training Partnership Act into law. We can all be proud to be associated with JTPA from its beginnings to a point where it is a vital part of our economic development strategy and our policy for local and regional growth. But I do not want to dwell on the past today because, as has been often been said, the past is just prologue to the future.

The JTPA in the development of which I am proud to have played the major role, was a significant development in the evolution of our job training laws. It is built on sound principles: a partnership between business and government; a recognition of the differing functions played by local, State and Federal governments; and an emphasis on achieving results rather than regulating process. The fact that this Act was soundly conceived is shown by the fact that even four years later only modest amendments were required—amendments which I am happy to say will soon be signed into law by the President.

We can be proud of the achievements of JTPA since we created it. Nationally, over 5 million people have participated in JTPA programs. More importantly, over 71 percent of its adult participants and 57 percent of its youth participants have found meaningful jobs.

Indiana has done even better than this, with over 79 percent of the adult and 59 percent of the youth participants being successfully placed. It is a tribute to John Mutz and all of you that each SDA in Indiana received incentive awards in the 1985 program year. Over 163,000 people have been enrolled in JTPA in Indiana; and I believe the program has been a vital part of the economic recovery in Indiana that has seen a historic high in the number of people employed in the state and unemployment levels at their lowest point since 1980.

As a final tribute to JTPA, I would emphasize that we are doing a good job of reaching targeted groups who are most in need of usable job training skills: 53 percent of program participants are women, 42 percent are youth under the age of 22, 45 percent are minorities and 40 percent were receiving other forms of public assistance when they entered the program.

But I have not come here only to celebrate the achievements of the past and to honor those of you who have already accomplished so much with JTPA—rather I want to point to the training and education problems of the future and see if we can work together in the same cooperative spirit to find solutions to them. This is especially appropriate today since this is National Job Skills Week (October 12-18). I was the chief Senate cosponsor of this resolution introduced by Senator Gore. The purpose of National Job Skills Week is to focus public attention on training and retraining issues that require national attention and to raise citizen awareness about the need to take individual efforts to develop and continually revamp our human resources.

From where I stand, I see three major unresolved issues relating to labor market policies. I do not have answers to any of them, and I think it will take considerable time, study, and effort until we are in a position to enact remedial legislation. But I would like to outline my ideas to people like you who are involved in the real world of chang-

ing labor markets every day, so that we can work out creative new ideas in the same spirit of partnership that has marked JTPA from its inception.

First, we need to deal with the wasteful duplication and lack of coordination in the effort to train and place persons who lack the necessary qualifications for work.

Especially at the Federal level we have too many agencies and programs to deal with job preparation and placement; agencies and programs which are marked by a lack of coordination and central purpose. I applaud the efforts being made at the State level to deal with this problem and particularly I commend Lt. Governor Mutz's program to implement the five-year strategic plan for employment and training. However, the problem is created at the Federal level and we in Federal government cannot shrink from contributing to the solution.

I do not need to tell you how many separate Federal efforts there are to train those unprepared or unqualified for the labor market; besides JTPA, we have the Work Incentive Program (WIN) and vocational rehabilitation and vocational education and adult education and trade adjustment assistance, not to speak of the Targeted Jobs Credit, community service block grants and Food Stamp workfare programs and welfare demonstration projects. In addition, practically every one of these programs has a placement effort that overlaps with that of the employment service.

I will not shock you when I say we cannot afford the waste of resources that accompanies such duplication of effort—but I do shock all of those who have a vested interest in preserving their particular program. I have introduced and held hearings on a bill that would ameliorate this problem, (S. 1990, the Education and Training Partnership Act) but to be candid we are a long way from developing a consensus that any action should be taken—much less consensus on any specific proposal.

This is an especially difficult problem to face because most of these programs have been around—and done good work—for years, and consequently have years of old habits and entrenched interests to protect them. But we must face the fact that better coordination is needed and make the hard decisions in a cooperative spirit to streamline and better focus our efforts.

Second, we must develop policies to ensure that welfare does not become a condition of life rather than a temporary relief from unavoidable hardship.

For the last thirty years, Congress has struggled to find a way to move employable persons off the welfare rolls to the economic independence of employment. This has become an ever more pressing task as the nature of the AFDC population has changed. The program was started as a way of helping widows, who were not considered employable, support their children; it has become a system of support for the unmarried, divorced or separated who are unable to care for their children, but who by current standards are employable. In 1940 (the first year for which we have data), 69 percent of all the children receiving support were in need because of the death or incapacity of a parent; in 1983 (the last year for which we have data), that number had dropped to 4 percent. The rest have parents for whom employment should provide the route to independence.

Other statistics indicate that among some AFDC recipients, welfare dependency becomes a way of life for the parent during the most formative years of a child's life. The average number of years of receiving AFDC assistance ranges between 5 and 8 and it is highest for those who first receive welfare relief before the age of 22. About 33 percent of those receiving assistance before age 22 are likely to have AFDC assistance for periods of 10 years or more. This percentage drops as the age of first assistance increases going from 26 percent for the 22 to 30 age bracket down to 15 percent or 16 percent for those in age brackets over 30.

We have experimented with work requirements and work incentives; child support enforcement and earned income tax credits and still the single-parent family continues as the greatest cause of poverty in the United States. This is a problem greater than job training; though job training must be a part of the solution. It is a problem of family values and of work ethic; it is a problem that requires government help but also self-help and community help. We see an ever growing body of data that shows that a part of our society is being left behind—and it is imperative that we do not permit the development in this society of a permanent underclass that does not share in the American dream.

I want to insist here that there probably is no government solution to this problem—we can only work at the margins to help those who want to make the effort to break the cycle of dependence. The really important work must be done by society as a whole—we must make sure that our value structure as well as our system of incentives works to encourage strong families and the desire for independence.

Third, a growing percentage of our youth are unprepared for the labor market due to illiteracy or deficiency in other skills—and even more unprepared for the labor market of the future which will demand even greater skills.

While the percentage and even the absolute number of youth in the labor market is declining, an ever larger share of that population is experiencing greater and greater difficulty in finding employment. The percentage of 16 to 24 year olds in the U.S. is projected to drop from a high of 23 percent in 1978 to 16 percent by 1995. Minority youth unemployment rates are astronomical and even those rates do not show the full extent of the problem because an increasing percentage are not even looking for work (and therefore not counted as unemployed).

For September 1986, while overall unemployment stood at 7 percent, it was 16 percent for white youth aged 16 to 19, while the corresponding rate for blacks was near 40 percent. In 1985, 50 percent of all white youths were employed compared to 33 percent of Hispanics and 24 percent of blacks. Minorities are increasing as a percentage of the total youth population. Of those aged 16 to 19, fully 18 percent are now minorities.

We focus on the minority youth and overall youth unemployment problem only to draw attention to the increasing complexity of the problem. Obviously, a multifaceted approach to our effort of bringing youth into the job market is needed. Again job training must be a part of the solution to this problem—but much more than job training is needed. The growing emphasis on the basics in our elementary schools is a welcome development but that development bypasses too many. But we need to focus on more than education and training: the strength of the family, the pervasive battle against drugs, the dependency dilemma, all must be considered as part of the effort to combat youth unemployment.

Each of these issues present a major challenge to our country. Each has a long history of unsuccessful attempts to remedy the problem but that is no reason to be of faint heart. I assure you that when I was first faced with the problem of rewriting our job training laws, I had no solution in hand. But by concentrating on basic principles, seeking the contribution of knowledgeable and interested parties and by searching for consensus among conflicting views, we created a system that works. I am convinced that the same approach can solve other problems—and I can assure you that I will at least try.●

ABORTION AND INFORMED CONSENT: MISSOURI

● Mr. HUMPHREY. Mr. President, imagine receiving a list of potential physical complications of a surgical procedure after the procedure had been performed on you. This is precisely what occurs on a daily basis for thousands of women who have abortions. In her letter Karen paints an outrageous picture of the counseling given to women before they opt for an abortion.

I hope my colleagues will read her letter and sympathize with her final sentence: "How can we be so cruel to the women of our great Nation, not giving all the facts and leaving them to suffer alone?" I urge my colleagues to cosponsor S. 2791 providing for informed consent before abortion.

The letter follows:

KANSAS CITY, MO,
July 2, 1986.

DEAR SENATOR HUMPHREY: I am writing about a matter that is most important to me, informed consent. The prenatal facts and the facts about abortion procedures must be told to a woman before having an abortion. As a woman who has had an abortion, here is my story in part.

What a blow it was at 17, pregnant and unmarried, with unsupportive parents. With nowhere to turn, afraid of losing my parents' love and a roof over my head, I had an abortion. My parents being under the same deception as I, and lacking knowledge of the baby's development, drove me to a three story, dingy, dirty hospital that was used during the Civil War. This was a legal abortion?

The third floor was full of girls who seemed to range between the ages of 13 and 25 or so. I knew in my heart what I was about to do was wrong, but I didn't know how to stop it from happening. I was scared and trapped, screaming in my mind, but nothing coming from my mouth.

The counseling I received at the hospital was of no help. The girl I talked with wasn't much older than myself and all she did was ask me why I wanted the abortion. She either wanted a list of reasons or was waiting to hear how I couldn't afford to raise a child on my own. If I would have known it was a developed baby, and not a blob of tissue (product of conception), I would have had the ammunition to fight with. Never once did she tell me about any assistance I might be able to receive that would help me to bring my baby to term (i.e., homes for unwed mothers). The abortion procedure was explained to me on the table as the doctor was doing the abortion.

As the machine was turned on, my mind went blank. What was happening here? I couldn't believe it was happening to me. This is what my parents thought was best? For me? For them? Definitely not for the innocent baby inside my womb.

The physical complications that might arise were explained to me on a sheet of paper as I was leaving. They never mentioned the emotional problems I would have, nor the spiritual wounds.

How can we be so cruel to the women of our great nation, not giving all the facts and leaving them to suffer alone?

In His Healing Love,

KAREN J. RODERICK.[1]

BILATERAL INVESTMENT TREATIES

● Mr. DODD. Mr. President, over the past 5 years, the Office of the U.S. Trade Representative has negotiated a number of bilateral investment treaties. These treaties are designed to provide added protection for the United States business community and its investments in Bangladesh, Cameroon, Egypt, Grenada, Haiti, Morocco, Panama, Senegal, Turkey, and Zaire. According to the Trade Representative's Office, this is just the first batch of investment agreements. More are sure to follow as negotiations are finalized.

The agreements that have already been negotiated are currently pending before the Foreign Relations Committee, where they have been since the spring of this year. Because of the committee's heavy workload, however, hearings on these treaties could not be held until just a few weeks ago.

In the course of those hearings, I took the opportunity to underscore my support in principle for these agreements and for the efforts by the Trade Representative's Office to secure additional guarantees and safeguards for U.S. business operations abroad. I was convinced then and I believe now that, on balance, these treaties are fine documents, and will serve the commercial interests of the U.S. business community. Clearly, they encourage and facilitate U.S. companies to invest in developing countries friendly to us. They do this by providing a stronger framework within which corporations can operate with a greater degree of certainty.

These goals and objectives are all to the good and they have my full support. But as laudatory and deserving as they are, they do not encompass the full range of U.S. interests overseas. In other words, as I think my colleagues understand, our international economic and commercial interests are not synonymous with the totality of our foreign policy interests. Recent actions taken by either the Congress or the executive branch against South Africa, Libya, and Nicaragua make that very clear. And just as clearly, I think we all realize that as circumstances change internationally, as developments alter and reshape the course of events, as new governments emerge with new leadership, our perception of U.S. interests will be reexamined and will also undergo change and redirection.

Regrettably, Mr. President, the bilateral investment agreements being considered by the Foreign Relations Committee do not recognize the inevitability of such changes and the impact those changes may have on the conduct of U.S. foreign policy. Rather these agreements assume a long-term status quo and provide for future modification only after the passage of a stipulated 10-year period. In other words, were this body to approve these agreements as presented, the United States would be locked into them with virtually no legal escape hatch available to us.

To my way of thinking such an arrangement is both unacceptable and inadmissible. The world is not static. It's not static in South Africa and it's not static in Zaire. It's not static in Libya and it's not static in Egypt. And it's certainly not static in Haiti or Turkey or Bangladesh, or anywhere else for that matter. And no agreement, whether it's designed to advance our commercial interests, secure our military posture or enhance our political standing can alter this basic fact—change is as unpredictable as the weather.

I raised this concern in the course of the committee's hearings on the investment treaties. And I intend to keep raising it until these treaties are modified in such a way that would allow us to terminate them because of over-riding foreign policy considerations or national security reasons. Such a termination clause is fairly standard procedure in most treaty arrangements, whether bilateral or multilateral. It's a standard feature in our mutual security treaties, such as NATO. It's a standard feature of our tax agreements. It should be a standard feature of our investment agreements.

Mr. President, I would like to see the pending agreements approved before the end of session. And I am prepared to accept a modified termination clause, one that would apply to prospective business activity only, providing that such clause not be subject to the arbitration requirements contained in these agreements. I regret that such a formulation has been unacceptable to the appropriate officials in the Trade Representative's Office. My hope is that they will reconsider this matter, thus clearing the way for us to act on these agreements in the closing days of the session.

To put this issue in its proper context, Mr. President, let's look at it this way: Flexibility in foreign policy is both desirable and essential. It is desirable because it permits us to choose among a variety of options. And it is essential because of the hourly, daily, weekly, monthly changes—often dramatic changes—that occur throughout the international community. The bilateral investment treaties that have been presented to the Senate do not allow for the measure of flexibility that is necessary for the successful conduct of foreign policy. By their very terms, they are to remain in force for no less than 10 years—regardless of virtually any other developments that may occur during that period. I am hopeful that U.S. Trade Representative officials will, upon reflection, recognize this shortcoming in the agreements submitted to us, and will move expeditiously to rectify it. U.S. foreign policy interests demand it, and the American business community deserves it.

ELIE WIESEL—NOBEL PEACE PRIZE RECIPIENT

● Mr. KERRY. Mr. President, I am very pleased today to congratulate Elie Wiesel on becoming the recipient of the Nobel Peace Prize for 1986, and to pay tribute to him. Surely there could be no more deserving recipient of the Nobel Peace Prize than Elie Wiesel. As the Nobel Committee stated in bestowing this award, "Elie Wiesel is a messager to mankind. His message is one of peace, atonement, and human dignity." It is highly appropriate that this award was bestowed on the day following Yom Kippur, the holiest day of the year of the Jewish people, which is a day of remembrance and atonement.

I take special pleasure in this award to Elie Wiesel because he is a member of the faculty at Boston University in Massachusetts, where he is the Andrew W. Mellon professor of humanities and professor of religion. I had occasion earlier this year to speak at Boston University during a week of remembrance of the Holocaust, and to meet and talk with Elie Wiesel. Like so many others, I was deeply inspired by my encounter with this humble and spiritual man.

I was also deeply moved by Elie Wiesel when he testified before the Senate Foreign Relations Committee on March 5, 1985, in support of the International Convention on Genocide. He said to us, "Above all, I speak as a witness. I speak as someone who has seen genocide at work.* * * What I have seen from 40-odd years ago should not be seen or endured by anyone alive ever. * * * I have seen the flames. I have seen the flames rising to the nocturnal heavens; I have seen parents and children, teachers and their disciples, dreamers and their dreams and woe unto me, I have seen children thrown alive in flames. I have seen all of them vanish in the night as

part of a plan, of a program conceived and executed by criminal minds that have corrupted the law and poisoned the hearts in their own land and the lands that they had criminally occupied. Then it was called the Final Solution. Today it is called genocide."

Mr. President, I am proud that the U.S. Senate heeded the words of Elie Wiesel, and chose to ratify the Genocide Treaty in this Congress. But I also am saddened that the President of the United States was unable to heed the plea of Elie Wiesel, when he implored the President to reconsider, and to cancel his trip to a Nazi cemetery at Bitburg. In both instances, Elie Wiesel acted as a voice of conscience, in reminding us that we must never forget the horrors of the Holocaust, or allow them to be repeated in the modern world.

Elie Wiesel has been an eloquent moral voice of remembrance, and an inspiration to millions of people. From the publication of his first novel, "Night," in 1958 he has established himself as a powerful moral spokesman for those who cannot speak for themselves, and those who are forever silent. He has been a powerful and eloquent spokesman for the "Jews of Silence," the Jews of the Soviet Union. He has spoken out for the Miskito Indians of Nicaragua, and for the disappeared in Argentina. And he has called upon the conscience of the world to witness and remember the modern-day holocaust in Cambodia.

Elie Wiesel has truly been the conscience of the modern world. All of us owe him an enormous debt of gratitude for his selfless and heroic efforts. I ask that an article describing the life and work of Elie Wiesel, which appeared in today's Washington Post, be printed in the RECORD. I congratulate Elie Wiesel on receiving the Nobel Peace Prize, and I give him my deep appreciation for his inspiration and his example.

I ask that an article about Elie Wiesel be printed in the RECORD.

The article follows:

[From the Washington Post, Oct. 16, 1986]

THE RESTLESS WITNESS

(By Jane Leavy)

When the call came at 5 a.m. yesterday, Elie Wiesel was lying in bed thinking of his mother, his father and sister who died, along with six million other Jews, in Nazi concentration camps more than 40 years ago.

For Wiesel, there was no euphoria in learning that he had won the 1986 Nobel Peace Prize. "I felt melancholy," he said, "I was thinking of the people I lost. Yesterday was Yom Kippur. I was in the mood of Yom Kippur. Would they know? I want so much that they know. I have to do something to justify them. Do they know?"

Knowing is his mission, his life's work. He is a survivor, the witness of the dead, their voice, their son, the one who never forgets. Remembering is his obsession and his burden. He did not ask for it anymore than he can relinquish it. It is his fate.

"For the first time in history, being became a crime," he said at a 1981 ceremony honoring those who died. "We must tell the tale. We must bear witness."

Yesterday, he said, "I would have fallen into total despair if I gave up on this duty. I have to. It's my life. I have to find out. Hundreds died and I did not. Why not?"

In bestowing the award, the Nobel committee answered that question: "Wiesel is a messenger to mankind. His message is one of peace, atonement and human dignity."

He has carried his message in the more than 25 books he has written, in the courses he has taught and in the deeds he has performed as chairman of the U.S. Holocaust Memorial Council. He calls himself a storyteller. Twenty-five years ago he used the word "holocaust" and gave a name to the unspeakable.

In April 1985 he went to the White House to accept the Congressional Gold Medal and implored President Reagan not to lay a wreath at Bitburg cemetery, where Nazi soldiers lie. "That place, Mr. President is not your place," he said, "Your place is with the victims of the SS." This year he chastised the United States, the Soviet Union and Yugoslavia for not exposing the past of former U.N. Secretary General Kurt Waldheim, and letting him find "refuge in oblivion."

He has become "*the* survivor," the irrefutable voice of an absent generation. "Naturally, it is a burden. It is also a privilege," he said. "It is a burden when people don't listen. But you have to go on. Here and there, there is always one who understands, one whose life changes. I am both humble and ambitiously arrogant. I cannot do much. I am one man. But I still hope that there will be one here and there that will be moved and changed. That's enough for me."

He paused and laughed. "Of course, it is nice if the person who is moved is in a position of power."

It is a daunting prospect to be the conscience of a forgetful world. He scoffs at the notion. "If I am my own conscience, it is enough," he said. "I want everyone to have their own conscience."

For 40 years he has grappled with the absence of conscience that allowed the systematic extermination of his people and millions of others. "All in all, the major questions, the essential questions, have not been answered," he has said, "What was it of the nature of man that this was possible? Why so many victims? Why so many killers? Why so many bystanders? All the real questions. Except the questions become deeper and deeper."

Eliezer Wiesel was born on Sept. 30, 1928, in the town of Sighet, now in Romania. He was 15 when his parents and three sisters were taken from their home in the spring of 1944. His mother and his younger sister died at Auschwitz. He was sent to Buchenwald with his father, who died there. He lost track of his older sisters and presumed them dead. When Buchenwald was liberated, he was one of 400 children who refused to be sent back to their homelands. "I saw the lists of the known survivors," he said in 1970. "And I didn't see my sisters' names on them, so I had no reason to want to go home. I wanted to try Palestine, but the British weren't letting us in."

He was shipped to a camp in Normandy, where he was interviewed and photographed by journalists. Soon after, the camp director called him into his office. "He was talking on the phone," Wiesel said. "And I heard my name mentioned. When he hung up, I said, 'Who was that?' He said, 'Your sister.' I didn't believe it. How would she know I was alive and in France? She had seen the article and picture, of course."

Both sisters were alive. He had learned the value of words and images.

He went to Paris, and then to the United States in 1956 (he became a citizen in 1963). His first book, "Night," was published in 1958. "Never shall I forget that first night, the first night in camp, which has turned my life into one long night," he wrote. "Never shall I forget that smoke. Never shall I forget the little faces of the children, whose bodies I saw turned into wreaths of smoke beneath a silent blue sky."

He has told the story of a young boy, who thought he was leaving on a grand adventure, watching a man at the station as the train pulled away: "He got smaller and smaller, and he just stood there looking rather nostalgic, as if he was sorry to see us go, sorry that the job was done now."

The man was Adolf Eichmann. The boy was Elie Wiesel. He has accepted, as his trust, the responsibility for never letting those memories fade. His challenge is to preserve them without desecrating them. He no longer uses the word "holocaust" because, he says, it has been cheapened by repetition.

The paradox envelops even the monument he has worked to build, the U.S. Holocaust Memorial Museum. "My dilemma is I'm not sure what we are doing," he said in 1983. "I know we must bear witness. On the other hand, I see what is being done with our testimony and I despair . . . It's the inherent difficulty in it, that once you turn something so personal and it becomes public, it is threatened by compromise . . . I don't want it to become routine . . . It's too personal."

So, too, there is honor in winning the Nobel Prize, but not exaltation. "I was stunned," he said. ". . . Happy? No. Reflective. Happy is a difficult word to use, but I am very grateful and conscious of the responsibility of the symbolism involved."

He said he hopes the award will add momentum to "my causes, Russian Jews and others who wait for doors to open."

To celebrate, he said, "we'll have tea and coffee."

Wiesel will not be deterred by adulation. "Do you think anything can change me?" he said. "The war didn't change me. Nothing can change me."

In the mid/1960s he returned to Sighet. Twenty years after the war, it was still as he remembered. But instead of a population of 15,000 Jews, there were 50.

"The whole town was exactly the same—the same trees, the same streets, the same houses," he has written. "The same church bells. My own home was the same home as before. I opened the gate and it had the same squeak.

"I looked into my home. They hadn't even moved the furniture. I said, 'Time hasn't changed.' Is it my life? Maybe it's a dream and I'll wake up. Maybe some boy who is 13, 14 years old will come out and he will look exactly the way I used to and will say, 'What are you doing here, stranger? What are you giving to my dream?' "

The lesson was clear. "That people can be removed from life, and unfortunately they don't leave any trace."

Sometimes, he wonders what he would have been had there been no war, no holocaust.

"It has been haunting me," he said. "I probably would have remained in my town. My ideal was to become a Rosh Yeshiva and

to write. I would have written different things, commentaries on the Bible. And I would have been a teacher.

"Strangely enough, I am a writer and a teacher."

He is a professor at Boston University, and lives in New York with his wife Marion, who is also a survivor. They have a son and a daughter.

"Of course, there are reasons to make one happy," said the man who has described himself as having the stare of a corpse. "Joy is contagious."

Still, the memories remain vivid. "Even more so this morning," he said yesterday. "But this doesn't mean I live in a cemetery. I am alive."●

THE PRESIDENT'S COMMISSION ON AMERICANS OUTDOORS

● Mr. CHAFEE. Mr. President, in January 1985 President Reagan appointed a Commission on Americans Outdoors which was to study current outdoor recreation policies and opportunities and make recommendations on how to meet the future outdoor needs of the American public.

The Commission will likely be the focal point for the development of natural resource policy for the rest of the century. This 15-member panel not only must produce a reasoned analysis of the present, it also will have to outline an effective and feasible plan for the future.

The most important challenge facing the Commission will be to recommend a mechanism, involving either modification of the Land and Water Conservation Fund or creation of a new trust fund, which will ensure adequate and reliable, long-term funding for land preservation and outdoor recreation.

The next few months will be decisive. The Commission is due to make its recommendations by the end of the year. As this panel makes its final proposals to the President, I hope they will incorporate the ideas articulated by Robert L. Bendick, Jr., director of Rhode Island's Department of Environmental Management, in last Sunday's New York Times. Over the past year, Bob Bendick has actively sought to ensure that we have a clear and focused program for the remainder of this century which will save America's open space.

Mr. President, I ask that Bob Bendick's article in the New York Times be printed in the RECORD so that we all may understand the importance of the matters being weighed by the President's Commission on Americans Outdoors and the need to see that they chart a course for which future generations will thank us.

The article follows:

THE LAND IS OUR LAND

(By Robert L. Bendick, Jr.)

PROVIDENCE, R.I.—I was standing in a field of wildflowers on Beavertail Point at the entrance to Rhode Island's Narragansett Bay. The sun was sparkling on the water and, just offshore, terns were diving above a school of bluefish. A car with out-of-state plates pulled into the parking lot behind me. A couple got out, walked over and after only a few minutes of small talk the man said: "You know, it's beautiful here. Is any of this land for sale?" I replied, "This is a state park." But I knew they wouldn't give up, because up the road, across the bay and all along the New England coast the land is for sale and somewhere they would find a piece of a farm, beach or bluff to buy, build on and make their own.

Since the landing of the first European settlers on our coast more than 350 years ago, much of American history has been a close (often passionate) relationship with a varied, beautiful and powerful land. That relationship continues to define how we think of ourselves. Watch the soft drink, fast food, beer and car ads on television—filled with farmers, cowboys, sunsets and mountains, with fishing at the lake and driving down country roads. The advertising people have examined how Americans think more carefully than anyone else. They know we associate the outdoors with family, good times and good feelings about ourselves.

But the image of this country seen on those ads has become increasingly hard to find in the real America. Around the metropolitan areas where most of us live, and near the oceans, lakes and mountains where we go to relax, the countryside is being consumed by urban sprawl and by second homes and resort townhouses that only a few can afford.

Fueled by a growing national population, the decentralization of economic activity and increasing affluence, these development trends will continue until, in many parts of the country, there will be far too little open land for far too many people. And there is more to all this than simply losing a nice view or a place for a father and child to go fishing on Sunday afternoon. We are learning that healthy natural system process pollution and reduce its impact. As the shores of our rivers and bays are developed, wetlands filled and trees cut down, we damage the water and air quality upon which we depend.

The loss of our rural and open space is irrevocable. Once subdivided and built on, beaches, river banks, foothills and lake shores will never in our lifetimes be restored. Yet despite the finality of land development, despite the accelerating loss of open land, despite the place we hold in our hearts for the outdoors, we have no functioning national program for preserving open space.

In 1985, President Reagan appointed a Commission on Americans Outdoors, which was charged with gathering information and making recommendations on the future of outdoor America. The commission is now discussing its final proposals for presentation to the President by the end of this year. Some options seem promising:

1. A grassroots effort administered by state and local governments to determine what open land should be saved and how it can be made accessible to and usable by the public.

2. Creation of a permanent National Trust Fund that could provide up to $2 billion a year for preserving and caring for open space.

3. Establishing a system of greenway parks along mountains, rivers, lakes and ocean coasts that would provide large-scale outdoor recreation opportunities to metropolitan area residents while also protecting water quality.

4. A broadening of traditional park concepts to include farms and other privately held land as part of greenway districts.

5. Design of transportation systems to allow urban area residents to more easily use regional open land reserves.

The commission should recommend these ideas to the President and to Congress. In doing so, it can seize the last opportunity to complete the unfinished work of the 19th century conservation movement—to save the open land people will need in the centuries to come—to fish, to canoe, to walk, to be alone, to feel the spirit of the pioneers who defined our national character.●

REDUCTION IN SOVIET DIPLOMATIC MISSION

● Mr. D'AMATO. Mr. President, I am pleased to cosponsor Senate Concurrent Resolution 163, a resolution expressing the sense of the Congress that the total number of Soviet diplomatic agents and consular officers in Washington, DC, and San Francisco be reduced to equal the total number of American diplomatic agents and consular officers serving in Moscow and Leningrad.

The Soviets currently have 274 diplomats at their Embassy in Washington and 39 at their consulate in San Francisco. At the same time, there are 221 American diplomats serving at our Embassy in Moscow and 28 at our consulate in Leningrad. In addition, there are about 218 Soviet diplomats at the missions to the United Nations and 174 Soviet citizens working for the U.N. Secretariat in New York. The next largest mission to the United Nations is that of the People's Republic of China, with 125 officials. In total, there are more than 1,400 Soviet officials in the United States. Meanwhile, there are only 249 Americans in the Soviet Union.

As the recent arrest of Gennadi Zakharov points out, many of these so-called diplomats are actually involved in espionage. In fact, Judge William Webster, Director of the FBI, estimates that nearly 40 percent of the roughly 2,500 East bloc diplomats currently in the United States are spies operating under the cloak of diplomatic immunity. Many, like Zakharov, are involved in operations designed to steal Western technology to enhance Soviet and East bloc weaponry. In testimony before the Permanent Subcommittee on Investigations last year, Judge Webster noted that "the Soviet collection effort is the largest, and in terms of capabilities, the most difficult to counter."

During the early 1970's, the Soviet Union established the Military Industrial Commission, made up of representatives from the Council of Ministers, the Foreign Trade Ministry, the KGB, and the GRU, the Soviet military intelligence organization. According to a report produced by the French, the Soviets transfer 10,000

pieces of equipment and 100,000 sensitive documents from the West to the Soviet Union each year. This flow represents not only an economic drain, but also, and more importantly, a direct threat to our national security.

While adoption of Senate Concurrent Resolution 163 will not solve the problem, it is an important first step. The way to avoid a repeat of the recent Zakharov-Daniloff imbroglio is to prevent Soviet spies from entering the United States in the first place. The inflated Soviet diplomatic presence must be reduced now. I urge my colleagues to support adoption of this resolution to compliment existing language, passed and signed into law last year as part of the State Department Authorization Act, calling for a reduction in the size of the Soviet missions to the United Nations.●

THE DISTRESS SALE POLICY

● Mr. WEICKER. Mr. President, in 1978 the Federal Communications Commission adopted the distress sale policy. I believe that this policy is a wise and beneficial one and I would oppose any attempt to weaken or abandon it.

The Federal Communications Commission awards television and radio broadcast licenses. Television licenses are granted for 5 years and radio licenses for 7 years. If a licensee allegedly acts in such a way as to disqualify him as broadcaster, the FCC may hold a hearing to revoke the license or deny renewal. If the license in revoked or renewal is denied, the broadcaster receives no compensation.

The distress sale policy allows a broadcaster that is under question for his actions to sell his license to a minority buyer under two conditions. First, the sales price must be 75 percent or less of fair market value. Second, the sale must occur prior to the commencement of a hearing.

Mr. President, the distress sale policy has many benefits. No. 1, it promotes the ownership of broadcast licenses by minorities, who are grossly underrepresented—1.8 percent—in the industry at present. So far, the policy has resulted in the sale of 25 stations to minority businesses. No. 2, the policy benefits the FCC. The Commission avoids costly and protracted procedures. No. 3, the public benefits by a relatively smooth and quick transition from one licensee to another. The alternative of a comparative hearing could result in a long period of time without the station being operational. No. 4, the selling licensee benefits by receiving some compensation for the license. He is punished, however, since he receives at most 75 percent of fair market value.

In the State of Connecticut, such a distress sale occurred in 1985. The previous owner of the station engaged in behavior that clearly violated the conditions of its license. The people of the Hartford area suffered, because channel 18 was not being used to its capacity. Astroline Communications Co., an Hispanic owned and operated business, offered to buy Channel 18. In December 1985, the FCC gave the go ahead for this sale. Since buying the station, Astroline has updated the facilities and created new jobs. In addition Connecticut television viewers have a new option in programming that is attracting a growing audience. The people of Connecticut have certainly benefited from this distress sale.

The distress sale policy works. It benefits minorities. It allows qualified broadcasters the opportunity to break into a tough, highly competitive industry.

Mr. President, I believe the distress sale policy should remain unchanged and I know the people of the State of Connecticut who have enjoyed Channel 18 agree.●

MILITARY RULES OF ENGAGEMENT

● Mr. GOLDWATER. Mr. President, the American Bar Association Standing Committee on Law and National Security, and the Center for Law and National Security of the University of Virginia, are cosponsoring a special conference on October 17 and 18 on the subject: "The Vietnam Debate: A Fresh Look at the Arguments."

In particular, I am pleased to note that one of the major topics to be reviewed at the conference is the rules of engagement, the detailed restrictions imposed on American fighting forces in North Vietnam, Laos, Cambodia, and South Vietnam. I have long been convinced that these strict rules, in part motivated by humanitarian reasons, but primarily reflective of civilian political decisions, denied our military forces the victory that would otherwise have followed in Southeast Asia.

It is only last year, almost two decades after the event, that I was finally able to persuade the Department of Defense to downgrade the rules and certain related military studies. These materials were placed in the RECORD in March 1985 so that they might be readily available for the press and the public as a source of documentation and information of how the Armed Forces were handcuffed in the Vietnam War.

Today I wish to offer for the RECORD a valuable analysis and summary of the rules of engagement prepared by Mr. Terry Emerson of my staff, who has been invited to give one of the presentations at the national conference which will be held in Charlottesville tomorrow. To my knowledge, his is the first address to draw on the new information which has become available, and I think it contributes to public discussion and knowledge of the subject. I ask that his paper appear in the RECORD.

The s

MAKING WAR WITHOUT WILL: VIETNAM RULES OF ENGAGEMENT

(By J. Terry Emerson, Counsel to U.S. Senator Barry Goldwater)

INTRODUCTION

Neither a dovish Congress, nor an ineffective military, lost the war in Vietnam. Rules of Engagement, imposed by civilian officials, did.

Although Congress and Watergate share blame for thwarting Presidential ability to enforce the peace agreement with Hanoi after January 1973, civilian managers in the Executive Branch had long before prevented a military victory by dictating Rules of Engagement which were overly specific, inconsistent and unresponsive to the best professional military judgment.[1]

This is the conclusion of Senator Barry Goldwater and of other critics based on newly declassified documents revealing the incredibly complex and comprehensive set of self-imposed restrictions that governed the conduct of the war.

THREE CATEGORIES OF RULES

The controls fell into three categories, with those formally termed Rules of Engagement being promulgated by the Joint Chiefs of Staff pursuant to political policies imposed by the President and Secretary of Defense.[2] These Rules were designed to keep the war limited and avoid international incidents, in particular the possibility of direct confrontation with Communist China or the Soviet Union. The Rules dealt with operations in border areas and countries, with the Demilitarized Zone and with air operations conducted over North Vietnam. An unusual situation existed in Laos where, by Presidential directive, theater responsibility for all U.S. military operations was vested in the American Embassy, Vietnam, which validated all targets and areas of operation.[3]

A second set of restrictions, known as Operating Rules, were the responsibility of COMUSMACV (Commander, United States Military Assistance Command, Vietnam), who delegated most of the authority to the Commander, Seventh Air Force. These limitations governed the conduct of the ground war, tactical air operations and Naval gun fire missions.[4]

A third set of rules were designated Operating Restrictions. They were contained in the CINCPAC (Commander-in-Chief, Pacific Command) Basic Operations Orders and included prohibtions against striking locks, dams, dikes, hydro-electric plants and fishing boats.

POLICIES REPRESENTED BY RULES

Many of the Rules were designed to safeguard the lives and property of non-combatants. For example, the requirement to vali-

[1] In May 1984, before an earlier ABA Conference on Vietnam, I documented the numerous statutes in which Congress had collaborated with the Executive in making national policy for Indochina, beginning with 1949 when Congress literally shoved funds on President Truman to support anti-communist forces in the region.

[2] See discussion of three types of ROE in foreward to USAF Project CHECO 1966-69, reprinted in 131 Cong. Rec. (daily ed. Mar. 14, 1985), S. 2982.

[3] Project CHECO 1966-69, id., at S 2985.

[4] In an attempt to make target validation and clearance procedures for all Allied Forces consistent, American advisors were directed to insure that their Vietnamese counterparts adhered to all Rules of Engagement. American fire missions in support of South Vietnamese operations were restricted to those falling within the guidelines, and the Rules

date and approve potential targets for air strikes in South Vietnam permeated the entire system for command and control of United States air power used in a ground support role. Fire missions against villages and hamlets were required to be preceded by warnings made by leafelts or loud speakers, controlled by an airborne or ground observer, and executed only after approval by the Province Chief directly, even when hostile free fire was received from the area.[5]

In addition to humanitarian interests and the goal of keeping or winning the loyalty of the population, the Rules were cognizant of the law of war. Directives were published "to reaffirm the prohibition against commission of war crimes and related acts" and to establish a system for reporting suspected serious crimes or incidents, whether inflicted upon U.S. military or civilian personnal "or by U.S. military personnel upon hostile miliary or civilian personnel." [6]

It is not my purpose to focus on the law of war or command criminal responsibility, although it should be pointed out that in 1955 the United States ratified four Geneva Conventions relating to international conflicts and in 1977 signed two Protocols governing the conduct of war, which remain unratified.[7] Rather, I will look at the practical consequences of implementing a rigid code of self-imposed, and some would say, self-defeating restrictions, such as those which bound the U.S. military force in Vietnam.

DECLASSIFICATION OF RULES

The Rules evolved into an extensive, detailed set of restrictions, not easily committed to memory or to being implemented under moments of extreme stress. Even so, Seventh Air Force required all strike air crews and Forward Air Controllers to demonstrate a thorough knowledge of the Rules before assuming operational duties and to complete a written examination.[8]

For years the details of these Rules were classified "top secret." It is only in 1985, after the repeated and persistent efforts of Senator Goldwater and with the personal involvement of Secretary Weinberger, that the actual text of the Rules and certain related official studies were declassified. Of particular interest is Project CHECO (Contemporary Historical Examination of Current Operations), a scholarly historical documentation and examination of United States Air Force combat operations in Southeast Asia covering the period from 1960 to September 1972. The activity was managed by Headquarters, Pacific Air Forces, and provides an ongoing report on USAF policies and experiences prepared on a contemporary basis during the Vietnam War.

The actual Rules for operations in North Vietnam, Laos and Cambodia were issued in the form of daily message traffic and were not retained. They are described, however, in the three volume CHECO report. The detailed Rules for South Vietnam were issued as official directives and were preserved. These materials were placed in the CONGRESSIONAL RECORD by Senator Goldwater as a series of publications on March 6, 14, 18 and 26, 1985.[9]

DETAILED RESTRICTIONS

These documents reveal just how comprehensive the restrictions were that bound our forces in Vietnam. For example, one rule told American pilots they were not permitted to attack a North Vietnam Mig sitting on the runway. The only time it could be attacked was after it was in flight, was clearly identified and showed hostile intentions. For most of the war, our pilots were not authorized to attack North Vietnam military air bases even when engaged in immediate hot pursuit of hostile enemy aircraft. As late as May 1971, no North Vietnam airfield on which third nation aircraft were present could be attacked. A "hostile intention" rule applied to truck convoys driving on highways in Laos and North Vietnam. In some areas, enemy trucks could escape attack under the Rules simply by driving off the road. Military truck parks located more than 200 meters from a road were not destroyed under this Rule.

Another Rule provided that SAM missile sites and supporting radar systems could not be struck while they were under construction, but only after they became operational and actually fired at Allied aircraft. Moreover, targets were to be attacked only when weather conditions permitted their positive identification. Until the end of 1971, aircrews in South Vietnam had to refer to at least four basic sources of operation orders to find the applicable Rules. In Laos, photographic reconnaissance was prohibited on weather flights. According to Seventh Air Force records, the average time consumed between identification of a target area in Laos and the clearance to strike was 15.5 days. In order to get validation for restrike, another five or eight days were required. Since success of the missions required timely strikes in response to the most recent intelligence, the effectiveness of the bombing was lost.[10]

When the Rules were relaxed, the changes were gradual and not strong enough to serve strategic ends. Many times, limited extensions of target areas were granted, only to be withdrawn soon afterwards. Numerous bombing halts interrupted the effectiveness of earlier air operations.

PREPAREDNESS INVESTIGATING SUBCOMMITTEE REPORT

In 1967, the Preparedness Investigating Subcommittee of the Senate Armed Services Committee conducted extensive hearings relative to the conduct of the air war against North Vietnam. After gathering the facts, the Subcommittee issued a report on August 31 which was strongly critical of the Rules of Engagement.

The Subcommittee concluded: "That the air campaign has not achieved its objectives to a greater extent cannot be attributed to inability or impotence of air power. It attests, rather, to the fragmentation of our air might by overly restrictive controls, limitations, and the doctrine of "gradualism" placed on our aviation forces which prevented them from waging the air campaign in the manner and according to the timetable which was best calculated to achieve maximum results." [11]

The same report observed that Secretary of Defense McNamara and the Johnson Administration had discounted the unanimous professional judgment of our military commanders and the Joint Chiefs and substituted civilian judgment in the details of target selection and the timing of strikes. The Subcommittee charged these civilian managers with having "shackled the true potential of air power and permitted the buildup of what has become the world's most formidable antiaircraft defenses." [12] An important source of disagreement between the Subcommittee and Secretary McNamara arose out of its discovery that the Rules of Engagement were directly attributable for the fact that *"during the entire year of 1966 less than 1 percent of the total sorties flown against North Vietnam were against fixed targets on the JCS target list."* [13] Here the Subcommittee was referring to the fact that none of the targets could be hit without specific approval of the Secretary of Defense or other high civilian authority.

IMPACT ON MILITARY OPERATIONS

In military eyes, the concentration of the air war to areas well south of the vital Hanoi-Haiphong regions left the important targets untouched and created a large haven into which the enemy could with impunity import war materials, construct sanctuaries for his aircraft and install anti-aircraft defenses. By failing to close the major ports, prohibiting aerial mining of coastal water lines of communication and forbidding a bombing attack cutting off rail and road lines to China, air operations were piecemealed.[14] The result was to allow North Vietnam to adjust to the air campaign by importing war materials from Communist countries through routes immune from attack and then disbursing and storing this material in sanctuaries. From these safe areas North Vietnam infiltrated the material to South Vietnam and Laos. Thus, the Rules permitted the enemy to protect its forces and material, provided it with secure military training and staging areas and placed outside the reach of American air power precisely those areas which military judgment considered most essential to strike.[15]

One of the tragic consequences of the Rules of Engagement was the impact on American aircraft and pilot losses by giving North Vietnam time to build up its sophisticated air defense system and to disburse its stocks of war supplies. The point on which

military experts disagreed most vehemently with civilian managers was the certainty among professional military men that these self-imposed restrictions greatly increased U.S. casualties.[16]

JOINT CHIEFS ARGUE FOR STRONGER ACTION

Some writers have editorialized that military leaders did not convey to civilian officials the depth of their concern with the Rules. However, both the Pentagon Papers and the newly declassified documents reveal that the Joint Chiefs repeatedly argued against the artificial limitations impeding the military mission in Indochina. A handful of civilian advisors, such as Walt Rostow, agreed with military professionals that systematic and continued bombing of war making resources in North Vietnam would have decisive results, but Secretaries of Defense McNamara and Clifford refused to relax the Rules.

The Joint Chiefs and commanders in the field pressed time after time for changes. For example, a message from CINCPACAF on March 28, 1968, challenged the restrictions in the North as being inconsistent with the build up and reenforcement of U.S. forces in South Vietnam.[17] Also in early 1968, this view was pressed on Secretary of Defense Clark Clifford, who had convened a senior group of advisors on the war from the State and Defense Departments, CIA and White House. General Wheeler submitted a paper to this group on behalf of the Joint Chiefs. The cover memo for his paper noted that "General Wheeler would favor action to close the Port of Haiphong through mining or otherwise." But he did not present a specific paper on that item because President Johnson had already indicated that closing the ports was not an action he was going to consider, even as part of a new, comprehensive review.[18]

JCS BOMBING PAPER

What remained in the Joint Chief's paper was clear enough. It recommended:

"An integrated interdiction campaign should be undertaken against the road, rail and waterway lines of communication with the objective of isolating the logistics base of Hanoi and Haiphong from each other and the rest of North Vietnam." [19]

To achieve this objective, the Chiefs advised it was necessary to reduce the restricted and prohibited areas around Hanoi and Haiphong and to delete the Speical Northeast Coastal Armed Reconnaissance area which limited attacks on North Vietnamese craft to those within three nautical miles of the coast.

The Joint Chiefs explained how North Vietnam had taken advantage of the sanctuaries given them in the cities. The JCS paper stated:

"There have been repeated and reliable intelligence reports that indicate civilians not engaged in essential war supporting activities have been evacuated from the cities of Hanoi and Haiphong. Photographic intelligence, particularly of Haiphong, clearly shows that materials of war are stockpiled in all open storage areas and along the streets throughout almost one-half of the city. Rather than an area for urban living, the city has become an armed camp and a large logistics storage base." [20]

CHRISTMAS BOMBING AND PEACE AGREEMENT

But the Joint Chiefs' paper fell on deaf ears. On March 31, 1968, President Johnson announced he would not seek reelection and, at the same time, he restricted air strikes on North Vietnam to a line south of the 19th parallel. On December 1, he ordered the total halt of bombing and of B-52 overflights of North Vietnam, even during the conduct of authorized strikes within the Demilitarized Zone. From then until May of 1972, not even preemptive strikes against the maturing North Vietnamese Air Defense System south of the 20th parallel were authorized. This permitted the system to reach a high level of sophistication in which the North Vietnamese linked GCI (Ground Controlled Intercept) radars with the lock-on radar capability of SAM sites, allowing the enemy to aim SAMs undetected by our aircrews until the instant of firing.[21]

During the last week of March 1972, General Lavelle, Commander of the Seventh Air Force, was recalled for allegedly violating these restrictions. The same week North Vietnam launched a major offensive against South Vietnam and the Rules he was charged with offending were soon obsolete. Air operating authorities were steadily broadened through April until May 9, when President Nixon announced the mining of Haiphong Harbor and permitted interdiction bombing throughout North Vietnam below the Communist China buffer zone.[22] These attacks culminated with twelve consecutive days of B-52 strikes starting on December 18, 1972, and the rapid settlement of peace talks with Hanoi.[23]

CONCLUSION

Were the political considerations which initiated the Rules of Engagement well founded? Or might the architects of these restrictions be fairly criticized for lacking sufficient confidence and will?

In "Years of Upheaval", Henry Kissinger writes:

"The Kennedy and Johnson administrations trapped themselves between their convictions and their inhibitions, making a commitment large enough to hazard our global position but then executing it with so much hesitation as to defeat their purpose. They engaged us in Indochina for the objective of defeating a global conspiracy and then failed to press a military solution for fear of sparking a global conflict—a fear that was probably as exaggerated as the original assessment."[24]

Without derogating the principle of civilian control of the military, it should be recognized that once diplomacy has failed and civilian policy makers have decided on war, the result of placing military strategy and tactical operations under the day-to-day direction of unskilled amateurs may be a greater sacrifice in blood and the denial of a military victory. The lesson of Vietnam is that once Americans forces are committed, there is no logical goal except to prevail.●

[16] These concerns echoed the admonition given by President Eisenhower, who a decade earlier had instructed a National Security Council meeting on United States policy toward the Far East, that "he wanted no more sanctuaries as had existed for the Communists in Manchuria during the Korean War." JOB TRAINING FOR ALL AMERICA'S YOUTH: THE ESCALATING NEED

● Mr. GORE. Mr. President, this week, October 12-18, has been designated National Job Skills Week. At a recent press conference on National Job Skills Week, Larry Brown, who serves as both president of the 70001 Training and Development Institute and chairman of the National Youth Employment Coalition made remarks about youth unemployment and school dropout rates in conjunction with the issues of job training and job skills. I want to share Mr. Brown's statement with my colleagues, and I ask that it be printed in the RECORD.

The statement follows:

REMARKS BY LARRY BROWN, PRESIDENT, 70001 TRAINING AND EMPLOYMENT INSTITUTE; CHAIRMAN, NATIONAL YOUTH EMPLOYMENT COALITION

For years, youth unemployment and excessive school dropout rates have been considered a serious social problem with economic overtones. But if the demographers are to be believed, during the next ten years these problems will become America's principal economic shortcoming as well as a tinderbox for explosive social upheaval.

The size of the labor force will not meet the demand and the skills, both basic and occupational, of new workers will fall woefully short of the fundamentals required in the workplace.

The implications on productivity are evident. The cost of goods and services will be driven up by the added expense of employer supplied education, day care, and retraining, while output is slowed by a workforce unable to efficiently manipulate new technology. Skilled workers, high in demand, will change employers regularly.

Wrenching social pressure will create unfortunate ironies. Youth unemployment will stay high, although many fewer youth enter the labor market. General unemployment will continue while jobs remain unfilled because skills do not match demand. U.S. workers will remain idle while additional jobs are sent off-shore or skilled immigrants are invited in as guest workers and dislocation continues in some areas and industries while others experience shortages. Single mothers will decline opportunities to work because of the unavailability of affordable daycare, making unemployment and welfare the only alternative.

Small business will face a novel threat from large companies. It won't be competition for financial capital, but for human re-

sources. The corporations that will be able to afford company schools, in-house daycare, and similar incentives, will be the ones able to attract skilled workers in scarce supply.

The statistics which describe the problem and the population are bleak, but we deceive ouselves if we conclude that somehow its the people we are discussing that are flawed—that they are unable or unwilling to be a part of the American workplace. Quite the contrary, 70001 Training and Employment Institute has had the privilege of serving over 60,000 high school dropouts and we come away from that experience with optimism.

These young people have dreams, hope, resilience, and determination. They are also reasonable and practical. They do not expect to have a job or a paycheck handed to them, but neither are they willing to pursue help that is inaccessible or unobtainable. They will walk out of schools that are insensitive or unsafe. They will have babies if that's the only way to care or be cared about and they will remain unskilled if the hurdles into a job training program are too severe or too impractical.

National Job Skills Week is part of both a simple and complex story. The simple one is that jobs now and tomorrow require people who are trained and always prepared for retraining. The complex story involves preschool education, dropout prevention and recovery, adult literacy, teen parenting programs, subsidized child care, welfare reform, and rational immigration policy. They are all part of the narrative that will characterize America's workforce, for better or worse, in the year 2000.●

GREEK INDEPENDENCE DAY

● Mr. SPECTER. On October 8, 1986, the Senate passed Senate Joint Resolution 308, as amended by the House, to commemorate March 15, 1987, as Greek Independence Day in the United States. I was pleased to sponsor the original version which passed the Senate earlier this year, commemorating March 25, 1986, as the 165th anniversary; and to work with Senator LAUTENBERG to see that the amended resolution was enacted.

Over 165 years ago the Greeks began the revolution that would free them from the Ottoman Empire and return Greece to its democratic heritage. It was, of course, the ancient Greeks who developed the concept of democracy in which the supreme power to govern was vested in the people. Our Founding Fathers drew heavily upon the political and philosophical experience of ancient Greece in forming our representative democracy. How fitting, then, that we should recognize the anniversary of the beginning of their effort to return to that democratic tradition.

This democratic form of government is only the most obvious of the many benefits we gained from the Greek people. The ancient Greeks contributed a great deal to the modern world and particularly to the United States of America, including art and philosophy, science, and law. Today, Greek Americans continue to enrich our culture and to make valuable contributions to American society, business, and government.

By this resolution, we are saluting the accomplishments of Greek-Americans in every field. And we are confident that United States-Greek relations will continue to improve strongly in the years ahead.●

SUPERFUND

● Mr. MITCHELL. Mr. President, 2 weeks ago, the Senate passed the Superfund conference report by a vote of 88 to 8. Last week, the House also passed the reauthorization package by a vote of 386 to 27. These votes demonstrate beyond any doubt that this legislation has the strong support of the entire Congress.

We have labored long and hard to produce an agreement that would garner this kind of overwhelming support. The issues are complex, but the need is critical. Congress has already consumed much time in completing this reauthorization process, but we have finally accomplished our task in a manner that is acceptable to about everyone.

Regrettably, however, we have been told that the President is seriously considering a pocket veto of this legislation.

It is clearly the prerogative of the President to veto legislation he opposes. It is also the prerogative of the Congress to override the veto. A pocket veto, however, thwarts the will of Congress. This is particularly true in the case of Superfund, where Congress has made its will known so clearly.

Rather than permit the President to pocket veto this essential legislation, I urge the majority leader to not adjourn sine die until Congress has a chance to vote on an override of a Presidential veto, if there is one. I understand the House is interested in staying in session, and 81 Senators signed a letter in support of no adjournment until the President signs or vetoes the bill.

The effect of a pocket veto of Superfund would be devastating. Everyone concerned about cleaning up toxic waste sites agrees that there are thousands of sites, far more than we first estimated. This massive problems will continue unabated if the President refuses to sign the legislation.

Superfund protects public health. If the President vetoes Superfund, the program will be shut down. Without Superfund, children near Superfund sites will continue to drink contaminated water and play in contaminated soil and will become ill from the exposure to the hazardous substances.

Many of us have worked to prevent such an outcome. We believe that there should be a program in place to protect people from exposure to hazardous substances. It will be a sad day if the President vetoes Congress' decision to provide for such a program. The public health would be at risk if the President vetos this legislation without giving Congress a chance to override the veto.

I urge the President to consider the pleas of the public and of the members of Congress and sign the Superfund legislation.

I also urge the majority leader to keep the Senate in session so we will have a chance to respond to a Presidential veto, should one occur.●

CEREMONIAL DEDICATION FOR THE NEW NAACP HEADQUARTERS

● Mr. SPECTER. Mr. President, on Saturday, October 18, 1986, for the first time in the history of its 77 years of existence, the National Association for the Advancement of Colored People [NAACP] shall open the doors of its new permanent national headquarters and conference center in Baltimore, MD.

This important landmark will provide additional facilities for a library, research, and archives center. According to Dr. Benjamin L. Hooks, executive director of this prominent civil rights organization, "buying our own building is symbolic of its efforts to promote economic equality and would serve as 'the Camp David of Black America.'"

FROM THE NIAGARA MOVEMENT TO NOW

The history of the NAACP is one that is well known. As noted by Dr. John Hope Franklin, a renowned black historian in "From Slavery to Freedom: A History of Negro Americans,"

> The sordid picture of Negro life in America in the 20th century had moved a group of young blacks as early as 1905 to reorganize for determined and aggressive action in order to secure full citizenship. They reasoned that the day of temporizing was over; a war was on and they decided to fight to the finish. This group, under the leadership of W. E. B. Dubois met at Niagara Falls, Canada in June 1905 and drew up a platform for aggressive action. Among other things, they demanded freedom of speech and criticism, manhood, suffrage, the abolition of all distinctions based on race, the recognition of the basic principles of human brotherhood, and respect for the working man.

Despite an open attack made on them for their radicalism, this group incorporated themselves as the Niagara Movement and met at Harpers Ferry in the following year.

In 1909, on the birthday of President Abraham Lincoln and in the spirit of abolition, a conference was held to address the issue of the "Negro question," which was extremely prevalent due to the high intensity of race wars in the North. It was a distinguished gathering of educators, professors, publicists, bishops, judges, and social workers.

After many long hours of discussion and debate, plans were made to establish a permanent organization, which came to be known as the National As-

sociation for the Advancement of Colored People.

The organization pledged itself to work for the abolition of all forced segregation, equal education for black and white children, the complete enfranchisement of blacks, and the enforcement of the 14th and 15th amendments.

In the first year of its existence the NAACP launched a program to widen the industrial opportunities for blacks, to seek greater police protection for blacks in the South and to carry on a crusade against lynching and lawlessness. Important instrumentalities in carrying out its program were the publication The Crisis and the Legal Redress Committee. It was the primary task of DuBois to get the magazine going.

In 1910 the NAACP launched its first successful legal effort to have a Baltimore statute declared unconstitutional, legalizing residential segregation. During the same year the organization won the release of two young black men held in New Jersey on trumped up murder charges.

In 1917 riots broke out in East St. Louis, IL, in Waco, TX and Memphis, TN. In response, black writer James Weldon Johnson, NAACP field secretary, organized an antilynching parade in New York. The huge demonstration attracted 15,000 black marchers who paraded down Fifth Avenue. It was the first of many such protests.

The organization reached new heights in the 1950's and early 1960's. In 1954, the NAACP took part in the historic Supreme Court cases, *Brown* versus *Board of Education of Topeka, Kansas,* which marked the end of legal segregation in education. During the following decade the NAACP reached its peak. Its membership soared from less than a quarter of a million to more than 500,000.

PUSHING A PROGRAM OF BLACK SELF-HELP

Today, under the leadership of Dr. Hooks, the NAACP has directed a significant level of emphasis on reducing the economic gap between blacks and whites. They are calling on blacks to recognize the potential of their consumer dollar as economic clout and to regenerate this capital in the black community to develop economic self-sufficiency.

Building on the economic accomplishments over the years the NAACP is currently engaged in "fair share" hiring and contracting accords with 32 firms, and has actively participated in boycotts to protest U.S. corporation involvement in South Africa.

In the political arena, the NAACP leadership has inspired a new emphasis on organizing the black community, particularly on voter registration and education, and the development of voting blocs during local and congressional elections.

Despite critics' charges that the NAACP has outlived its usefulness, it is my strong belief that we can never abandon the banner for human and civil rights for blacks and other minorities in America.

The NAACP has done invaluable work. It has put forth consistent and unwavering efforts in litigating cases over the years. It is the NAACP which has been at the forefront of recording the racial implications of one legal case after another. Its role in the history of the black struggle is unmistaken and indispensable.

Mr. President, I urge my colleagues to join me in commemorating this joyous historical occasion and to encourage the work for its continued success.●

SALUTE THE BOYS OF VIETNAM

● Mr. SASSER. Mr. President, I would like to bring to the attention of my colleagues in the Senate a song written by a man in Florida and dedicated to the veterans of the Vietnam conflict.

Entitled "Salute the Boys of Vietnam," the song is currently being distributed by the Fischer & Lucas Co. of Nashville, TN.

I had the pleasure of meeting Mr. Fischer recently and receiving a copy of the song and a note from J.C. Weaver, its author.

This song was written for the boys of Vietnam because of the strong feeling I have in my heart . . . . for every time I see a boy with an arm missing, a leg missing, or even blind, he tells me he was in the Vietnam war—I know they didn't choose to go there, but they did to represent America. May God bless them!

Mr. President, I would like to share the lyrics of this song with the Senate, and I ask that the lyrics be printed in the RECORD.

The lyrics follow:

SALUTE THE BOYS OF VIETNAM

Leaving home with papers in hand
To fight a war that no one understands
Trying to be a man in this strange land
Crawling through the jungles of Vietnam

We salute the boys of Vietnam
We salute the ones that gave it all
We salute the boys of Vietnam
We salute the ones that had to fall

Shiny medals and ribbons of a war
Memories of a battle that is no more
Fighting boys of America who stood tall
Remember those whose names are on the wall

We salute the boys of Vietnam
We salute the ones that gave it all
We salute the boys of Vietnam
We salute the ones that had to fall

We salute the boys of Vietnam
We salute the ones that gave it all
We salute the boys of Vietnam
We salute the ones that had to fall

HONORING MS. CLAUDIA DEWANE, DIRECTOR OF THE VIETNAM VETERANS OUTREACH CENTER IN HARRISBURG

● Mr. SPECTER. Mr. President, 11 years after the United States conflict with Vietnam has ended, our Nation still struggles to understand one of the most turbulent eras in American history. It is therefore with great pride that I recognize Ms. Claudia Dewane and her efforts on behalf of Vietnam veterans in central Pennsylvania.

As director of the Vietnam Veterans Outreach Center in Harrisburg, PA. Ms. Dewane is contributing to the healing process that our Nation is now experiencing following the Vietnam conflict. Addressing what she views as an unresolved sadness concerning Vietnam, Ms. Dewane works with veterans, especially female veterans, whose service has been largely overlooked. The outreach center attempts to work out the feelings of rage, helplessness, fear, guilt, and depression that many veterans have faced after the end of the war. These emotions, symptoms of what is termed posttraumatic stress disorder, can get in the way of having a normal, happy and whole life for many veterans.

Through counseling and the formation of support groups, Ms. Dewane has helped many women who served during the Vietnam war work through their fears and sadness.

Thanks to Ms. Dewane, many veterans are receiving the assistance necessary to make their lives whole again.●

ARMS CONTROL PROGRESS

● Mr. LUGAR. Mr. President, I rise to salute President Reagan for the very real progress that he was able to achieve in arms control at the Reykjavik summit. We Americans often like to pick winners and losers quickly, but in this case, we would do better to take a longer view. We and the Soviets have been engaged in a gradual arms negotiations process over a number of years. Reykjavik represents one more important milestone on the road to meaningful arms reduction.

In one sense, both sides emerged as "winners." Arms control was discussed in greater detail and at a higher level than ever before. Important new ground was broken, offers and apparent agreement to very deep arms reductions were progressed to where a concluding agreement seems inevitable and the two sides narrowed their differences on several key issues. It is my hope that the progress made in Reykjavik can now be built upon at the bargaining table in Geneva.

The President was, in my judgment, absolutely right in refusing to kill SDI, as the Soviets demanded. The Soviets for over 20 years have been in-

volved in their own strategic defense program. Fully half of Soviet expenditures in strategic arms have been spent on strategic defense. Although some people question whether SDI will work, the Soviets' strenuous objections to it indicate they believe it will, and so do I.

The President did offer to suspend deployment of SDI for a 10-year period, during which both sides would reduce, and then eliminate, their strategic missile forces. At that point, we would be willing to share SDI with the Soviets so that both would be protected from any third country that chooses to go nuclear. I am hopeful that the Soviets will reconsider this offer. If both sides eliminate their strategic missiles, neither would have anything to fear from SDI deployment.

In any event, I am optimistic about the arms control process. Reykjavik may yet be viewed as a decisive turning point. We would all do well, therefore, from making quick judgments and to resist the temptation to pick winners and losers too hastily.●

EXAMPLE OF A POSITIVE TRANSITION RULE

● Mr. KASTEN. Mr. President, there has been considerable discussion about the role of transition rules as part of the tax package. I would like to give one example of where a transition rule is the only equitable action and is entirely appropriate.

The city of Kenosha, several years ago, entered into a contract with the Corps of Engineers regarding the operation of a confined dredge facility. That contract specified the Corps of Engineers would turn over a newly created island to the city for its use.

Unfortunately, the corps did not fulfill its end of the deal. The city was unable to proceed with a planned redevelopment project that was contingent on the corps completing its work. This year, with the adoption of major tax reform, many of the incentives for that project would be lost. The transition rule adopted for the city of Kenosha simply gave them the same incentives that were lost because the Government failed to live up to a contract.

I ask that a letter from the city describing how this rule will work be printed at this point in the RECORD.

The letter follows:

CITY OF KENOSHA,
Kenosha, WI, October 7, 1986.

Hon. LES ASPIN,
House of Representatives, Cannon Building, Washington, DC.
Hon. WILLIAM PROXMIRE,
U.S Senate, Dirksen Building, Washington, DC.
Hon. ROBERT W. KASTEN, Jr.,
U.S. Senate, Hart Senate Office Building, Washington, DC.

Re: Kenosha Harbor, in Kenosha, Wisconsin (Subparagraphs 204 (a)(32)(M) and 1317(6)(W) of H.S. 3838 as Reported By the Conference Committee and Passed By the United States House of Representatives and Senate).

DEAR GENTLEMEN: On behalf of the City of Kenosha, Wisconsin, its taxpayers and residents, I wish to personally thank all of you for your tireless efforts in obtaining Transition Rules in H.S. 3838 (Tax Reform Act of 1986) for our downtown redevelopment project which is identified in Subparagraphs 204(a)(32)(M) of such 1986 Act as "Kenosha Harbor, in Kenosha, Wisconsin" and some features of which are set out in Subparagraph 1317 (6)(W) of such 1986 Act.

I ask that you convey our deep appreciation to all of the members of the 99th Congress who voted for H.S. 3838 and our project's Transition Rules.

We here in Kenosha have been working for a long time on our multistage downtown redevelopment project, the first portion of which involves the creation of a lakefront park, recreational area and marina on the site of the Army Corps of Engineers confined spoils disposal facility and adjacent lands. The Kenosha project also includes redevelopment of adjacent areas, the corridor between the Kenosha lakefront and central business district, as well as the Kenosha downtown itself. Our redevelopment project will include new and rehabilitated residential, commercial, office and mixed-use facilities developed and redeveloped during the years to come by Link Programs, Inc. (presently the developer of record for the Kenosha project's first stage) and other developer(s).

Subparagraph 1317(6)(W) of the Act refers to the Kenosha project as being located on lands presently or formerly submerged under the waters of Lake Michigan. Like most other cities on the Great Lakes, at various times in the past substantially all of what is now the City of Kenosha is on land which was submerged under the waters of Lake Michigan. As you will recall from your recent trip to Kenosha, the project's land area is bounded on the east by the east wall of the Corps confined spoils disposal facility (extended), bounded on the north by 48th Street (extended), bounded on the west by the present Chicago-Northwestern railroad tracks, and bounded on the south by the north line of Eichelman Park (60th Street) (extended). This area is substantially smaller than the total area in the City of Kenosha which formerly was submerged under the waters of Lake Michigan.

A part of the Kenosha project's land area formerly was improved with the Kenosh Stadium, which we demolished prior to December 31, 1983. Also legislation for the parts of the project's land granted to the City by the State of Wisconsin was included in the State's biennium budget prior to December 31, 1983. The balance of our downtown redevelopment project's land is areas adjacent to these parts, that is, within the project's overall land area described above, so that the entire area and all of the project's various stages are intended to benefit from the Transition Rule in Section 1317(6)(W) of the 1986 Act.

Finally, we understand that the $105,000,000 mentioned in Subparagraph 1317(6)(W) of the 1986 Act does not apply to the Transition Rule contained in Subparagraph 204(a)(32)(M) of such Act, and that the $105,000,000 limitation only applies to private activity bonds which are qualified redevelopment bonds solely by reason of the Transition Rule, Subparagraph 1317(6)(W) and does not apply to any bond the interest of which is not exempt from federal income tax or to any bond which is a qualified bond without application of such Transition Rules.

While the Transition Rules for our downtown redevelopment project included in H.R. 3838 do not completely place the City of Kenosha in the position it would have been had the Corps completed filling and closure of the CDF in Kenosha Harbor in April of 1984 at the end of its stipulated 10-year lifetime, the Transition Rules are certainly steps in the right direction. The economic impact of the adverse changes not covered by our project's Transition Rules remain a part of the City's claim against the Corps, which with your continued support, we hope can be finally and favorably resolved in the near future.

Very truly yours,

JOHN D. BILOTTI,
Mayor.

CITY OF KENOSHA,
Kenosha, WI, October 7, 1986.

Hon. LES ASPIN,
House of Representatives, Cannon Building, Washington, DC.
Hon. WILLIAM PROXMIRE,
U.S. Senate, Dirksen Building, Washington, DC.
Hon. ROBERT W. KASTEN, Jr.,
U.S. Senate, Hart Senate Office Building, Washington, DC.

GENTLEMEN: While the cryptic nature of the two references to Kenosha's project in the Tax Reform Act of 1986 forming its Transition Rules certainly presents unique opportunities for the City, when employed aggressively, the City's Special Counsel, Messrs. Bierman and Fleck of Foley & Lardner, are concerned that subsequent bond counsel (typically a conservative lot) will take exactly the opposite tact and interpret the Kenosha Transition Rules so as to defeat their intent and purpose.

Essentially the problem is one of lack of legislative history at the Federal Government level. At this juncture the legislative history consists of the Kasten-Packwood colloquy in the Congressional Record of June 24, 1986, and correspondence from my office and our special counsel. It would be a real chore to put together a paper trail which would satisfy a conservative bond counsel.

Therefore, at the suggestion of our special counsel, I am writing to you under separate cover describing our Project, and request that you do two things:

(1) Arrange for my descriptive letter to you to be read into the Congressional Record in both the Senate and House of Representatives, before the coming adjournment;

(2) Send me a confirmatory letter acknowledging that your understanding of the Kenosha Project is as described in my letter, and that such Project is the Project intended to benefit from the two Transition Rules included in H.R. 3838 (a draft of confirmatory letter is enclosed), and arrange for the confirmatory letter to appear in the Congressional Record along with my descriptive letter. It would really be helpful if the concurrence of Senator Packwood and Congressman Rostenkowski also could be obtained and put in the Congressional Record—truly the icing on the cake.

We will need a copy of the pages from the Congressional Record, and will retain same, together with your confirmatory letter, in our records for use in the future. We have all worked so hard to get this far, that it would be a crime to jeopardize our progress by failing to take these additional steps.

I know that I can count on you for this additional assistance.

Best personal regards,

JOHN D. BILOTTI,
Mayor.●

DISCOUNTING OF PROPERTY-CASUALTY LOSS RESERVES

● Mr. WALLOP. Mr. President, as a conferee on the tax bill, one of the things I have found most troublesome is the wide latitude granted staff to develop policy on issues never formally considered by the conferees. I have spent some time here on the floor of the Senate trying to highlight such issues, as I am sure, as Senators, we will have to answer to our constituents in the future when the full impact of these staff decisions becomes known. As a further example of the types of concerns I have today, I would like to raise questions on the fairness of the final version of H.R. 3838 with regard to so-called fresh start as it relates to the discounting of property-casualty loss reserves.

Title X of the conference agreement contains a significant revision of the tax treatment of property and casualty insurance companies. Within that section, the reserve strengthening feature of the fresh start adjustment was significantly modified in conference. According to the conference agreement reserve strengthening that occurs in 1986 for accident years 1985 and prior is, in effect, disallowed as a result of the application of so-call fresh start accounting provisions.

Presumably, the intent is to prevent insurers from artificially increasing the opening reserve in order to increase income forgiven under fresh start. Implicit in this provision is the notion that reserve strengthening actions taken by insurance companies during 1986 for prior accident years is heavily motivated by the desire to avoid Federal income taxes. Nothing could be further from the truth. While it certainly can be acknowledged that increases in reserves decrease an insurance company's Federal tax burden, there are substantial and legitimate nontax reasons for increasing the provisions for unpaid losses in prior accident years. First, reserves are estimates made in many cases by the employment of statistical models. Models are subject to many types of errors such as parameter error, specification error and statistical error. Reserves estimates are subject to reevaluation. When reserves are initially underestimated, they must be revalued at a higher level. This reevaluation is what you characterize as reserve strengthening.

Second, reserve strengthening occurs only when reserves are inadequate. The weakness of reserves in the property-casualty industry has been the focus of public attention in recent years. Insurance availability and the cost has, indeed, been much discussed on the floor of this body. The industry's financial condition now is very fragile. Sound financial management and honest financial reporting demands that reserves be strengthened where appropriate.

A review of an Analysis of Loss and Loss Adjustment Expense Development exhibits contained in 10-K Forms filed by property-casualty insurers would clearly show that many companies have been historically underreserved and reserve strengthening for them is a normal part of doing business.

These companies have already reported too much income by underreserving in the first place. Insurance companies should not be penalized by the tax laws where reserves are strengthened in accordance with sound actuarial reserving practices. These companies have a responsibility to accurately and fairly report their financial condition. It is not in the public interest to provide them with a perverse incentive for maintaining inadequate reserves either. The reserve strengthening definition as currently written in the conference report is arbitrary and inconsistent with one of the goals of tax reform, that is, fostering positive behavioral response from corporate and individual taxpayers toward the Federal tax system.

The Senate bill's reserve strengthening provision was fair. The Internal Revenue Service, as it does under current law, would combat abusive reserving practices. The conference modification substitutes a simplistic, cookbook approach that is entirely inappropriate and will likely create tensions causing companies to underreserve to the potential detriment of their policyholders.●

TRIBUTE TO THE BOSTON RED SOX

● Mr. PELL. Mr. President, I wish to join with all of New England today in tipping my hat to the Boston Red Sox, the winners last night of their first American League pennant since 1975. The Red Sox have brought great pleasure and excitement to their fans, and I am particularly proud of the fact that 14 of the 24 players on the Red Sox team previously played for the Pawtucket Red Sox farm club. Included in this group are Roger Clemens, the winner of last night's pennant clinching game and a 24-game winner during the regular season, Marty Barrett, the Most Valuable Player in the just concluded playoffs, and Jim Rice, the captain of the Red Sox and successor to Ted Williams and Carl Yastremski as the left fielder and leader of the Boston club. Pawtucket, RI, has played a real role in the success of this year's team by serving as a training ground for so many future players and I am proud that my State is an integral part of the Boston Red Sox organization.

Autumn is always a beautiful season in New England, and it is an especially memorable time of year whenever the Red Sox hoist the American League flag high over Fenway Park in Boston. I join the thousands of baseball fans in my State in wishing the Red Sox well in the upcoming World Series against the New York Mets.●

THE TRIAL OF JUDGE HARRY E. CLAIBORNE

● Mr. EVANS. Mr. President, when the Senate tries an impeachment case, we take upon our shoulders the most weighty of the responsibilities U.S. Senators are obliged to bear. In the recent Claiborne trial, we were asked to cast our votes to acquit or convict a man whom the House of Representatives had voted unanimously to impeach. I trust that these votes were not easy for any Member.

No person delights in passing judgment on another. Even with appropriate standards of review, the task is difficult. That is why citizens sitting as jurors in criminal trials are given elaborate instructions and clear guidance. Senators sitting as jurors in an impeachment trial have little guidance. But what guidance we are given should be followed.

In a matter of this gravity it is wholly right and proper that we avail ourselves of all resources which might assist us in reasoned deliberations. Yet, in this case we chose to make do with incomplete information and a nonstandard of review. Although all 100 of us sat in judgment, only a chosen few heard testimony or examined witnesses.

A cardinal precept of the criminal law is that a conviction is proper only when judgment is rendered by a jury which has had full and complete exposure to the presentations of the prosecution and defense. An incomplete record is flatly insufficient as a basis for a final decision. But we voted not to have the full Senate hear witnesses or have an opportunity to question the accused.

Moreover, I believe that once the case has been presented to us, we should apply a consistent standard of review. While it is of course proper for the Senate to decide for itself what the standard it, once determined it should be applied by all. But we voted to deny to ourselves the benefit of an explicit standard of review.

Under the Constitution, "the Senate shall have the sole power to try all impeachments." What is left unanswered is whether judgment in cases of impeachment can be rendered without the Senate actually having had a chance to take sufficient time to hear

testimony, evaluate the credibility of witnesses, and assess the full range of evidence. If the Founding Fathers had foreseen that election year haste was a potential impediment to careful consideration in the Senate it is likely they would have handed down to us more detailed instructions.

In prior impeachment cases, the full Senate had an opportunity to receive all the evidence directly. No committee was appointed to serve as a buffer between the accused and those responsible for making the final judgment. This case was also unprecedented in another respect. While more judges have been tried than any other class of civil officer, this case apparently was the first one in which the accused had already been convicted in a court of law. Neither the Constitution nor previous cases shed much light on the path which is to be followed under such circumstances.

It is generally acknowleged that the framers of our Constitution borrowed heavily from the British when drafting the impeachment provisions. Yet, while a Senate impeachment trial is procedurally analogous to a trial before the House of Lords, the object of the proceedings is decidedly different. English impeachments contemplate imposition of criminal penalties upon conviction. In the case of Archbishop Laud, the lords went so far as to impose the death penalty.

Under our Constitution the penalty for conviction is limited to removal from office. Subsequent civil or criminal actions are not precluded, nor are they required. Once convicted, a civil officer must be removed from office because neither immunity from prosecution nor Presidential pardon are available to those whom the Senate has voted to convict.

Our vote was the final word on Judge Claiborne's career. We were the trial court and the appellate court at the same time. It was thus incumbent upon us to take the utmost care to ensure that our proceedings were proper. I believe we lost sight of the fact that the procedures of justice are often more important than the substance of the laws in creating the perception of fairness.

That brings us to a discussion of the actual charges. We considered four articles of impeachment. It was our obligation to decide whether any of those articles warranted conviction.

But what constitutes an impeachable offense? Article 2, section 4 of the Constitution states that civil officers "shall be removed from office on impeachment for, and conviction of, treason, bribery, or other high crimes and misdemeanors." In this case, neither of the specifically enumerated crimes—treason and bribery—were alleged. We were limited then to considering whether the misconduct of Judge Claiborne was sufficiently egregious that it falls within the ambit of the general term.

Constitutional scholars generally agree that only a limited group of offenses qualify as "high crimes and misdemeanors." Evidence suggests that the framers intended that the English "great offenses" define the range of misconduct contemplated by our Constitution. At common law in England, misapplication of funds, abuse of official power, neglect of duty, encroachment on or contempt of legislative prerogatives, and corruption were impeachable offenses. Whether the list is exclusive is open to question.

During the impeachment trial of President Andrew Johnson, House manager John Bingham suggested that it may be inappropriate to take an overly narrow view of what constitutes impermissible behavior.

An impeachable high crime or misdemeanor is one in its nature or consequences subversive of some fundamental or essential principle of government or highly prejudicial to the public interest, and this may consist of a violation of the Constitution, of law, of an official oath, or of duty, by an act committed or omitted, or, without violating a positive law, by the abuse of discretionary powers from improper motives or for an improper purpose.

Clearly, our object here should have been to ensure that we took a balanced and fair approach to evaluating the acts for which Judge Claiborne was impeached. In making that evaluation, it was important to keep in mind that the stakes were higher than removal of a judge from office. The real issue was whether we would do more harm to the cause of justice by acting in undo haste than we might contribute to the cause of justice by removing a convicted felon from the Federal bench.

Under article III, section 1, judges "shall hold their offices during good behavior." Thus, it may have been appropriate to hold Judge Claiborne to a higher standard than that which might apply to civil officers generally. The judiciary play a critical role in our system of government and nothing would be more destructive than to permit the taint of official indifference to law to permeate the judicial system. It is equally true that we should not have allowed the Senate proceedings to adhere to any but the highest standards.

One critical question was whether the mere fact of conviction so besmirches the judicial facade that a thorough independent investigation was unnecessary. If so, what was the real point of these proceedings? I felt that we were bound to do more than simply ratify a decision already made.

Lawrence Tribe, an eminent constitutional scholar, has stated that "a showing of criminality is neither necessary nor sufficient for the specification of an impeachable offense." Certainly, violation of a speed limit would be insufficient by itself to warrant an impeachment. At the same time, a willing violation of the code of judicial conduct may be. In every instance, it is up to the Senate to evaluate all of the circumstances surrounding the conduct at issue. Only then can we truly say that we have discharged our responsibilities in full accord with the oath we have taken.

It may be that a full examination of the facts of this case would have lead me to a clear conclusion that Judge Claiborne acted with criminal intent and that conviction was justified. But, it may also be true that such an examination would have raised sufficient doubts in the minds of at least 34 Senators that we would have voted to acquit. The trial of an impeachment is no place for shortcuts or haste. Justice may be elusive, but that is no excuse for a half-hearted try to find it.●

OMB-AAU NEGOTIATED REVISION OF CIRCULAR A-21

● Mr. EVANS. Mr. President, recently, the Office of Management and Budget [OMB], and the Association of American Universities reached agreement on revision of circular A-21. This agreement marks the culmination of a long and arduous negotiation process that has involved Congress, OMB and the biomedical research community.

Circular A-21 governs reimbursement of indirect costs to grantees in support of Federal research grants. While there was general agreement by all that the circular needed revision to reflect changes in university administration affecting biomedical research, there was no clear consensus on how it could be redrafted.

I, along with the senior Senator from Washington [Mr. GORTON], and others have insisted that any OMB revision of A-21 be done in careful consultation with the university research community. I am pleased to report that a mutually accepted revision has been agreed to, in principle. I believe this agreement reflects much hard work and diligence by both OMB and the university research community. I am hopeful that it will be a final solution so we can move ahead to strengthen the capacity for research and advanced training in the nation's universities.

Mr. President, I ask unanimous consent that a statement in support of the agreed revision by Robert Rosenzweig, president of the Association of American Universities, and a description of the new proposal be inserted in the RECORD.

The material follows:

STATEMENT ON PROPOSED REVISION OF OMB CIRCULAR A-21

(Robert M. Rosenzweig, President, Association of American Universities, September 29, 1986)

The decision of OMB to amend its June 9 revision of Circular A-21 is welcome news. The new proposal (attached) is an improvement over earlier versions.

Reaching this agreement has been a long and difficult process. We are grateful for the assistance of OMB Deputy Director Joseph R. Wright, who helped, through discussions with the Government-University-Industry Research Roundtable, to seek balance among the concerns of government officials, university administrators, and faculty. The efforts of OMB to respond to university concerns affirm the importance of working together on important national research policy issues. We are extremely grateful to Members of Congress who encouraged and aided resolution of this contentious and complicated issue.

The original February proposal was published with no advance consultation with universities. Discussions since that time have improved the proposed revision. Nevertheless, it was clear from the start that the motivation for the change was budgetary and that a set of cost principles, developed over the years and closely linked to the nature of our peculiar system of higher education, was being used to "save" $100 million without regard to any other consequences.

It is important to understand that university people view A-21 as a document grounded in management considerations that have fiscal implications, rather than the other way around. To reverse those, as seems to have happened this year, exposes universities to the risk of sudden, uncontrollable, and unpredictable change. That sense of risk was compounded by the fact that the people in OMB who have historically been concerned with A-21 changes were not involved in this one, and those who were involved, able as they are, were largely unfamiliar with the issues and were impelled by their view of what the budget required.

On one point there is unanimity among university presidents, and that is that future changes in A-21 must be considered outside the framework of the annual budget. Obviously, budgetary consequences are relevant, but changes proposed primarily in order to meet a budgetary target will be strongly resisted. The proper way to deal with the budget is through the budget and appropriations process, not by manipulating the accounting principles.

The special studies on which OMB and the universities have agreed to cooperate will help lay the foundation for better policy. Additionally, the work of the Government-University-Industry Research Roundtable shows promise of producing more efficient and effective relationships in the area of research administration. We hope that we can now move forward to improve the system so that basic scientific research and the universities in which it takes place will remain strong and vital.

DESCRIPTION OF PROPOSED REVISION OF OMB CIRCULAR A-21

This revision of OMB Circular A-21 excludes from cost-based reimbursement the administrative activities of faculty, department heads, and other academic personnel with responsibilities equivalent to those of regular faculty (professional personnel conducting research and instruction) and substitutes a fixed rate of 3.6 percent of modified total direct costs. In effect, this revision concludes that the activities of these persons are too difficult and onerous to measure and to attribute to the costs of research and, therefore, it is best to substitute a fixed reimbursement for the current system of trying to measure actual costs through "effort reporting." This proposed revision will reduce "faculty effort reporting" that has long been considered by faculty to be one of the most unnecessary and burdensome of paperwork provisions.

PROPOSED REVISION OF OMB CIRCULAR A-21

Department administration expenses

Revise F.4.a.(2)(a):

(2) Academic departments—

(a) Salaries and fringe benefits attributable to the administrative work (including bid and proposal costs) of faculty (including department heads) and other professional personnel conducting research and/or instructin shall be allowed at a rate of 3.6 percent of modified total direct costs. This does not include professional business or professional administrative officers. This allowance shall be added to the computation of the indirect cost rate for major functions in section G; the expenses covered by the allowance shall be excluded from the departmental administration cost pool. No documentation is required to support this allowance.

General administration and general expenses

Add the following sentence to F.3.a.:

General administration and general expenses shall not include expenses incurred within non-university-wide dean's offices, academic departments, organized research units, or similar organizational units. (See section F.4., departmental administration expenses.)

Universities (in cooperation with OMB) will: collect data on actual costs covered by the 3.6 percent allowance; collect data on the extent of institutional cost sharing in federally sponsored research; collect data on the costs to universities of federal requirements.

OPINION OF SENATOR LEVIN ON THE CLAIBORNE IMPEACHMENT

● Mr. LEVIN. Mr. President, there is a legal maxim which holds that "hard cases make bad law." But I fear that the Senate's recently concluded impeachment proceedings in the case of Judge Claiborne provided us with a new piece of folk wisdom: "easy cases can make bad law too."

On its face, this appeared to be a relatively simple matter. The respondent, Judge Harry Claiborne, had been found guilty by a jury of his peers, his case had been appealed and those appeals had been denied. And while he still has additional motions pending—and may have them pending for years—they do not focus as much on the facts which contributed to the verdict of guilt as on the processes used to assemble those facts.

Given all that, there was, I fear, a natural tendency for members of the public and perhaps even some Members of the House and Senate, to believe that Mr. Claiborne did not deserve very much of our time or attention. In fact, in discussing the scheduling of the impeachment proceedings in the Senate, the operating assumption was always that it ought not take more than 2 days. The theory seems to have been that we should act quickly. But the Constitution requires that we act in other ways.

THE CONCEPT OF A TRIAL

I believe our constitutional role requires us to take adequate time—in any case brought before us—to reach a judgment ourselves; to determine as individuals and as a body whether or not the respondent is guilty of high crimes and misdemeanors so as to require removal from office.

The Constitution is clear: "the Senate shall have the sole power to *try* all impeachments," article I, section 3; it also provides that "the *trial* of all crimes except impeachment shall be by jury," article II, section 2. (Emphasis added.)

It seems clear from those constitutional requirements that in an impeachment, the Senate is required to act as a fact finder—for fact finding is the heart of trying any case. The respondent in this case made that point repeatedly. In briefs which are part of the record, the Senate is characterized again and again as "a finder of the facts." The House, in its briefs, never challenged that characterization. Indeed, the House seemed to accept it when they argued that the record before the Senate contained enough information to allow us to make a judgment on the facts—and those facts, they believed, required us to find that Harry Claiborne "willfully and knowingly" filed tax returns which he "did not believe to be true and correct."

So the Constitution gives the Senate the "sole power" to try impeachments, and it seems clear to all that the Senate's constitutional mandate is to independently evaluate both the disputed and the undisputed facts involved in any case brought before us.

THE ROLE OF WITNESSES BEFORE THE SENATE AS RELATED TO ARTICLES I AND II

When facts are in dispute—as they were in article I and II of the impeachment resolution as brought to us by the House—a finder of fact can reach a resolution of that dispute only if he or she is able to evaluate the credibility of key witnesses.

For 500 years, the law has recognized that the way in which a witness offers testimony—the nonverbal cues or demeanor of the witness—is an important element is evaluating credibility. That is why Wigmore, in his classic text on evidence, pointed out that the demeanor of a witness is "always assumed to be in evidence."

I believe this point is so well established that extended comment about its centrality to legal theory is not essential. But, for the record, let me cite

just a few statements which illustrate the point. Ullman, in a study of "Medieval Principles of Evidence" writes that the 14th century Postglossators held that the "indispensable requisite for the judge to form an opinion on the trustworthiness of witnesses was that they appear before him personally * * *. The personal impressions made upon the judge by the witnesses, their way of answering questions, their reactions and behavior in court, were the only means of ascertaining whether their statements were trustworthy or not." Judge Frank has commented that "a deposition has always been, and still is, treated as a substitute, a second-best, not to be used when the original is at hand for it deprives—justice—of the advantage of having the witness before the jury." And as Sir John Coleridge observed, a cold record "cannot give the look or manner of the witness: his hesitation, his doubts, his variations of language, his confidence or precipitancy, his calmness or consideration * * * it may be the dead body of the evidence without its spirit."

In his briefs, Judge Claiborne asked for a full trial before the Senate, by which he meant the right to call witnesses and have them questioned under oath before the Senate so that Senators could observe their demeanor. Clearly impeachment trials in the past have involved witnesses being heard by the full Senate. Yet only the "rule 11" committee heard the witnesses in this case and the committee did not make any formal findings relative to demeanor. Contrast that with the fact that even a master in equity must report to the court recommendations and findings on demeanor of witnesses if such findings are based at all on demeanor.

In opposition to both the respondent's argument and history, the House argued that a full trial was not required. They asserted that demeanor is simply one of a number of factors which make up credibility and, given the weight of evidence available—and the demeanor related judgments which we can assume the jury made. There was no need for the full Senate to see and hear witnesses directly. The record alone will suffice, they argued.

The House is partly right: demeanor is just one factor. But it can be a crucial factor, a deciding factor. And that is why we require witnesses to testify in open court and why we should have required them to testify before the Senate. As Judge Frank once wrote, "demeanor, to be sure, is no infallible guide to reliability of testimony; yet, as matters now stand, it is one of the best guides available." To a degree, even the Senate recognized the value of demeanor evidence when it authorized the "rule 11" committee to hold a hearing. After all, that hearing essentially covered the same ground that had already been covered in the courts. In other words, the Senate felt a need to develop its own record—as a result, 12 of us did hear and see witnesses, even though those 12 could have simply read their testimony in the record of a previous proceeding, the trial before the Federal jury.

The "rule 11" committee did an excellent job of developing a record. I have the greatest respect for the members and staff of the committee—they had a difficult job and they discharged it with dignity and devotion. The record they developed is essential to understanding the case. But, in my view, it was not adequate to let the Senate make findings in those disputed areas where witness demeanor or credibility is critical to the process of determining what the facts are. The Senate, as a finder of fact, did not hear or see a single witness. And, as a result, our ability to fairly reach decisions, when the facts were in dispute, was restricted.

To reach a judgment on issues involving disputed facts where the demeanor and credibility of the witnesses are important, I believe the Senate needed to see the witnesses—as the "rule 11" committee did—and not just see a record or even tapes of witnesses testifying.

When we voted not to hear any additional witnesses, we set up a process which made it impossible for the Senate, as the finder of fact, to fully and fairly evaluate the credibility of witnesses.

Now some might say that we did hear Judge Claiborne. He spoke to us. However, he did not appear before us as a witness; he was simply exercising his right to "participate in the summation" as Vice President BUSH explained to the Senate. And while some have suggested that Judge Claiborne did not take the opportunity in his speech to answer specific allegations, the Senate did not ask him any questions about those allegations and his failure to respond specifically and in detail can not be held against him. Indeed, the request, made in executive sessions by one Senator, to have Judge Claiborne appear as a witness and answer questions was rejected by the Senate.

So, as Judge Claiborne said, he was speaking primarily to let the Senate see him—which suggests that Judge Claiborne felt that there was some value in presenting his demeanor to the Senate. A similar value would have been attached to the appearance of a number of other witnesses.

ARTICLES III AND IV

While I could not on principle vote for a conviction on articles I and II, I believe that articles III and IV were proven. Let me discuss them briefly.

Article III asserts that Judge Claiborne was found guilty by a jury. His conviction, article III alleged, was indisputable evidence of misbehavior and high crimes in office. In my view, the record was more than sufficient to support the conviction.

Many of my colleagues had, it appears, concerns about this article. Two such concerns were expressed. First, it was argued that the Senate was, in essence, abdicating to the courts its responsibility as the sole authority to try impeachments and second, that this might set a precedent which suggests that any conviction must result in impeachment or, conversely, that any "not guilty" verdict would be grounds for a refusal to impeach a public official. Let me respond to both concerns.

As to abdication of responsibility, I must confess that I find it ironic that some are bothered about abdicating our responsibility by giving credibility to a final court judgment—if supported by the record—when, by refusing to hear witnesses, we in essence abdicated our responsibility as finders of fact—but, in this case, abdicated not in favor of a court but rather in favor of no one.

The record before the courts and the "rule 11" committee made it clear that the Senate could reach the conclusion that the conviction of the defendant was final and well supported by the record. That is precisely the conclusion I did reach in regard to article III. While the defense of Government misconduct is still pending, nothing in that appeal would alter the facts which were at the core of the judicial process that has been completed. And the results clearly established that Judge Claiborne was legally "found guilty by a 12-person jury of making and subscribing a false tax return. * * *"

As to the belief that conviction based on the fact of prior judicial determinations sets a precedent, that simply is not true. Again, the record before the "rule 11" committee and the House briefs made it clear that the even in the face of a conviction, the Senate must satisfy itself relative to the guilt of the defendant. We may chose to take a final court verdict of guilty as evidence of guilt, provided that we are satisfied that the record supports that finding. We are not bound to so utilize a court judgment—but surely we are free to do so. And if we do so, no precedent is established thereby. To satisfy myself on that point, I solicited the views of Chairman RODINO. In his capacity as a House manager, he clearly did not advance a claim of of precedent.

In my letter to the chairman, I asked the following question:

Would a conviction by the Senate on article III set a precedent, or be used for argument in later impeachment proceedings, that the House of Representatives is bound to impeach and the Senate is bound to con-

vict, following a Federal court conviction of a public official?

Chairman RODINO's response to me in a letter of October 9, 1986 was as follows:

You have asked me to address whether a conviction on article III would bind the Senate to convict in future cases, in which a public official similarly had been convicted. On behalf of the House of Representatives, I respectfully submit that the answer to this question is no.

My letter and Chairman RODINO's response were made part of the record during our deliberations.

It seems clear, then, that the Senate, as the sole authority over impeachment, can, in essence, decide to credit or ignore a jury verdict for whatever reasons it thinks adequate.

It is also clear that a verdict of "not guilty" in a trial court does not restrict the Senate's freedom to act on articles of impeachment sent over from the House. Senator HEFLIN's question on this point and the Presiding Officer's answer in open session make it clear that the Senate has freedom to act as it deems fit even if a House-impeached official comes before us armed with a "not guilty" verdict rendered by a court or jury. We all know that a "not guilty" verdict by a jury is far different from a finding of innocent. And while a person may be "not guilty" in a court of law, that does not mean that they are or should be found "not guilty" of the high crimes and misdemeanors which justify a conviction in the Senate.

Finally, article IV asked the Senate to agree that Judge Claiborne's actions have "betrayed the trust of the people of the United States and reduced confidence in the integrity and impartiality of the judiciary, thereby bringing disrepute to the Federal courts and the administration of justice by the courts." I believe that article IV can be fairly construed as incorporating the article III reference to the jury finding and, as I have indicated earlier, my review makes it clear that the jury verdict was amply supported by the record.

In addition, in the past, article IV type language has been viewed as a "catch all" or "character" charge. Such articles serve the function of stating that conviction is desirable because the respondent has engaged in misbehavior sufficient to justify removal from office by the Senate. In that context, I believe that Mr. Claiborne deserved to be convicted by the Senate on article IV.

CONCLUDING COMMENTS

Having discussed the specific articles and the process which was used by the Senate to conduct this trial, I have three final observations to make.

First, I was greatly disturbed by the conduct that the Government was alleged to have exhibited in this case. The evidence clearly suggests that the Government engaged in a pattern of selective prosecution, prosecutorial overreaching, and perhaps intimidation of witnesses and other improprieties. I support a full investigation of those charges as they relate to Mr. Claiborne in particular and other cases as well. I should hasten to add that even if such conduct is proven to have existed, that would not alter my votes on the various articles of impeachment. While such Government action might bring Mr. Claiborne a reversal in the courts, the Senate, acting as a Court of Impeachment, operates under different standards. The exclusionary rule, for example, does not apply in these proceedings and in other areas our laws differ from those applied by the courts. So while Mr. Claiborne may or may not deserve judicial relief, he is entitled to no relief from the judgment of the Senate.

Second, I feel compelled to register my strong objection to the manner in which the question on article III was put to the Senate by the Presiding Officer. On articles I, II and IV, the question put to the Senate was phrased as required by the rules: "Senators, how say you? Is the respondent, Harry E. Claiborne, guilty or not guilty?" But on article III, the question was put this way: "Senators, how say you? Is the respondent, Harry E. Claiborne, guilty or not guilty or do you vote present? The results which followed, with 35 Senators voting present, may or not have resulted from the way in which the question was presented—but the form in which the question was put was erroneous and violative of both the rules and the unanimous-consent agreement under which we were operating.

Third, while I have criticized the Senate for refusing to allow certain witnesses to be called and for other failures which I observed, I also want to compliment this body and my colleagues for their honest concern about commitment to the process. I have already indicated that the "rule 11" committee functioned magnificently; I indicate now that the staff of the Office of the Senate Legal Counsel and the Rules and Ethics Committees were also most supportive. And while my colleagues and I agreed on some issues and disagreed on others, I believe we shared a common desire to achieve justice as we understood it. Those who observed the seriousness with which the Senate viewed these proceedings will observed a free society at its best.

DR. J.C. WILLKE'S ARTICLE ON ASSAULT RAPE, AND PREGNANCY

● Mr. HATFIELD, the Senate has been the arena for countless debates on the issue of abortion since the Supreme Court handed down its Roe versus Wade decision. During the past 13 years, the Nation and Congress have not reconciled themselves to this fateful, far-reaching decision of our Nation's highest court.

Sadly, few of our discussions face the issue squarely: Should abortion on demand be legal in the United States? We have allowed ourselves to be limited to questions of Federal funding for elective abortions, to questions of the propriety of tax-exempt status for abortion providers, to questions of parental notification and informed consent. Most of these debates are void of important discussions as to why abortion is an acceptable alternative for the pregnant woman, and what pressures cause her to terminate the life of her unborn child.

One of the most emotional debates within the abortion issue is the rare case of abortion by a woman who becomes pregnant as a result of rape. Certainly, rape is a horrifying, dehumanizing crime which demands a compassionate response to the victim and swift punishment of the offender. But the undeniably traumatic experience of rape is being thrown about by abortion supporters as a key reason why abortion on demand should be available to every woman, regardless of the circumstances of conception.

In one of the most thoughtful pieces I have read on assault rape, and pregnancy, Dr. J.C. Willke expands the discussion of this narrow issue beyond the question of whether a woman should be allowed to abort the child conceived as a result of rape. He reveals some of the complex, conflicting emotions racing through the victim's mind. Also discussed is society's role in the victim's decisionmaking process. Dr. Willke lists options which should be made available to the pregnant woman. And finally, he voices the view, which I share, that the innocent child should not receive the death penalty for the crime of the father.

Mr. President, I ask that Dr. Willke's article, "Assault Rape, and Pregnancy" be printed in the RECORD.

The article follows:

[From the National Right to Life News, Oct. 9, 1986]

ASSAULT RAPE, AND PREGNANCY

(By J.C. Willke, M.D.)

When talking about assault-rape pregnancy, there are important considerations other than those we discussed in my two previous columns, little known but crucial facts.

For example, how would most people respond to the question, what—from the woman's point of view—is the worse thing about an assault rape for that tiny percentage of women who become pregnant?

Almost without thinking, most would say, "Well, of course, her main problem is the fact that she's pregnant." In fact, this is not true. Well-done studies show us that her chief complaint is not the fact of being pregnant, but rather how others treat her.

This is a sobering thought. If true, it is a terrible indictment of the society in which

we live. Do we treat these poor women with compassion and love? Do we invite them into our homes; into our arms? Have we given them the support they need? Or have we, as these studies suggest, treated these victims with contempt or suspicion? Have we too often "blamed the victim?" If we have, we have failed our obligations in a most profound way.

Why is this so important? Because no victim of an assault rape should be stigmatized for something that happened through no fault of her own. Furthermore, experience has shown that if we treat her with charity, with love, with tenderness, and with concern, there will be far less chance she will abort.

There's another aspect of assault rape that is really only now becoming an area that is discussed: How the woman will react later if she does have an abortion? The core fact here is one that few of us even thought of ten years ago, but one that we are learning about very effectively both from women who have carried to term and from those who have aborted babies in this situation. It is this.

The rape was something done to her. If the victim is treated with charity, compassion, and love, she may well have very little guilt later, or none at all. She may (they don't all) be able to fully accept the fact that the rape was not in any way her fault, but rather was a totally unjust assault upon her.

If, however, she gets an abortion, the results are far different. This is a very deliberate action, one that was done by her to another.

She may often bear a burden of guilt later for having had the abortion, similar to that so often experienced by women after any other abortion. She will have one of two memories. "I did the loving thing. I carried my baby. I gave him life." Or, the other memory, "I killed my baby."

Coincident with this is a biologic fact that women, pregnant from rape, have at least unconsciously always known, but that the men who advised them seemed completely unaware of. It is summed up in the simple statement, "The baby is also half hers."

Yes, this is the "rapist's child" but also her child. A woman pregnant from rape instinctively knows this. Unthinking men and other women, advising her, too often seem unaware of it. This simple biologic fact, to her undeniable, can and often does add to the burden of guilt that she may bear if she goes on to have an abortion.

Another factor that relates to this is that some women may not be able to bear the fact of "looking at that child every day of my life." They feel, "I could not bear to raise that child." If so, we understand. What is also obviously true, however, is that there are literally hundreds of thousands of outstretched arms aching to accept that child and love him or her for a lifetime. To deliver a child in such a situation must never be equated with keeping and raising the child, for that baby can be adopted into a loving home.

It is somewhat automatically assumed by most people that a woman, pregnant from assault rape, will always get an abortion if it is available. As a matter of fact, this is also not true. In the case of assault-rape pregnancy, where abortion was freely available and offered, and compassionate help is offered to her, only half of the women will choose to get an abortion. Interesting? Yes, and I think it is a real compliment to the women involved.

In an earlier column I discussed the fact that there was a very, very small number of women who got pregnant from assault rape, perhaps as few as 100 or 200 per year in the U.S. If only half of those who did get pregnant went on to choose an abortion, we can cut this number in half again.

One interesting minor argument that is sometimes posed relates to the issue of capital punishment. We in the Right-to-Life movement do not take an official position on capital punishment, for we limit our concern to the protection of innocent life. However, if we were to ask an average audience how many of them favor capital punishment, we would find a cross sectional break quite comparable to that of the general population—some for, some against. On the other hand, if we were to extend that question and ask "How many of you think there ought to be capital punishment for the rapist?" we find the number dropping way off, sometimes to zero. The question then to pose is, "If you do not favor capital punishment for the crime of assault rape, would you favor capital punishment for the innocent child conceived by that assault rape?" A rather interesting argument. It does make us think.

Let's finally, though, get back to our original argument, one that overshadows all of the others. That original statement is so clear and so concise that it simply says it all.

Should we kill an innocent baby for the crime of his father?●

RSVVP PROGRAM IS A SUCCESS

● Mr. SARBANES. Mr. President, earlier this week I brought to the attention of my colleagues the very important contribution being made by concerned Marylanders to alleviate hunger both here in the United States and abroad. The program, called "RSVVP"—Restaurants Sharing Ten Percent—was held on October 15 in connection with the observance of World Food Day, and involved the donation by participating restaurants of 10 percent of their gross receipts on that day. I understand from the organizers of the event that well over $30,000 was raised this year, a remarkable achievement.

Mr. President, I would once again like to thank and congratulate all who participated, and I submit the following articles about the program for the RECORD:

[The Baltimore Sun, Oct. 15, 1986]

HUNGER PAINS

(By Nora Frenkiel)

Jan Houbolt says he never goes to sleep at night wondering if his life has any meaning. As a longtime community organizer, advocate for the underprivileged and current executive director of the Maryland Food Committee, he has spent hours finding creative solutions for feeding the estimated 700,000 in this state who may go to sleep at night wondering where their next meals are coming from.

Today, thousands of patrons will dine at restaurants participating in the RSVVP program, another creative solution, which stands for Restaurants Sharing Ten Percent. Last year almost 200 restaurants—about the same number involved this year—turned over 10 percent of a day's receipts, which raised $34,000 or enough to feed 60,000 people for one day.

This year the organizers are hoping for an even better turnout. "It's easy for people to go out and do it," Mr. Houbolt says. "The restaurants are the ones being generous. The alternative is saying, 'Let's all fast for a day and give up the proceeds to fight hunger.' Frankly, that wouldn't raise as much money. And part of my job is to channel funds from those who have to those who don't have."

The people scanning menus can feel good about themselves and about feeding the hungry, which has been a fashionable cause for several years. But it's not quite as trendy as it once was. "It's already become less fashionable than it was two years ago," says Mr. Houbolt. "Two years ago there was a presidential task force on hunger. Now the concerns are drugs and child abuse. We're not in the front as we were, and it's partly due to the economic recovery. Yet for a number of people, life is much worse than it ever was."

Ann Miller, longtime advocate of the cause and a founder of the Maryland Food Committee, admits the struggle goes on. "We're very good at this business of making statements and making it sound as if we're terribly concerned, but when the opportunity arises to actually do the work, very few people do. It's very difficult to do good and Jan does good. And he has a long hard road ahead of him."

At 40, Jan Houbolt, despite a few wrinkles, retains his boyishness. In his small Mount Vernon office, where the paint is peeling, he talks about a renewed energy to continue his work. Three years ago he came aboard as the executive director of the Food Committee, which has a dual approach—direct service and funding to organization that feed the hungry, and a lobbying effort to encourage change in legislation affecting the poor.

"We were nearly bankrupt," he says. "We had a staff of three and a small budget." Today the picture is one of success: 10 employees, an annual budget of $500,000 (almost all of it privately raised) and the funding of 53 soup kitchens and emergency food centers across the state.

"I credit this turnaround all to Jan," says Eileen Yoffe, president of the organization's board of directors. "He's a real go-getter and he cares tremendously about the work he's doing. Although he's very aggressive about solving problems, he's also one of the most compassionate people I've ever met."

Ms. Miller credits the director with "a sensitivity and ability to reach out into the community." Part of that outreach is a hand outstretched asking for money, since all but $29,000 funded from a federal block grant through the Department of Human Resources, is raised from the private sector—from churches and synagogues, from corporations and individuals.

"At first I didn't like asking people for money," Mr. Houbolt admits. "It's hard to do. But now I take a hard look and think about how much I believe in what I'm doing. Some people make it very easy. But for others you really have to jump through that hoop. I'll do it now if they require it," he says with a grin.

One day he'll find himself power-lunching at the Centre Club with a Food Committee supporter. And then he'll turn around, with all that boyish charm, and say, "Let me treat you to lunch next time." And so he takes the CEO to Paul's Place Soup Kitchen in Southwest Baltimore, where lunch might

be a peanut butter and jelly sandwich and sweet potatoes, and the utensil a sturdy plastic spoon. It's a power lunch and results more often than not with a generous donation.

Spending time with those CEOs led to a brief crisis in Mr. Houbolt's life within the last year. The man who says, "I didn't seek out a career, I followed my values and this just happened," now says, "I took a look at my life and realized that I was turning 40 and I was asking myself whether or not I could afford a washer and dryer." He listened to his colleagues on the Greater Baltimore Leadership Committee, who told him in earnest voices: "You've done your part. You've done your good work. Why don't you think about switching to private industry?"

He talked with his wife, Rachel Wohl, who works at Urban Services and is completing a law degree at the University of Maryland. "She operates out of the same tradition that I do," he says. They live in a row house in South Baltimore.

He took time to review his life: son of an immigrant from the Netherlands who worked for the State Department, he grew up in Taiwan, Okinawa, New York and finally in Arlington, Va. His parents currently live in Loudoun County, Va., and he says, "My mother is one of those great do-gooders." She was named Woman of the Year in her community last year.

His background: a bachelor's degree from Howard University in Washington, "where I learned what it was like to be in the minority and learned about the civil rights struggle," and a Ph.D. in sociology from American University in 1981, with teaching stints in New York and at the University of Baltimore. Grassroots work—with the Northeast Baltimore Community organization and the Neighborhood Rental Services—led to the job at the Maryland Food Committee. And somehow, as he sees it now, values matched the job.

"I look at older people, blue-collar people, who've been working all their lives and now they're retired and they've been wiped out by medical bills and they're poor. And I realized I don't have a pension. And I don't want to end up that way."

Crisis, however, was resolved. "I decided this is the path for me. This is the work I want to be doing." Yet there still are occasional moments of disappointment. "The thing about this," says Ms. Miller, "is that you do get terribly discouraged and you start writing an annual report and you realize how much has happened. Only on the small gains do you get what you finally achieve and be awfully grateful."

Frustration, however, comes and goes. "On the one hand," says Mr. Houbolt, "we're a big success with an annual budget of $500,000. But on the other hand that's worth three months for Joanne Carson's alimony payment."

Yet, Mr. Houbolt doesn't dwell on that inequity for long. "I'm confident enough the world can be a more reasonable place than it is. There may always be hungry people. But there's always something that can be done."

[The Baltimore Evening Sun, Oct. 15, 1986]

RSVVP

Last October Marylanders had the opportunity to celebrate World Food Day by participating in an unusual fundraising technique. RSVVP stands for Restaurants Sharing 10 Percent (the two V's represent the Roman numeral five—totaling 10). The project, initiated by the Maryland Food Committee, sparked national attention and raised enough money through participating restaurants to help feed 60,000 people.

This year about 200 restaurants in central Maryland have agreed to participate by donating 10 percent of today's gross receipts. The proceeds will be divided between the Maryland Food Committee and the Emergency Taskforce on Africa.

RSVVP is one of those welcome fundraising events in which everybody can come out ahead. Restaurant patrons can help those in need while enjoying a restaurant meal at the usual prices, while restaurants are likely to see an increase in customers to cover the donation of part of their proceeds.

That's the reason enough to go out to dinner—RSVVP.●

DR. ABEL WOLMAN

● Mr. SARBANES. Mr. President, today Baltimore honors an international expert in health and sanitation who for more than 50 years has been a pioneer for the safer and more efficient water and sewer systems necessary in the modern world. Dr. Abel Wolman, an extraordinary and remarkable man who served the people of the world for more than 50 years, is receiving a high and fitting recognition for his continuing work.

Dr. Wolman, the man responsible for designing water and sewer systems in cities around the world and who designed an outstanding system which has served Baltimore for half a century of growth and which has been held up as a model for other cities to emulate, was recognized for his contributions to Maryland and the public water systems of many cities around the world.

Today the city of Baltimore renamed the municipal office building, where Dr. Wolman continues to work on sanitation problems facing our people, in honor of this pioneering engineer and Baltimore native. Now an active 94 years of age, Dr. Wolman was born and educated in Baltimore, where he received both his undergraduate and engineering degrees from the Johns Hopkins University. Dr. Wolman has traveled around the world representing the United States at public health policy conferences and consulting with leaders on water and health problems.

Mr. President, I ask that two articles, from today's Baltimore Sun and Baltimore Evening Sun, describing some of Dr. Wolman's many achievements and today's honor, be reprinted in the RECORD.

The articles follow:

[From the Baltimore Sun, Oct. 16, 1986]

BUILDING NAMED AFTER SANITARY ENGINEER

(By Ann LoLordo)

When he wasn't in Geneva devising ways to get clean water to the world's 2.5 billion people who don't have it or in California addressing 600 engineers who make their living studying water problems too, Dr. Abel Wolman might well have been found in a conference room in the city's Municipal Building.

After all these years of telling local governments and foreign leaders everything they've ever wanted to know about water, the 94-year-old sanitary engineer still returns monthly to the seventh floor of 200 N. Holliday St. And, over a tongue sandwich and a piece of pie, he talks to public works officials about the water and waste water systems perhaps he knows best—Baltimore's.

"It is my city. I happen to love it. The city of Baltimore and every other city in the world is a going concern. I quote Mencken, 'We've always got solutions—mostly wrong.'"

When Dr. Wolman arrives at the Municipal Building today, he will come not as a consultant but as an honored guest. The limestone structure in which he has met with public works officials for more than 40 years will be rededicated as the Abel Wolman Municipal Building."

It seems a fitting tribute to the veteran Johns Hopkins University professor who as a boy in East Baltimore had to carry water from a well, a diminutive man who designed a water works system for his hometown that to date outshines its counterparts.

The dedication was supposed to be a surprise—but an invitation arrived at his North Charles Street town house last Friday. "I was absolutely stunned. It was an amazing tribute," Dr. Wolman said.

Up until he opened his mail, he knew only that he was to keep the date open. Mayor William Donald Schaefer had "told me. 'Put down Oct. 16 in your black book,'" Dr. Wolman said.

He returned the invitation, saying he would attend the dedication.

Throughout his long and illustrious career. Dr. Wolman has searched for water in the Negev desert in Israel and walked the crowded streets of Calcutta to determine how the city could bring clean water to its people. And the people with whom he works marvel at the genuine concern and devotion with which he performs his work.

"Even with all the knowledge that he has, he attacks a problem as if it's the first time in his life he's ever encountered it," remarked Francis W. Kuchta, the city's public works director for the past 12 years. "He has this long experience, not only in this country but in many countries around the world, in water and waste water problems and can bring it to bear on the problems that we have in the city of Baltimore."

When the two men met on Friday, they talked about the drought that has plagued Maryland, the city's reliance on the Susquehanna River for its water, and the problems at the Back River and Patapsco waste water treatment plans.

Dr. Wolman finds amusing the technological terms that have developed in the industry: "Waste water is good old sewage," he says, "Solid wastes are good old garbage."

But he said the problems plaguing waste water treatment plants are indeed serious.

"Under the flood of capital money from the Environmental Protection Agency, now approaching $60 billion in waste water treatment, we built—in a hurry—plants throughout the United States of the highest sophistication," he said. "Having done so we woke up with the reality that with very few exceptions we did not have the skill to operate them. Period.

"Nobody knows what to do with sludge," he said, pausing, "in the world."

When Abel Wolman was a student at Johns Hopkins University, his interest was medicine, not water.

"I was headed for that until the day I got my bachelors degree," he said. "When I came home, my family announced to me they had had the usual family conclave—to which I was not invited—and it was announced it would be a good thing for me to enter the engineering school [at Hopkins]. You're looking at the first graduate."

What does he think of now of the city water system he designed more than 50 years ago? "One of the best in the United States."

[From the Baltimore Evening Sun, Oct. 16, 1986]

CITY RENAMING MUNICIPAL BUILDING FOR ABEL WOLMAN

(By Kaye Thompson)

Abel Wolman, the sanitary engineer responsible for designing the city's water system and many other cities around the world, will be honored today when the Municipal Building is renamed in his honor.

The building, at 200 N. Holliday St., now will be known as the Abel Wolman Municipal Building.

Wolman, 94, has been a consultant to the city on issues of water supply, sewerage and refuse disposal since 1931. He is also a professor emeritus of engineering at Johns Hopkins University.

A slight man with snow white hair and a gaunt face, Wolman has been a leader in the public health field for more than seven decades. He has also applied his keen mind and wit to a range of other topical problems confronting both his native Baltimore and countries as foreign and far away as India and Israel.

Wolman first distinguished himself as an engineer in the 1920s and 30s when, along with a Johns Hopkins classmate, he devised a method for standardized chlorination of drinking water and implemented the method at the city's Montebello Filtration Plant. This treatment of water has been cited as the single most important factor in controlling diseases caused by waterborne bacteria and viruses.

It has been adopted by most municipal water systems in this country and many abroad.

Wolman is also credited for designing a water system in the city that has adequately met the needs of a growing population for more than 50 years and has been held up as a model for other cities to emulate.

Wolman has traveled around the world to help other countries with their water and public health problems and represented the United States at world conferences. He has also sat on multiple task forces looking into everything from sludge to the dilemma of "white flight" out of the city to a governor-appointed task force on graft in the early 1970s.

Wolman was born in Baltimore in 1892 and graudated from Johns Hopkins University twice—first with a bachelor of arts degree and later with a degree in engineering. He has been awarded an honorary doctorate in engineering from Hopkins, the National Medal of Science, the Tyler Ecology Award and, just this year, the John Wesley Powell Award of the U.S. Geological Survey.

IMPEACHMENT TRIAL OF JUDGE HARRY E. CLAIBORNE

● Mr. GORE. Mr. President, the Constitution of the United States establishes that Federal judges shall serve during "good behaviour." Article III, section 1. It further provides that:

The President, the Vice President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

Article II, section 4. The House of Representatives is empowered to draft articles of impeachment and the Senate possesses "the sole Power to try all Impeachments." Article I, section 6.

When the framers adopted the British model and assigned the impeachment power to the House and Senate, they recognized the important and difficult role that impeachments serve in protecting the public trust:

A well-constituted court for the trial of impeachments is an object not more to be desired than difficult to be obtained in a government wholly elective. The subjects of its jurisdiction are those offences which proceed from the misconduct of public men, or, in other words, from a nature which may with peculiar propriety be denominated "political," as they relate chiefly to injuries done immediately to the society itself. The prosecution of them, for this reason, will seldom fail to agitate the passions of the whole community, and to divide it into parties more or less friendly or inimical to the accused. In many it will connect itself with the preexisting factions, and will enlist all their animosities, partialities, influence, and interest on one side or on the other; and in such cases there will always be the greatest danger that the decision will be regulated more by the comparative strength of the parties, than by the real demonstrations of innocence or guilt. * * * The convention, it appears, thought the Senate the most fit depositary of this important trust. Those who can best discern the intrinsic difficulty of the thing, will be least hasty in condemning that opinion, and will be most inclined to allow due weight to the arguments which may be supposed to have produced it.

Federalist No. 65. Six centuries of experience with impeachments in Great Britain and the United States serve as a guide.

Impeachment Articles have been brought against 12 Federal officials. Of those, six resulted in acquittal, four in removal and two in dismissal.

Prior to the Senate floor proceeding concerning this matter, I served as a member of the Senate Impeachment Trial Committee established pursuant to rule XI of the Senate Rules. Though never used prior to this proceeding, the committee process was established in anticipation of the last impeachment proceeding to come before the Senate, some 50 years ago. The procedure is consistent with the British system as well as the Supreme Court's practice when considering cases pursuant to its Article III original jurisdiciton provision. Compare N. Williams, "The Historical and Constitutional Bases for the Senate's Power to Use Masters or Committees to Receive Evidence in Impeachment Trials," 50 N.Y.U. L. Rev. 512 (1975) with R. Berger "Impeachment, the Constitutional Problems" (Harv. Univ. Press 1973). The committee heard testimony of witnesses called by the House managers and Judge Claiborne over a period of 7 days. Over a dozen witnesses testified, including Claiborne. Transcripts and videotape recordings of the committee proceedings have been made available to the full Senate.

Based on the testimony adduced, the numerous exhibits and pleadings submitted in this proceeding, and the arguments of counsel, I have voted in favor of conviction on Articles I, II, and IV of the Articles of Impeachment. Because Claiborne has been afforded a full trial before the Senate, consideration of the third article is not necessary.

BACKGROUND

Claiborne was convicted on two tax charges and sentenced to 2 years in prison plus fines in October 1984. He had been indicted in early 1984 on bribery, tax, and Ethics in Government Act charges. His first trial resulted in a hung jury and he was retried on the tax and Ethics Act charges. The conviction after the second trial was affirmed by the ninth circuit court of appeals and the Supreme Court declined to review the case. He has exhausted his direct appeals. He began serving his sentence in May of this year and has filed two motions for collateral relief in Federal district court.

ANALYSIS

The House of Representatives presented four articles of impeachment of the Senate. A two-thirds vote in favor of conviction on any one of the articles is sufficient to warrant removal from office. The first two articles stem from the facts giving rise to Claiborne's conviction under 26 U.S.C. 7206(1) for willfully making and subscribing false tax returns in 1979 and 1980. The third article seeks removal from office because of the felony conviction. The fourth article urges removal because Claiborne's false income statements on his 1979 and 1980 Federal tax returns "betrayed the trust of the people of the United States and reduced confidence in the integrity and impartiality of the judiciary."

The elements of an offense under Section 7206(1) are as follows:

(1) the defendant made and subscribed a return, statement, or other document that was incorrect as to a material matter; (2) the return, statement, or other document subscribed by the defendant contained a written declaration that it was made under the penalties of perjury; (3) the defendant did not believe the return, statement, or other document to be true and correct as to every material matter; and (4) the defendant falsely subscribed to the return, statement, or other document willfully, with the specific intent to violate the law.

United States v. *Marabelles*, 724 F.2d 1374, 1380 (9th Cir. 1984). Since there is virtually no dispute that the tax returns at issue failed to report taxable income, the gravamen of the offense in this instance is the element of "willfullness."

The Supreme Court has concluded that willfulness does not require a finding of a bad purpose or evil motive, but rather that "willfulness simply means a voluntary, intentional violation of a known legal duty." *United States* v. *Pomponio*, 429 U.S. 10, 12 (1976). Just as "willfullness" does not connote an evil motive on the one hand, it does not embrace conduct which is merely negligent or mistaken on the other. E.g., *United States* v. *Daniels*, 617 F.2d 146, 148 (5th Cir. 1980).

Courts infer willfulness from the presence of any of a variety of factors in cases under 26 U.S.C. 7206, including, for example:

/S/uch circumstantial evidence as "a consistent pattern of understating large amounts of income, coupled with evidence of falsehood, surreptitious cash transactions and inadequate records kept by the taxpayer," substantial understatement of taxable income and tax liability for the years in question, the withholding of material information from the taxpayer's bookkeepers by giving them only summary sheets of the records in question, and the expenditure of large amounts of cash that cannot be reconciled with the amount of income reported.

United States v. *Hughes*, 766 F.2d 875, 878 (5th Cir. 1985). Virtually all of these factors are present in this case.

A. THE 1979 TAX RETURN

In addition to his 1979 judicial salary, Claiborne received $41,072.93 in ordinary income, pursuant to a legitimate feesplitting arrangement with his former business associates. Only half of the additional income was reported on his 1979 tax return. His conduct leading to the preparation and filing of the return virtually assured that some or all of his fee income would go unreported.

The money was received in the form of 14 checks, cashed at local casinos. This was a significant departure from his financial practice over the three previous decades. Prior to assuming the bench, all of his legal fee checks were deposited into bank accounts which were tracked by his accountant who, in turn, received bank statements for the accounts and copies of deposit records. Claiborne directed Joseph Wright, an accountant who kept the books for his law practice and prepared his tax returns, to treat all deposits as income unless specifically directed otherwise. Wright also understood that he was to give the Government the benefit of the doubt if questions arose.

The respondent opted for this practice in order to "show every penny" that passed through his office. After adhering steadfastly to the practice for many years, he abandoned it in favor of cashing the checks at casinos in 1979 for, as he claimed, convenience and the need for "pocket money." Claiborne did not inform Wright that he had begun cashing legal fee checks at casinos, and he stopped providing Wright with any information setting forth his additional income. He instead chose to record the amounts periodically in a personal diary he began keeping.

Claiborne eventually provided Wright with conflicting information regarding the precise amount of his 1979 income. In March 1980 he crafted a memorandum for Wright which purported to detail his 1979 fee earnings. Curiously, he based the figures upon "bank deposits" that he believed were fee income, apparently forgetting that the fee checks in question included many which had been cashed rather than deposited. Claiborne prepared the memorandum in order to secure a bank loan with Wright's help. Composed from memory because he had misplaced his financial diary, the memorandum estimated the fee income as about $46,000, roughly twice the amount later reported on his taxes and twice the amount he later told Wright.

To compound matters, Claiborne later suggested to Wright over the telephone that only four of the seven items listed in the March 1980 memorandum could be characterized as fees. The four items totaled $22,332.87. He listed a similar amount on his judicial ethics disclosure. He told Wright the remaining items in the memorandum constituted interest income, proceeds from a time certificate of deposit and the sale of an airplane.

Though unsure of the details of the conversation, Claiborne acknowledges that he described at least one item as nonfee income. Wright had no other means of ascertaining Claiborne's income; his notations on the document itself are consistent with his testimony and could have been generated either through guesswork or through the telephone conversation he had with his client. Finally, Wright's testimony is consistent with the prior practice of treating all deposits as income unless directed otherwise.

Claiborne interposes a number of claims in defense. He asserts, for example, that he cashed the fee checks in 1979 rather than depositing them in his bank accounts in order to obtain "pocket money." While $40,000 over the course of several months may resemble pocket money to some, the significance of Claiborne's behavior lies in its stark departure from a history of depositing fee checks in bank accounts so as to allow his accountant to maintain accurate income records. Whatever the reason for the change, the record clearly shows that its effect was to leave no bank record of the receipt or cashing of these checks. Claiborne thereby denied Wright the very information necessary to account for the additional income.

The lynchpin of his defense to the 1979 tax charge is his claim that on April 11, 1980, he sent Wright a letter stating his fee income, together with his W-2 form and a check. Wright neither recalls requesting the letter nor has a recollection of it. He has not been able to produce a copy from his files. Judy Ahlstrom, Claiborne's secretary, apparently delivered the information to Wright and she corroborates Claiborne's claim regarding the delivery of the information and its general contents. This testimony, however, is at odds with common sense and with the testimony of Wright and his wife who also worked in the accounting office.

None of the witnesses on this issue was particularly compelling, although the evidence suggests that Ahlstrom delivered something to Wright's office on April 11, 1980; whether the delivery included the April 11 letter is not clear. Claiborne did not see the completed tax return, having signed it in blank prior to leaving town on business.

Although several possible scenarios suggest themselves, only one seems plausible. On the one hand, the April 11 letter could have been delivered to Wright's office, only to be the one item from the relevant file which was later lost or stolen, leaving Wright with only the earlier memorandum and telephone data from Claiborne as to his income. Under these scenarios, Claiborne gave his accountant conflicting information, at best.

The more plausible scenario is that the self-serving story behind Claiborne's April 11 letter is fictitious. By April 11, his accountant had at least two statements of his 1979 fee income, a circumstance fully consistent with Wright's contention that the April 11 letter was not requested. Claiborne questions the credibility of the Government's witnesses on this issue, pointing to their failure to recall burglaries of their premises and a move which could have caused the loss of the April 11 letter; he has not, however, suggested a convincing motive which would explain why they would adjust their stories. Moreover, no other documents from the file were misplaced.

Too many leaps of logic are required to accept his defense. Many of the factors surrounding the preparation and filing of his 1979 return are factors from which courts readily infer willfulness. Most important, if he did not know precisely what was reported in the 1979 tax return, he certainly should have known that his behavior served only to confuse his accountant

and prevent him from developing an accurate picture of his true income.

B. THE 1980 TAX RETURN

Claiborne's 1980 tax return also underreported his income. That discrepancy allowed him to pay only $1,103 in taxes rather than $97,864. The difference was attributable to his failure to report $87,912 in legal fee income and the improper treatment of the tax consequences flowing from the sale of his home.

Although the precise facts are not entirely clear, the record demonstrates that Claiborne abandoned his longtime accountant, Joseph Wright, and retained Creative Tax Consultants, headed by Jerry Watson. In contrast to the $600 annual fee charged by Wright for bookkeeping and preparation of tax returns, Watson earned $2,000 for his work on the 1980 tax return. That fee was measured in part by the size of the refund Watson was able to generate.

The change in accountants was the result of a belief that Wright was no longer interested in keeping the respondent as a client, combined with the fact that Watson happened to impress the respondent with his ability. While Claiborne was apparently unaware of Watson's nefarious reputation in the community, Watson held himself out as one willing to generate tax savings through "innovative" means. Since Claiborne was well aware of the substantial tax liability he faced in 1980, Watson's "talents" certainly factored into the decision to retain him and discard Wright. That conclusion is buttressed by the timing of Claiborne's decision to change accountants: after Watson suggested that he could dramatically reduce Claiborne's tax liability.

Watson developed a method to treat the sale of Claiborne's home as a tax free transaction, notwithstanding a taxable gain of over $200,000. Despite the fact that his erstwhile law practice did not have the requisite cost basis to substantiate such a claim, Watson also recorded a "loss" based upon the termination of Claiborne's law practice when he became a judge. The two men discussed these plans.

Chief among his claims in response, Claiborne rejects the inference that he abruptly switched accountants in order to gain the services of someone more willing to engage in tax law brinksmanship. He adds that he neither read the completed 1980 tax return, nor understood or was aware of the import of Watson's dubious calculations. Whether he read the return prior to filing, he acknowledges discussing with Watson the notions of claiming the gain from the home sale as a tax free transaction and taking a loss on his former law practice. He recognized within days after the filing that the return may well have been faulty, but was assured by Watson that two experienced Internal Revenue Service officials had vouched for the accuracy of the calculations. Notwithstanding his uneasiness with the return and the sizable refund it yielded, Claiborne retained Watson's services for 2 additional years and took no steps to check the 1980 tax return further.

Claiborne's conduct compels the conclusion that he willfully understated his 1980 income. Whether he was truly unaware of how incorrect his tax return was, he certainly turned a blind eye to questionable circumstances which otherwise would have been obvious to him. His change in accountants suggests a desire to conceal income. He resorted to extensive cash transactions. He underreported a significant amount for a second year in a row.

CLAIMS OF GOVERNMENTAL MISCONDUCT

Claiborne has urged the Senate to permit him to call several dozen witnesses ranging from prosecutors and investigators to the trail judge in his criminal proceeding. He contends that their testimony will reveal a vendetta which led to his conviction, and an unwillingness of several dozen Federal judges to expose its illegality out of fear that public opinion would question whether the vendetta issue was a mere subterfuge erected to protect a fellow jurist.

Even assuming all of Claiborne's allegations of governmental misconduct to be true, the same conclusions as to his conduct obtain. No individual claim or combination of claims can or should detract from the conclusion that he willfully submitted false income tax returns in 1979 and 1980. The Senate need go no further than it already has in assessing the merits of these claims. Although Claiborne views these theories as the overarching issue in this proceeding, he is mistaken.

His contention seems to be that but for a vast conspiratorial vendetta, his innocence would have been proven or the charges would never have been brought. Claiborne contends that full consideration of his claims on this score leads to several conclusions which will exonerate him. Specifically, he suggests that Federal prosecutors pursued him so relentlessly and unscrupulously that they bargained for perjured testimony from a known criminal and spearheaded an illegal burglary of his home in search of inculpatory evidence. He claims that exculpatory evidence was withheld and that witnesses were either intimidated or unfairly coached. If accurate, these claims warrant serious scrutiny and I have cosponsored legislation to establish a special subcommittee to investigate the issue further. If the claims have merit, steps should be taken to rectify the wrong. Remedial measures, however, will in no way abrogate the finding that Claiborne engaged in impeachable conduct.

He further asserts that he could not have had the requisite willful intent, given the predisposition of Federal prosecutors; that claim rests on the notion that no one whose every move is under intense scrutiny by Federal prosecutors would willfully violate the law or knowingly submit such faulty tax returns. This assertion is untenable, given the clear findings regarding Claiborne's conduct.

Claiborne alleges that sympathy for prosecutors and fear of public criticism led several dozen Federal judges to gloss over his defenses. He points to two dissenting appellate opinions in his case suggesting that some of the members of the reviewing panel may have rendered their decision without fully examining the record. Conveniently, Claiborne fails to address the fact that the Supreme Court, when presented with the full record in his case and the dissenting opinions upon which Claiborne now relies, also refused to overturn his criminal convictions.

Finally, Claiborne points to the departure from typical tax investigation procedures as an indication that he received uniquely harsh treatment. He contends that he was denied opportunities to negotiate with the Internal Revenue Service which would have obviated the need to resort to a criminal indictment. In so claiming, the respondent joins the many who believe that the discretion of the Internal Revenue Service and Federal prosecutors in deciding whether to pursue criminal charges is overbroad and should be curtailed. The law currently provides that discretion. Whether it should is a question which may well warrant inquiry but does not alter the finding in this proceeding.

CONCLUSION

The conclusion is inescapable that Claiborne filed false income tax returns and that he did so willfully rather than negligently. While I do not believe that the Senate must apply a reasonable doubt standard in impeachment proceedings, I nevertheless believe that Claiborne has advanced no reason to doubt the conclusions that I have reached about his conduct.

Although a convicted felon, Claiborne arrived before the Senate as a member of the Federal judiciary. He has been afforded the procedural protections which the constitution reserves for that important position. Given the circumstances, it is incumbent upon the Senate to fulfill its constitutional responsibility and strip this man of his title. An individual who has knowingly falsified tax returns has no business receiving a salary derived from the tax dollars of honest citizens. More importantly, an individual guilty of such reprehensible conduct ought

not be permitted to exercise the awesome powers which the constitution entrusts to the Federal judiciary.●

FEDERALISM ACT OF 1986

Mr. EVANS. Mr. President, yesterday I joined with my good friend and colleague Senator DURENBERGER to introduce S. 2926, the Federalism Act of 1986. I ask that this bill be printed in the CONGRESSIONAL RECORD.

The bill is as follows:

S. 2926

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Federalism Act of 1986".

SEC. 2. STATEMENT OF POLICY AND PURPOSE.

(a) STATEMENT OF POLICY.—It is the policy of the United States that—

(1) the Federal Government should assume responsibility if—

(A) nationwide uniformity of policy, finance, or administration is important to the solution of a problem, or

(B) it is necessary to raise revenues from the Nation as a whole and to distribute them to the various parts of the Nation;

(2) State and local governments should assume responsibility if—

(A) diversity of policy, finance, or administration is important to the solution of a problem, or

(B) experimentation by State and local officials with a knowledge of local conditions is important to meeting public needs; and

(3) State governments, rather than local governments, should assume responsibility if—

(A) the State constitution does not assign responsibility with specificity to the State government or to local governments,

(B) the multiplicity and diversity of local governments create barriers to raising revenues and delivering services effectively, or

(C) there is no compelling reason for the Federal Government to determine the distribution of resources and responsibilities.

(b) PURPOSE.—In furtherance of the principles set forth in subsection (a), it is the purpose of this Act—

(1) to terminate a number of shared programs and allow States to set their own priorities;

(2) to create greater nationwide uniformity of benefits in the Federal "safety-net" programs;

(3) to promote the employment of welfare recipients;

(4) to remove the tangled web of regulations imposed by the Federal government on State and local governments;

(5) to level the fiscal disparities between the poorest and wealthiest States and localities; and

(6) to reform intergovernmental relationships while assisting in the elimination of the Federal deficit crisis.

(c) BUDGET NEUTRALITY.—The principles and purposes set forth in subsections (a) and (b) shall be implemented gradually and on a fiscally neutral basis.

TITLE I—AID TO FAMILIES WITH DEPENDENT CHILDREN

SUBTITLE A—BENEFITS AND FEDERAL PARTICIPATION

SEC. 101. AFDC MINIMUM BENEFIT AMOUNT.

(a) MINIMUM BENEFIT AMOUNT.—

(1) Section 402(a) of the Social Security Act (42 U.S.C. 602(a)) is amended—

(A) by striking "and" at the end of paragraph (38),

(B) by striking the period at the end of paragraph (39) and inserting in lieu thereof "; and", and

(C) by inserting after paragraph (39) and before the matter following such paragraph the following new paragraph:

"(40) provide that aid provided under the plan shall be equal to or greater than the minimum benefit amount specified in section 411.".

(2) Part A of title IV of such Act is amended by inserting between sections 410 and 412 the following new section:

"MINIMUM BENEFIT AMOUNT

"SEC. 411. (a) The minimum monthly benefit amount for aid furnished in any month under a plan approved under this part with respect to any dependent child (including the relative with whom the child is living and any other individual in the same home as the child, whose needs are taken into account in making the determination under section 402(a)(7)) shall be an amount that, when added to the value of any food stamp allotment to which the family or its household is entitled for such month, is equal to the applicable percentage of the nonfarm income official poverty line established by the Office of Management and Budget (and revised annually in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981) for a family of the same size.

"(b) For purposes of this section—

"(1) the term 'applicable percentage' means—

"(A) 50 percent with respect to months beginning in fiscal year 1989,

"(B) 52 percent with respect to months beginning in fiscal year 1990,

"(C) 54 percent with respect to months beginning in fiscal year 1991,

"(D) 56 percent with respect to months beginning in fiscal year 1992,

"(E) 58 percent with respect to months beginning in fiscal year 1993,

"(F) 60 percent with respect to months beginning in fiscal year 1994, and

"(G) 62 percent with respect to months beginning in any fiscal year after fiscal year 1994; and

"(2) the term 'fiscal year' has the meaning given to such term in section 1102 of title 31, United States Code.".

(b) FEDERAL MATCHING RATE.—Section 1118 of the Act (42 U.S.C. 1318) is amended—

(1) by striking the second sentence,

(2) by inserting "(a)" after "Sec. 1118.", and

(3) by striking the last sentence, and

(4) by adding at the end thereof the following new subsection:

"(b) For purposes of subsection (a), the term 'Federal medical assistance percentage' shall mean—

"(1) 90 per centum with respect to any amounts expended by the State (as aid to families with dependent children) to meet the minimum benefit requirements of section 402(a)(40), and

"(2) the Federal medical assistance percentage (as defined in section 1905) with respect to any amounts (expended by the State as aid to families with dependent children) in excess of the amounts necessary to meet such requirements.".

(c) EFFECTIVE DATE.—Except as otherwise specifically provided, the amendments made by subsections (a) and (b) shall become effective October 1, 1988.

SEC. 102. MANDATORY PROVISION OF AID WITH RESPECT TO DEPENDENT CHILDREN IN TWO-PARENT FAMILIES.

REQUIREMENT THAT AID BE PROVIDED.—Section 402(a) of the Social Security Act, as amended by section 101 of this Act, is further amended—

(1) by striking out "and" after the semicolon at the end of paragraph (39);

(2) by striking out the period at the end of pararaph (40) and inserting in lieu thereof "; and"; and

(3) by inserting immediately after paragraph (40) the following new paragraph:

"(41) provide that payments of aid will be made under the plan with respect to dependent children of unemployed parents, in accordance with section 407.".

(b) CONFORMING AMENDMENTS—

(1) Section 407(b) of such Act is amended by striking out "(b) The provisions" and all that follows down through "(1) requires" and inserting in lieu thereof the following:

"(b) In providing for the payment of aid under the State's plan approved under section 402 in the case of families which include dependent children within the meaning of subsection (a) of this section, as required by section 402(a)(41), the State's plan—

"(1) shall require".

(2) Section 407(b)(2) of such Act is amended by striking out "provides—" and inserting in lieu thereof "shall provide—".

(c) EFFECTIVE DATE.—Except as otherwise specifically provided, the amendments made by subsections (a) and (b) shall become effective October 1, 1988.

SEC. 102. MANDATORY PROVISION OF AID WITH RESPECT TO DEPENDENT CHILDREN IN TWO-PARENT FAMILIES.

(a) REQUIREMENT THAT AID BE PROVIDED.—Section 402(a) of the Social Security Act, as amended by section 101 of this Act, is further amended—

(1) by striking out "and" after the semicolon at the end of paragraph (39);

(2) by striking out the period at the end of paragraph (40) and inserting in lieu thereof "; and"; and

(3) by inserting immediately after paragraph (40) the following new paragraph:

"(41) provide that payments of aid will be made under the plan with respect to dependent children of unemployed parents, in accordance with section 407.".

(b) CONFORMING AMENDMENTS.—

(1) Section 407(b) of such Act is amended by striking out "(b) The provisions" and all that follows down through "(1) requires" and inserting in lieu thereof the following:

"(b) In providing for the payment of aid under the State's plan approved under section 402 in the case of families which include dependent children within the meaning of subsection (a) of this section, as required by section 402(a)(41), the State's plan—

"(1) shall require".

(2) Section 407(b)(2) of such Act is amended by striking out "provides—" and inserting in lieu thereof "shall provide—".

(c) EFFECTIVE DATE.—The amendments made by this section shall become effective October 1, 1988.

Subtitle B—Work-Related Requirements

SEC. 111. STATE PLAN REQUIREMENTS; REGISTRATION OF AFDC APPLICANTS AND RECIPIENTS FOR WORK-RELATED COUNSELING, ASSESSMENT, AND ASSIGNMENT.

(a) REQUIREMENT OF REGISTRATION.—Section 402(a)(19) of the Social Security Act is amended—

(1) in subparagraph (A)—

(A) by striking out "shall register" and all that follows down through "regulations issued by him," in the matter preceding clause (i) and inserting in lieu thereof "shall register with the State agency designated under section 416, in accordance with regulations issued by the Secretary, for work-related counseling, assessment, and assignment to employment, training, education, and other employment-related activities as described in section 416(b),";

(B) by striking out clause (iii) and inserting in lieu thereof the following:

"(iii) a person so remote from appropriate employment related activities that his or her effective participation in such activities is precluded;";

(C) in clause (v) by inserting "(or such younger age as the State may designate)" after "six";

(D) by striking out "to participate under a work incentive program or accept" in clause (vi) and inserting in lieu thereof "to participate in good faith in counseling and assessment with such agency and in employment, training, or education pursuant to an assignment under that section, or to accept";

(E) by striking out "the Secretary of Labor" in clause (v) and inserting in lieu thereof "the State agency designated under section 416";

(F) by striking out "or" at the end of clause (viii);

(G) by adding "or" after the semicolon at the end of clause (ix);

(H) by inserting after clause (ix) and before the matter following such clause the following new clause:

"(x) any individual with respect to whom the State agency designated under section 416 makes the determination that counseling, assessment, and the employment-related activities described in section 416(b) will not improve the employment prospects of the individual;"; and

(I) in the matter following clause (x)—

(i) by striking out "any individual referred to in clause (v)" in the matter following clause (ix) and inserting in lieu thereof "(I) any individual exempt from registration under the preceding provisions of this subparagraph", and

(ii) by striking out "register;" the second place it appears and inserting in lieu thereof "register, and (II) no individual providing care for a child under the age of six shall be required to register by reason of the parenthetical expression in clause (v) unless the State agency designated under section 416 is able to make necessary transportation and child care arrangements available to such individual;";

(2) in subparagraph (B), by striking out "or the individual's certification" and all that follows and inserting in lieu thereof "or the individual's certification under subparagraph (G) of this paragraph to the State agency designated under section 416, or by reason of an individual's participation in employment, training, or education pursuant to an assignment made by such agency under section 416(b)(3);";

(3) in subparagraph (C), by striking out "a non-Federal contribution to the work incentive programs" and all that follows and inserting in lieu thereof "a non-Federal contribution by appropriate State and local agencies and private organizations to the work incentive programs established by part C, and to any other work-related programs to which individuals are assigned under section 416(b)(3), as specified in section 416(e);";

(4) in subparagraph (D), by striking out "under section 434" and "a program established by section 432(b) (2) or (3)" and inserting in lieu thereof "under a program to which individuals are assigned by the State agency designated under section 416" and "such a program", respectively;

(5) in subparagraph (F)—

(A) by striking out "that if" and all that follows down through "purposes of such part C" (in the matter preceding clause (i)) and inserting in lieu thereof "that if (and for such period as is prescribed under regulations of the Secretary) any child, relative, or individual required to register under subparagraph (A) has been found by the State agency designated under section 416 to have refused without good cause to so register, or has refused without good cause to participate in good faith in counseling and assessment with the State agency designated under section 416 or in employment, training, or education pursuant to an assignment made by such agency under section 416(b)(3),"; and

(B) by adding after and below clause (v) the following:

"and for purposes of this subparagraph a refusal by an individual to accept employment shall be considered to have been made with good cause if the acceptance of such employment would result in a net loss of income by such individual;".

(6) in subparagraph (G)—

(A) by striking out "for the administration of programs established pursuant to section 432(b) (1), (2), or (3)" and inserting in lieu thereof "by the State agency designated under section 416";

(B) by striking out "the order of priority listed in section 433(a)" and inserting in lieu thereof "with the order of priority determined by the State";

(C) by striking out "under section 432(b) (1), (2), or (3)" each place it appears and inserting in lieu thereof "under the work-related program involved";

(D) by striking out "the Secretary of Labor" each place it appears and inserting in lieu thereof "the State agency designated under section 416";

(E) by striking out "accepts employment" and "retain such employment" and inserting in lieu "accepts counseling, assessment, job search, employment, training, or education" and "continue such counseling, assessment, job search, employment, training, or education", respectively; and

(F) by striking out clause (iii) and redesignating clause (iv) as clause (iii); and

(7) in subparagraph (H), by striking out "under section 432(b) (1), (2), or (3)" and inserting in lieu thereof "under section 416".

(b) REQUIREMENT OF CONSOLIDATED ADMINISTRATION OF WORK-RELATED PROGRAMS.—Section 402(a) of such Act is further amended—

(1) by striking out "and" after the semicolon at the end of paragraph (38);

(2) by striking out the period at the end of paragraph (39) and inserting in lieu thereof "; and"; and

(3) by inserting immediately after paragraph (39) the following new paragraph:

"(40) consolidate the administration of the State's work-related functions under this part, by providing for the assignment of registered individuals by the State agency designated under section 416 to work-related counseling, assessment, and to employment and training programs (as described in such section) and for the performance by such agency of its other duties under that section and under paragraph (19) of this subsection.".

SEC. 112. CONSOLIDATED ADMINISTRATION OF WORK-RELATED PROGRAMS.

Part A of title IV of the Social Security Act is amended by adding at the end thereof the following new section:

"CONSOLIDATED ADMINISTRATION OF WORK-RELATED PROGRAMS

"SEC. 416. (a)(1) The Governor of each State with a plan under this part shall designate a State agency to perform the functions specified in this section and in section 402(a)(19).

"(2) It shall be the purpose of the State agency designated under this subsection to assist applicants for and recipients of aid to families with dependent children in finding gainful employment and in obtaining any training and education which may be necessary to enable them to perform such employment, with the objective of reducing the number of individuals on the welfare rolls by providing such applicants and recipients with a realistic opportunity to become self-sufficient.

"(b) In carrying out the purpose described in subsection (a)(2), the State agency designated under subsection (a) shall—

"(1) provide for the registration of all applicants for and recipients of aid to families with dependent children, consistent with section 402(a)(19), and for the determination of the appropriate employment-related activities (including counseling, assessment, and job search) with respect to each such individual;

"(2) administer, or enter into arrangements with administering authorities for, the participation of such applicants and recipients in employment, training, and education activities determined by the State agency designated under subsection (a) to be in furtherance of the objective stated in subsection (a)(2), including—

"(A) the work incentive program under part C of this title,

"(B) the work incentive demonstration program under section 445,

"(C) the State's community work experience program under section 409,

"(D) the State's work supplementation program under section 414, and

"(E) a work demonstration program under section 1115;

"(F) any program under the Job Training Partnership Act,

"(G) any program of job search and related services, including services offered by vocational education agencies and the public employment offices of the State, and

"(H) any other program (Federal, State, local, or private) which could be made effectively available to such applicants and recipients and participation in which would further such objective;

"(3) assign each such applicant or recipient to activities or programs with respect to which arrangements have been entered into under paragraph (2) and which are determined by the State agency designated under subsection (a), to be appropriate for such applicant or recipient, and provide all possible assistance to such applicant or recipient in preparing for, enrolling in, and participating in such program or programs; and

"(4) take all other actions, not inconsistent with the provisions of this section or of the law governing the program or programs involved, which may be necessary or appropriate to achieve the objective stated in subsection (a)(2).

"(c)(1) The terms and conditions of participation in employment, training, and education activities as described in subsection (b)(2), and the manner in which the provisions of the programs involved are to apply with respect to applicants and recipients registered under section 402(a)(19), shall be determined (subject to the specific requirements of this title and of such programs) by the State agency designated under subsection (a) in consultation with the administering authorities of such programs.

"(2) To the maximum extent possible, the steps taken in providing for participation in counseling, assessment, and job search, and the employment, training, and education activities as described in subsection (b)(2) shall include coordination of the services furnished and activities conducted under the various programs involved with respect to registered applicants and recipients in order to avoid inefficiency and duplication of effort and to assure the widest possible availability to such applicants and recipients of services and activities which will further the objective stated in subsection (a)(2). Under regulations prescribed by the Secretary, this section and all functions performed by State agencies and entities under this section shall be coordinated with the work and training requirements which apply to applicants for and recipients of benefits under the Food Stamp Act of 1977.

"(d) The State agency designated under subsection (a) shall make available to registered applicants and recipients who are assigned for employment, training, or education under subsection (b)(3) such child care services and transportation, and such other assistance not inconsistent with law, as may be necessary or appropriate to achieve the objective stated in subsection (a)(2).

"(e)(1) Notwithstanding any other provision of law, and except as provided in paragraphs (4) and (5), the Federal contribution to the costs incurred by the State agency designated under subsection (a) in any fiscal year, and to the costs incurred by any other State agency or entity in carrying out a program referred to in subsection (b)(2) with respect to individuals assigned to that program under subsection (b)(3) in any fiscal year shall be equal to the applicable percentage of such costs as determined under paragraph (2).

"(2)(A) For purposes of paragraph (1), the applicable percentage of the costs described in that paragraph which are incurred by any State agency or entity in fiscal year 1988 shall be 90 percent.

"(B) For purposes of paragraph (1), the applicable percentage of the costs described in paragraph (1) which are incurred by any State agency or entity in a fiscal year beginning after fiscal year 1988 shall be—

"(i) 90 percent, with respect to so much of a State's allotment for such fiscal year under subsection (f) as does not exceed the amount allotted to the State under such subsection for fiscal year 1988,

"(ii) 70 percent, with respect to one-half of the amount by which the amount allotted to the State for the fiscal year under subsection (f) exceeds the amount allotted to the State under such subsection for fiscal year 1988, and

"(iii) a percentage (not more than 90 percent and not less than 70 percent) specified by the Secretary on the basis of the performance of the State agency designated under subsection (a), with respect to one-half of the amount by which the amount allotted to the State for the fiscal year under subsection (f) exceeds the amount allotted to the State under such subsection for fiscal year 1988.

"(3)(A) In any fiscal year beginning after fiscal year 1988, the percentage specified by the Secretary under paragraph (2)(B)(iii) shall be determined in accordance with performance standards developed and prescribed by the Secretary of Health and Human Services, in consultation with the Secretary of Labor, appropriate State officials designated for purposes of this paragraph by the Governors of the several States, and other appropriate experts.

"(B) Such performance standards (which shall be coordinated with the corresponding performance standards under the Job Training Partnership Act)—

"(i) shall be measured by outcomes and not by levels of activity or participation, and shall be based on the degree of success which may reasonably be expected of States (in carrying out their employment-related programs with respect to registered individuals assigned under subsection (b)(3)) in helping such individuals to achieve self-sufficiency and reducing welfare costs;

"(ii) shall take into account the greater difficulties in achieving self-sufficiency that face individuals with limited prior employment experience; and

"(iii) shall encourage States to give appropriate recognition to the greater difficulties in achieving self-sufficiency that face individuals with limited prior employment experience.

"(4) The Federal contribution for administrative costs shall be 50 percent.

"(5) The Federal contribution for the costs of providing (or making available) transportation, child care, and other employment-related support services (as defined by the Secretary in regulations) to registered individuals assigned to a program under subsection (b)(3) shall be 90 percent.

"(f)(1) Notwithstanding any other provision of law, there are authorized to be appropriated—

"(A) $500,000,000 for fiscal year 1988,

"(B) $600,000,000 for fiscal year 1989,

"(C) $700,000,000 for fiscal year 1990,

"(D) $800,000,000 for fiscal year 1991,

"(E) $900,000,000 for fiscal year 1992, and

"(F) $1,000,000,000 for each of the fiscal years 1993, 1994, and 1995,

to carry out the activities under this section.

"(2) The amount allotted to a State under paragraph (1) for a fiscal year shall be an amount that bears the same ratio to the amount appropriated under such paragraph for such fiscal year as—

"(A) the average number of AFDC recipients in such State during the most recent 12-month period preceding the commencement of such fiscal year for which satisfactory data are available, bears to

"(B) the average number of AFDC recipients during such period in all the States.

SEC. 113. OPTIONAL COVERAGE OF EMPLOYMENT-RELATED SUPPORT SERVICES FOR CERTAIN INDIVIDUALS.

(a) IN GENERAL.—Section 402(a) of the Social Security Act, as amended by sections 101 and 102 of this Act, is further amended—

(1) by striking out "and" at the end of paragraph (40);

(2) by striking out the period at the end of paragraph (41) and inserting in lieu thereof "; and"; and

(3) by inserting immediately after paragraph (41) the following new paragraph:

"(42) at the option of the State, provide that, in any case where a family has ceased, by reason of increased income from employment, to be eligible for aid under the State plan approved under this part (A) payment under the plan for child care, transportation, and other employment-related support services (as defined by the Secretary in regulations) will continue for such family for a period of up to twelve months after the family has ceased to be eligible for such aid, and (B) at the option of the State, a family contribution for such services (determined in accordance with a sliding scale based on income) will be required.".

(b) REIMBURSEMENT.—Section 416(e)(5) of such Act, as added by section 112 of this Act, is amended by inserting "(and to other individuals eligible for such services in accordance with section 402(a)(42))" after "subsection (b)(5)".

SEC. 114. TECHNICAL, CONFORMING, AND MISCELLANEOUS AMENDMENTS.

(a) AMENDMENTS TO PART A OF TITLE IV.—(1) Section 402(a)(8)(A)(iv)(II) of the Social Security Act is amended by striking out "under the programs established by section 432(b) (2) and (3)" and inserting in lieu thereof "under any training, education, or public service employment program to which such child or relative has been assigned pursuant to section 416(b)(3)".

(2) Section 403(c) of such Act is amended by striking out "certified to the local employment office of the State as being ready for employment or training under section 432(b) (1), (2), or (3)" and inserting in lieu thereof "assigned by the State agency designated under section 416(a) for counseling, assessment, or job search, or for any employment, training, or education activities pursuant to section 416(b)(3)".

(3) Section 407(b)(2)(C)(i) of such Act is amended by striking out "for the work incentive program" and all that follows and inserting in lieu thereof ", and".

(4) Section 407(d)(1) of such Act is amended by striking out "a community work experience program under section 409, or the work incentive program established under part C" and inserting in lieu thereof "a program with respect to which the State agency designated under section 416(a) has provided under section 416(b)(2) for participation by registered individuals in employment, training, and education activities".

(5) Section 407(e) of such Act is amended—

(A) by striking out "and the Secretary of Labor shall jointly" and inserting in lieu thereof "shall";

(B) by striking out "for the work incentive program" and all that follows down through "or in connection" and inserting in lieu thereof "and in connection"; and

(C) by striking out "both the work incentive program" and inserting in lieu thereof "both the programs referred to in section 416(b)(2)".

(6) Section 414(h) of such Act is amended by striking out "or part C".

(b) AMENDMENTS TO PART C OF TITLE IV.—(1) Part C of title IV of such Act is amended—

(A) by striking out section 431;

(B) in section 432(a), by striking out "The Secretary of Labor (hereinafter in this part referred to as the Secretary)" and inserting in lieu thereof "The Secretary";

(C) in section 436(b), by striking out "prescribed jointly by him and the Secretary of Health and Human Services" and inserting in lieu thereof "prescribed by him";

(D) in section 439—

(i) by striking out "and the Secretary of Health and Human Services" where it first appears, and

(ii) by striking out ", jointly by the Secretary and the Secretary of Health and Human Services," and inserting in lieu thereof "by the Secretary";

(E) in section 441, by striking out "(jointly with the Secretary of Health and Human Services)";

(F) in section 443—

(i) by striking out "of Health and Human Services" in the first and second sentences, and

(ii) by striking out "and shall be paid by the Secretary of Health and Human Services to the Secretary" in the fourth sentence;

(G) in section 444(a), by striking out "by the Secretary of Health and Human Services"; and

(H) in section 445—

(i) by striking out "of Health and Human Services" each place it appears in paragraphs (1) and (2) of subsection (b) and in subsection (e), and

(ii) by striking out paragraph (3) of subsection (b).

(2) Section 433(a) of such Act is amended—

(A) by striking out "certified to him by a State, pursuant to section 402(a)(19)(G)" and inserting in lieu thereof "assigned to the work incentive program pursuant to section 416(b)(3)"; and

(B) by striking out "certified to him under section 402(a)(19)(G)" and inserting in lieu thereof "assigned to the work incentive program pursuant to section 416(b)(3)".

(3) Section 433(b)(3) of such Act is amended by striking out "certified to him pursuant to section 402(a)(19)(G)" and inserting in lieu thereof "assigned to the work incentive program pursuant to section 416(b)(3)".

(4) Section 433(g) of such Act is amended by striking out "certified to the Secretary pursuant to section 402(a)(19)(G)" and inserting in lieu thereof "assigned to the work incentive program pursuant to section 416(b)(3)".

(5) Section 435(a) of such Act is amended by striking out "shall not exceed 90 per centum of the costs of carrying out this part" and inserting in lieu thereof "shall be equal to the applicable percentage of the costs of carrying out this part as determined under section 416(e)".

(6) Section 444(a) of such Act is amended by striking out "individuals certified" and all that follows and inserting in lieu thereof "individuals assigned to the work incentive program pursuant to section 416(b)(3).".

(7) Section 444(d) of such Act is amended by striking out "certified to the Secretary by such agency under section 402(a)(19)(G)" and inserting in lieu thereof "assigned to the State agency designated under section 416".

(8) Section 445 of such Act is amended—

(A) by striking out "Not later than June 30, 1985, the" in subsection (b)(1) (in the matter preceding subparagraph (A)) and inserting in lieu thereof "The";

(B) by striking out ", and shall be required to participate in," in subsection (b)(1)(B); and

(C) by striking out "shall be in force for a three-year period" in subsection (d) and inserting in lieu thereof "shall be in force for such period as may be specified in the letter of application submitted under subsection (b)(1), and may be renewed (upon the submission by the Governor of an appropriate letter of application, subject to approval in the manner described in subsection (b)(2)) for an additional period or periods".

(c) RELATIONSHIP WITH OTHER WORK-RELATED PROGRAMS.—Whenever a provision of section 416 of the Social Security Act, or any other provision of such Act which is amended by the preceding provisions of this Act, is determined to be inconsistent with a provision of any of the work-related programs referred to in section 416(b)(2) of such Act or of any other work-related program which may involve or affect individuals who have registered under section 402(a)(19) of such Act and are assigned to such program under section 416(b)(3) of such Act, the provision of section 416 of the Social Security Act (or other provision of such Act as amended by this Act) shall govern.

SEC. 115. EFFECTIVE DATE.

Except to the extent otherwise specifically provided, the amendments made by this subtitle shall take effect October 1, 1987.

Subtitle C—Hold Harmless

SEC. 121. HOLD HARMLESS.

Notwithstanding any other provision of title IV or XI of the Social Security Act, the Federal percentage shall be 100 per centum with respect to—

(1) amounts expended by a State as aid to families with dependent children (or for employment-related activities consolidated under part A of title IV) in calendar quarters beginning in fiscal year 1988, and

(2) amounts expended by a State as aid to families with dependent children (or for employment-related activities consolidated under part A of title IV) in calendar quarters beginning in fiscal year 1989,

that are in excess of the amounts expended by the State for such aid and activities for calendar quarters beginning in fiscal year 1987 and that are attributable to the amendments made by this Act.

TITLE II—MEDICAID

SEC. 201. MEDICAID ELIGIBILITY FOR POOR CHILDREN AND PREGNANT WOMEN.

(a) QUALIFIED PREGNANT WOMEN AND CHILDREN.—

(1) Section 1905(n) of the Social Security Act (42 U.S.C. 1396f(n)) is amended to read as follows:

"(n)(1) The term 'qualified pregnant woman or child' means—

"(A) women during pregnancy (and during the 60-day period following pregnancy),

"(B) infants and children under five years of age,

"(C) children who have attained five years of age but have not attained six years of age,

"(D) children who have attained six years of age but have not attained seven years of age,

"(E) children who have attained seven years of age but have not attained eight years of age,

"(F) children who have attained eight years of age but have not yet attained nine years of age,

"(G) children who have attained nine years of age but have not yet attained ten years of age,

"(H) children who have attained ten years of age but have not yet attained eleven years of age, and

"(I) children who have attained eleven years of age but have not yet attained twelve years of age,

whose family income does not exceed 100 percent of the nonfarm income official poverty line defined by the Office of Management and Budget (and revised annually in accordance with section 673(2) of the Omnibus Budget Reconciliation Act of 1981) applicable to a family of the size involved.

"(2) Notwithstanding subsection (a)(17), for purposes of this subsection family income shall be determined in accordance with the methodology employed under section 5 of the Food Stamp Act of 1977. Any different treatment provided under this paragraph for such individuals shall not, because of subsection (a)(17), require or permit such treatment for other individuals.".

(2)(A) Section 1902(a)(17) of such Act (42 U.S.C. 1396a(a)(17)) is amended by inserting "except as provided in subsection (n)," after "(17)".

(B) Section 1903(f)(4) of such Act (42 U.S.C. 1396b(f)(4)) is amended by inserting "for any individual described in section 1902(f)(1) or" after "as medical assistance".

(b) REQUIRED SERVICES.—Section 1902 of such Act (42 U.S.C. 1396a), as amended by subsection (a), is further amended by adding at the end thereof the following new subsection:

"(l) The Secretary shall establish uniform national minimum standards with respect to the types of care and services described in section 1905(a) that shall be made available to qualified women and children under State plans approved under this title. Such services shall include, with respect to pregnant women, at least the services described in subsections (a)(10)(C)(iii)(II) and (e)(5).".

(c) EFFECTIVE DATE.—

(1) Except as provided in paragraphs (2) and (3), the amendments made by this Act shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1987.

(2)(A) Subparagraph (C) of section 1902(n)(1) of the Social Security Act, as added by subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1988.

(B) Subparagraph (D) of section 1902(n)(1) of the Social Security Act, subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1989.

(C) Subparagraph (E) of section 1902(n)(1) of the Social Security Act, subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1990.

(D) Subparagraph (F) of section 1902(n)(1) of the Social Security Act, subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1991.

(E) Subparagraph (G) of section 1902(n)(1) of the Social Security Act, subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1992.

(F) Subparagraph (H) of section 1902(n)(1) of the Social Security Act, subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1993.

(G) Subparagraph (I) of section 1902(n)(1) of the Social Security Act, subsection (a), shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1994.

(3) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to

comply with the requirements of such title solely on the basis of its failure to meet such additional requirements until the first day of the first calendar year beginning after the close of the first regular session of the State legislature that begins after October 1, 1987.

(4) The amendments made by this section shall become effective without regard to whether the Secretary of Health and Human Services has promulgated final regulations with respect to the standards required by section 1902(l) of the Social Security Act.

SEC. 202. MEDICAID ELIGIBILITY FOR CERTAIN OTHER INDIVIDUALS.

(a) IN GENERAL.—

(1) Subsection (f) of section 1902 of the Social Security Act (42 U.S.C. 1396a(F) is repealed.

(2) Section 1902(a)(10)(A)(i) of the Social Security Act, as amended by section 201, is further amended—

(A) by striking "or" at the end of subclause (II),

(B) by striking the semicolon at the end of subclause (III) and inserting in lieu thereof a comma, and

(C) by adding at the end thereof the following new subclauses:

"(IV) who are eligible to have paid with respect to them supplemental security income benefits under title XVI, or

"(V) who would be eligible (if they were not in a medical institution) to have paid with respect to them, aid or assistance under the appropriate State plan described in subclause (I), supplemental security income benefits under title XVI.".

(3)(A) Section 1843(b) of such Act (42 U.S.C. 1395v(b)) is amended by striking "subject to section 1902(f),".

(B) Section 1902(a)(10)(A)(ii)(IV) of such Act is amended to read as follows:

"(IV) with respect to whom there is being paid, or who are eligible to have paid with respect to them, aid or assistance under the appropriate State plan described in clause (i);".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1988.

SEC. 203. MEDICALLY NEEDY PROGRAM REQUIRED.

(a) IN GENERAL.—Section 1902 of the Social Security Act, as amended by sections 201 and 202, is further amended by adding at the end thereof the following new subsection:

"(m) In order to be approved under this section, a State plan shall, pursuant to subsection (a)(1)(C), include medical assistance for one or more groups of individuals described in section 1905(a) who are not described in subsection (a)(1)(A) of this section.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to medical assistance furnished in calendar quarters beginning on or after October 1, 1988.

SEC. 204. FEDERAL MEDICAL ASSISTANCE PERCENTAGE.

Section 1905(b) of the Social Security Act 942 U.S.C. 1396d(b)) is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively,

(2) by inserting "(1)" after "(b)",

(3) by striking "Hawaii;" and inserting in lieu thereof "Hawaii, decreased by the applicable number of percentage points;",

(4) by striking "83 per centum" and inserting in lieu thereof "90 per centum",

(5) by striking "Act)." and inserting in lieu thereof "Act). Notwithstanding the first sentence of this subsection, the Federal medical assistance percentage shall be 80 per centum with respect to amounts expended as medical assistance for qualified pregnant women and children (as defined in section 1902(n)) for calendar quarters beginning on or after October 1, 1987, and before October 1, 1988, and 90 per centum with respect to amounts so expended in calendar quarters beginning on or after October 1, 1988.", and

(6) by adding at the end thereof the following new paragraph:

"(2) For purposes of paragraph (1), the applicable number of percentage points (by which a State percentage shall be reduced) is—

"(A) in the case of calendar quarters beginning on or after October 1, 1988, and before October 1, 1989, 2 percentage points,

"(B) in the case of calendar quarters beginning on or after October 1, 1989, and before October 1, 1990, 4 percentage points,

"(C) in the case of calendar quarters beginning on or after October 1, 1990, and before October 1, 1991, 6 percentage points,

"(D) in the case of calendar quarters beginning on or after October 1, 1991, and before October 1, 1992, 8 percentage points,

"(E) in the case of calendar quarters beginning on or after October 1, 1992, and before October 1, 1993, 10 percentage points, and

"(F) in the case of calendar quarters beginning on or after October 1, 1993, and before October 1, 1994, 12 percentage points, and

"(F) in the case of calendar quarters beginning on or after October 1, 1994, 14 percentage points.".

SEC. 205. HOLD HARMLESS.

Notwithstanding any other provision of title XI or XIX of the Social Security Act, the Federal medical assistance percentage shall be 100 per centum with respect to—

(1) amounts expended by a State for medical assistance furnished in calendar quarters beginning in fiscal year 1988, and

(2) amounts expended by a State for medical assistance furnished in calendar quarters beginning in fiscal year 1989,

that are in excess of the amounts expended by the State for medical assistance for calendar quarters beginning in fiscal year 1987 and that are attributable to the amendments made by this Act.

TITLE III—TERMINATION OR REDUCTION OF CERTAIN FEDERAL PROGRAMS

SEC. 301. REPEAL OF CERTAIN STATUTES.

The following provisions of law are hereby repealed:

(1) APPALACHIAN REGIONAL COMMISSION.—Section 101 of the Appalachian Regional Development Act of 1965 (Public Law 89-4; 79 Stat. 5).

(2) ECONOMIC DEVELOPMENT ADMINISTRATION.—Public Works and Economic Development Act of 1965 (Public Law 89-136; 79 Stat. 552).

(3) URBAN MASS TRANSIT INTERSTATE TRANSFER.—Section 4(g) of the Urban Mass Transportation Act of 1964.

(4) URBAN MASS TRANSIT FORMULA GRANTS.—Section 9 of the Urban Mass Transportation Act of 1964.

(5) URBAN MASS TRANSIT RESEARCH.—Section 11 of the Urban Mass Transportation Act of 1964.

(6) UDAG AND CDBG.—Title I of the Housing and Community Development Act of 1974.

(7) IMPACT AID.—

(A) The Act of September 30, 1950 (Public Law 874, Eighty-first Congress).

(B) The Act of September 23, 1950 (Public Law 815, Eighty-first Congress).

(8) CONSOLIDATION OF EDUCATION PROGRAMS.—Chapter 2 of the Education Consolidation and Improvement Act of 1981.

(9) VOCATIONAL EDUCATION.—Carl D. Perkins Vocational Education Act.

(10) COMMUNITY SERVICES BLOCK GRANTS.—Community Services Block Grant Act.

(11) WASTEWATER.—Federal Water Pollution Control Act (33 U.S.C. 1251, et seq.).

(12) RURAL WATER WASTE DISPOSAL.—Section 306 of the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1926).

SEC. 302. REDUCTION IN HOUSING ASSISTANCE PROGRAM OUTLAYS.

(a) PROGRAMS TO WHICH REDUCTIONS APPLY.—The reductions required by subsection (b) shall apply to the following housing assistance programs:

(1) Housing assistance payments under section 8 of the United States Housing Act of 1937.

(2) Public housing assistance and loans under the United States Housing Act of 1937.

(3) Rental housing assistance under section 236 of the National Housing Act.

(4) Loans for the development of housing for the elderly and handicapped under section 202 of the Housing Act of 1959.

(5) Congregate services assistance under the Congregate Housing Services Act of 1978.

(6) Operating assistance under section 201 of the Housing and Community Development Amendments of 1978.

(b) AMOUNT OF REDUCTIONS.—The Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives shall report legislation to their respective Houses reducing the aggregate outlays for the programs referred to in subsection (a) from the fiscal year 1986 aggregate baseline outlay amount, as determined by the Director of the Congressional Budget Office, by the following cumulative amounts:

(1) For fiscal year 1987, $700,000,000.
(2) For fiscal year 1988, $800,000,000.
(3) For fiscal year 1989, $900,000,000.
(4) For fiscal year 1990, $1,000,000,000.
(5) For fiscal year 1991, $1,000,000,000.
(6) For fiscal year 1992, $1,200,000,000.
(7) For fiscal year 1993, $1,300,000,000.
(8) For fiscal year 1994, $1,400,000,000.

SEC. 303. REDUCTION AND TERMINATION OF SOCIAL SERVICES BLOCK GRANT.

(a) REDUCTION.—Section 2003(c)(3) of the Social Security Act (42 U.S.C. 1397b(c)(3)) is amended to read as follows:

"(3) $2,000,000,000 for each of the fiscal years 1988 and 1989.".

(b) TERMINATION.—Effective October 1, 1989, title XX of the Social Security Act is repealed.

TITLE IV—FISCAL CAPACITY GRANTS

SEC. 401. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds and declares that—

(1) with the same level of tax effort, high fiscal capacity communities can generate twice the tax revenues of low fiscal capacity communities;

(2) such unevenness in revenue raising ability is responsible for substantial differences in the level and quality of basic community services such as public safety, emergency services, assistance to the homeless,

indigent and elderly public health, and transportation;

(3) low-income communities generally have higher concentrations of poor individuals who have above average needs for public services and place additional burdens on local governments;

(4) these communities are further burdened by the numerous, unfunded Federal mandates with which they must comply;

(5) it is a responsibility of the Federal government to help ensure that all citizens enjoy a minimum level of basic public services;

(6) it is in the national interest to strengthen the weaker partners in the Federal system by lessening the fiscal disparities that exist among communities;

(7) overall, the current system of Federal aid is only mildly targeted to needy State and local government and does little to lessen fiscal disparities; and

(8) a well-targeted program of general purpose fiscal assistance, with a moderate funding level, could reduce fiscal disparities between high-income and low-income local governments.

(b) PURPOSE.—It is the purpose of this title to establish a program that will—

(1) reduce fiscal disparities among State and local governments, and

(2) ensure that all communities can provide their citizens with a safety net of basic public services,

by providing general purpose fiscal assistance to needy communities.

SEC. 402. DEFINITIONS AND SPECIAL RULES OF APPLICATION.

(a) DEFINITIONS.—For purposes of this title—

(1) The term "unit of general local government" means—

(A) a county, township, city, or political subdivision of a county, township, or city, that is a unit of general local government as determined by the Secretary of Commerce for general statistical purposes; and

(B) except under sections 407(b), 408, and 409(a)(2), the District of Columbia and the recognized governing body of an Indian tribe or Alaskan native village that carries out substantial governmental duties and powers.

(2) The term "entitlement period" means each one-year period beginning on October 1 of 1987, 1988, 1989, 1990, 1991, 1992, and 1993.

(3) The term "State and local taxes" means taxes imposed by a State government or unit of general local government or other political subdivision of the State government for public purposes (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for capital outlay) as determined by the Secretary of Commerce for general statistical purposes.

(4) The term "other charges" means the other charges imposed by a State government or unit of general local government as determined by the Secretary of Commerce for general statistical purposes.

(5) The term "adjusted taxes of a unit of general local government" means the taxes imposed by the unit of general local government for public purposes (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for capital outlay) determined by the Secretary of Commerce for general statistical purposes and adjusted (under regulations of the Secretary of the Treasury) to exclude amounts properly allocated to education expenses.

(6) The term "income" means the total money income received from all sources as determined by the Secretary of Commerce for general statistical purposes.

(7) The term "per capita income" means—

(A) in the case of the United States, the income of the United States divided by the population of the United States;

(B) in the case of a State, the income of that State, divided by the population of that State; and

(C) in the case of a unit of general local government, the income of that unit of general local government divided by the population of the unit of general local government.

(8) The term "finding of discrimination" means a decision by the Secretary of the Treasury about a complaint described in section 419(b), a decision by a State or local administrative agency, or other information (under regulations prescribed by the Secretary) that it is more likely than not that a State government or unit of general local government has not complied with subsection (a) or (b) of section 414.

(9) The term "holding of discrimination" means a holding by a United States court, a State court, or an administrative law judge appointed under section 3105 of title 5, that a State government or unit of general local government expending amounts received under this Act has—

(A) excluded a person in the United States from participating in, denied the person the benefits of, or subjected the person to discrimination under, a program or activity because of race, color, national origin, or sex; or

(B) violated a prohibition against discrimination described in section 414(b) of this Act.

(10) The term "Trust Fund" means the General Fiscal Assistance Trust Fund.

(11) The term "Secretary" means the Secretary of the Treasury.

(b) BOUNDARY AND OTHER CHANGES.—When a boundary line change, a State statutory or constitutional change, annexation, a governmental reorganization, or other circumstance results in the application of this Act in a way that does not carry out the purposes of this Act, the Secretary shall apply this Act under regulations of the Secretary in a way that is consistent with those purposes.

SEC. 403. PAYMENTS TO STATE AND LOCAL GOVERNMENTS.

(a) PAYMENT OF ENTITLEMENTS.—Each State government and unit of general local government is entitled to an amount equal to the amount allocated to such government under this Act for each entitlement period. The Secretary of the Treasury shall pay each amount out of the General Fiscal Assistance Trust Fund.

(b) TIMING OF PAYMENTS.—Except as provided under regulations of the Secretary, the Secretary shall determine allocations under this Act for an entitlement period by the first day of the third month before the beginning of the entitlement period. The Secretary shall pay such allocations in installments. An installment shall be paid at least once a quarter by the fifth day after the end of the quarter. The Secretary initially may estimate the amount of each installment.

(c) ADJUSTMENTS.—The Secretary shall adjust a payment under this Act to a State government or unit of general local government to the extent that a prior payment to the government was more or less than the amount required to be paid. However, the Secretary may increase or decrease a payment to the government only when the Secretary or the government demands the increase or decrease within one year after the end of the entitlement period for which the payment was made.

(d) RESERVATION FOR ADJUSTMENTS.—The Secretary may reserve a percentage (of not more than 0.5 percent) of the amounts otherwise required to be paid under this section for an entitlement period for a State government and units of general local government in the State when the Secretary considers the reserve is necessary to ensure the availability of sufficient amounts to pay adjustments after the final allocation of amounts among the units of general local government in the State.

SEC. 404. GENERAL FISCAL ASSISTANCE TRUST FUND.

(a) ADMINISTRATION OF TRUST FUND.—There is hereby established in the Treasury of the United States a trust fund to be known as the "General Fiscal Assistance Trust Fund". The Secretary of the Treasury shall be the trustee of the Trust Fund. Amounts in the Trust Fund—

(1) except as provided in this Act, may be used only for payments to State governments and units of general local government under this Act; and

(2) remain available until expended.

(b) APPROPRIATIONS.—(1) The Trust Fund shall consist of amounts appropriated to the Trust Fund.

(2) There are authorized to be appropriated to the Trust Fund for each entitlement period—

(A) $2,500,000,000 for the purpose of making payments to State governments under this Act, and

(B) $1,500,000,000 for the purpose of making payments to units of general local government under this Act.

(c) TRANSFER OF EXCESS TO GENERAL FUND.—The Secretary shall transfer to the general fund of the Treasury amounts in the Trust Fund the Secretary decides are not necessary for payments to State governments and units of general local government under this Act.

(d) APPROPRIATION AUTHORIZED FOR CERTAIN ADMINISTRATIVE EXPENSES.—There are authorized to be appropriated to the Department of Commerce for each entitlement period $500,000 for the purpose of making the determinations required under sections 402(a)(4) and 407(c)(3).

SEC. 405. QUALIFICATIONS.

(a) IN GENERAL.—Under regulations prescribed by the Secretary, a State government or unit of general local government qualifies for payment under this Act for an entitlement period only after establishing to the satisfaction of the Secretary that—

(1) the government will establish a trust fund in which the government will deposit all payments received under this Act;

(2) the government will use amounts in the trust fund (including interest) during a reasonable period provided in such regulations;

(3) if at least 25 percent of the pay of individuals employed by the government in a public employee occupation is paid out of the trust fund, individuals in the occupation any part of whose pay is paid out of the trust fund will receive pay at least equal to the prevailing rate of pay for individuals employed in similar public employee occupations by the government;

(4) if at least 25 percent of the costs of a construction project are paid out of the trust fund, laborers and mechanics employed by contractors or subcontractors on the project will receive pay at least equal to the prevailing rate of pay for similar construction in the locality as determined by the Secretary of Labor under the Act of March 3, 1931 (known as the Davis-Bacon Act) (40 U.S.C. 276a et seq.), and the Secretary of Labor shall act on labor standards under this clause in a way that is in accordance with Reorganization Plan No. 14 of 1950 (64 Stat. 1267) and section 2 of the Act of June 13, 1934 (40 U.S.C. 276c);

(5) the government will use accounting, audit, and fiscal procedures conforming to guidelines prescribed by the Secretary of the Treasury (after the Secretary consults with the Comptroller General of the United States);

(6) after reasonable notice to the government, the government will make available to the Secretary of the Treasury and the Comptroller General, with the right to inspect, records the Secretary reasonably requires to review compliance with this Act or the Comptroller General of the United States reasonably requires to review compliance and operations under section 421(d) of this Act;

(7) the government will make reports the Secretary of the Treasury reasonably requires, in addition to the annual reports required under section 422(b) of this Act; and

(8) the government will comply with the requirements of sections 413 and 421.

(b) REVIEW BY GOVERNORS.—A unit of general local government shall give the chief executive officer of the State in which the government is located an opportunity for review and comment before establishing compliance with subsection (a).

(c) SANCTIONS FOR NONCOMPLIANCE.—

(1) When the Secretary of the Treasury decides that a State government or unit of general local government has not complied substantially with subsection (a) or regulations prescribed under subsection (a), the Secretary shall notify the government. The notice shall state that if the government does not take corrective action by the date that is 60 days after the date the government receives the notice, the Secretary will withhold additional payments to the government for the current entitlement period and later entitlement periods until the Secretary is satisfied that the government—

(A) has taken the appropriate corrective action; and

(B) will comply with subsection (a) and regulations prescribed under subsection (a).

(2) Before giving notice under paragraph (1), the Secretary shall give the chief executive officer of the State government or unit of general local government reasonable notice and an opportunity for a proceeding.

(3) The Secretary may make a payment to the government notified under paragraph (1) of this subsection only when the Secretary is satisfied that the government—

(A) has taken the appropriate corrective action; and

(B) will comply with subsection (a) and regulations prescribed under subsection (a).

SEC. 406. SPECIAL ENTITLEMENTS FOR INDIAN TRIBES, ALASKAN NATIVE VILLAGES, AND THE DISTRICT OF COLUMBIA.

(a) ALLOCATION BASED ON POPULATION.—For each entitlement period, the Secretary shall allocate out of the amount authorized for such entitlement period under section 404(b)(2)(B) to—

(1) each Indian tribe and Alaskan Native village having a recognized governing body carrying out substantial governmental duties and powers, and

(2) the District of Columbia,

an amount bearing the same ratio to the special allocation amount for such entitlement period as the population of such tribe or village, or of the District of Columbia, bears to the total population of all of such tribes, villages, and the District of Columbia.

(b) SPECIAL ALLOCATION AMOUNT.—For purposes of this section, the term "special allocation amount" means, for any entitlement period, the amount determined by multiplying—

(1) the total population of all Indian tribes, Alaskan Native villages, and the District of Columbia, by

(2) 150 percent of the amount determined by dividing—

(A) the amount authorized for such entitlement period under section 404(b)(2)(B), by

(B) the total population of the United States.

SEC. 407. STATE AREA ALLOCATIONS FOR UNITS OF GENERAL LOCAL GOVERNMENT.

(a) IN GENERAL.—

(1) For each entitlement period, the Secretary shall allocate to each State out of the amount authorized for the period under section 404(b)(2)(B) (after deduction of the amount allocated under section 406) an amount bearing the same ratio to such amount authorized (after such deduction) as—

(A) the amount determined by multiplying—

(i) the population of the State, by

(ii) the general tax effort factor of the State, by

(iii) the relative fiscal capacity factor of the State; bears to

(B) the sum of the amounts determined under subparagraph (A) for all the States.

(2)(A) The amount of funds allocated to a State under this subsection for any entitlement period shall equal or exceed an amount determined by multiplying—

(i) the population of such State, by

(ii) 20 percent of an amount determined by dividing—

(I) the amount of funds authorized to be appropriated for such entitlement period under section 404(b)(2)(B), by

(II) the total population of the United States.

(B) The Secretary shall increase the amount allocated to any State under paragraph (1) for any entitlement period by the amount necessary to ensure that the allocation to such State under this subsection for the entitlement period meets the requirements of subparagraph (A). The Secretary shall reduce the allocations made under this subsection to all other States by the amount of such increase in proportion to the amount of funds each of such other States was allocated under paragraph (1) for the entitlement period, but only to the extent the allocations made to each of such other States under this subsection for the entitlement period after such reduction meets the requirements of subparagraph (A).

(b) STATE AREA ALLOCATION TO BE ALLOCATED AMONG UNITS OF GENERAL LOCAL GOVERNMENT.—The Secretary shall allocate the amount allocated to a State under subsection (a) among the units of local government in that State under section 408 or 410.

(c) DEFINITIONS.—For purposes of the section—

(1)(A) The general tax effort factor of a State for an entitlement period is an amount determined by dividing—

(i) the sum of—

(I) State and local government taxes, and

(II) other charges imposed by State and local government, by

(ii) the total taxable resources of the State.

(B) The general tax effort factor for any State shall not exceed an amount determined by dividing—

(i) the total of the sums determined under subparagraph (A)(i) for all the States, by

(ii) the sum of the total taxable resources for all the States.

(2)(A) The relative fiscal capacity factor of a State for an entitlement period is the excess, if any, of—

(i) 150 percent of the adjusted total taxable resources of all the States; over

(ii) an amount determined by dividing—

(I) the total taxable resources of such State, by

(II) the population of such State.

If the amount determined under clause (i) does not exceed the amount determined under clause (ii), the relative fiscal capacity factor is zero.

(B) The adjusted total taxable resources of all the States is an amount equal to the sum of—

(i) 20 percent of the amount determined by dividing—

(I) the total taxable resources of the State for which the relative fiscal capacity factor is being determined, by

(II) the population of the State for which the relative fiscal capacity factor is being determined, plus

(ii) 80 percent of the amount determined by dividing—

(I) the sum of the total taxable resources of all the States, by

(II) the sum of the population of all the States.

(3)(A) The total taxable resources of a State is equal to the average, during the most recent 3 years, of the sum of—

(i) the gross State product of such State, plus

(ii) other resources which are potentially taxable by such State or units of general local government within such State, but which originate in the economies of other States.

(B) For purposes of subparagraph (A)—

(i) the Secretary of the Treasury shall, by regulation, define the resources that shall be taken into account for purposes of clause (ii) of subparagraph (A), and

(ii) the Secretary of Commerce shall compute gross State products and such other resources on an annual basis.

SEC. 408. ALLOCATIONS TO UNITS OF GENERAL LOCAL GOVERNMENT IN THE SAME STATE.

(a) IN GENERAL.—Except as otherwise provided in this Act, each unit of general local government in any State (other than the District of Columbia and any Indian tribe and Alaskan Native village which is eligible to receive an entitlement under section 406) shall be allocated for each entitlement period an amount bearing the same ratio to the amount allocated to such State under section 407(a) as—

(1) the amount determined by multiplying—

(A) the population of such unit of general local government, by

(B) the general tax effort factor of such unit of general local government, by

(C) the income factor of such unit of general local government; bears to

(2) the sum of the amounts determined under paragraph (1) for all units of the general local government located in such State.

(b) DEFINITIONS.—For purposes of this section—

(1)(A) The general tax effort factor of a unit of general local government for an entitlement period is the amount determined by dividing—

(i) the revenues of the unit of general local government, by

(ii) the income of such unit.

(B) The revenues of a unit of general local government are the sum of—

(i) the adjusted taxes of the unit of general local government, and

(ii) the other charges imposed by the unit of general local government.

(C) The Secretary shall include that part of sales taxes transferred to a unit of general local government that are imposed by a county government in a geographic area of a unit of general local government as taxes of the unit of general local government under subparagraph (A) when—

(i) the county government transfers any part of the revenue from the taxes to the unit of general local government without specifying the purpose for which the unit of general local government may expend the revenue; and

(ii) the chief executive officer of the State notifies the Secretary that the taxes satisfy the requirements of this subparagraph.

(D) Notwithstanding subparagraph (C)—

(i) the revenues of a township shall not exceed 200 percent of the amount determined by multiplying—

(I) the per capita revenues of all township governments in the State, by

(II) the population of such township government;

(ii) the revenues of a municipal government shall not exceed 200 percent of an amount determined by multiplying—

(I) the per capita revenues of all municipal governments in the State, by

(II) the population of such municipal government;

(iii) the per capita revenues of a county government shall not exceed 200 percent of an amount determined by multiplying—

(I) the per capita revenues of all county governments in the State, by—

(II) the population of such county government; and

(iv) the per capita revenues of a unified city/county government (as defined by the Bureau of the Census) shall not exceed 200 percent of the amount determined by multiplying—

(I) the per capita revenues of all units of unified city/county governments in the State, by

(II) the population of such unified city/county governments.

(E) The per capita revenues of any unit of general local government is the amount determined by dividing—

(i) the revenues of such unit of general local government, by

(ii) the population of such unit of general local government.

(2)(A) The income factor of a unit of general local government for an entitlement period is equal to the excess, if any, of—

(i) 120 percent of the adjusted State per capita income, over

(ii) the per capita income of such unit of general local government.

If the amount determined under clause (i) does not exceed the amount described in clause (ii), the relative income factor of such unit of general local government is zero.

(B) The adjusted State per capita income is equal to the sum of—

(i) 20 percent of the per capita income of the State in which such unit of general local government is located, plus

(ii) 80 percent of the per capita income of the United States.

SEC. 409. ADJUSTMENTS OF LOCAL GOVERNMENT ALLOCATIONS MADE UNDER SECTION 408.

(a) LIMITATIONS ON PAYMENTS.—

(1) Subject to paragraph (2), the per capita allocation under section 408 of any unit of general local government in a State for any entitlement period shall not exceed 300 percent of the amount determined by dividing—

(A) the amount authorized for such entitlement period under section 404(b)(2)(B), by—

(B) the total population of the United States.

(2) Notwithstanding any other provision of this Act, if—

(A) the amount allocated under section 408 to any unit of general local government for an entitlement period is less than $5,000; or

(B) such allocation is waived by the governing authority of the unit of general local government,

the Secretary shall not pay such allocation to such unit of general local government.

(b) Any amounts which may not be paid to a unit of general local government by reason of subsection (a) shall be reallocated among the other units of general local government in the same State in proportion to the amounts allocated under section 408 to such other units, but no reallocation shall cause the entitlement of any such other unit to exceed the amount to which that unit is limited by subsection (a).

SEC. 410. ALTERNATIVE DISTRIBUTION OF FUNDS TO LOCAL GOVERNMENTS.

(a) ESTABLISHMENT OF COMMISSION.—

(1) Each State which receives funds under this Act shall establish a commission to investigate—

(A) the public service needs and fiscal capacities of units of general local government in such State, and

(B) alternative means of allocating among the units of general local government in such State the funds allocated to such State under section 407.

(2)(A) Subject to the provisions of subparagraph (B), the membership of the commission which is to be established under paragraph (1) shall be representative of the forms of units of general local government in the State and the populations served by such units of general local government.

(B) At least 50 percent of the membership of the commission which is to be established under paragraph (1) shall represent units of general local government which have income that is less than 90 percent of the per capita income of the United States.

(3) No funds may be paid under this Act to a State government or to a unit of general local government with the State after the date that is 3 years after the date of enactment of this Act until the State government establishes a commission under paragraph (1) that complies with the requirements of this section.

(b) RECOMMENDATIONS.—

(1) The commission established under subsection (a)(1) shall recommend to the legislature of the State, as an alternative to the allocation provided under section 408, a method of allocating among the units of general local government in the State the funds that are allocated to the State under section 407.

(2) The allocation method recommended by the commission under paragraph (1) shall provide what the commission determines to be the best means of allocating funds to reduce, among all units of general local government in the State, the excess of—

(A) the amount of funds each unit of general local government in the State needs to provide public services, over

(B) the fiscal capacity of such unit of general local government.

(c) IMPLEMENTATION OF ALTERNATIVE ALLOCATION METHOD.—If—

(1) a State government enacts a law which provides, as an alternative to the allocation under section 408, a method of allocating among units of general local government in such State the funds that are allocated to the State under section 407, and

(2) the other requirements of subsections (a) and (b) have been met,

the Secretary shall use such alternative allocation method, in lieu of the provisions of section 408, in allocating among units of general local government in such State the funds allocated to such State under section 407.

SEC. 411. ALLOCATIONS TO STATE GOVERNMENTS.

(a) IN GENERAL.—For each entitlement period, the Secretary shall allocate to each State government out of the amount authorized for the period under section 404(b)(2)(A) an amount bearing the same ratio to such amount authorized as—

(1) the amount determined by multiplying—

(A) the population of the State, by

(B) the general tax effort factor of the State, by

(C) the relative fiscal capacity factor of the State; bears to

(2) the sum of the amounts determined under paragraph (1) for all the States.

(b) LIMITATION.—

(1) Notwithstanding any other provision of this Act, the Secretary shall not make any payment under this Act to a State government for an entitlement period if the amount allocated to such State government under subsection (a) for such entitlement period is less than $1,000,000.

(2) Any amounts which may not be paid to a State government by reason of paragraph (1) shall be allocated among the other State governments in proportion to the amounts allocated to such other State governments under subsection (a).

(c) DEFINITIONS.—For purposes of the section—

(1)(A) The general tax effort factor of a State for an entitlement period is an amount determined by dividing—

(i) the sum of—

(I) State and local government taxes, and

(II) other charges imposed by State and local government, by

(ii) the total taxable resources of the State.

(B) The general tax effort factor for any State shall not exceed an amount determined by dividing—

(i) the total of the sums determined under subparagraph (A)(i) for all the States, by

(ii) the sum of the total taxable resources for all the States.

(2)(A) The relative fiscal capacity factor of a State for an entitlement period is the excess, if any, of—

(i) 90 percent of the adjusted total taxable resources of all the States; over

(ii) an amount determined by dividing—

(I) the total taxable resources of such State, by

(II) the population of such State.

If the amount determined under clause (i) does not exceed the amount determined under clause (ii), the relative fiscal capacity factor is zero.

(B) The adjusted total taxable resources of all the States is an amount equal to the sum of—

(i) 20 percent of the amount determined by dividing—

(I) the total taxable resources of the State for which the relative fiscal capacity factor is being determined, by

(II) the population of the State for which the relative fiscal capacity factor is being determined, plus

(ii) 80 percent of the amount determined by dividing—

(I) the sum of the total taxable resources of all the States, by

(II) the sum of the population of all the States.

(3)(A) The total taxable resources of a State shall be determined in accordance with section 407(c)(3).

SEC. 412. INFORMATION USED IN ALLOCATION FORMULAS.

(a) USE OF MOST RECENT INFORMATION.—Except as provided in this section, the Secretary shall use the most recent available information provided by the Secretary of Commerce and the Secretary of Labor before the beginning of the entitlement period to determine an allocation under this Act. When the Secretary of the Treasury decides that the information is not current or complete enough to provide for a fair allocation, the Secretary may use additional information (including information based on estimates) as provided under regulations of the Secretary.

(b) POPULATION DATA.—

(1) The Secretary shall determine population on the same basis that the Secretary of Commerce determines resident population for general statistical purposes, except that—

(A) the population of the United States includes the population of the District of Columbia and the population of Indian tribes and native villages; and

(B) the population of a State does not include the population of Indian tribes and native villages.

(2) The Secretary of the Treasury shall request the Secretary of Commerce to adjust the population information provided to the Secretary of the Treasury as soon as practicable to include a reasonable estimate of the number of resident individuals not counted in the 1980 census or revisions of the census. The Secretary of the Treasury shall use the estimates in determining allocations for the entitlement period beginning after the Secretary of the Treasury receives the estimates. The Secretary of the Treasury shall adjust population information to reflect adjustments made under section 118 of Public Law 96-369.

(c) ADDITIONAL DATA LIMITATIONS.—The Secretary of the Treasury may not—

(1) in determining an allocation for an entitlement period, use information on tax collections for years more recent than the years used by the Secretary of Commerce in the most recent Bureau of the Census general determination of State and local taxes made before the beginning of that period;

(2) consider a change in information used to determine an allocation for a period of 60 months when the change—

(A) results from a major disaster declared by the President under section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141); and

(B) reduces the amount of an allocation; and

(3) for purposes of allocations under sections 407, 408, 409, and 410, consider any reduction in the amount of adjusted taxes of any State government or unit of general local government if such reduction—

(A) results from a specific economic dislocation which causes—

(i) the closing of places of employment,

(ii) declines in assessed values of, or receipt of taxes from, real property, or

(iii) declines in sales or income tax collections of such government, and

(B) would reduce the allocation of the State government or unit of general local government for an entitlement period by an amount equal to or greater than 20 percent of such allocation for the preceding entitlement period.

SEC. 413. ACCOUNTABILITY.

(a) HEARING ON PROPOSED USE OF FUNDS.—A State government or unit of general local government expending payments under this Act shall hold at least one public hearing on the proposed use of the payment in relation to its entire budget. At the hearing, persons shall be given an opportunity to provide written and oral views to the governmental authority responsible for enacting the budget and to ask questions about the entire budget and the relation of the payment to the entire budget. The government shall hold the hearing at a time and a place that allows and encourages public attendance and participation.

(b) DISCLOSURE OF INFORMATION.—

(1) At least 10 days before a hearing required under subsection (a)(1) is held, a State government or unit of general local government shall—

(A) make available for inspection by the public at the principal office of the government a statement of the proposed use of the payment and a summary of the proposed budget of the government; and

(B) publish in at least one newspaper of general circulation the proposed use of the payment with the summary of the proposed budget and a notice of the time and place of the hearing.

(2) By the 30th day after adoption of the budget under State or local law, the government shall—

(A) make available for inspection by the public at the principal office of the government a summary of the adopted budget, including the proposed use of the payment; and

(B) publish in at least one newspaper of general circulation a notice that the information referred to in clause (A) of this paragraph is available for inspection.

(c) WAIVERS OF REQUIREMENTS.—Under regulations of the Secretary of the Treasury, a requirement under subsection (a)(1) of this section may be waived if the budget process required under the applicable State or local law or charter provisions—

(1) ensures the opportunity for public attendance and participation contemplated by subsection (a); and

(2) includes a hearing on the proposed use of a payment received under this Act in relation to the entire budget of the government.

(d) EXCEPTION TO 10-DAY LIMITATION.—When the Secretary is satisfied that the State government or unit of general local government will provide adequate notice of the proposed use of a payment received under this Act, the 10-day period under subsection (b)(1) of this section may be changed to the greatest extent necessary to comply with applicable State or local law.

(e) APPLICATION TO GOVERNMENTS WITHOUT BUDGETS.—The Secretary shall prescribe regulations for applying this section to State governments and units of general local government that do not adopt budgets.

SEC. 414. PROHIBITED DISCRIMINATION.

(a) GENERAL PROHIBITION.—No person in the United States shall be excluded from participating in, be denied the benefits of, or be subject to discrimination under, a program or activity of a State government or unit of general local government because of race, color, national origin, or sex if the government receives a payment under this Act.

(b) ADDITIONAL PROHIBITIONS.—The following prohibitions and exemptions also apply to a program or activity of a State government or unit of general local government if the government receives a payment under this Act:

(1) a prohibition against discrimination because of age under the Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.),

(2) a prohibition against discrimination against an otherwise qualified handicapped individual under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), and

(3) a prohibition against discrimination because of religion, or an exemption from that prohibition, under the Civil Rights Act of 1964 (42 U.S.C. 2000a et seq.) or title VIII of the Act of April 11, 1968 (known as the Civil Rights Act of 1968) (42 U.S.C. 3601 et seq.).

(c) LIMITATIONS ON APPLICABILITY OF PROHIBITIONS.—Subsections (a) and (b) of this section do not apply when the State government or unit of general local government shows, by clear and convincing evidence, that a payment received under this Act is not used to pay for any part of the program or activity with respect to which the allegation of discrimination is made.

(d) INVESTIGATION AGREEMENTS.—The Secretary shall try to make agreements with heads of agencies of the United States Government and State agencies to investigate noncompliance with this section. An agreement shall—

(1) describe the cooperative efforts to be taken (including sharing civil rights enforcement personnel and resources) to obtain compliance with this section; and

(2) provide for notifying immediately the Secretary of actions brought by the United States Government or State agencies against a State government or unit of general local government alleging a violation of a civil rights law or a regulation prescribed under a civil rights law.

SEC. 415. DISCRIMINATION PROCEEDINGS.

(a) NOTICE OF NONCOMPLIANCE.—By the 10th day after the Secretary makes a finding of discrimination or receives a holding of discrimination about a State government or unit of general local government, the Secretary shall submit a notice of noncompliance to the government. The notice shall state the basis of the finding or holding.

(b) INFORMAL PRESENTATION OF EVIDENCE.—The State government or unit of general local government may present evidence in-

formally to the Secretary within 30 days after the government receives a notice of noncompliance from the Secretary. Except as provided in subsection (e) of this section, the government may present evidence on whether—

(1) a person in the United States has been excluded or denied benefits of, or discriminated against under, the program or activity of the government, in violation of section 414(a) of this Act;

(2) the program or activity of the government violated a prohibition described in section 414(b) of this Act; and

(3) any part of that program or activity has been paid for with a payment received under this Act.

(c) TEMPORARY SUSPENSION OF PAYMENTS.—By the end of the 30-day period under subsection (b) of this section, the Secretary shall decide whether the State government or unit of general local government has not complied with section 414 (a) or (b) of this Act, unless the government has made a compliance agreement under section 417 of this Act. If the Secretary decides that the government has not complied, the Secretary shall notify the government of the decision and shall suspend payments to the government under this Act unless, within 10 days after the government receives notice of the decision, the government—

(1) makes a compliance agreement under section 417 of this Act; or

(2) requests a proceeding under subsection (d)(1) of this section.

(d) ADMINISTRATIVE REVIEW OF SUSPENSIONS.—

(1) A proceeding requested under subsection (c)(2) of this section shall begin by the 30th day after the Secretary receives a request for the proceeding. The hearing shall be before an administrative law judge appointed under section 3105 of title 5. By the 30th day after the beginning of the proceeding, the judge shall issue a preliminary decision based on the record at the time on whether the State government or unit of general local government is likely to prevail in showing compliance with section 414 (a) or (b) of this Act.

(2) When the administrative law judge decides at the end of a proceeding under paragraph (1) of this subsection that the State government or unit of general local government has—

(A) not complied with section 414 (a) or (b) of this Act, the judge may order payments to the government under this Act terminated; or

(B) complied with section 414 (a) or (b) of this Act, a suspension under section 416(a)(1)(A) of this Act shall be discontinued promptly.

(3) An administrative law judge may not issue a preliminary decision that the government is not likely to prevail when the judge has issued a decision described in paragraph (2)(A) of this subsection.

(e) BASIS FOR REVIEW.—In a proceeding under subsection (b), (c), or (d) of this section on a program or activity of a State government or unit of general local government about which a holding of discrimination has been made, the Secretary or administrative law judge may consider only whether a payment under this Act was used to pay for any part of the program or activity. The holding of discrimination is conclusive. If the holding is reversed by an appellate court, the Secretary or judge shall end the proceeding.

SEC. 416. SUSPENSION AND TERMINATION OF PAYMENTS IN DISCRIMINATION PROCEEDINGS.

(a) IMPOSITION AND CONTINUATION OF SUSPENSIONS.—

(1) The Secretary shall suspend payment under this Act to a State government or unit of general local government—

(A) if an administrative law judge appointed under section 3105 of title 5 issues a preliminary decision in a proceeding under section 415(d)(1) of this Act that the government is not likely to prevail in showing compliance with section 414 (a) and (b) of this Act;

(B) except as provided in section 415(d)(2)(B) of this Act, when the administrative law judge decides at the end of the proceeding that the government has not complied with section 414 (a) or (b) of this Act, unless the government makes a compliance agreement under section 417 of this Act by the 30th day after the decision; or

(C) when required under section 415(c) of this Act.

(2) Except as provided in section 415(d)(2) of this Act, a suspension already ordered under paragraph (1)(A) of this subsection continues in effect when the administrative law judge makes a decision under paragraph (1)(B) of this subsection.

(b) LIFTING OF SUSPENSIONS AND TERMINATIONS.—When a holding of discrimination is reversed by an appellate court, a suspension or termination of payments in a proceeding based on the holding shall be discontinued.

(c) RESUMPTION OF PAYMENTS UPON ATTAINING COMPLIANCE.—The Secretary may resume payment to a State government or unit of general local government of payments suspended by the Secretary only—

(1) at the time and under the conditions stated in—

(A) the approval by the Secretary of a compliance agreement under section 417(a)(1) of this Act; or

(B) a compliance agreement under section 417(a) of this Act;

(2) when the government complies completely with an order of a United States court, a State court, or administrative law judge that covers all matters raised in a notice of noncompliance submitted by the Secretary under section 415(a) of this Act;

(3) when a United States court, a State court, or an administrative law judge decides (including a judge in a proceeding under section 415(d)(1) of this Act), that the government has complied with section 414 (a) and (b) of this Act; or

(4) when a suspension is discontinued under subsection (b) of this section.

(d) PAYMENT OF DAMAGES AS COMPLIANCE.—Compliance by the government under subsection (c) of this section may include paying restitution to the person injured because the government did not comply with section 414 (a) or (b) of this Act.

(e) RESUMPTION OF PAYMENTS UPON REVERSAL BY COURT.—The Secretary may resume payment to a State government or unit of general local government of payments terminated under section 415(d)(2) of this Act only when the decision resulting in the termination is reversed by an appellate court.

SEC. 417. COMPLIANCE AGREEMENTS.

(a) TYPES OF COMPLIANCE AGREEMENTS.—A compliance agreement is an agreement—

(1) approved by the Secretary between the governmental authority responsible for prosecuting a claim or complaint that is the basis of a holding of discrimination and the chief executive officer of the State government or unit of general local government that has not complied with section 414 (a) or (b) of this Act; or

(2) between the Secretary and such chief executive officer.

(b) CONTENTS OF AGREEMENTS.—A compliance agreement—

(1) shall state the conditions the State government or unit of general local government has agreed to comply with that would satisfy the obligations of the government under section 414 (a) and (b) of this Act;

(2) shall cover each matter that has been found not to comply, or would not comply, with section 414 (a) or (b) of this Act; and

(3) may be a series of agreements that dispose of those matters.

(c) AVAILABILITY OF AGREEMENTS TO PARTIES.—The Secretary shall submit a copy of the compliance agreement to each person who filed a complaint referred to in section 415(b) of this Act, or, if an agreement under subsection (a)(1) of this section, each person who filed a complaint with a governmental authority, about a failure to comply with section 414 (a) or (b) of this Act. The Secretary shall submit the copy by the 15th day after an agreement is made. However, when the Secretary approves an agreement under subsection (a)(1) of this section after the agreement is made, the Secretary may submit the copy by the 15th day after approval of the agreement.

SEC. 418. ENFORCEMENT BY THE ATTORNEY GENERAL OF PROHIBITIONS ON DISCRIMINATION.

The Attorney General may bring a civil action in an appropriate district court of the United States against a State government or unit of general local government that the Attorney General has reason to believe has engaged or is engaging in a pattern or practice in violation of section 414 (a) or (b) of this Act. The court may grant—

(1) a temporary restraining order;

(2) an injunction; or

(3) an appropriate order to ensure enjoyment of rights under section 414 (a) or (b) of this Act, including an order suspending, terminating, or requiring repayment of, payments under this Act or placing additional payments under this Act in escrow pending the outcome of the action.

SEC. 419. CIVIL ACTION BY A PERSON ADVERSELY AFFECTED.

(a) AUTHORITY FOR PRIVATE SUITS IN FEDERAL OR STATE COURT.—When a State government or unit of general local government, or an officer or employee of a State government or unit of general local government acting in an official capacity, engages in a practice prohibited by this Act, a person adversely affected by the practice may bring a civil action in an appropriate district court of the United States or a State court of general jurisdiction. Before bringing an action under this section, the person must exhaust administrative remedies under subsection (b) of this section.

(b) ADMINISTRATIVE REMEDIES REQUIRED TO BE EXHAUSTED.—A person adversely affected must file an administrative complaint with the Secretary of the Treasury or the head of another agency of the United States Government or the State agency with which the Secretary has an agreement under section 414(d) of this Act. Administrative remedies are deemed to be exhausted after the 90th day after the complaint was filed if the Secretary, the head of the Government agency, or the State agency—

(1) issues a decision that the government has not failed to comply with this Act; or

(2) does not issue a decision on the complaint.

(c) AUTHORITY OF COURT.—In an action under this section, the court—

(1) may grant—

(A) a temporary restraining order;

(B) an injunction; or

(C) another order, including suspension, termination, or repayment of, payments under this Act or placement of additional payments under this Act in escrow pending the outcome of the action; and

(2) to enforce compliance with section 414 (a) or (b) of this Act, may allow a prevailing party (except the United States Government) a reasonable attorney's fee.

(d) INTERVENTION BY ATTORNEY GENERAL.—In an action under this section to enforce compliance with section 414 (a) or (b) of this Act, the Attorney General may intervene in the action when the Attorney General certifies that the action is of general public importance. The United States Government is entitled to the same relief as if the Government had brought the action and is liable for the same fees and costs as a private person.

SEC. 420. JUDICIAL REVIEW.

(a) APPEALS IN FEDERAL COURT OF APPEALS.—A State government or unit of general local government receiving notice from the Secretary of the Treasury about withholding payments under section 405(c) of this Act, suspending payments under section 416(a)(1)(B) of this Act, or terminating payments under section 415(d)(2)(A) of this Act, may apply for review of the action of the Secretary by filing a petition for review with the court of appeals of the United States for the circuit in which the government is located. The petition must be filed by the 60th day after the notice is received. The clerk of the court immediately shall send a copy of the petition to the Secretary and the Attorney General.

(b) FILING OF RECORD OF ADMINISTRATIVE PROCEEDING.—The Secretary shall file with the court a record of the proceeding on which the Secretary based the action. The court may consider only objections to the action of the Secretary that were presented before the Secretary.

(c) AUTHORITY OF GRANT.—The court may affirm, change, or set aside any part of the action of the Secretary. The findings of fact by the Secretary are conclusive if supported by substantial evidence in the record. When a finding is not supported by substantial evidence in the record, the court may remand the case to the Secretary to take additional evidence. The Secretary may make new or modified findings and shall certify additional proceedings to the court.

(d) REVIEW ONLY BY SUPREME COURT.—A judgment of the court under this section may be reviewed only by the Supreme Court under section 1254 of title 28.

SEC. 421. AUDITS, INVESTIGATIONS, AND REVIEWS.

(a) AUDIT REQUIREMENTS.—Except as otherwise provided in this section, a State government or unit of general local government which receives a payment under this Act shall have an audit made in accordance with chapter 75 of title 31, United States Code.

(b) WAIVER BY SECRETARY.—Under regulations of the Secretary, the Secretary may waive the requirement of subsection (a) for a State government or unit of general local government for a fiscal year when the Secretary decides that the financial statements of the government for the year cannot be audited, and the government shows substantial progress in making the statements auditable.

(c) INVESTIGATIONS BY SECRETARY.—

(1) The Secretary shall maintain regulations providing reasonable and specific time limits for the Secretary to—

(A) carry out an investigation and make a finding after receiving a complaint referred to in section 419(b) of this Act, a determination by a State or local administrative agency, or other information about a possible violation of this Act;

(B) carry out audits and reviews (including investigations of allegations) about possible violations of this Act; and

(C) advise a complainant of the status of an audit, investigation, or review of an allegation by the complainant of a violation of section 414 (a) or (b) of this Act or other provision of this Act.

(2) The maximum time limit under paragraph (1)(A) of this subsection is 90 days.

(d) REVIEWS BY COMPTROLLER GENERAL.—The Comptroller General shall carry out reviews of the activities of the Secretary, State governments, and units of general local government necessary for Congress to evaluate compliance and operations under this Act.

SEC. 422. REPORTS.

(a) REPORTS BY SECRETARY TO CONGRESS.—Before June 2 of each year, the Secretary personally shall report to Congress on—

(1) the status and operation of the Fiscal Assistance Trust Fund during the prior fiscal year; and

(2) the administration of this Act, including a complete and detailed analysis of—

(A) actions taken to comply with sections 414, 415, 416, 417, and 418, including a description of the kind and extent of noncompliance and the status of pending complaints;

(B) the extent to which State governments and units of general local government receiving payments under this Act have complied with sections 405 and 421 (a), (b), and (d) of this Act, including a description of the kind and extent of noncompliance and actions taken to ensure the independence of audits conducted under section 421 (a), (b), and (d);

(C) the way in which payments under this Act have been distributed in the jurisdictions receiving payments; and

(D) significant problems in carrying out this Act and recommendations for legislation to remedy the problems.

(b) REPORTS BY STATE GOVERNMENTS AND UNITS OF GENERAL LOCAL GOVERNMENT TO SECRETARY.—

(1) At the end of each fiscal year, each State government or unit of general local government receiving a payment under this Act shall submit a report to the Secretary. The report shall be submitted in the form and at a time prescribed by the Secretary and shall be available to the public for inspection. The report shall state—

(A) the amounts and purposes for which the payment has been appropriated, expended, or obligated during the fiscal year;

(B) the relationship of the payment to the relevant functional items in the budget of the government; and

(C) the differences between the actual and proposed use of the payment.

(2) The Secretary shall provide a copy of a report submitted under paragraph (1) of this subsection by a State government or unit of general local government to the chief executive officer of the State in which the government is located. The Secretary shall provide the report in the way and form prescribed by the Secretary.

(c) REGULATIONS.—The Secretary shall prescribe regulations for applying this section to State governments and units of general local government that do not adopt budgets.

TITLE V—BLOCK GRANTS TO STATES FOR LONG-TERM HEALTH CARE SERVICES.

SEC. 501. ESTABLISHMENT OF BLOCK GRANT PROGRAM WITH RESPECT TO LONG-TERM HEALTH CARE.

Title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) is amended by adding at the end the following new sections:

"ESTABLISHMENT OF BLOCK GRANT PROGRAM WITH RESPECT TO LONG-TERM HEALTH CARE

"SEC. 1921. (a) TERMINATION OF PROGRAM OF REIMBURSEMENT.—Notwithstanding any other provision of law—

"(1) no provision of this title may, with respect to any State plan referred to in section 1902, be construed as requiring any State to provide for medical assistance for long-term health care; and

"(2) the Secretary may not, under section 1903, pay any amount to any State with respect to any amount expended by a State in providing medical assistance for long-term health care.

"(b) ESTABLISHMENT OF BLOCK GRANT PROGRAM.—

"(1) The Secretary shall, for each fiscal year, pay to any State described in paragraph (3) an amount determined in accordance with section 1922. Such amount may be used by a State only for the provision of long-term health care. Subject to paragraph (2), each State may determine such criteria for eligibility for long-term health care as the State involved determines to be appropriate.

"(2) A State must extend eligibility for long-term care to individuals entitled to medical assistance under the State plan approved under section 1902 before it may extend eligibility for such care to other categories of individuals.

"(3) Any State referred to in paragraph (1) is any State that—

"(A) with respect to health care and services other than long-term health care, has a plan approved under this title; and

"(B) provides to the Secretary such information as the Secretary determines to be necessary to make the computation described in section 1922.

"(c) DEFINITION OF LONG-TERM HEALTH CARE.—For purposes of this section, the term 'long-term health care' means skilled nursing facility services, intermediate care facility services, inpatient psychiatric hospital services, home health care services and other services necessary to prevent or terminate the institutionalization of eligible individuals.

"(d) EFFECTIVE DATE.—This section shall take effect on the expiration of the 2-year period beginning on the 1st day of the 1st fiscal year beginning after the date of the enactment of the Federalism Act of 1986.

"COMPUTATION OF AMOUNT OF BLOCK GRANT FOR LONG-TERM HEALTH CARE

"SEC. 1922. (a) IN GENERAL.—With respect to the State involved, the amount referred to in section 1921(b) is the lesser of—

"(1) an amount described in subsection (f); and

"(2) an amount equal to the sum of—

"(A) an amount equal to the product of—

"(i) the primary adjusted Federal medical assistance percentage (as defined in subsection (b)) for the fiscal year; and

"(ii) the qualifying amount (as defined in subsection (c)); and

"(B) an amount equal to the product of—

"(i) the secondary adjusted Federal medical assistance percentage (as defined in subsection (d)) for the fiscal year; and

"(ii) the compensatory amount (as defined in subsection (e)).

"(b) DEFINITION OF PRIMARY ADJUSTED FEDERAL MEDICAL ASSISTANCE PERCENTAGE.—For purposes of this section:

"(1) The term 'primary adjusted Federal medical assistance percentage' means a percentage equal to the sum of the Federal medical assistance percentage and the primary adjustment percentage for the fiscal year.

"(2) The term 'primary adjustment percentage' means—

"(A) for the fiscal year in which section 1921 takes effect, 5 percent; and

"(B) for each subsequent fiscal year, a percentage equal to the sum of 3 percent and the primary adjustment percentage for the immediately preceding fiscal year.

"(c) DEFINITION OF QUALIFYING AMOUNT.—For purposes of this section:

"(1) The term 'qualifying amount' means an amount equal to the larger of—

"(A) the sum of the 5 adjusted health service category amounts, or

"(B) 50 percent of the total amount expended by the State involved in the base year for all 5 adjusted health service categories.

"(2) The term 'health service category' means each of the following:—

"(A) Skilled nursing facility services.

"(B) Intermediate care facility services with respect to mentally retarded individuals or individuals with related conditions.

"(C) Intermediate care facility services other than the services described in subparagraph (B).

"(D) Inpatient psychiatric hospital services.

"(E) Home health care services.

"(3) The term 'adjusted health service category amount' means—

"(A) with respect to a health service category described in subparagraph (A), (B), (C), or (D) of paragraph (2), the product of—

"(i) an amount equal to the total amount expended in the base year by the State involved for such category, and

"(ii) the national per capita care day ratio for such category; and

"(B) with respect to the health service category described in subparagraph (E) of paragraph (2), an amount equal to the total amount expended in the base year by the State involved for such category.

"(4) The term 'base year' means the fiscal year immediately preceding the fiscal year in which section 1921 takes effect.

"(5) The term 'care day' means a day on which a service referred to in paragraph (2) has been provided.

"(6) The term 'national per capita care day ratio' means, with respect to the health service category involved, an amount equal to the lesser of 1.5 and—

"(A) the national median number of care days provided per individual in the base year; divided by

"(B) the mean number of care days per individual provided in the base year by the State involved.

"(7) The term 'national median number' means, with respect to the category of health service involved, the median of the respective means of care days per individual provided in the base year by the States.

"(d) DEFINITION OF SECONDARY ADJUSTED FEDERAL MEDICAL ASSISTANCE PERCENTAGE.—For purposes of this section:

"(1) The term 'secondary adjusted Federal medical assistance percentage' means a percentage equal to the difference between the Federal medical assistance percentage and the secondary adjustment percentage for the fiscal year.

"(2) The term 'secondary adjustment percentage' means—

"(A) for the fiscal year in which section 1921 takes effect, 2.5 percent; and

"(B) for each subsequent fiscal year, a percentage equal to the sum of 1.5 percent and the secondary adjustment percentage for the immediately preceding fiscal year.

"(e) DEFINITION OF COMPENSATORY AMOUNT.—

"(1) For purposes of this section, the term 'compensatory amount' means the difference between—

"(A) the aggregate total of amounts expended in the base year by the State involved for the 5 health service categories ; and

"(B) the qualifying amount for such State.

"(2) The compensatory amount may be a negative number.

"(f) LIMITATION ON AMOUNT OF GRANT.—

"(1) The amount referred to in subsection (a)(1) is the sum of—

"(A) an amount equal to the product of 90 percent and the qualifying amount; and

"(B) an amount equal to the product of—

"(i) the percentage described in paragraph (2); and

"(ii) the greater of 0 and the compensatory amount.

"(2) The percentage referred to in paragraph (1)(B)(i) is a percentage equal to the difference between—

"(A) the Federal medical assistance percentage; and

"(B) the product of—

"(i) 50 percent; and

"(ii) the difference between 90 percent and the Federal medical assistance percentage.

"(g) ADJUSTMENT BY SECRETARY OF QUALIFYING AMOUNT.—

"(1) If the Secretary makes the determination described in paragraph (2), the Secretary shall increase the qualifying amount of the State involved to the extent determined by the Secretary to be appropriate.

"(2) The determination referred to in paragraph (1) is a determination that—

"(A) with respect to the State involved, the number of poor elderly individuals residing in the State has increased, or

"(B) the cost of providing long-term health care has increased, since the base year due to inflation and other factors.

"STATE ADMINISTRATION

"SEC. 1923. Prior to expenditure by a State of payments made to it under section 1921 for any fiscal year, the State shall report on the intended use of the payments the State is to receive under such section, including information on the types of activities to be supported and the categories or characteristics of individuals to be served. The report shall be transmitted to the Secretary and made public within the State in such manner as to facilitate comment by any person (including any Federal or other public agency) during development of the report and after its completion. The report shall be revised throughout the year as may be necessary to reflect substantial changes in the activities assisted under this title, and any revision shall be subject to the requirements of the previous sentence.".

SEC. 502. REPORT BY SECRETARY WITH RESPECT TO TECHNICAL AND CONFORMING CHANGES.

With respect to the amendments to title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) made by this Act, the Secretary of Health and Human Services shall, before the expiration of the 180-day period beginning on the date of the enactment of this Act, submit to the Congress a report describing such technical and conforming changes in such title XIX as the Secretary determines to be appropriate.●

IMMIGRATION REFORM—CONFERENCE REPORT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the mandatory quorum under rule XXII be waived with regard to the cloture vote today at 1 o'clock.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

THE CALENDAR

Mr. SIMPSON. Mr. President, after conferring with the acting Democratic leader, my friend Senator MATSUNAGA, we have business to do that must be performed tonight or this morning in order that the House and Senate can complete their coordinated efforts on the passage of this legislation of various types and sorts.

With that, after conferring, as I say, with the acting Democratic leader, I would like to inquire if he is in a position to pass or definitely postpone any or all of the following Calendar items: Calendar Nos. 456, 498, 862, 865, 867, 868, 1052, and 1095.

Mr. MATSUNAGA. Not 1052, no. The others we have no objection to.

Mr. SIMPSON. You do have an objection to 1052?

Mr. MATSUNAGA. Yes; we have an objection to that.

Mr. SIMPSON. Mr. President, with the deletion of Calendar item No. 1052, is the acting minority leader in a position to pass or indefinitely postpone any of those other items?

Mr. MATSUNAGA. We have no objection on this side.

Mr. SIMPSON. Then, I ask unanimous consent that we pass en bloc or indefinitely postpone en bloc these items and that all committee-reported amendments, preambles, and title amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT OF PATENT COOPERATION TREATY IMPLEMENTATION LAWS

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1230) to amend the patent laws implementing the Patent Cooperation Treaty.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MATHIAS. The Patent Cooperation Treaty is an international patent agreement aimed at harmonizing the patent application procedures in member countries around the world. The treaty was ratified by the President with the advice and consent of the Senate in 1973, and eventually went into effect for our country in 1978.

At time of the Senate's consideration of the treaty in 1973, we placed a reservation on chapter 2, due to the belief that the procedures in that chapter would place an undue burden on our Patent and Trademark Office at that time because of differences between the patent systems of the various countries that would participate in the treaty. Since that time, however, there has been tremendous progress, partly as a result of the treaty, in making those systems more compatible, and consequently we are now in a position to take advantage of the benefits of chapter 2.

Accordingly in the 98th Congress the President asked for the advice and consent of the Senate to withdraw the reservation on chapter 2. That request—Treaty Document 98-29—was favorably reported this year from the Foreign Relations Committee after a hearing, and passed the Senate by unanimous consent last Thursday. The bill before us today, S. 1230, is the implementing legislation, making the changes necessary in our domestic patent statutes for conforming to chapter 2 of the Patent Cooperation Treaty, if the Senate acts on the President's request as expected.

The substantive portions of the treaty, chapters 1 and 2, allow inventors to file preliminary international patent applications prior to committing the money and technical resources necessary to formulate a formal patent application. Under these chapters, inventors are given more lead time and informal assessments of the prospect of obtaining a patent on their inventions in other countries.

Under chapter 1, an inventor receives an international search report citing all prior art that might have a bearing on the patentability of the invention, and also is allowed 20 months before having to decide whether to submit a formal, full-scale patent application. After that, he would forfeit the priority date established when he filed the international application.

If the inventor enters chapter 2 procedures, the lead period is extended by 10 months, and the applicant is provided with an international preliminary examination report. Such reports are prepared by the patent office in one of the member countries, assessing whether the invention is novel, nonobvious, and useful—the three standard criteria around the world for patentability. The preliminary examination report is also circulated to the patent offices in all the member countries, for their possible use if the inventor decides to proceed with a patent application in those countries.

There is a solid consensus that withdrawing our reservation and submitting to chapter 2 of the Treaty is in the interest of promoting innovation in our country. As it stands, U.S. inventors have been the largest users by far of chapter 1 of the Treaty. Furthermore, it is now universally agreed that entering chapter 2 would not place undue burdens on the U.S. Patent and Trademark Office. The European Patent Office has agreed to assist the U.S. Patent and Trademark Office during the transition period after we withdraw our reservation. This assistance will be particularly valuable during the interim next year when our Patent and Trademark Office is completing its drive to reduce patent pendency time to 18 months.

The Judiciary Committee ordered S. 1230 favorably reported by unanimous consent on December 5, 1985. We are aware of no opposition to the bill, and I urge its adoption.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1230

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Act to authorize the United States to participate in chapter II of the Patent Cooperation Treaty".

SEC. 2. (a) Section 351(a) of title 35, United States Code, is amended by striking out ", excluding chapter II thereof".

(b) Section 351(b) of title 35, United States Code, is amended by striking out "excluding part C thereof".

(c) Section 351(g) of title 35, United States Code, is amended by—

(1) striking out "term" and inserting in lieu thereof "terms";

(2) inserting "and 'International Preliminary Examining Authority' " after "Authority"; and

(3) striking out "means" and inserting in lieu thereof "mean".

(d) Section 361(d) of title 35, United States Code, is amended to read as follows:

"(d) The international fee, and the transmittal and search fees prescribed under section 376(a) of this part, shall either be paid on filing of an international application or within such later time as may be fixed by the Commissioner.".

SEC. 3. The item relating to section 362 in the analysis for chapter 36 of title 35, United States Code, is amended to read as follows:

"362. International Searching Authority and International Preliminary Examining Authority.".

SEC. 4. Section 362 of title 35, United States Code, is amended to read as follows:

"§ 362. International Searching Authority and International Preliminary Examining Authority

"(a) The Patent and Trademark Office may act as an International Searching Authority and International Preliminary Examining Authority with respect to international applications in accordance with the terms and conditions of an agreement which may be concluded with the International Bureau, and may discharge all duties required of such Authorities, including the collection of handling fees and their transmittal to the International Bureau.

"(b) The handling fee, preliminary examination fee, and any additional fees due for international preliminary examination shall be paid within such time as may be fixed by the Commissioner.".

SEC. 5. Section 364(a) of title 35, United States Code, is amended by—

(a) striking out "or", first occurrence and inserting in lieu thereof ",";

(b) inserting "International Preliminary Examining Authority" after "Authority, or"; and

(c) striking out "both".

SEC. 6. Section 368(c) of title 35, United States Code, is amended by—

(a) striking out the second occurrence of "or" and inserting in lieu thereof ","; and

(b) striking out "both" and inserting in lieu thereof "International Preliminary Examining Authority".

SEC. 7. (a) Section 371(a) of title 35, United States Code, is amended to read as follows:

"(a) Receipt from the International Bureau of copies of international applications with any amendments to the claims, international search reports, and international preliminary examination reports including any annexes thereto may be required in the case of international applications designating or electing the United States.".

(b) Section 371(b) of title 35, United States Code, is amended to read as follows:

"(b) Subject to subsection (f) of this section, the national stage shall commence with the expiration of the applicable time limit under article 22(1) or (2), or under article 39(1)(a) of the treaty.".

(c) Section 371(c)(4) of title 35, United States Code, is amended by striking the "." and inserting in lieu thereof ",".

(d) Section 371(c) of title 35, United States Code, is amended by adding at the end thereof the following new paragraph (5):

"(5) a translation into the English language of any annexes to the international preliminary examination report, if such annexes were made in another language.".

(e) Section 371(d) of title 35, United States Code, is amended by adding at the end thereof the following sentence: "The requirement of subsection (c)(5) shall be complied with at such time as may be fixed by the Commissioner and failure to do so shall be regarded as cancellation of the amendments made under article 34(2)(b) of the treaty.".

(f) Section 371(e) of title 35, United States Code, is amended by inserting "or article 41" after "28".

SEC. 8. (a) Section 376(a) of title 35, United States Code, is amended by—

(1) inserting "and the handling fee" after the first occurrence of "fee";

(2) striking "amount is" and inserting in lieu thereof "amounts are";

(3) redesignating paragraph (5) as paragraph (6); and

(4) inserting the following new paragraph (5):

"(5) A preliminary examination fee and any additional fees (see section 362(b))."

(b) Section 376(b) of title 35, United States Code, is amended by—

(1) inserting "and the handling fee" after the first occurrence of "fee" in the first sentence; and

(2) inserting "the preliminary examination fee and any additional fees," after "fee," in the third sentence.

SEC. 9. Sections 2 through 8 of this Act shall come into force on the same day as the effective date of entry into force of chapter II of the Patent Cooperation Treaty with respect to the United States, by virtue of the withdrawal of the declaration under article 64(1)(a) of the Patent Cooperation Treaty. It shall apply to all international applications pending before or after its effective date.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WILDLIFE SANCTUARY FOR HUMPBACK WHALES IN THE WEST INDIES

The joint resolution (H.J. Res. 67) calling for a wildlife sanctuary for humpback whales in the West Indies, was considered, ordered to a third reading, read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO INDEFINITELY POSTPONE CERTAIN MEASURES

Mr. SIMPSON. Mr. President, I ask unanimous consent that the following calendar items be indefinitely postponed: Calendar Order No. 498, S. 595; Calendar Order No. 862, S. 2635; Calendar Order No. 865, S. 2287; Calendar Order No. 867, S. 2466; and Calendar Order No. 868, S. 2532.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEMORIAL TO HONOR WOMEN WHO HAVE SERVED IN THE ARMED FORCES

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 945, House Joint Resolution 36, the memorial to honor women who have served in the Armed Forces.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 36) authorizing establishment of a memorial to honor women who have served in or with the Armed Forces of the United States.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

There being no objection, the Senate proceeded to consider the joint resolution, which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike out all after the enacting clause, and insert the following:

AUTHORIZATION OF MEMORIAL

SECTION 1. There is hereby authorized to be established on Federal land in the District of Columbia and its environs, by any organization or organizations approved by the Secretary of the Interior, a memorial to honor women who have served in the Armed Forces of the United States. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the Senate on September 10, 1986 (S. Rpt. 99-421).

FUNDING

SEC. 2. The organization or organizations approved by the Secretary shall establish the memorial with non-Federal funds.

AMENDMENT NO. 3481

Mr. SIMPSON. Mr. President, I send an amendment to the desk of the committee substitute on behalf of Senator MCCLURE and ask for its immediate consideration.

The PRESIDING OFFICER. Will the clerk report.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] on behalf of Mr. MCCLURE, proposes an amendment numbered 3481.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

1. On page 2, line 22, of H.J. Res. 36 as reported by the Committee on Energy and Natural Resources, strike "There is hereby authorized to be established on Federal land in the District of Columbia and its environs, by any organization or organizations approved by the Secretary of the Interior, a memorial" and insert in lieu thereof "The Women in Military Service for America Memorial Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs".

2. On page 3, line 2, of H.J. Res. 36 as reported by the Committee on Energy and Natural Resources, strike "Senate on September 10, 1986 (S. Rept. 99-421)" and insert in lieu thereof "House of Representatives on September 29, 1986".

3. On page 3, line 5 of H.J. Res. 36, as reported by the Committee on Energy and Natural Resources, strike "The organization or organizations approved by the Secretary" and insert in lieu thereof "The Women in Military Service for America Memorial Foundation".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3481) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the joint resolution.

The amendment was ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read a third time.

The PRESIDING OFFICER. The joint resolution having been read a third time, the question is, shall it pass?

So the joint resolution (H.J. Res. 36) was passed.

The title was amended so as to read "A joint resolution to authorize the establishment of a memorial on Federal land in the District of Columbia and its environs to honor women who have served in the Armed Forces of the United States.".

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ERECTION OF A MEMORIAL TO BLACK REVOLUTIONARY WAR VETERANS AND BLACK MEN, WOMEN, AND CHILDREN WHO RAN AWAY FROM SLAVERY

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar item No. 946, H.J. Res. 142, dealing with the black Revolutionary War veterans.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 142) authorizing establishment of a memorial to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom, which had been reported from the Committee on Energy and Natural Resources, with an

amendment to strike out all after the enacting clause, and insert the following:

AUTHORIZATION OF MEMORIAL

SECTION 1. The Black Revolutionary War Patiots Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the Senate on September 10, 1986 (S. Rpt. 99-421).

FUNDING

SEC. 2. The Black Revolutionary War Patriots Foundation shall establish the memorial with non-Federal funds.

The amendments were agreed to.

The amendments were ordered to be engrossed, the bill was read the third time, and passed.

The title was amended so as to read: "A joint resolution to authorize the erection of a memorial on Federal land in the District of Columbia and its environs to honor the estimated 5,000 courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom.".

There being no objection, the Senate proceeded to consider the joint resolution.

AMENDMENT NO. 3482

Mr. SIMPSON. Mr. President, I send an amendment to the desk to the committee substitute on behalf of Senator MCCLURE, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] for Mr. MCCLURE, proposes an amendment numbered 3482.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 14, strike all after the word "the" and insert in lieu thereof "House of Representatives on September 29, 1986.".

The PRESIDING OFFICER. Is there debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 3482) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment, as amended, and third reading of the bill.

The committee amendment, as amended, was ordered to be engrossed, and the joint resolution to be read a third time.

The joint resolution, as amended, was read a third time.

The PRESIDING OFFICER. The joint resolution, as amended, having been read the third time, the question is, Shall it pass?

The joint resolution (H.J. Res. 142), as amended, was passed.

The amendment to the title was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INTEREST PROVISIONS OF THE DECLARATION OF TAKING ACT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar item 986, S. 2424, to amend the interest provisions of the Declaration of Taking Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2424) to amend the interest provisions of the Declaration of Taking Act.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 3483

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator DURENBERGER and Senator BOSCHWITZ, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. DURENBERGER, Mr. BOSCHWITZ, and Mr. THURMOND, proposes an amendment numbered 3483.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following:

SEC. 2. (a) Notwithstanding any other provision of chapter 11 of title 11, United States Code, the bankruptcy trustee in each case described in subsection (b) shall pay benefits until May 15, 1987, to retired former employees under a plan, fund, or program maintained or established by the debtor in such case prior to filing a petition (through the purchase of insurance or otherwise) for the purpose of providing medical, surgical, or hospital care benefits, or benefits in the event of sickness, accident, disability, or death.

(b) This section is effective with respect to—

(1) cases commenced under chapter 11 of title 11, United States Code, in which a plan for reorganization has not been confirmed by the court and in which any such benefit is still being paid on October 2, 1986;

(2) in cases under which an order for relief is entered under chapter 11 of title 11, United States Code, after October 2, 1986, while such case is a case under chapter 11; or

(3) in cases under title 11, United States Code, involving a partnership which was in existence prior to July 17, 1986, and was the subject of a petition under chapter 11 of title 11, United States Code, upon which an order for relief was entered by a bankruptcy court on August 7, 1986, and where one of the partners received bankruptcy court authorization on August 6, 1986, approving rejection of a partnership agreement.

(c) If any provision of this section or the application thereof to any person or circumstance is held invalid, the provisions of every other part of this section and the first section shall not be affected thereby.

On page 3, line 14, of H.J. Res. 142 as reported by the Committee on Energy and Natural Resources, strike "Senate on September 10, 1986 (S. Rept. 99-421)" and insert in lieu thereof "House of Representatives on September 29, 1986".

The PRESIDING OFFICER. Is there debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (No. 3483) was agreed to.

Mr. GORTON. Mr. President, I have a concern about this bill that I would like to explore with the distinguished Senator from South Carolina responding on behalf of the Committee on the Judiciary. I expect that my concern can be alleviated through this colloquy.

Mr. THURMOND. I would be pleased to respond to the distinguished Senator from Washington.

Mr. GORTON. This bill would provide a formula for determining interest payments in cases where the Federal Government acquires land pursuant to a Declaration of Taking. Would this bill have any effect in situations where the Federal Government acquires land pursuant to a legislative taking?

Mr. THURMOND. The bill does not in any way affect legislative takings. It is an amendment to the Declaration of Taking Act. That act is concerned only with the acquisition of any land or easement or right of way in land for the public use through a procedure that involves the filing in Federal court of a document called a Declaration of Taking, which is signed by the authority empowered by law to ac-

quire the land. A Declaration of Taking is not utilized when the Government acquires land pursuant to a legislative taking.

Mr. GORTON. I understand that the Department of Justice asked for this bill. Does the Department agree that this bill has no impact whatsoever on a legislative taking?

Mr. THURMOND. The committee has talked with the Department about your point, and the Department has given its complete assurance that the bill concerns only takings under the Declaration of Taking Act, and that neither the bill nor the act have any effect on legislative takings.

Mr. GORTON. I am pleased to hear that. I was concerned because I am aware of proceedings which have been going on for some years to determine compensation in connection with the Government's legislative taking pursuant to the Redwood National Park Act, as amended, (16 U.S.C. 79a-q). That act contains provisions concerning compensation and interest, and refers to the Declaration of Taking Act only to incorporate an administrative procedure for deposits into the registry of the court. I did not think it appropriate that any of the ground rules underlying those Redwood National Park proceedings should be changed by the bill this late in the game. Am I correct, then, in understanding that the Federal court's determination of compensation and interest for the Redwood National Park legislative takings will in no way be affected by this bill?

Mr. THURMOND. Based on both the assurance that the Department of Justice has given me on this particular point and my understanding of the bill and the Redwood National Park Act, as amended, the Senator is correct; no court determination in these cases will be affected; and, the settlement agreement reached prior to this date between United States and Louisiana Pacific Corp., including the option to elect between rates, is not altered and may be exercised.

Mr. GORTON. I thank the Senator, and have no objection to the passage of the bill.

Mr. DURENBERGER. Mr. President, I send an amendment to the desk on behalf of myself, Mr. BOSCHWITZ and the distinguished chairman of the Judiciary Committee, Mr. THURMOND. This amendment is intended to protect the life, health and disability benefits of retired employees whose benefits have been unilaterally terminated when a company has filed for bankruptcy.

I believe this amendment has been cleared on both sides. I especially want to thank the distinguished chairman of the Judiciary Committee Mr. THURMOND, for working out this amendment and contributing his expertise in drafting the provision.

The amendment I am offering today prevents companies that have filed for bankruptcy from terminating the life, health and disability benefits of retired employees until May 15, 1987. This amendment is similar to a provision contained in the continuing resolution, but broadens the scope of that amendment so as to ensure that these benefits must be continued in cases where the Bankruptcy Court entered an order for relief on August 7.

Mr. THURMOND. Mr. President, this amendment creates a new provision in the Bankruptcy Code that will protect the health and life insurance benefits of retirees when their former employers file for bankruptcy. It is designed to continue this protection until May 15, 1987, in order to give Congress time to act on the broader question of how retiree benefits are to be treated under the Bankruptcy Code, and especially under section 1113.

I stress that this new provision is not to be read or interpreted as affecting the interpretation of section 1113 of the code. I have participated in drafting this amendment with that purpose in mind, and I know that is the intent of both Senator DURENBERGER and Senator BOSCHWITZ, who worked with me in the drafting of this amendment. It was only with this understanding that I have consented to allow the Senate to consider this amendment in the closing days of the session.

Mr. President, I want to make it completely clear, as Senators DURENBERGER and BOSCHWITZ understand, that this amendment does not affect the interpretation of section 1113 in any way.

Mr. BOSCHWITZ. Mr. President, we sometimes refer to certain legislation as "must" legislation. That is, legislation which must be passed as a top priority. I consider this amendment to be "must" legislation.

When LTV Corp. filed for bankruptcy under chapter 11 of the bankruptcy laws on July 17 of this year, the health, disability, and death benefits of over 78,000 retirees of that company and its subsidiaries were put in jeopardy. Recognizing the catastrophe that a discontinuance of these benefits could be for retired workers and their families, Congress acted on several pieces of legislation to prevent any interruption in the payment of these benefits. I supported those legislative efforts.

Most recently, on October 3, 1986, the Senate added an amendment to the continuing resolution which would require LTV Corp. to continue health, disability and death benefits to it's retirees until May 15, 1987. The intention was that these benefits should be protected until Congress has an opportunity to study the bankruptcy laws and determine what further action it wants to take to protect these retirees.

Subsequently, we have been informed that, under the language used in the amendment to the continuing resolution, the health, disability, and death benefits of over 1,000 retirees on the severely depressed Minnesota Iron Range would not be protected. The amendment we are offering today would amend the language of the earlier amendment to the continuing resolution to make clear that the benefits of these retirees would be protected in the same fashion as those of other retirees affected by the LTV Corp. bankruptcy.

Again, I consider this to be "must" legislation. I want to thank the distinguished chairman of the Judiciary Committee, President Pro Tempore THURMOND, for his efforts in helping us to pass this legislation to protect these retirees.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 2424), as amended, was ordered to be engrossed for a third reading, and was read the third time.

□ 0231

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar 1014, H.R. 5363, the House companion bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5363) to amend the interest provision of the Declaration of Taking Act.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. SIMPSON. Mr. President, I move to strike all after the enacting clause and insert the text of S. 2424, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

The PRESIDING OFFICER. If there be no further amendment, the question is on third reading and passage.

The bill (HR. 5363), as amended, was ordered to a third reading, read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent that S. 2424 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

PINE RIDGE INDIAN RESERVATION CLAIMS SETTLEMENT ACT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar 1087, dealing with the Pine Ridge Indian Reservation.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2260) to settle claims arising out of activities on the Pine Ridge Indian Reservation.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with amendments, as follows:

(The parts of the bill intended to be stricken are shown in bold face brackets, and the parts of the bill intended to be inserted are shown in italics:)

S. 2260

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in full settlement of all claims, legal and equitable, against the United States arising out of activities on the Pine Ridge Indian Reservation that were the subject of the findings of fact and recommendations submitted to the Senate by the Chief Commissioner of the United States Court of Claims (Congressional Reference 4-76) in response to a request of the Senate made in Senate Resolution 378 (94th Congress, agreed to on August 9, 1976), the Secretary of the Treasury is authorized and directed to pay, out of funds in the Treasury of the United States not otherwise appropriated, the following amounts:

(1) $731.05 to Joe Leavitt (claimant No. 1),

(2) $118,771.10 to William Leavitt (claimant No. 3),

(3) $10,954.48 to Dwight W. and Francis Afraid of Hawk (claimant No. 3),

(4) $15,073.31 to Stella Bear Shield (claimant No. 4),

(5) $3,582.00 to Samuel Crocked Eyes (claimant No. 5),

(6) $2,955.00 to Seth Eagle Bear (claimant No. 6),

(7) $4,095.00 to Frank and Gonne A. Grooms (claimant No. 7),

(8) $2,537.00 to Vera High Hawk (claimant No. 8),

(84) $18,436.58 to Federal Insurance Co. (claimant No. 92),

(85) $1,650.00 to Stephen E. and JoAnne Ferace (claimant No. 93),

(86) $12,331.14 to Guv and Jean Fritze (claimant No. 94),

(87) $7,000.00 to C and F Trucking (claimant No. 95),

(88) $16,615.00 to Olive A. and Agnes Gildersleeve (claimant No. 96),

(89) $12,763.08 to Gordon G. and Lorraine F. Greenamyre (claimant No. 97),

(90) $21,917.51 to H and R Plumbing and Heating, Inc. (claimant No. 98),

(91) $39,298.25 to Home Insurance Co. (claimant No. 99),

(92) $21,457.92 to Janis Roofing (claimant No. 100),

(93) $6,431.95 to Milbank Mutual Insurance Company (claimant No. 101),

(94) $4,468.00 to Marv F. Pike (claimant No. 102),

(95) $67,511.54 to R and S Construction Company (claimant No. 103),

(96) $12,405.00 to Estate of Wilbur A. Riegert (claimant No. 104),
(97) $19,620.00 to Orville G. Schwarting (claimant No. 105),
(98) $490,934.44 to Sioux, Inc. (claimant No. 106),
(99) $8,275.02 to Stuyvesant Insurance Co. (claimant No. 107),
(100) $8,028.65 to Oglala Sioux Tribe (claimant No. 108),
(101) $28,374.00 to Oglala Sioux Housing Authority (claimant No. 109),
(102) $37,697.50 to Aaron DeSersa-Sron (claimant No. 110),
(103) $5,181.45 to Ivdia Black Bear (claimant No. 111),
(104) $887.50 to Thomas Casey (claimant No. 112),
(105) $3,984.00 to Roy and Pauline White Butterfly (claimant No. 113),
(106) $3,495.00 to Eleanor Pig Owl for George Iron Teeth (claimant No. 114),
(107) $3,168.09 to Standard Oil (Indiana) (claimant No. 115),
(108) $7,335.00 to Shirley Blunt Horn (claimant No. 116),
(109) $1,866.00 to Eugene and Vera Hunts Horse (claimant No. 118),
(110) $2,650.40 to Claytor and Vernice Jealous of Him (claimant No. 119),
(111) $1,021.00 to Keva A. and Reuben R. Mesteth (claimant No. 120),
(112) $4,234.70 to Hobart Spotted Bear (claimant No. 121), and
(113) $1,425.00 to Employers Mutual Companies (claimant No. 122).

(b)(1) No part of any amount paid to any person under subsection (a) in excess of 10 percent of such amount shall be paid or delivered to, or received by, any agent or attorney on account of services rendered in connection with the claim for which such payment is made, and the same shall be unlawful, notwithstanding any contract to the contrary. Violation of the provisions of this paragraph is a misdeameanor punishable by a fine not to exceed $1,000.

(2) Notwithstanding any other provision of law, no amount of any payment made to a person under this Act shall be included in the income of such person for purposes of any Federal, State, or local income tax. Notwithstanding any other provision of law, payments made to a person under this Act may not be considered as income or resources or otherwise used as the basis for denying or reducing—

(A) any financial assistance or other benefit under the Social Security Act—

(i) to which such person, or the household of such person, is otherwise entitled, or

(ii) for which such person, or the household of such person, is otherwise eligible, or

(B) any other financial assistance or benefit—

(i) to which such person, or the household of such person, is otherwise entitled, or

(ii) for which such person, or the household of such person, is otherwise eligible, under any program part or all of the funding for which is provided by the Federal Government.

(2)(c) Pursuant to the recommendations of the Chief Commissioner of the United States Court of Claims, the Secretary of the Treasury is authorized and directed to pay out of funds in the Treasury of the United States not otherwise appropriated, $26,486.44 to the Dakota Plains Legal Services, formerly South Dakota Legal Services Corporation for services rendered in connection with the proceeding conducted pursuant to section 2509 of title 28, United States Code, which was initiated by reason of Senate Rescolution 378 (94th Congress, agreed to on August 9, 1976).

The PRESIDING OFFICER. Without objection, the amendments are considered en bloc and agreed to en bloc.

The committee amendments were agreed to en bloc.

The PRESIDING OFFICER. Are there further amendments?

If not, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RELIEF OF RAMZI AND MARIE SALLOMY

Mr. SIMPSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 332.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 332) entitled "An Act for the relief of Ramzi Sallomy and Marie Sallomy", do pass with the following amendment:

Page 2, line 6, strike out [Act.], and insert: *Act: Provided further, That a suitable and proper bond or undertaking, approved by the Attorney General, be deposited on behalf of Ramzi Sallomy as prescribed by section 213 of the said Act.*

Mr. SIMPSON. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXEMPTIVE AUTHORITY OF THE SECURITIES AND EXCHANGE COMMISSION

Mr. SIMPSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2000.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2000) entitled "An Act to clarify the exemptive authority of the Securities and Exchange Commission", do pass with the following amendment:

Strike out all after the enacting clause, and insert: Notwithstanding section 3(a) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79c(a)), a holding company which has only one subsidiary company that is solely a gas utility company, as defined in said Act, shall be exempt from all provisions, except section 9(a)(2), of said Act if neither the holding company nor any other subsidiary company is a public utility company, the operations of such subsidiary gas utility company do not exceed beyond the State in which it is organized, the subsidiary company was incorporated on June 16, 1986, for the express purpose of operating as a gas utility company, and all of whose voting securities are owned by the holding company, and neither the holding company, nor any of its subsidiary companies are engaged in residential or commercial plumbing, heating, refrigeration, airconditioning, or in the sale, installation or servicing of such or related equipment.

Mr. BYRD. Mr. President, S. 2000 passed the Senate on August 14. The purpose of this measure is to ensure that the Securities and Exchange Commission be given very narrow authority to except a single company, Cabot Corp., from the strictures of the Public Utility Holding Company Act. The exception is needed so that Cabot Corp. can comply with an order of the West Virginia Public Service Commission to reorganize part of its operations. On reflection of the Senate's original action, it became apparent that the effective date of the measure would unintentionally except others. The House of Representatives amended S. 2000 to set the effective date as a date applicable only to Cabot. The House further refined our intentions by additional language which legislative counsel informs me better states the exception; substituting the word "if" for the words "provided that."

I urge my colleagues to join with Senator ROCKEFELLER and me in supporting S. 2000. The legislation is necessary and beneficial to the citizens of West Virginia. It does not compromise the protections Congress intends to preserve under the Public Utility Holding Company Act.

Mr. SIMPSON. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CRIMINAL JUSTICE ACT REVISION

Mr. SIMPSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3004.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 3004) entitled "An Act to amend section 3006A of title 18, United States Code, to improve the delivery of legal services in the criminal justice system to those persons financially unable to obtain adequate representation, and for other purposes", with the following amendment:

In lieu of the matter proposed to be inserted by said amendment, insert:

TITLE I—CRIMINAL JUSTICE ACT REVISION

SEC. 101. SHORT TITLE.

This title may be referred to as the "Criminal Justice Act Revision of 1986".

SEC. 102. AMENDMENTS TO TITLE 18, UNITED STATES CODE.

(a) IN GENERAL.—Section 3006A of title 18, United States Code, is amended as follows:

(1) Subsection (a) is amended by striking out "(1) who is" and all that follows through "subsection (h)," and inserting in lieu thereof the following: "in accordance with this section. Representation under each plan shall include counsel and investigative, expert, and other services necessary for adequate representation. Each plan shall provide the following:

"(1) Representation shall be provided for any financially eligible person who—

"(A) is charged with a felony or a misdemeanor (other than a petty offense as defined in section 1 of this title);

"(B) is a juvenile alleged to have committed an act of juvenile delinquency as defined in section 5031 of this title;

"(C) is charged with a violation of probation;

"(D) is under arrest, when such representation is required by law;

"(E) is entitled to appointment of counsel in parole proceedings under chapter 311 of this title;

"(F) is subject to a mental condition hearing under chapter 313 of this title;

"(G) is in custody as a material witness;

"(H) is entitled to appointment of counsel under the sixth amendment to the Constitution; or

"(I) faces loss of liberty in a case, and Federal law requires the appointment of counsel.

"(2) Whenever the United States magistrate or the court determines that the interests of justice so require, representation may be provided for any financially eligible person who—

"(A) is charged with a petty offense for which a sentence to confinement is authorized; or

"(B) is seeking relief under section 2241, 2254, or 2255 of title 28.

"(3) Private attorneys shall be appointed in a substantial proportion of the cases. Each plan may include, in addition to the provisions for private attorneys, either of the following or both:

"(A) Attorneys furnished by a bar association or a legal aid agency.

"(B) Attorney furnished by a defender organization established in accordance with the provisions of subsection (g).".

(2) Subsection (b) is amended—

(A) in the second sentence—

(i) by striking out "In every criminal case" and all that follows through "violation of probation and" and inserting in lieu thereof "In every case in which a person entitled to representation under a plan approved under subsection (a)"; and

(ii) by striking out "defendant" and inserting in lieu thereof "person";

(B) in the third sentence by striking out "defendant" each place it appears and inserting in lieu thereof "person"; and

(C) in the fifth sentence by striking out "defendants" and inserting in lieu thereof "persons".

(3)(A) Subsection (d)(1) is amended by striking out "court. Such attorney" and inserting in lieu thereof "court, unless the Judicial Conference determines that a higher rate of not in excess of $75 per hour is justified for a circuit or for particular districts within a circuit, for time expended in court or before a United States magistrate and for time expended out of court. The Judicial Conference shall develop guidelines for determining the maximum hourly rates for each circuit in accordance with the preceding sentence, with variations by district, where appropriate, taking into account such factors as the minimum range of the prevailing hourly rates for qualified attorneys in the district in which the representation is provided and the recommendations of the judicial councils of the circuits. Not less than 3 years after the effective date of the Criminal Justice Act Revision of 1986, the Judicial Conference is authorized to raise the maximum hourly rates specified in this paragraph up to the aggregate of the overall average percentages of the adjustments in the rates of pay under the General Schedule made pursuant to section 5305 of title 5 on or after such effective date. After the rates are raised under the preceding sentence, such maximum hourly rates may be raised at intervals of not less than 1 year each, up to the aggregate of the overall average percentages of such adjustments made since the last raise was made under this paragraph. Attorneys".

(B) Subsection (d)(2) is amended—

(i) in the first sentence—

(I) by striking out "$2,000" and inserting in lieu thereof "$3,500"; and

(II) by striking out "$800" and inserting in lieu thereof "$1,000";

(ii) in the second sentence by striking out "$2,000" and inserting in lieu thereof "$2,500", and

(iii) by striking out the third sentence and inserting in lieu thereof the following: "For any other representation required or authorized by this section, the compensation shall not exceed $750 for each attorney in each proceeding.".

(C) Subsection (d)(3) is amended by adding at the end thereof the following: "The chief judge of the circuit may delegate such approval authority to an active circuit judge.".

(D) Subsection (d)(4) is amended in the first sentence by striking out "represented the defendant" and inserting in lieu thereof "provided representation to the person involved".

(4)(A) Subsection (e)(1) is amended in the first sentence by striking out "an adequate defense" and inserting in lieu thereof "adequate representation".

(B) Subsection (e)(2) is amended to read as follows:

"(2) WITHOUT PRIOR REQUEST.—(A) Counsel appointed under this section may obtain, subject to later review, investigative, expert, and other services without prior authorization if necessary for adequate representation. Except as provided in subparagraph (B) of this paragraph, the total cost of services obtained without prior authorization may not exceed $300 and expenses reasonably incurred.

"(B) The court, or the United States magistrate (if the services were rendered in a case disposed of entirely before the United States magistrate), may, in the interest of justice, and upon the finding that timely procurement of necessary services could not await prior authorization, approve payment for such services after they have been obtained, even if the cost of such services exceeds $300.".

(C)(i) Subsection (e)(3) is amended by striking out "$300" and inserting in lieu thereof "$1,000".

(ii) Subsection (e)(3) is amended by adding at the end thereof the following: "The chief judge of the circuit may delegate such approval authority to an active circuit judge.".

(5)(A)(i) Subsection (h)(2)(A) is amended by striking out "similarly as under title 28, United States Code, section 605, and subject to the conditions of that section" and inserting in lieu thereof "in accordance with section 605 of title 28".

(ii) Subsection (h)(2)(A) is amended by inserting after the fourth sentence the following: "Upon the expiration of his term, a Federal Public Defender may, by a majority vote of the judges of the court of appeals, continue to perform the duties of his office until his successor is appointed, or until one year after the expiration of such Defender's term, whichever is earlier.".

(B) Subsection (h)(2)(B) is amended in the third sentence by striking out "coming" and inserting in lieu thereof "next fiscal".

(C) Subsection (h) is further amended by adding at the end thereof the following:

"(3) MALPRACTICE AND NEGLIGENCE SUITS.—The Director of the Administrative Office of the United States Courts shall, to the extent the Director considers appropriate, provide representation for and hold harmless, or provide liability insurance for, any person who is an officer or employee of a Federal Public Defender Organization established under this subsection, or a Community Defender Organization established under this subsection which is receiving periodic sustaining grants, for money damages for injury, loss of liberty, loss of property, or personal injury or death arising from malpractice or negligence of any such officer or employee in furnishing representational services under this section while acting within the scope of that person's office or employment.".

(6) Subsection (i) is amended by inserting immediately before the period at the end of the first sentence the following: ", including funds for the continuing education and training of persons providing representational services under this section".

(7) Subsection (l) is amended—

(A) by striking out ", other than subsection (h) of section 1,"; and

(B) by striking out "Act" each place it appears and inserting in lieu thereof "section".

(b) ADDITIONAL AMENDMENTS.—(1) Section 3006A of title 18, United States Code, is further amended by striking out subsection (g) and redesignating subsections (h) through (l) as subsections (g) through (k), respectively.

(2) Subsection (j), as redesignated by paragraph (1), is amended to read as follows:

"(j) DISTRICTS INCLUDED.—As used in this section, the term 'district court' means each district court of the United States created by chapter 5 of title 28, the District Court of the Virgin Islands, the District Court for the Northern Mariana Islands, and the District Court of Guam.".

SEC. 103. TECHNICAL AMENDMENTS.

Section 223(e) of the Comprehensive Crime Control Act of 1984 (Public Law 98-473; 98 Stat. 2028) is amended to read as follows:

"(e) Section 3006A(a) is amended—

"(1) in paragraph (1)(A) by striking out 'misdemeanor (other than a petty offense as defined in section 1 of this title)' and inserting in lieu thereof 'Class A misdemeanor';

"(2) in paragraph (1) by striking out subparagraph (E) and redesignating subparagraphs (F) through (D as subparagraphs (E) through (H), respectively; and

"(3) in paragraph (2)(A) by striking out 'petty offense' and inserting in lieu thereof 'Class B or C misdemeanor, or an infraction'.".

SEC. 104. WITNESS FEES.

Section 1825 of title 28, United States Code, is amended to read as follows:

"§ 1825. Payment of fees

"(a) In any case in which the United States or an officer or agency of the United States is a party, the United States marshal for the district shall pay all fees of witnesses on the certificate of the United States attorney or assistant United States attorney, and in the proceedings before a United States magistrate, on the certificate of such magistrate, except: that any fees of defense witnesses, other than experts, appearing pursuant to subpoenas issued upon approval of the court, shall be paid by the United States marshal for the district—

"(1) on the certificate of a Federal public defender or assistant Federal public defender, in a criminal case in which the defendant is represented by such Federal public defender or assistant Federal public defender, and

"(2) on the certificate of the clerk of the court upon the affidavit of such witnesses' attendance given by other counsel appointed pursuant to section 3006A of title 18, in a criminal case in which a defendant is represented by such other counsel.

"(b) In proceedings in forma pauperis for a writ of habeas corpus, and in proceedings in forma pauperis under section 2255 of this title, the United States marshal for the district shall pay, on the certificate of the district judge, all fees of witnesses for the party authorized to proceed in forma pauperis, except that any fees of witnesses for such party, other than experts, appearing pursuant to subpoenas issued upon approval of the court, shall be paid by the United States marshal for the district—

"(1) on the certificate of a Federal public defender or assistant Federal public defender, in any such proceedings in which a party is represented by such Federal public defender or assistant Federal public defender, and

"(2) on the certificate of the clerk of the court upon the affidavit of such witnesses' attendance given by other counsel appointed pursuant to section 3006A of title 18, in any such proceedings in which a party is represented by such other counsel.

"(c) Fees and mileage need not be tendered to a witness upon service of a subpoena issued on behalf of the United States or an officer or agency of the United States, upon service of a subpoena issued on behalf of a defendant represented by a Fedeal public defender, assistant Federal public defender, or other attorney appointed pursuant to section 3006A of title 18, or upon service of a subpoena issued on behalf of a party authorized to proceed in forma pauperis, if the payment of such fees and mileage is to be made by the United States marshal under this section.".

SEC. 105. EFFECTIVE DATE.

This title and the amendments made by this title shall take effect 120 days after the date of enactment of this Act. The maximum hourly rates provided in section 3006A(d)(1) of title 18, United States Code, as amended by section 102(a)(3)(A) of this Act, shall apply only to services performed on or after the effective date of this title. The maximum allowed for compensation for a case, as provided in section 3006A(d)(2) of title 18, United States Code, as amended by section 101(a)(3)(B) of this Act, shall apply only to compensation claims in which some portion of the claim is for the services performed on or after the effective date of this title. The maximum compensation allowed pursuant to section 3006A(e) of title 18, United States Code, as amended by subparagraphs (B) and (C) of section 102(a)(4) of this Act, shall apply only to services obtained on or after the effective date of this title.

TITLE II—RECALL OF CERTAIN JUDICIAL OFFICERS

SEC. 201. RECALL OF CERTAIN RETIRED JUDICIAL OFFICERS.

(a) MAGISTRATES.—(1) Section 631(d) of title 28, United States Code, is amended—

(A) by striking out "No" and inserting in lieu thereof "Except as otherwise provided in sections 375 and 636(h) of this title, no";

(B) by striking out "the unanimous" and inserting in lieu thereof "a majority"; and

(C) by inserting after "courts," the following: "which is taken upon the magistrate's attaining age seventy and upon each subsequent anniversary thereof,".

(2) Section 636 of title 28, United States Code, is amended by adding at the end the following:

"(h) A United States magistrate who has retired may, upon the consent of the chief judge of the district involved, be recalled to serve as a magistrate in any judicial district by the judicial council of the circuit within which such district is located. Upon recall, a magistrate may receive a salary for such service in accordance with regulations promulgated by the Judicial Conference, subject to the restrictions on the payment of an annuity set forth in subchapter III of chapter 83, and chapter 84, of title 5. The requirements set forth in subsections (a), (b)(3), and (d) of section 631, and paragraph (1) of subsection (b) of such section to the extent such paragraph requires membership of the bar of the location in which an individual is to serve as a magistrate, shall not apply to the recall of a retired magistrate under this subsection or section 375 of this title. Any other requirement set forth in section 631(b) shall apply to the recall of a retired magistrate under this subsection or section 375 of this title unless such retired magistrate met such requirement upon appointment or reappointment as a magistrate under section 631.".

(b) ALTERNATIVE RECALL OF CERTAIN JUDGES AND MAGISTRATES.—(1) Chapter 17 of title 28, United States Code, is amended by inserting after section 374 the following new section:

"§ 375. Recall of certain judges and magistrates

"(a)(1) A bankruptcy judge, a judge of the Claims Court, or a United States magistrate appointed under chapter 43 of this title, who has retired under the applicable provisions of title 5 upon attaining the age and years of service requirements established in section 371(c) of this title, may agree to be recalled to serve under this section for a period of five years as a bankruptcy judge, judge of the Claims Court, or magistrate, as the case may be, upon certification that substantial service is expected to be performed by such retired judge or magistrate during such 5-year period. With the agreement of the judge or magistrate involved, a certification under this subsection may be renewed for successive 5-year periods.

"(2) For purposes of paragraph (1) of this subsection, a certification may be made—

"(A) in the case of a bankruptcy judge or a United States magistrate, by the judicial council of the circuit in which the official duty station of the judge or magistrate at the time of retirement was located; and

"(B) in the case of a judge of the Claims Court, by the chief judge of the United States Claims Court.

"(3) For purposes of this section—

"(A) the term 'bankruptcy judge' means a bankruptcy judge appointed under chapter 6 of this title or serving as a bankruptcy judge on March 31, 1984; and

"(B) the term 'judge of the Claims Court' means a judge of the United States Claims Court who is appointed under chapter 7 of this title or who has served under section 167 of the Federal Courts Improvement Act of 1982.

"(b) A judge or magistrate recalled under this section may exercise all of the powers and duties of the office of judge or magistrate held at the time of retirement, including the ability to serve in any other judicial district to the extent applicable, but may not engage in the practice of law or engage in any other business, occupation, or employment inconsistent with the expeditious, proper, and impartial performance of duties as a judicial officer.

"(c) During the 5-year period in which a certification under subsection (a) is in effect, the judge or magistrate involved shall receive, in addition to the annuity provided under the applicable provisions of title 5, an amount equal to the difference between that annuity and the current salary of the office to which the judge or magistrate is recalled.

"(d) A certification under subsection (a) may be terminated in accordance with section 372(c) of this title, and such a certification shall be terminated upon the death of the recalled judge or magistrate involved.

"(e) Except as provided in subsection (b), nothing in this section shall affect the right of judges and magistrates who retire under the provisions of chapter 83 or chapter 84 of title 5 to serve as reemployed annuitants in accordance with the provisions of title 5. A judge or magistrate to whom this section applies may be recalled under section 155, 636(h), or 797 of this title, as the case may be, other than during a 5-year period in which a certification under subsection (a) is in effect with respect to that judge or magistrate.

"(f) For purposes of determining the years of service requirements in order to be eligible of recall under this section, any service as a bankruptcy judge, a judge of the Claims Court, or a United States magistrate, and any prior service as a referee in bankruptcy, a commission of the Court of Claims, or a United States commissioner, may be credited.

"(g) Except as provided in subsection (c), a judge or magistrate recalled under this section shall be considered to be a reemployed annuitant under chapter 83 or chapter 84, as the case may be, of title 5.

"(h) The Judicial Conference of the United States may promulgate regulations to implement this section.".

(2) The item relating to section 375 in the table of sections for chapter 17 of title 28, United States Code, is amended to read as follows:

"375. Recall of certain judges and magistrates.".

SEC. 202. TECHNICAL AMENDMENTS.

(a) RECALL OF BANKRUPTCY JUDGES.—Section 155(b) of title 28, United States Code, is amended by inserting ", and chapter 84," after "chapter 83".

(b) OFFICIAL DUTY STATION.—Section 374 of title 28, United States Code, is amended by adding at the end the following: "The place where a judge or magistrate recalled under section 155, 375, 636, or 797 of this title maintains the actual abode in which the judge or magistrate customarily lives shall be deemed to be the official station of such judge or magistrate for purposes of section 604(a)(7) of this title.".

(c) RECALL OF CLAIMS COURT JUDGES.—Section 797(a) of title 28, United States Code, is amended by inserting ", or chapter 84," after "chapter 83".

(d) CLERICAL AMENDMENT.—Section 633(b) of title 28, United State Code, is amended by striking out "643" and inserting in lieu thereof "634".

SEC. 203. EFFECTIVE DATE.

This title and the amendments made by this title take effect on January 1, 1987.

Mr. SIMPSON. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MATSUNAGA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTION OF TECHNICAL ERROR IN ENROLLMENT OF S. 475

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to consideration of House Concurrent Resolution 411, making technical corrections in S. 475, to amend the Motor Vehicle Information and Cost Savings Act.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 411) to correct a technical error in the enrollment of the bill S. 475.

There being no objection, the concurrent resolution (H. Con. Res. 411) was considered and agreed to.

Mr. SIMPSON. I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TESTIMONY OF SENATE EMPLOYEES

Mr. SIMPSON. Mr. President, I send a resolution to the desk on behalf of Senators DOLE and BYRD and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A Senate resolution (S. Res. 512) to direct the Senate Legal Counsel to represent the staff of Senator Dole and to authorize the testimony of such staff in the case of *United States* v. *Michael Evan Bardoff, et al.*

Mr. SIMPSON. Mr. President, on August 4, 1986, a number of Senate offices were the targets of political demonstrations by groups wanting to express their views on United States aid to anti-Sandinista forces in Nicaragua. One of those was the personal office in the Hart Building of the majority leader, whose staff called the Capitol Police resulting in the arrests of 18 protestors who were ultimately charged under the D.C. Code with unlawful entry and unlawful conduct.

Fifteen of those individuals subsequently pled guilty, but the remaining three demanded a jury trial which is scheduled to begin in the D.C. Superior Court tomorrow afternoon. The assistant U.S. attorney who is prosecuting the case has subpoenaed five Capitol Police officers to appear as witnesses at the trial and has in addition requested the testimony of four of Senator DOLE's staff assistants who were present during the sit-in.

Since Senate employees cannot appear in their official capacity at a judicial proceeding without permisson of the Senate, this resolution would authorize those staff members to comply with the U.S. attorney's request. It would also direct the Senate legal counsel to represent them during all phases of the action in question in order to assure that the privileges and rights of the Senate are protected.

Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 512) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 512

Whereas, in the case of *United States* v. *Michael Evan Bardoff, et al.*, Crim. No. M-9508-86, et al., pending in the Superior Court of the District of Columbia, the United States Attorney has requested the testimony of Elizabeth Meyer, Mariam Bechtel, Janeal Cabbage and Jennifer Schumacher of the personal office staff of Senator Dole;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. 288b(a) and 288c(a)(2) (1982), the Senate may direct its counsel to represent employees of the Senate with respect to testimony requests made of them in their official capacity;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, when it appears that the testimony of employees of the Senate is or may be needful for use in any court for the promotion of justice, the Senate will take such action as will promote the ends of justice consistent with the privileges and rights of the Senate; Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to represent Elizabeth Meyer, Mariam Bechtel, Janeal Cabbage, Jennifer Schumacher and any other staff assistant of Senator Dole who may be asked to testify in the case of *United States* v. *Michael Evan Bardoff, et al.* or subsequent related proceedings.

SEC. 2. That Elizabeth Meyer, Mariam Bechtel, Janeal Cabbage, Jennifer Schumacher, and any other staff assistant of Senator Dole who may be asked is authorized to testify in the case of *United States* v. *Michael Evan Bardoff, et al.*, except concerning matters which may be privileged.

Mr. SIMPSON. I move to reconsider the vote by which the resolution was agreed to.

Mr. MATSUNAGA. I move to lay that motion on the table. The motion to lay on the table was agreed to.

QUIET TITLE ACTIONS

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 2484, dealing with Quiet Title, just received from the House.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2484) to amend title 28, United States Code, relating to quiet title actions against the United States, with respect to actions brought by States.

The Senate proceeded to consider the bill.

Mr. INOUYE. I ask Senator MCCLURE, is it his and the committee's understanding that the notice provision in H.R. 2484 would neither apply to nor begin to run against a State or a party which has given the United States express permission or express consent to go upon a parcel of land by virtue of license, lease, Executive order, grant or any other form of authority?

Mr. MCCLURE. Yes, that is correct.

Mr. INOUYE. Is it also the intent and purpose of the committee that where a State has given the United States express permission to go upon the land, improvements or investments made by the United States even in a defense facility do not give a State notice that the United States claims the right or title to the land and that a State should not be barred at the courthouse door by the statute of limi-

tations from the opportunity to prove its title in court * * * whatever the merits of its claim?

Mr. McCLURE. That is right. It is not the purpose or intent of this bill to prohibit a quiet title action or to challenge the title of lands where the United States has entered by the express consent or permission of a State or private party. Were that the case, no State would ever give the United States a lease, license, Executive order, or any kind of permission to use property for fear that the United States, by improving the land, would bar a fair determination of ownership.

Mr. INOUYE. Am I correct in assuming that while this bill would not allow the relitigation of any case on the merits, it would also not preclude a State from bringing a quiet title action unless the United States had made it clear to a State or a private party for more than 12 years that the United States was claiming right, title, and ownership of the land and not merely that it used or was in possession of the land?

Mr. WALLOP. This is our intention.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 2484) was ordered to a third reading, was read a third time, and passed.

Mr. SIMPSON. I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to consideration of H.R. 4154, dealing with mandatory retirement.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4154) to amend the Age Discrimination in Employment Act of 1967 to remove the maximum age limitation applicable to employees who are protected under such Act, and for other purposes.

The Senate proceeded to consider the bill.

AMENDMENT NO. 3484

(Purpose: To amend the Age Discrimination in Employment Act of 1967 to remove the maximum age limitation applicable to employees who are protected under such Act, and for other purposes)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator HEINZ and others in the nature of a substitute and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. HEINZ, Mr. METZENBAUM, Mr. FORD, Mr. BRADLEY, Mr. KENNEDY, Mr. GRASSLEY, Mrs. HAWKINS, Mr. COHEN, and Mr. CHILES, proposes an amendment in the nature of a substitute numbered 3484.

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Age Discrimination in Employment Amendments of 1986".

SEC. 2. AMENDMENTS RELATING TO MAXIMUM AGE.

(a) COVERAGE UNDER GROUP HEALTH PLANS.—Subsection (g)(1) of section 4 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623(g)(1)), as added by section 116(a) of the Tax Equity and Fiscal Responsibility Act of 1982, is amended by striking out "through 69" each place it appears and inserting in lieu thereof "or older".

(b) TECHNICAL AMENDMENT.—Subsection (g) of section 4 of the Age Discrimination in Employment Act of 1967, as added by section 802(b)(2) of the Older Americans Act Amendments of 1984, is amended by striking out "(g)(1)" in inserting in lieu thereof "(h)(1)".

(c) REMOVAL OF MAXIMUM AGE LIMITATION.—Section 12 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631) is amended—

(1) in subsection (a) by striking out "but less than seventy years of age", and

(2) in subsection (c)(1) by striking out "but not seventy years of age,".

SEC. 3. EMPLOYMENT AS FIREFIGHTER OR LAW ENFORCEMENT OFFICER.

(a) GENERAL RULE.—Section 4 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623) is amended by adding at the end thereof the following new subsection:

"(i) It shall not be unlawful for an employer which is a State, a political subdivision of a State, an agency or instrumentality of a State or a political subdivision of a State, or an interstate agency to fail or refuse to hire or to discharge any individual because of such individual's age if such action is taken—

"(1) with respect to the employment of an individual as a firefighter or as a law enforcement officer and the individual has attained the age of hiring or retirement in effect under applicable State or local law on March 3, 1983, and

"(2) pursuant to a bona fide hiring or retirement plan that is not a subterfuge to evade the purposes of this Act.".

(b) TERMINATION PROVISION.—The amendment made by subsection (a) of this section is repealed December 31, 1993.

SEC. 4. DEFINITIONS.

Section 11 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 630) is amended by adding at the end thereof the following new subsections:

"(j) The term 'firefighter' means an employee, the duties of whose position are primarily to perform work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment, including an employee engaged in this activity who is transferred to a supervisory or administrative position.

"(k) The term 'law enforcement officer' means an employee, the duties of whose position are primarily the investigation, apprehension, or detention of individuals suspected or convicted of offenses against the criminal laws of a State, including an employee engaged in this activity who is transferred to a supervisory or administrative position. For the purpose of this subsection, 'detention' includes the duties of employees assigned to guard individuals incarcerated in any penal institution.".

SEC. 5. STUDY AND PROPOSED GUIDELINES RELATING TO POLICE OFFICERS AND FIREFIGHTERS.

(a) STUDY.—Not later than 4 years after the date of enactment of this Act, the Secretary of Labor and the Equal Employment Opportunity Commission, jointly, shall—

(1) conduct a study—

(A) to determine whether physical and mental fitness tests are valid measurements of the ability and competency of police officers and firefighters to perform the requirements of their jobs,

(B) if such tests are found to be valid measurements of such ability and competency, to determine which particular types of tests most effectively measure such ability and competency, and

(C) to develop recommendations with respect to specific standards that such tests, and the administration of such tests should satisfy, and

(2) submit a report to the Speaker of the House of Representatives and the President pro tempore of the Senate that includes—

(A) a description of the results of such study, and

(B) a statement of the recommendations developed under paragraph (1)(C).

(b) CONSULTATION REQUIREMENT.—The Secretary of Labor and the Equal Employment Opportunity Commission shall, during the conduct of the study required under subsection (a) and prior to the development of recommendations under paragraph (1)(C), consult with the United States Fire Administration, the Federal Emergency Management Agency, organizations representing law enforcement officers, firefighters, and their employers, and organizations representing older Americans.

(c) PROPOSED GUIDELINES.—Not later than 5 years after the date of the enactment of this Act, the Equal Employment Opportunity Commission shall propose, in accordance with subchapter II of chapter 5 of title 5 of the United States Code, guidelines for the administration and use of physical and mental fitness tests to measure the ability and competency of police officers and firefighters to perform the requirements of their jobs.

SEC. 6. SPECIAL RULE FOR TENURED FACULTY.

(a) SPECIAL RULE.—Section 12 of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631) is amended by adding at the end thereof the following new subsection:

"(d) Nothing in this Act shall be construed to prohibit compulsory retirement of any employee who has attained 70 years of age, and who is serving under a contract of unlimited tenure (or similar arrangement providing for unlimited tenure) at an institution of higher education (as defined by section 1201(a) of the Higher Education Act of 1965).".

(b) TERMINATION PROVISION.—The amendment made by subsection (a) of this section is repealed December 31, 1993.

(c) STUDY REQUIRED.—The Equal Employment Opportunity Commission shall, not

later than 12 months after the date of enactment of this Act, enter into an agreement with the National Academy of Sciences for the conduct of a study to analyze the potential consequences of the elimination of mandatory retirement on institutions of higher education.

(2) The study required by paragraph (1) of this subsection shall be conducted under the general supervision of the National Academy of Sciences by a study panel composed of 9 members. The study panel shall consist of—

(A) 4 members who shall be administrators at institutions of higher education selected by the National Academy of Sciences after consultation with the American Council of Education, the Association of American Universities, and the National Association of State Universities and Land Grant Colleges;

(B) 4 members who shall be teachers or retired teachers at institutions of higher education (who do not serve in an administrative capacity at such institutions), selected by the National Academy of Sciences after consultation with the American Federation of Teachers, the National Education Association, the American Association of University Professors, and the American Association of Retired Persons; and

(C) one member selected by the National Academy of Sciences.

(3) The results of the study shall be reported, with recommendations, to the President and to the Congress not later than 5 years after the date of enactment of this Act.

(4) The expenses of the study required by this subsection shall be paid from funds available to the Equal Employment Opportunity Commission.

SEC. 7. EFFECTIVE DATE; APPLICATION OF AMENDMENTS.

(a) IN GENERAL.—Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on January 1, 1987, except that with respect to any employee who is subject to a collective-bargaining agreement—

(1) which is in effect on June 30, 1986,

(2) which terminates after January 1, 1987,

(3) any provision of which was entered into by a labor organization (as defined by section 6(d)(4) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206(d)(4)), and

(4) which contains any provision that would be superseded by such amendments, but for the operation of this section,

such amendments shall not apply until the termination of such collective bargaining agreement or January 1, 1990, whichever occurs first.

(b) Effect on Existing Causes of Action.—The amendments made by sections 3 and 4 of this Act shall not apply with respect to any cause of action arising under the Age Discrimination in Employment Act of 1967 as in effect before January 1, 1987.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute.

The amendment in the nature of a substitute (No. 3484) was agreed to.

Mr. HEINZ. Mr. President, I rise in support of H.R. 4154, the Age Discrimination in Employment Amendments of 1986. This amendment would prohibit mandatory retirement by removing the age 70 cap in the Age Discrimination in Employment Act [ADEA]. This amendment is similar to legislation which I introduced in 1985 and to H.R. 4154, introduced by Congressman CLAUDE PEPPER and unanimously passed by the House of Representatives on September 23, 1986. The importance of removing the age 70 cap is its messsage to present and future older workers: you are to be employed on the basis of your ability, not on the basis of your birth date.

The problems associated with age discrimination are not new to the Congress. The first ADEA bill, enacted in 1967, stemmed from the Congress' determination that age discrimination, like discrimination based upon race, religion, or sex, is inherently contrary to the principle of individual merit. The original act was designed to protect workers between the ages of 40 to 65. In 1978, the Age Discrimination in Employment Act was amended to eliminate mandatory retirement for nearly all Federal workers and to increase to 70 the age at which non-Federal workers could be forcibly retired. This bill will abolish that age 70 cap and will reverse a policy that implicitly sanctions arbitrary discrimination against working men and women over the age of 70. While it is a simple change in the law, it will make an enormous difference in the lives of those who will soon face the devastating effects of age discrimination.

There are 1.1 million Americans age 70 and over in our work force. Many of these people want to continue working—sometimes for reasons of self-fulfillment, but more often for reasons of economic necessity. Federal law now deprives these people of the same guarantees of equal opportunity in employment that other citizens enjoy. They are deprived of this protection not on the basis of who they are and what they can do, but solely on the basis of their age.

At a hearing I chaired before the special Committee on Aging in June, I learned of the severe psychological and financial impact of forced retirement on older workers. I heard first hand how this policy, if left to stand, would silence the strings of a concert violinist from Philadelphia, would close the schoolbooks of a dedicated teacher from Connecticut, and were it not for the Older Americans Act, would sentence a productive, willing worker from my hometown of Pittsburgh to years of financial hardship and social isolation.

Age discrimination is unfair and we should rid our society of it without further delay. More than 4 years ago, on April 2, 1982, President Reagan endorsed the abolition of mandatory retirement saying, "when it comes to retirement, the criterion should be fitness for work, not year of birth." And public opinion in this country clearly supports the elimination of mandatory retirement. A recent Harris poll found that by a 9 to 1 margin, the majority of all ages feel that, "nobody should be forced to retire because of age."

In addition to the compelling civil rights arguments for the elimination of forced retirement, there are sound economic arguments for increasing the labor force participation rates among older workers. Age discrimination is not only a threat to the well-being of older individuals, but it also undermines the economic stability of the Nation's retirement income systems and, to a lesser extent, the larger economy as well.

Passage of this legislation will encourage more older workers to remain employed longer and will help to prepare us for the inevitable work force changes that will occur in the future. Our Nation will need these productive older workers. As you are aware, Mr. President, the age distribution of the population will be shifting dramatically over the coming decades. The younger working-age population has ceased its rapid growth and, between now and 1995, will actually show marked declines. What this means is that our standard of living is threatened due to possible future labor shortages unless we continue to increase the size of our work force. And since everyone who will be a younger worker during the next 20 years has already been born, we know that the only way that we will be able to grow and prosper is if able bodied, productive older workers, who are today in their late forties or fifties or even early sixties, have the opportunity and incentive to continue working. The behavior of this group of older workers will be vital to our continued economic growth.

Allowing older people to remain productive will also lessen the strains on our retirement income programs. If those now forced to retire were working, the overall obligation of the Social Security Trust Fund would be decreased, and the number contributing would increase. Official cost estimates show that by 2020, the increase in the total tax revenues to Social Security and Medicare, will reach about $100 million.

According to the Department of Labor, if mandatory retirement were abolished, 195,000 more workers would be in the labor force in the year 2000. The Employee Benefit Research Institute estimates that the impact of legislation to abolish mandatory retirement would have only affected between 41,000 and 77,000 people in 1985. The study by the Department of Labor on the impact of totally eliminating mandatory retirement also indicates that it would not produce any work force dislocations. Thus, lifting the age cap will have a negligible impact on worker behavior and on new

entrants into the labor force, such as younger minorities and women.

Arbitrary age limits are repugnant to the letter and spirit of the ADEA, which was enacted to promote employment of older persons based on their ability rather than age and to prohibit arbitrary age discrimination in employment. Simply stated, it was Congress' intention that age should not be used as the principal determinant of an individual's ability to perform a job, but that this determination, to the greatest extent feasible, should be made on an individual basis. Age limitations conflict with this intent because they are based on notions of age-based incapacity and do not consider an individual's potential or job performance.

Mr. President, the ADEA does not require employers to keep unfit or unproductive employees. All that the ADEA requires is that the employer make individualized assessments where it is possible and practical to do so. I believe that such determinations are possible and that it is reasonable to require them rather than imposing age limits based solely on age.

Special concerns about the public safety and the tenure system at colleges and universities have been raised. To address those concerns, this bill includes temporary exemptions for State and local public safety officers and for tenured faculty to allow them to adjust to uncapping. These temporary exemtions should not be regarded as an encroachment on the fundamental principles of the ADEA. During the 7-year exemption period, studies will be undertaken to evaluate and propose criteria for physical and mental fitness tests for police officers and firefighters and to evaluate the consequences of the elimination of mandatory retirement on institutions of higher education. The compromise reached on the exemption for police and firefighters is the result of the diligent efforts of Senators NICKLES, FORD, METZENBAUM, and BRADLEY along with police and firefighters unions and representatives. Likewise, the temporary exemption for academies was facilitated by the diligent efforts of Senator HATCH, chairman of the Labor and Human Resources Committee. The Agreements they have reached have made possible the passage of this bill.

Mr. President, passage of this mandatory retirement bill will not end age discrimination. This form of discrimination has persisted in this country on the basis of misconceptions concerning the aging process and unfounded stereotypes about older people. But with this new legislation we can begin to reeducate the American public, and especially employers, about the vast reservoir of talent and expertise that older Americans have to offer to the social and economic development of our society.

The continued use of mandatory retirement policies is both morally unsupportable and contrary to the economic interests of employees, employers, and the American public. Eliminating this type of discrimination will signal our recognition of the value of older workers in the work place and will signal our intention to reject all barriers to their full participation.

We have fought long and hard to combat discriminatory employment practices in the areas of race, sex, religion, national origin, and age. Forcing older workers out of their jobs at age 70 robs society of the contribution and productivity of an increasingly important segment of our work force, and it robs these individuals of the dignity and self-sufficiency which comes from working. Every worker ought to have the right to be judged on the basis of his or her abilities. The issue is one of basic civil rights and fairness.

Mr. President, I wish to thank the cosponsors of this amendment, and their staffs, especially Jim Brudney and Kennie Gill, for their tireless efforts with regard to this legislation. Without their willingness to reach compromise, this bill would not have come to the floor. I commend Senator NICKLES, the chairman of the Subcommittee on Labor, the subcommittee which has jurisdiction of the provisions of this bill, for his cooperation. Senator METZENBAUM played a special role in ironing out the differences over the bill.

Many older worker advocates and organizations, including the American Association of Retired Persons, the National Senior Citizens Law Center, the Gray Panthers, the National Council of Senior Citizens, the American Bar Association, and the AFL–CIO, support the elimination of forced retirement, and have contributed much to this effort.

I thank my colleagues for their support.

Mr. METZENBAUM. Mr. President, I rise in support of the Heinz-Metzenbaum substitute, amending the Age Discrimination in Employment Act.

In 1978, Congress amended the ADEA by raising the cap from age 65 to age 70. This amendment would take the important further step of eliminating the age cap altogether.

Age alone has nothing to do with an employee's ability to work. Justice Oliver Wendall Holmes served with distinction on the Supreme Court into his 90's. Congressman CLAUDE PEPPER, the father of age discrimination law in this country, is still going strong at age 86. Millions of Americans over 70 are ready, willing, and able to earn their keep if given a chance.

Today, 11 percent of our population is over age 65. We cannot afford to ignore this valuable human resource. Premature retirement results in additional years of reduced income, which can drag older Americans into poverty. At the same time, premature retirement increases the burden on an already strained Social Security System.

In our society, work defines not only access to income but also self-esteem and social status. By establishing a national retirement policy based on ability and performance rather than the arbitrary factor of age, this bill recognizes and protects the dignity of older Americans.

Although the Heinz-Metzenbaum substitute lifts the age cap for all workers in the private sector, it also creates a 7-year phasein period—through December 31, 1993—for two groups of employees.

First, public safety employees—police and firefighters—are subject to applicable State laws that set uniform policies governing maximum ages of hire or retirement. Second, tenured faculty at colleges and universities may still be covered by the age 70 limit of current Federal law.

The substitute also provides for a thorough study of the issues underlying each set of claims. At present, the case for a permanent exemption has not been made. I, for one, am not certain that such a case can be made. But when the two studies are complete, Congress will at least have better information before it from which to decide.

The substitute is supported by organizations representing older Americans, including the American Association of Retired Persons and the National Council of Senior Citizens. It also has the the support of organizations representing police and firefighters, including the international Union of Police Associations, the Fraternal Order of Police, the International Association of Chiefs of Police, and the International Association of Firefighters, and by the major public employer groups, including the National League of Cities, the U.S. Conference of Mayors, and the National Association of Counties. And the 7-year phase-in period for tenured faculty has the support of a majority of the university community as well as the American Federation of Teachers and the National Education Association.

The House bill removing the age cap, H.R. 4154, was approved by the House late last month, on a vote of 394 to 0. H.R. 4154 made no provision for institutions of higher education, but included a permanent exemption for police and firefighters that was vigorously opposed by groups representing older Americans.

The Heinz-Metzenbaum substitute for H.R. 4154 adopts a narrower, temporary exemption for police and firefighters while providing a similar temporary exemption for institutions of higher education. After discussions involving the Democratic managers of

H.R. 4154, notably Congressmen PEPPER and HAWKINS, I can say that those two leaders will support and recommend acceptance of the Senate version of the legislation should this amendment reach the other body.

As many of my colleagues know, this bill is dramatic proof that legislation is indeed the art of compromise. Every group affected by the bill has had to make some concessions, and I think the bill is stronger because of that.

I also want to pay homage to several of my colleagues for their efforts on this bill. Senator FORD was instrumental in pressing for a bill that would protect the interests of public safety employees. Senators BRADLEY and NICKLES also played key roles in working out a compromise on the public safety issue. Senators HATCH and QUAYLE helped develop a compromise that would address tenured faculty. Senators SIMON, PELL, and DODD also were active on that issue. And Senator HEINZ, who participated on all fronts, helped pull together the entire package.

Finally, the staffs of all these Senators, as well as my own staff, are to be congratulated for their negotiating skills, their patience, and their perseverance. Special thanks are due to James Brudney of my office; to Stephen McConnell and Terri Parker with Senator HEINZ; to Kennie Gill with Senator FORD; to Ken Apfel with Senator BRADLEY; and to Richard Lawson with Senator NICKLES.

Mr. FORD. Mr. President, I am most pleased that the Senate is taking action today to pass these important changes in the Age Discrimination In Employment Act. This compromise provides for the lifting of the age cap, while providing an important exemption for State and local police and firefighters and tenured faculty. I am pleased to have been a part of the negotiations on this bill which have allowed it to finally move forward.

I commend my colleagues who have been a part of this process for their work. I would like to particularly thank Senator BRADLEY, who shared my concerns about the need for relief for State and local safety and health personnel, and Senator NICKLES, chairman of the Labor Subcommittee with jurisdiction over this issue, who held hearings on this issue at my request earlier this year and who has worked very closely with the Fraternal Order of Police to bring this compromise about. Additionally, I would like to thank my colleagues who have been involved in reaching this compromise, including Senators HEINZ, METZENBAUM, KENNEDY, HATCH, HELMS, and QUAYLE, and their staff, for their willingness to keep this issue alive so we could take action this Congress.

I have always been a strong supporter of the ADEA. I supported raising the cap from 65 to 70, and I support this move to eliminate the cap entirely. It is past time that Congress recognize the important contribution older workers can make to the economic base of this Nation. We cannot afford to prematurely shelve the talents of many of our older workers by subjecting them to mandatory retirement. The legislation we are adopting today ensures that we do not lose one of the most valuable human resources our Nation has—our older workers.

While I completely support lifting the cap, I also recognize that if Congress is to eliminate mandatory retirement, we must also bring some certainty to State and local governments who, because of recent Supreme Court decisions, are unable to structure hiring and retirement requirements for safety personnel and firefighters. This compromise provides for such certainty.

The House passed similar legislation on September 23 by a unanimous vote. The House-passed bill lifts the age cap and provides a permanent exemption for State and local police, firefighters and penal institution employees, the so-called Murphy amendment, and a study by the EEOC to be followed by proposals on the availability of fitness tests to adequately measure ability and competency of these safety exployees. This exemption was adopted by the House by almost a 3-to-1 vote.

When the bill came over to the Senate, concerns were raised about the potential scope of the Murphy amendment. It became apparent that those of us who felt strongly that we should end discrimination against our older workers once and for all, but should also address the concerns of our State and local governments had a great deal of work to do in the few remaining days of the session. We began negotiations with the clock running, but with a firm resolve to achieve a compromise which would allow the cap to be lifted and provide a realistic exemption for State and local government safety and health personnel. The compromise we have before us today achieves these goals. It is supported by the American Association of Retired Persons, the International Association of Chiefs of Police, the Fraternal Order of Police, the International Association of Fire Fighters, the International Union of Police Associations, the National Governors Association, the National League of Cities, and the National Association of Counties.

The compromise reached on the State and local police and firefighter issue is a fair one. This exemption will allow State and local governments to set hiring and retirement requirements for these safety and health personnel according to their specific needs. The compromise provides a 7-year exemption, which expires at the end of 1993, for State and local police, firefighters, and prison guards. This compromise allows State and local governments to set hiring and retirement ages for these workers, provided such a plan is not a subterfuge to evade the purposes of the ADEA. It is important to note that it was not the intention of those negotiating this provision that such a plan be either a specific legislative enactment or a detailed written plan, but that it be a bona fide hiring or retirement plan which was established for legitimate governmental reasons and not merely as a way to evade the purposes of the ADEA.

A further component of this compromise establishes a floor for the hiring and retirement requirements which a State or local government can set. The hiring and retirement age requirements of a plan in effect as of March 3, 1983 become the floor for allowable plans. This is the date that the EEOC versus Wyoming case was decided. If jurisdictions have raised or eliminated mandatory retirement ages after this date, they have the choice of either moving back to the plan requirements in effect on March 3, 1983, or remaining where they are. However, State and local governments would not be able to lower retirement age requirements below what was in effect as of March 3, 1983. The purpose of this provision is to provide relief to those jurisdictions which were forced to respond to the Wyoming case, while at the same time ensuring that no lesser discrimination protection will be provided for these workers than what was in effect at the time the Wyoming case was decided.

I have long maintained that elected State and local officials are in the best position to determine the public safety needs of their constituencies. I do not believe that these elected officials fashion hiring and retirement policies to purposely evade the requirements of the ADEA. Our elected counterparts in State and local governments are no less committed to eliminating age discrimination than are Members of this Congress, and I do not believe that they will use this exemption to arbitrarily discriminate against older workers. The requirement that hiring and retirement ages be based on a bona fide plan also ensures that such discrimination will not occur.

The compromise on State and local safety and health personnel also modifies language in the House-passed bill which requires a study of this issue and proposed guidelines by the EEOC on the administration and use of fitness tests for these workers. The compromise provides for a 4-year study by the EEOC and the Secretary of Labor to determine whether physical and mental fitness tests can measure the ability of police officers and firefighters to do their job, and to make recommendations with respect to standards

which should be applied to such tests. The purpose of this provision is to try to establish a workable alternative to the current maze of litigation and conflicting court decisions on the issue of testing that have plagued our State and local governments since the Supreme Court reached its decision in 1983 in the case of EEOC versus Wyoming. Following this study, not later than 5 years after the enactment of this act, the EEOC is required to propose these guidelines.

An important modification which we included in the compromise is a requirement that the EEOC and the Secretary of Labor consult with various affected groups during the course of the study and prior to the development of recommendations. Those of us who support an exemption for these State and local safety and health personnel were concerned that the EEOC study would end up being either a restatement of current law or would totally ignore the practical aspects and needs of law enforcement management in general. I am therefore pleased that we were able to include in this compromise a requirement that the EEOC and the Secretary of Labor consult with groups and independent agencies which are affected by this exemption. In particular, the U.S. Fire Administration and the Federal Emergency Management Agency must be consulted. Additionally, organizations representing law enforcement officers and firefighters, and their employers, must also be a part of the study. To ensure a balanced study, groups representing older Americans will also be consulted.

While it is left to EEOC and the Secretary to determine which such groups will be contacted, there were several organizations which were intimately involved in reaching this compromise and would be appropriately consulted with, including the National Association of Fire Fighters, the International Association of Chiefs of Police and the State and Provisional Division of IACP, the Fraternal Order of Police and the International Union of Police Associations. Employers of these groups which would be appropriately consulted with should include representatives of State and local governments, including the National Association of Counties, the National League of Cities, and the National Governors Association. This list does not represent all such groups that are affected by this exemption, but provides a guideline of those organizations that were involved in these negotiations on the safety and health personnel exemption. Those of us who have been involved in these negotiations will be closely watching the progress of this study to ensure that all concerns are adequately represented.

The need for an exemption for State and local safety health personnel first came to my attention in 1983 following the Wyoming decision when former Kentucky Governor John Y. Brown, Jr., requested my assistance in obtaining relief for the State Police. Governor Martha Layne Collins reiterated that request in 1984 and I introduced legislation in the 98th Congress designed to bring relief to this group. No action was taken on that bill and at the beginning of the 99th Congress I reintroduced the legislation. Chairman NICKLES agreed to hold hearings on my proposal, and those of Senator BRADLEY and Senator QUAYLE, in March of this year. The testimony at that hearing showed a clear need for some type of exemption for State and local safety and health personnel.

I was pleased when the House then voted to include the Murphy amendment in H.R. 4154, legislation which lifts the age cap under the ADEA. While I strongly support lifting the age cap, I would not be able to support such a move without some type of exemption for State and local police and firefighters. The compromise we are adopting today satisfies my concerns and provides a realistic approach to such relief.

I commend my colleagues for allowing this measure to pass. It is my understanding that the House is prepared to accept our compromise and I encourage the House to move promptly to pass this measure and send it to the President for his signature.

Mr. BRADLEY. Mr. President, I rise as a cosponsor of this compromise package to eliminate the mandatory retirement cap and to exempt public safety officers from the Age Discrimination in Employment Act.

Mr. President, last year I introduced S. 698, which amends the Age Discrimination in Employment Act to allow States and municipalities the flexibility to determine entry and retirement ages for their public safety officers and firefighters. The amendment before us provides this exemption for the next 7 years and establishes a comprehensive study to help us determine what permanent Federal policy should be in this area.

Mr. President, Congress has already exempted from ADEA certain classes of Federal Government workers who regularly face unique mental and physical demands. Since 1974, Federal firefighters and law enforcement officers, including members of the FBI, secret service and Federal prisons, must retire at age 55. This amendment extends the exemption for the next 7 years to States and municipalities to allow them to determine retirement and entry ages for their own public safety officers and firefighters, just as Congress has done for similarly situated Federal employees.

The Supreme Court had held in EEOC against Wyoming that the Age Discrimination in Employment Act covers States and political subdivisions. Based on this decision, the laws of States and local governments which set retirement ages of less than 70 for public safety officers and firefighters have been invalidated. Needless to say, the Supreme Court decision has caused disarray in many State and local jurisdictions.

This issue was brought to my attention 2 years ago by the Governor of New Jersey and the head of the New Jersey State Police, Colonel Clinton L. Pagano. In addition to their support, the National Governors Association, National Association of Attorneys General, the Fraternal Order of Police, the International Association of Chiefs of Police, the National Troopers Coalition, the Firefighters and numerous other public safety organizations have passed resolutions calling on Congress to exempt certain public safety officers from the ADEA.

Mr. President, I am a strong proponent of the Age Discrimination in Employment Act. This exemption should not be construed as an invitation to start eroding those protections. But older Americans have as much reason as anyone to insure that those who perform emergency services are physically able to do so. Congress has already determined that age is a significant factor in job performance for a very select group of occupations to be exempted. This compromise package merely offers State and local governments the option to exempt these same occupations regardless of whether the person works for the Federal Government or a State or local government. I urge my colleagues to support this compromise package.

Mr. KENNEDY. Mr. President, it is with great pride that I join my colleagues in support of the Age Discrimination in Employment Amendments of 1986. This legislation passed the House last month by a vote of 394–0. That margin of victory is a much deserved tribute to the bill's author, the distinguished chairman of the House Rules Committee, Mr. CLAUDE PEPPER.

This legislation also serves as a tribute to our Nation's senior citizens. Today we recognize the outstanding accomplishments, in every field of endeavor, of this vital segment of our work force. Today we say as a nation that age alone is not the measure of a worker's worth, and that discrimination based on age is as invidious as that based on race, or sex, or national origin. Today we make these truths the law of our land.

We know too well from our experience as a nation that biases are often difficult to overcome. Age bias is no different from other biases, but now the time has come for mandatory retirement of mandatory retirement. Nineteen years ago Congress first passed the Age Discrimination in Em-

ployment Act, prohibiting age discrimination against employees between the ages of 40 and 65. Eight years ago we raised the age cap from 65 to 70. Today we take the next logical step, and remove that cap entirely.

George Bernard Shaw once said: "Some people are old at 17; others are young at 70." We only have to look around us to see just how true that is. We have a President, distinguished colleagues in the House of Representatives and distinguished colleagues here in the Senate who are making enormous contributions on a daily basis running this country, well past the age of 70. Yet under current law in other occupations, these same active and energetic men and women might be forcibly retired. The Nation would be worse off without their contributions, just as it is worse off without the contributions of the hundreds of thousands of workers who are forced into premature retirement under current law.

At the turn of this century, only 5 percent of our population was over 65 years of age. Today, 11 percent are over 65, and in 50 years it is projected that over 20 percent of our population will be over 65. As a nation we cannot afford to squander the talent, energy, and contribution of our fastest growing age group. We must not permit mandatory retirement to rob those seniors of their dignity, their self-esteem, and their opportunity to work.

I commend the managers of this bill and all the Senators whose cooperation was necessary so that the Senate could join the House and pass this important legislation in the last days of this Congress.

Mr. GRASSLEY. Mr. President, I rise in support of H.R. 4154, a bill to abolish mandatory retirement and other forms of age discrimination in employment. I have supported the elimination of mandatory retirement since my days as a Member of the House of Representatives. I have been privileged to support the efforts of the distinguished Senator from Pennsylvania [Senator HEINZ] and Representative PEPPER to remove the age 70 cap on the Age Discrimination in Employment Act. Both of these gentlemen, and others, deserve a great deal of credit for clearing the way for the consideration of the measure before the Senate today.

The Age Discrimination in Employment Act [ADEA] protects individuals between the ages of 40 and 70 from age discrimination in the workplace. The ADEA prohibits employers from discriminating because of age in such matters as hiring, job retention, compensation, and other terms, conditions, and privileges of employment. I was a Member of the House of Representatives in 1977, when Congress raised the age cap on the ADEA from 65 to 70. I supported that effort, although I did not think it went far enough. I am pleased that we are here today to completely remove the age cap on the ADEA.

There are compelling public policy reasons for eliminating mandatory retirement and encouraging persons to remain in the work force longer. Demographers tell us that the population of the United States is growing older. This is also true in the workplace, where the "baby boom" cohort is growing older while the number of younger people entering the work force is declining. We therefore need to change public policies that discourage people from working beyond what we have considered in the past to be the normal retirement age. Of course, it goes without saying that the longer a person works, the less the drain on Social Security and private pension funds. In some cases, individuals may need to work because their economic situations dictate that they need the income from a job.

There is more than enough empirical evidence to demonstrate that old age does not necessarily mean a decline in a person's ability to work. That myth has been exploded, and it is time for the law of the land to conform to reality. In the vast majority of jobs, older workers can compete on an equal footing with younger workers. Rather than choosing some arbitrary age where we say the law against age discrimination in the workplace no longer applies, with the passage of this bill we are saying that if a person can do a job, he has a right to continue to work for as long as he wants to.

As far as I am concerned, the real issue with regard to mandatory retirement is whether we should consider older persons as individuals or as part of a group. I believe strongly that we ought to consider people as individuals. We ought not to judge people, in the workplace or anywhere else, on the basis of whether they are black or white, male or female, old or young. That is why I reject the idea that just because someone has arrived at a certain age he or she ought to be "turned out to pasture." And that is why I support the measure before the Senate.

Mrs. HAWKINS. Mr. President, I applaud the Senate's efforts to focus national attention on the shortcomings of our present national policies with respect to mandatory retirement and I rise in support of legislation which will ensure that our senior citizens are allowed to work as long as they please.

My home State of Florida boasts the largest number of elderly citizens per capita. And I am well aware that those who are productively busy—whether in the work force or in volunteer service—make a tremendous contribution not only to themselves but also to their community.

It has been said that a mind is a terrible thing to waste. And truly this axiom can be applied to our Nation's senior citizens. We so often forget that with the graying hair and the aging joints come decades of experience—learning—and wisdom. Many of these citizens have lived through the Depression. Many have seen the world wars. And are now holding great-grand-children—after raising families of their own. All of us would benefit to sit at their feet and listen.

I was pleased to see that the Department of Labor released statistics verifying that the retention of qualified senior citizens in our work force would not have an adverse effect upon other segments seeking employment. Within the beltway, it is always gratifying to see common sense supported by statistics.

Mr. President, too often we have heard with respect to our Nation's elderly that you can't teach an old dog new tricks. Well, this Senator doesn't think that it is plausible to compare aging dogs and our grandparents. With current job training programs and a variety of social services already in place, there is no reason why our senior citizens cannot receive up-to-date skills.

I wholeheartedly support this legislation which will ensure equal employment opportunities for our Nation's elderly and I urge my colleagues to join me to this end.

Mr. HATCH. Mr. President, I am pleased that an agreement has been reached which will allow the Senate to act favorably on legislation to upcap the Age Discrimination in Employment Act. I have supported this goal for many years, because I believe that individuals should be judged based on their abilities and not on arbitrary factors such as age.

Our Nation counts among its work force many valuable, experienced workers who are approaching age 70 and who may choose to continue working. We can ill afford to sacrifice arbitrarily the skill and dedication of these workers simply because they have reached an age threshold, especially at a time when many industries are facing skilled labor shortages.

This bill contains an effective compromise involving public safety officers and tenured university faculty. The measure exempts police and firefighters as well as tenured faculty for a 7-year period and mandates a comprehensive study on the consequences of eliminating an age cap for these occupational classifications. I, for one, will review this report with great interest. It will help determine whether further amendments will be necessary in order to maintain the delicate balance between the right of every individual to be judged on the basis of his or her skill and experience and the interests of the general public.

I believe the bill before the Senate today adequately addresses the legitimate concerns of all the groups and organizations which participated in the hearings and deliberations on this issue, particularly public employers and the academic community. I hope that my colleagues will join me in supporting this compromise and vote in favor of this long-overdue reform of the Age Discrimination in Employment Act.

Mr. MOYNIHAN. Mr. President, I rise to support H.R. 4154, the Age Discrimination in Employment Amendments of 1986. This bill removes the specific mandatory retirement age of 70 for non-Federal employees, established by the Age Discrimination in Employment Amendments of 1978. This bill will allow the 78,000 Americans over 70 who are still working to continue to do so—and it will permit the 177,000 Americans between 65 to 70, who are still working—but might have had to retire in the next 5 years—to do so as well. For as long as they are able and so desire.

I must note, however, that I am troubled by the application of this change to the unique situation of tenured faculty members at colleges and universities. In order for these institutions to remain effective centers of teaching and scholarship, they must have a balance of old and new faculty. Hence, universities must ensure that older faculty members retire at an appropriate age, not simply to "make room" for younger faculty, but to maintain a contemporary, innovative and creative atmosphere where students can obtain the fullest education.

Unfortunately, I am not at all certain that this bill adequately takes into account the history of academia since the late 1950's. As a result of vast expansion in the number of individuals pursuing careers in academia at this time, there is now a bulge of faculty members who will not be retiring before the end of this century—even if they retire at the current mandatory age of 70.

This is certainly not to criticize in any way these undoubtedly qualified faculty members. But there does appear to be a severe shortage of teaching positions available for today's scholars. And the situation at this time is such that most new faculty openings occur as a result of retirement. We should be very careful, I think, about eliminating the retirement age altogether, unless we can be sure that this Nation's education will not suffer as a result.

Therefore, I note that the legislation before us today provides a temporary exemption, for 7 years, for tenured faculty from the provisions of this bill. In other words, tenured faculty or the equivalent, will still have to retire at 70 for the next 7 years. I would have perferred an even longer period—12 or 15 years—but note that the House inexplicably chose not to provide any exemption.

Importantly, during this 7-year period, the bill calls upon the National Academy of Sciences to appoint—within a year of enactment—a nine-member Commission to study the impact of removing the mandatory retirement age on colleges and universities. This study will be due in 5 years, allowing the Congress to adequately review the effects of this bill on academic communities, and make the appropriate changes in order to protect the vital national resource embodied in education.

Mr. HELMS. I am primarily concerned about two aspects of this bill—the effect it will have on our State and local police and firefighters and the effect it will have on small business. When the bill passed the House, it contained a permanent exemption for law enforcement personnel and firefighters. Is the Senator from Kentucky satisfied that the compromise he has reached will give our law enforcement officers and firefighters sufficient leeway to establish acceptable retirement policies?

Mr. FORD. Let me assure my good colleague from North Carolina that I firmly believe the compromise before us is a good one and is the best possible solution under the circumstances. While I would have preferred the Murphy language, there were some legitimate problems with its scope that came to our attention after the House bill passed. This compromise is supported by the major police and firefighting groups and the organizations representing State and local governments. As with any compromise, it is no one's perfect answer. I am confident that we have provided the necessary relief for our public safety and health personnel and a reasonable amount of time to completely study this issue.

The compromise provides for a 7-year exemption which will allow State and local governments the ability to set hiring and retirement plans suited to their individual needs. At the same time, we provide for a study of whether physical and mental fitness tests can measure the ability and competency of these workers. During this study, representatives of police and firefighting groups will be consulted, as well as their employers, which includes State and local governments.

There is a very strong need for this exemption at this time. As of March of this year 33 States or localities were facing litigation by the EEOC on this issue. Numerous other private suits have also been filed, threatening fiscally pressed State and local governments with potential added litigation costs. There is no uniformity in this litigation and much uncertainty of how a bona fide occupational qualification [BFOQ] defense will be treated.

I commend my colleague for raising these issues and appreciate his willingness to let this compromise move forward. Our State and local governments desperately need this relief.

Mr. HELMS. I thank my good friend from Kentucky. I am also concerned about the potential increase in litigation and litigation costs for small businesses. Has the Senator from Pennsylvania taken that potential problem into consideration?

Mr. HEINZ. Yes, I have. We are fortunate to have several excellent examples of situations where raising the age cap has made no significant change in the number of age discrimination cases. Since 1978 when the cap was lifted for Federal workers from age 65 to age 70, there has been no appreciable increase in the number of Federal complaints, according to the National Senior Citizens Law Center.

We have also looked at the experience of two States which have large elderly populations, California and Florida, and which have outlawed mandatory retirement. There is no evidence in these States of an increase in age discrimination lawsuits. In California, in 1984, of the 1,400 age complaints filed, 28 complaints or a mere 2 percent were filed by persons 69 years of age or older. Data from Florida in 1985 suggests a similar trend. Of the 756 age discrimination in employment cases filed, only two charges were made by individuals over age 70. These examples bolster the information collected by the EEOC in 1981, which revealed that of the total charges filed—9,100—only 22 percent were filed by persons 60 and over. The remaining 78 percent were filed by persons 59 and under. In addition a recent Syracuse University study of ADEA litigants, found that 73 percent of plaintiffs were under age 59.

These points lead one to be very confident that this legislation which lifts the mandatory retirement age 70 cap will not significantly increase the number of age discrimination cases filed.

I want to thank my distinguished colleague from North Carolina for his interest and cooperation in this matter and I hope that my responses to his questions have been helpful.

Mr. HELMS. I thank my distinguished colleagues for their straightfoward responses. I commend them for the tremendous work they have done on this issue, and I especially appreciate the efforts they have made to allay my concerns. Mr. President, I have no objection.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and the bill to be read a third time. The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 4154) was passed.

Mr. SIMPSON. I move to reconsider the vote by which the bill passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RELIEF OF AUDREY O. LEWIS AND EMERSON B. VEREEN

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 1010, for the relief of Audrey O. Lewis and Emerson B. Vereen, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1010) for the relief of Audrey O. Lewis and Emerson B. Vereen.

AMENDMENT NO. 3485

(Purpose: To reduce certain awards.)

Mr. SIMPSON. I send an amendment to the desk on behalf of Senator THURMOND and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] for Mr. THURMOND, proposes an amendment numbered 3485.

On page 1, line 6, strike out "$140,500" and insert in lieu thereof "$70,250".

On page 1, line 8, strike out "$43,750" and insert in lieu thereof "$18,275".

On page 2, line 23, strike out "$9,100" and insert in lieu thereof "$4,550".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3485) was agreed to.

The PRESIDING OFFICER. Are there further amendments? If there be no further amendment, the question is on the engrossment and third reading of the bill.

The amendment was ordered to be engrossed for a third reading and read the third time.

The bill was read the third time and passed.

Mr. SIMPSON. I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL PLACED ON CALENDAR—H.R. 2652

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 2652, a bill for the relief of Kumari Rajlakshmi Bais, and that it be placed on the Senate Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF UNITED WAY'S 100TH ANNIVERSARY

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 684, calling for recognition of the United Way's 100th anniversary, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the resolution will be stated by title.

The assistant legislative clerk read as follows:

A House joint resolution (H.J. Res. 684) calling for recognition of United Way's one hundredth anniversary.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. DOLE. Mr. President, this year, the United Way, an organization known for its outstanding volunteer work will be celebrating its 100th anniversary. Today, along with many of my colleagues, I am introducing this resolution to commemorate the United Way's centennial, as well as its many superlative achievements.

CENTENNIAL CELEBRATION

Over 2,200 United Ways across America have been established in its 100-year existence. These offices have been helping individual communities provide for critical health and human care needs. In addition to direct services, the United Way has also contributed to, and supported, over 37,000 different groups and programs through a vast network of local charitable groups and volunteers. As a result of this comprehensive involvement in the needs of communities throughout this country, the effects of the United Way's activities can be felt in all parts of this Nation.

SECOND CENTURY CHALLENGES

The United Way's second century promises to be more successful than its first, as it challenges itself to look forward beyond its past accomplishments toward the new challenges and opportunities that lie ahead. As Members of Congress, we should applaud the United Way's efforts and congratulate the attempts of its dedicated workers to reach out and involve new agencies and new people in order to improve the quality of life for all Americans.

With this resolution, the Congress of the United States can encourage the spirit of voluntarism exemplified by this organization and express our gratitude to the United Way on a very outstanding 100 years of community service.

Mr. D'AMATO. Mr. President, I rise today to express my support as an original cosponsor of a joint resolution being introduced by the distinguished majority leader, Senator DOLE. The purpose of this resolution is to express congressional admiration of the United Way of America on the occasion of its 100th anniversary.

One of the most important concerns facing the strength and durability of our Nation as a people, is the stability of American family and community life. It is important, therefore, that, as we offer our thanks and appreciation to the United Way, Americans rededicate themselves to the basic values of family and community upon which our great Nation was founded. The United Way long has promoted these values.

Established in 1918 as the Community Chests and Councils of America, the United Way, since its inception, has operated with a stated mission: to increase the organized capacity of people to care for one another. The United Way is primarily made up of volunteers who support a broad range of human-care programs and service organizations in their local community. Through its nationwide organization the United Way raises funds, mainly through the workplace, that are distributed among a broad range of services to the surrounding community.

Beyond this invaluable fundraising capacity, the United Way's strong community presence long has served as a focal point in pulling together key business, political, and religious leaders to address critical problems affecting the country as a whole. On issues such as teenage pregnancy, drug abuse, shelters for the homeless, and hunger, the United Way has long been a leader in addressing the problems at hand and seeing that coordinated action is taken to address these problems.

Providing assistance to more than 37,000 human-care-related organizations throughout the United States, the United Way represents the best of America's volunteer and charitable spirit. In light of the increasing budgetary constraints that we face as a nation, however, it is going to become even more important to have a strong United Way acting to support the many essential human care organiza-

tions that exist in every community in this Nation.

It is for all of these reasons, Mr. President, that I salute the more than 2,200 United Ways operating throughout America and the individuals and organizations that support them. The United Way is a unique organization and deserves the vigorous support of every Member of this body, the House of Representatives, and, indeed, the Nation.

Thank you, Mr. President.

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 684) was ordered to a third reading, read the third time, and passed.

Mr. SIMPSON. I move to reconsider the vote by which the joint resolution was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

□ 0240

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate companion bill introduced by Senator DOLE be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSFER TO COMPETITIVE SERVICE

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of H.R. 5218 dealing with competitive status and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5218) to amend title 5, United States Code, to provide that certain individuals be accorded competitive status for purposes of transferring to the competitive service.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5218) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

TEXAS WILDERNESS ACT AMENDMENTS OF 1986

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be discharged from further consideration of H.R. 4685, the Texas Wilderness Act Amendments of 1986, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 4685) to adjust the boundaries of areas of the National Wilderness Preservation System in the State of Texas.

The Senate proceeded to consider the bill.

AMENDMENT NO. 3486

The PRESIDING OFFICER. Are there amendments?

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator HELMS.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. HELMS, proposes an amendment numbered 3486.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 10, strike out "June" and insert in lieu thereof "October".

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute.

The amendment (No. 3486) was agreed to.

Mr. BENTSEN. Mr. President, I thank the distinguished chairman of the Agriculture Committee [Mr. HELMS] for his assistance in arranging for consideration and passage of this bill.

The Texas wilderness bill, which I introduced together with Congressman CHARLIE WILSON of Texas will make some needed adjustments in the boundaries of the wilderness areas in Texas. The suggested changes would even out jagged boundaries and move those boundaries to make them more easily marked and recognizable. The bill would also provide additional acreage to the east Texas wilderness areas of Upland Island, Big Slough, Turkey Hill, Indian Mounds, and Little Lake Creek.

In 1984, I introduced and helped pass the legislation to establish these wilderness areas. The original measure designated 34,000 acres of Federal land as components of the National Wilderness Preservation System. This insured the continued protection of these unique ecosystems, assuring that they would remain unspoiled for the enjoyment of future generations.

The alterations originally proposed in this bill would have added a total of 1,770 acres to these areas; 1,080 of these acres would come from existing U.S. Forest Service lands, and 690 acres from the acquisition of private lands, but only from willing sellers. The private landowners would have been compensated through exchange of U.S. forest lands of comparable value, so there would have been no Treasury outlays.

Objections have been raised to certain parts of this bill, and I am pleased to report that an accommodation has been reached which is agreeable to all parties concerned. This compromise would entail deleting the 690 acres of private lands from the bill, leaving only the boundary adjustments involving Federal lands. These remaining adjustments will still improve the existing wilderness areas from both an environmental and managerial standpoint.

Mr. President, in the national forest units in Texas the surface of the land is owned by the Federal Government, but in many cases the mineral rights are in private ownership. The law originally establishing these wilderness areas recognized and preserved the right of access of the mineral owners.

It was my intent in introducing this legislation that the rights of the private mineral owners would be preserved. If I might ask a question of the chairman of the Agriculture Committee, has any change been made through this legislation which would change that right of access from that which now exists for these Texas wilderness areas?

Mr. HELMS. Mr. President, if I might respond briefly to my colleague from Texas, it is my understanding that this bill makes no change in the treatment of private mineral owners or any rights of access to minerals underneath units of the National Wilderness Preservation System in Texas. It merely revises the boundaries of these units somewhat, in the process bringing in some small additional acreage which is already under Federal ownership.

Mr. BENTSEN. I thank the distinguished chairman of the Agriculture Committee. It is my understanding that this bill as amended is acceptable to all the other parties involved in this legislation, and I urge the adoption of the bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

PUBLIC LAW 99-396 AMENDMENT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Committee on Energy be discharged from further consideration of S. 2921, the Omnibus Territories bill, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2921) to amend the Public Law 99-396 exception to the Balanced Budget and Emergency Deficit Control Act of 1985, and for other purposes.

The Senate proceeded to consider the bill.

AMENDMENT NO. 3487

The PRESIDING OFFICER. Are there amendments?

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator McCLURE in the nature of a substitute.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. McCLURE, proposes an amendment numbered 3487.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

"Section 19 (b) of Public Law 99-396 (100 Stat. 837, 844) is amended by:

"1) inserting 'section 30 of' immediately before 'the Organic Act of Guam';

"2) inserting 'section 3 of' immediately before 'the Joint Resolution to approve';

"3) inserting 'section 4 of the Act of April 12, 1900 (31 Stat. 78, 48 U.S.C. 740), as amended, and section 9 of the Act of March 2, 1917 (39 Stat. 954, 48 U.S.C. 734), as amended, which became a part of' immediately before 'The Puerto Rican';

"4) inserting 'section 28 (a) and (b) of' immediately before 'the Revised Organic'; and

"5) inserting 'section 4(c)(2) of' immediately before 'an Act to authorize'."

Mr. McCLURE. Mr. President, this legislation was transmitted by the administration last week to make certain technical amendments to section 19 of the omnibus territories measure, Public Law 99-396, which was enacted earlier this year. Although the administration had seen the language of section 19 prior to its passage by the Congress, after it had been sent to the President and Congress had recessed, questions were raised regarding the interpretation of the language. Without going through the episode in detail, I do want to express my appreciation to Pam Turner who alerted us to the problem and the general counsel's office at OMB which helped resolve the matter. The President agreed to sign the measure and we agreed to make the necessary technical corrections as soon as possible. I ask unanimous consent that a copy of a letter which Senator JOHNSTON and I sent to the President be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. McCLURE. The amendment in the nature of a substitute reflects further discussions with the Department of the Interior and it fully conforms with the intent to resolve this technical problem as had been agreed to by myself, Senator JOHNSTON and the administration. I urge adoption of the amendment and passage of S. 2921, as amended.

Mr. JOHNSTON. I would like to join with Senator McCLURE in urging passage of this legislation, as amended. The bill will resolve a technical problem in the Omnibus territories legislation which was passed earlier this year. The substitute amendment is consistent with the intent of the original language of section 19 of the Omnibus Territories bill; language which had been cleared by OMB, the Department of the Interior and the Budget Committee and I understand that this language has been cleared by all concerned.

EXHIBIT 1

U.S. SENATE,
COMMITTEE ON ENERGY
AND NATURAL RESOURCES,
WASHINGTON, DC, AUGUST 27, 1986.

The PRESIDENT,
The White House
Washington, DC.

DEAR MR. PRESIDENT: We are writing with respect to H.R. 2478, the omnibus territories measure. Subsequent to final Congressional action and the adjournment of the Congress, the Committee was informed that the Administration was considering a veto of the measure as a result of a possible interpretation by the Department of Justice of certain language in section 19 of the bill. The Department apparently believes that the reference to the 1978 Omnibus Territories Act contained in section 19 could be interpreted to include any appropriations made pursuant to that Act.

The language of section 19, however, does not mention either authorizations or appropriations pursuant to the 1978 Act. Section 19 addresses only amounts "covered into the treasuries of said islands or paid pursuant to said laws". Sections 1(c) and 4(c) of the 1978 Act deal with the timing of payments to Guam and the Virgin Islands and are the only provisions of that Act which form the basis for such payments. All other grants or transfers are mere authorizations and require the enactment of an appropriation. There is no reference to any appropriation in sectic
the De
strain
decisions with respect to the distinction between authorizations and appropriations.

The Committee staff have reviewed the issue, and it remains our view, as well as that of the Budget Committees which approved the language, that the interpretation offered by the agencies is completely contrary to the legislative history, the clear meaning of the statutory language, and principles of statutory construction.

It remains our view, as expressed in the explanation of the legislation during Senate consideration on August 9, 1986, that section 19 applies only to the section 30 funds for Guam, those funds covered over to Puerto Rico under the Federal Relations and Foraker Acts, the section 28(b) funds for the Virgin Islands, and those funds for the Northern Mariana Islands which are backed by a pledge of the Full Faith and Credit of the United States. As OMB Director Miller testified before the Budget Committee, these funds "appear in the Federal budget as an incidental matter for convenience of administration rather than as a means of resource allocation." Section 19 was drafted and approved by the Budget Committee to address those and only those accounts.

Accordingly, we urge you to sign H.R. 2478. If the Administration continues to believe that a clarification of section 19 is necessary, we would be happy to work with you to secure the prompt enactment of such amendments to section 19 which you request and which are consistent with the intent of H.R. 2478.

Sincerely,

J. BENNETT JOHNSTON,
Ranking Minority.
JAMES A. McCLURE,
Chairman.

The PRESIDING OFFICER. Are there amendments to the substitute? If not, the question is on agreeing to the amendment in the nature of a substitute.

The amendment (No. 3487) was agreed to.

The bill was ordered to be engrossed for a third time, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

INDIANA DUNES NATIONAL LAKESHORE

Mr. SIMPSON. Mr. President, I ask unanimous consent the Energy Committee be discharged from further consideration of H.R. 4037, the Indiana Dunes bill and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read the bill as follows:

A bill (H.R. 4037) relating to the Indiana Dunes National Lake Shore, and for other purposes.

The Senate proceeded to consider the bill.

AMENDMENT NO. 3488

an amendment to the desk on behalf of Senators QUAYLE and LUGAR in the nature of a substitute.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wyoming (Mr. SIMPSON) on behalf of Mr. QUAYLE and Mr. LUGAR, proposes an amendment numbered 3488.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert:

SECTION 1. INDIANA DUNES NATIONAL LAKESHORE.

(a) BOUNDARY CHANGES.—The first section of the Act entitled "An Act to provide for the establishment of the Indiana Dunes National Lakeshore, and for other purposes", approved November 5, 1966 (16 U.S.C. 460u), is amended by striking out "December 1980, and bearing the number 626-91014" and inserting in lieu thereof "October 1986, and numbered 626-80,033-B".

(b) DEFINITION OF IMPROVED PROPERTY.—Section 4 of such Act is amended by striking out the first sentence and substituting "As used in this Act, the term 'improved property' means a detached, one-family dwelling which meets each of the following criteria:

"(1) The construction of the dwelling began before the date (shown in the table contained in this section) corresponding to the appropriate map.

"(2) The property is located within the boundaries delineated on the map described in such table which corresponds to such date.

"(3) The property is not located within the boundaries of any other map referred to in such table which bears an earlier date.

The term 'appropriate map', means a map identified as 'Boundary Map—Indiana Dunes National Lakeshore' (for 'A Proposed Indiana Dunes National Lakeshore' in the case of a dwelling the construction of which was begun before January 4, 1965) which is dated and numbered as provided in the following table:

Property within boundaries of map	Construction began before
Dated October 1986, #626-80,033-B.	February 1, 1986
Dated December 1980, #626-91014.	January 1, 1981
Dated September 1976, #626-91007.	February 1, 1973
Dated September 1966, #LNPNE-1008-ID.	January 4, 1965

The term 'improved property' also includes the lands on which the dwelling is situated which meets both of the following criteria:

"(A) The land is in the same ownership as the dwelling.

"(B) The Secretary has designated the lands as reasonably necessary for the enjoyment of the dwelling for the sole purpose of noncommercial residential use.

Such term also includes any structures accessory to the dwelling which are situated on the lands so designated. The maps referred to in this section shall be on file and available for public inspection in the Office of the Director of the National Park Service, Department of the Interior. The Secretary shall designate the land referred to in subparagraph (B).".

(c) RETAINED RIGHTS.—Section 5(a) of such Act (16 U.S.C. 460u-5a) is amended as follows:

(1) Strike out "the first section" and insert in lieu thereof "section 4, dated December 1980, and numbered 626-91014."

(2) Strike out ": *Provided*, That" and substitute a period followed by "In the case of improved property within the boundaries of the map dated December 1980 and numbered 626-91014".

(3) After "(a)" strike "Except for" and insert "(1) Except for owners described in paragraph (2) and".

(4) Strike "(1)" in each place it appears and substitute "(A)" and strike "(2)" and substitute "(B)".

(5) Add the following at the end thereof:

"(2)(A) In the case of property included within the boundaries of the lakeshore after 1980, any owner or owners of record of improved property may retain a right of use and occupancy for noncommercial residential purposes for a term ending at either of the following:

"(i) A fixed term not to extend beyond September 30, 2010, or such lesser fixed term as the owner or owners may elect at the time of acquisition.

"(ii) A term ending at the death of any owner or of a spouse of any owner, whichever occurs last.

The owner shall elect the term to be reserved.

"(B) The retention of rights under subparagraph (A) shall be available only to individuals who are homeowners of record as of July 1, 1986, who have attained the age of majority as of that date and who make a bona fide written offer not later than July 1, 1991, to sell to the Secretary.".

(d) AUTHORIZATION.—Section 9 of such Act (16 U.S.C. 460u-9) is amended as follows:

(1) In the first sentence strike "$11,000,000" and insert in lieu thereof "$20,000,000".

(2) Add after the last paragraph "In addition to any other sums authorized for the acquisition of lands and interests in lands pursuant to the provisions of this Act there are authorized to be appropriated an additional $3,500,000 to be used for such purposes. The Secretary shall conduct a feasibility study of establishing United States Highway 12 as the 'Indiana Dunes Parkway' under the jurisdiction of the National Park Service. The Secretary shall submit the results of such study to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Commerce on Energy and Natural Resources of the United States Senate within two years after the enactment of this sentence.

Effective October 1, 1986, there is authorized to be appropriated such sums as may be necessary for the purposes of conducting the feasibility study.".

(e) EXISTING PROPERTY RIGHTS.—Section 10 of such Act (16 U.S.C. 460u-16) is amended by inserting at the end thereof: "Nothing in this Act shall be construed to diminish the existing property rights of Northern Indiana Public Service Company (as of October 1, 1986) with respect to—

"(1) a parcel of land owned in fee by the Northern Indiana Public Service Company and used for high voltage electrical transmission lines, pipelines, and utility purposes, beginning at said Company's Dune Acres substation and extending east to said Company's Michigan City Generating Station, which parcel by this Act is included within the boundaries of the Indiana Dunes National Lakeshore and herein designated as area II-I on National Park Service Boundary Map No. 626-80,033-B, dated October 1986, excluding that certain parcel of approximately 6.0 acres adjacent Mineral Springs Road in areas II-I, and

(2) land owned in fee by the Northern Indiana Public Service Company and used for high voltage electrical transmission lines, pipelines, and utility purposes as has by this Act been included within the boundaries of the Indiana Dunes National Lakeshore and herein designated as area II-H on said National Park Service Boundary Map No. 626-80,033-B."

(f) OWNER CONSENT REQUIRED.—Section 13 of such Act (16 U.S.C. 460u-13) is amended by changing "SEC. 13." to "SEC. 13. (a)", by striking out "the first section" and inserting in lieu thereof "section 4, dated December 1980 and numbered 626-91014", and by adding a new subsection (b) as follows:

"(b) The Secretary may acquire that portion of area IV-B in private ownership on the map referred to in section 1 of this Act only with the consent of the owner: *Provided*, That the Secretary may acquire an agricultural easement should the owner change the use in existence as of September 19, 1986, through eminent domain.".

(g) MAP REFERENCE.—Section 16 of such Act (16 U.S.C. 460u-16) is amended by inserting at the end of the first sentence "on the map referred to in section 4, dated October 1976, and numbered 626-9100".

(h) RIGHTS-OF-WAY.—Section 15 of such Act is amended by adding the following at the end thereof: "The Secretary may acquire only such interest in the rights-of-way designated 'Crossing B' and 'Crossing C' on the map dated October 1986 and numbered 626-80,033-B as he determines to be necessary to assure public access to the banks of the Little Calumet River and the banks of Salt Creek within fifty feet on either side of the centerline of said river and creek.".

(i) COOPERATIVE AGREEMENT AND STUDY.—Add the following new section at the end of such Act:

"SEC. 24. LITTLE CALUMET RIVER AND BURNS/PORTAGE WATERWAY.

"(a) COOPERATIVE AGREEMENT.—The Secretary may enter into a cooperative agreement with the Little Calumet River Basin Development Commission, the State of Indiana or any political subdivision thereof for the planning, management, and interpretation of recreational facilities on the tract within the boundaries of Indiana Dunes National Lakeshore identified as tract numbered 09-117 or on lands under the jurisdiction of the State of Indiana or political subdivision thereof along the Little Calumet River and Burns Waterway. The cooperative agreement may include provision for the planning of public facilities for boating, canoeing, fishing, hiking, bicycling, and other compatible recreational activities. Any recreational developments on lands under the jurisdiction of the National Park Service

planned pursuant to this cooperative agreement shall be in a manner consistent with the purposes of this Act, including section 6(b).

"(b) STUDY.—The Secretary shall conduct a study regarding the options available for linking the portions of the lakeshore which are divided by the Little Calumet River and Burns/Portage Waterway so as to coordinate the management and recreational use of the lakeshore. The Secretary shall submit the results of the study to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate within two years after the enactment of this section. Effective October 1, 1986, there is authorized to be appropriated such sums as may be necessary for the purposes of conducting the study.".

Mr. LUGAR. Mr. President, I rise in support of this important legislation, which would authorize the acquisition of key land parcels for the Indiana Dunes National Lakeshore.

This substitute amendment to H.R. 4037 would also increase the authorized limit on development projects in the lakeshore from the current level of $11 to $20 million. This would accommodate a prudent portion of the development projects which have been planned for the lakeshore. And this legislation would also require the National Park Service to complete a study of the idea of making all or portions of U.S. 12 within park boundaries a scenic "Indiana Dunes Parkway."

I am impressed by the wide support which this bill enjoys among citizens groups, local officials, and affected industries in Indiana. This legislation is well coordinated with stringent Federal budgetary limitations. These will necessarily require that the land acquisitions and developments that the bill permits will occur over a period of years as Indiana receives its fair share of scarce park funds. This bill will further improve one of our Nation's most heavily used and unique natural parks. It will enhance and lead to better future planning of the lakeshore.

I wish to commend Senator QUAYLE and Congressman VISCLOSKY for their hard work and concerted efforts in fashioning this legislation. I urge its passage by the Senate.

Mr. QUAYLE. Mr. President, before the Senate today is legislation to address the management, development and environmental needs of the Indiana Dunes National Lakeshore.

H.R. 4037 was passed by the House of Representatives and this measure has become a basis for the legislation before the Senate now. I appreciate the support and assistance that I have received from Senator LUGAR, a cosponsor of this substitute. This measure has evolved based in part upon a meeting I conducted in Chesterton, IN, with individuals actively concerned about the Indiana Dunes; and in part upon conversations I have had since that time. I believe the substitute under consideration is a design for the next decade.

This substitute differs from the House bill in a number of respects. First, where the House bill authorizes the acquisition of 853 acres, the Senate proposal increases this figure by approximately 30 acres. This addition conforms with an agreement reached by Bethlehem Steel, environmentalists and Portage Mayor Robert E. Goin to increase the acreage along the Salt Creek corridor. This addition could be used to facilitate access for such recreational activities as fishing and canoeing.

Not all of the acres slated to be included within the boundaries of the lakeshore will be acquired by fee purchase. In the Heron Rookery, for example, the House-passed bill proposes two parcels of property for acquisition, one to the south owned by the State of Indiana and one to the north owned by private landowners. Several of these landowners have expressed reservations about selling their lands and concern over the consequent loss to the local tax base. Because the current owners have no plans to use the land for any purpose but agriculture, one the lakeshore finds consistent with protection of the herons, I believe a trigger mechanism is a more appropriate approach to acquiring this parcel than fee purchase. The Senate substitute provides that the Park Service would be authorized to negotiate for an agricultural easement for this land only in the event a landowner decides not to conduct farming operations on it any longer. Otherwise, landowners could continue their current practice of farming this property, and there would be no loss to the local tax base.

The Senate substitute also includes language clarifying the property rights of the Northern Indiana Public Service Co. (Nipsco) with regard to land to be included within the boundaries of the lakeshore by this legislation. This language is acceptable to both Nipsco and environmentalists. The legislation includes within the boundaries of the lakeshore the Nipsco/South Shore Railroad corridor. Including this corridor within the lakeshore would give the Park Service both management responsibility for trails along this strip and enable the Park Service to coordinate better its development of a system of trails within the dunes.

Finally, this substitute raises the authorization from the current $11 million threshold to $20 million. The existing ceiling has been breached, therefore, it is appropriate to address this matter. I believe that a $20 million authorization ceiling will permit adequate development activities to take place within the lakeshore for the foreseeable future.

There are two issues that the Senate substitute does not address. First, three parcels of land within the city of Gary corporate limits are not included. While I originally proposed these parcels for acquisition because of their environmental significance, particularly the Woodlake Dune Savannah, local concern and opposition by the Gary City Administration that having these parcels within the boundaries of the park would delay or hamper local marina development prevented their inclusion here.

Second, several constituents brought to my attention their concerns over leaseback arrangements held by homeowners within the park boundaries and raised the possibility of lengthening the time when the leases would expire. I certainly understand the attachment of these homeowners to the beauty of the area. This legislation does not address this issue because of the great difficulty in determining an equitable solution. Opposition was raised to this proposal by those who believed that creating a uniform lease termination would further delay the access of the general public to these lands. Considering the need for a consensus package, it was not possible to address this issue in this legislation.

To meet other management needs of the park besides acquisition, this substitute incorporates several features of the House-passed bill. Two studies are to be conducted under this legislation. The first would be a study of the feasibility of establishing portions of U.S. 12 as a scenic parkway. The second study would examine linking the west and east units of the lakeshore. While I certainly believe this needs to be studied, it is my hope the emphasis would be on assessing nonacquisition means of linkage, such as through easements or cooperative agreements, wherever possible.

This legislation also gives the Secretary of the Interior the authority to participate in planning recreational activities along the Little Calumet River and Burns Waterway. This is warranted because any development of recreational facilities outside the park boundaries will have an effect on the number of visitors to the park and the services it provides.

The Indiana Dunes National Lakeshore is an important asset to the northwest Indiana region and to the State as a whole. Already an enhancement to the quality of life in the region, the park can also act as a drawing card for increased economic activity there. I believe this legislation makes improvements to the management, development, and environmental quality of the lakeshore that will carry it forward into the next decade.

The PRESIDING OFFICER. Are there further amendments to the substitute. If not, the question is on

agreeing to the amendment in the nature of a substitute.

The amendment (No. 3488) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed, as follows:

H.R. 4037

SECTION 1. INDIANA DUNES NATIONAL LAKESHORE.

(a) BOUNDARY CHANGES.—The first section of the Act entitled "An Act to provide for the establishment of the Indiana Dunes National Lakeshore, and for other purposes", approved November 5, 1966 (16 U.S.C. 460u), is amended by striking out "December 1980, and bearing the number 626-91014" and inserting in lieu thereof "October 1986, and numbered 626-80,033-B".

(b) DEFINITION OF IMPROVED PROPERTY.—Section 4 of such Act is amended by striking out the first sentence and substituting "As used in this Act, the term 'improved property' means a detached, one-family dwelling which meets each of the following criteria:

"(1) The construction of the dwelling began before the date (shown in the table contained in this section) corresponding to the appropriate map.

"(2) The property is located within the boundaries delineated on the map described in such table which corresponds to such date.

"(3) The property is not located within the boundaries of any other map referred to in such table which bears an earlier date.

The term 'appropriate map', means a map identified as 'Boundary Map—Indiana Dunes National Lakeshore' (or 'A Proposed Indiana Dunes National Lakeshore' in the case of a dwelling the construction of which was begun before January 4, 1965) which is dated and numbered as provided in the following table.

Property Within Boundaries of Map	*Construction Began Before*
Dated October 1986, #626-80,033-B.	*February 1, 1986*
Dated December 1980, #626-91014.	*January 1, 1981*
Dated September 1976, #626-91007.	*February 1, 1973*
Dated September 1966, #LNPNE-1008-ID.	*January 4, 1965*

The term 'improved property' also includes the lands on which the dwelling is situated which meets both of the following criteria:

"(A) The land is in the same ownership as the dwelling.

"(B) The Secretary has designated the lands as reasonably necessary for the enjoyment of the dwelling for the sole purpose of noncommercial residential use.

Such term also includes any structures accessory to the dwelling which are situated on the lands so designated. The maps referred to in this section shall be on file and available for public inspection in the Office of the Director of the National Park Service, Department of the Interior. The Secretary shall designate the land referred to in subparagraph (B).".

(c) RETAINED RIGHTS.—Section 5(a) of such Act (16 U.S.C. 460u-5a) is amended as follows:

(1) Strike out "the first section" and insert in lieu thereof "section 4, dated December 1980, and numbered 626-91014."

(2) Strike out ": Provided, That" and substitute a period followed by "In the case of improved property within the boundaries of the map dated December 1980 and numbered 626-91014".

(3) After "(a)" strike "Except for" and insert "(1) Except for owners described in paragraph (2) and".

(4) Strike "(1)" in each place it appears and substitute "(A)" and strike "(2)" and substitute "(B)".

(5) Add the following at the end thereof:

"(2)(A) In the case of property included within the boundaries of the lakeshore after 1980, any owner or owners of record of improved property may retain a right of use and occupancy for noncommercial residential purposes for a term ending at either of the following:

"(i) A fixed term not to extend beyond September 30, 2010, or such lesser fixed term as the owner or owners may elect at the time of acquisition.

"(ii) A term ending at the death of any owner or of a spouse of any owner, whichever occurs last.

The owner shall elect the term to be reserved.

"(B) The retention of rights under subparagraph (A) shall be available only to individuals who are homeowners of record as of July 1, 1986, who have attained the age of majority as of that date and who make a bona fide written offer not later than July 1, 1991, to sell to the Secretary.".

(d) AUTHORIZATION.—Section 9 of such Act (16 U.S.C. 460u-9) is amended as follows:

(1) In the first sentence strike "$11,000,000" and insert in lieu thereof "$20,000,000".

(2) Add after the last paragraph "In addition to any other sums authorized for the acquisition of lands and interests in lands pursuant to the provisions of this Act there are authorized to be appropriated an additional $3,500,000 to be used for such purposes. The Secretary shall conduct a feasibility study of establishing United States Highway 12 as the 'Indiana Dunes Parkway' under the jurisdiction of the National Park Service. The Secretary shall submit the results of such study to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate within two years after the enactment of this sentence. Effective October 1, 1986, there is authorized to be appropriated such sums as may be necessary for the purposes of conducting the feasibility study.".

(e) EXISTING PROPERTY RIGHTS.—Section 10 of such Act (16 U.S.C. 460u-16) is amended by inserting at the end thereof: "Nothing in this Act shall be construed to diminish the existing property rights of Northern Indiana Public Service Company (as of October 1, 1986) with respect to—

"(1) a parcel of land owned in fee by the Northern Indiana Public Service Company and used for high voltage electrical transmission lines, pipelines, and utility purposes, beginning at said Company's Dune Acres substation and extending east to said Company's Michigan City Generating Station, which parcel by this Act is included within the boundaries of the Indiana Dunes National Lakeshore and herein designated as area II-I on National Park Service Boundary Map No. 626-80,033-B, dated October 1986, excluding that certain parcel of approximately 6.0 acres adjacent Mineral Springs Road in areas II-I, and

(2) land owned in fee by the Northern Indiana Public Service Company and used for high voltage electrical transmission lines, pipelines, and utility purposes as has by this Act been included within the boundaries of the Indiana Dunes National Lakeshore and herein designated as area II-H on said National Park Service Boundary Map No. 626-80,033-B."

(f) OWNER CONSENT REQUIRED.—Section 13 of such Act (16 U.S.C. 460u-13) is amended by changing "SEC. 13." to "SEC. 13. (a)", by striking out "the first section" and inserting in lieu thereof "section 4, dated December 1980 and numbered 626-91014", and by adding a new subsection (b) as follows:

"(b) The Secretary may acquire that portion of area IV-B in private ownership on the map referred to in section 1 of this Act only with the consent of the owner: Provided, That the Secretary may acquire an agricultural easement should the owner change the use in existence as of September 19, 1986, through eminent domain.".

(g) MAP REFERENCE.—Section 16 of such Act (16 U.S.C. 460u-16) is amended by inserting at the end of the first sentence "on the map referred to in section 4, dated October 1976, and numbered 626-9100".

(h) RIGHTS-OF-WAY.—Section 15 of such Act is amended by adding the following at the end thereof: "The Secretary may acquire only such interest in the rights-of-way designated 'Crossing B' and 'Crossing C' on the map dated October 1986 and numbered 626-80,033-B as he determines to be necessary to assure public access to the banks of the Little Calumet River and the banks of Salt Creek within fifty feet on either side of the centerline of said river and creek.".

(i) COOPERATIVE AGREEMENT AND STUDY.—Add the following new section at the end of such Act:

"SEC. 24. LITTLE CALUMET RIVER AND BURNS/PORTAGE WATERWAY.

"(a) COOPERATIVE AGREEMENT.—The Secretary may enter into a cooperative agreement with the Little Calumet River Basin Development Commission, the State of Indiana or any political subdivision thereof for the planning, management, and interpretation of recreational facilities on the tract within the boundaries of Indiana Dunes National Lakeshore identified as tract numbered 09-177 or on lands under the jurisdiction of the State of Indiana or political subdivision thereof along the Little Calumet River and Burns Waterway. The cooperative agreement may include provision for the planning of public facilities for boating, canoeing, fishing, hiking, bicycling, and other compatible recreational activities. Any recreational developments on lands under the jurisdiction of the National Park Service planned pursuant to this cooperative agreement shall be in a manner consistent with the purposes of this Act, including section 6(b).

"(b) STUDY.—The Secretary shall conduct a study regarding the options available for linking the portions of the lakeshore which are divided by the Little Calumet River and Burns/Portage Waterway so as to coordi-

nate the management and recreational use of the lakeshore. The Secretary shall submit the results of the study to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate within two years after the enactment of this section. Effective October 1, 1986, there is authorized to be appropriated such sums as may be necessary for the purposes of conducting the study.".

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR RECESS UNTIL 9:30 A.M., FRIDAY, OCTOBER 17, 1986

Mr. SIMPSON. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m., later today, Friday, October 17, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, following recognition of the two leaders under the standing order, I ask unanimous consent that there be a period for the transaction of routine morning business, not to extend beyond 10:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. SIMPSON. Mr. President, at 10:30 a.m., the Senate will resume consideration of (H.J. Res. 738) the continuing resolution. Rollcall votes can be expected and could occur well before 12 noon.

At 1 p.m., by unanimous consent, a vote will occur on the motion to invoke cloture on the immigration bill conference report.

Also, during the day, the Senate can be expected to turn to the consideration of any of the following items: Reconciliation conference report, the debt limit conference report, any conference reports available for action, any legislative or executive items cleared for action.

Votes can be expected to occur throughout the day on Friday, October 17, 1986.

I inquire of the acting Democratic leader if he has any further business.

Mr. MATSUNAGA. Mr. President, we have nothing further to bring up.

I congratulate the acting majority leader. In all my 24 years here, I have never seen so many bills passed in so short a time. Congratulations.

Mr. SIMPSON. I thank the acting Democratic leader.

I thank the staff. I think that sometimes, while we in the Senate complain a bit about our duty, we forget the remarkable people before us, who spend an inordinate amount of time long after we have left these Chambers. I appreciate what they do, and I thank them.

RECESS UNTIL 9:30 A.M., FRIDAY OCTOBER 17, 1986

Mr. SIMPSON. Mr. President, I move, in accordance with the previous order, that the Senate stand in recess until 9:30 a.m., Friday, October 17, 1986.

The motion was agreed to, and at 2:46 a.m., the Senate recessed until 9:30 a.m., Friday, October 17, 1986.

NOMINATIONS

Executive nominations received by the Senate October 15, 1986:

DEPARTMENT OF STATE

Arnold Lewis Raphel, of New Jersey, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Islamic Republic of Pakistan.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

James H. Duff, of Pennsylvania, to be a member of the National Museum Services Board for a term expiring December 6, 1991. (Reappointment)

CONFIRMATIONS

Executive nominations confirmed by the Senate October 15, 1986:

DEPARTMENT OF STATE

L. Paul Bremer III, of Connecticut, a career member of the Senior Foreign Service, Class of Career Minister, to be Ambassador at Large for Counter-Terrorism.

David C. Fields, of California, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Central African Republic.

Alexander Fletcher Watson, of Maryland, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Peru.

Charles J. Pilliod, Jr., of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mexico.

James Daniel Phillips, of Kansas, a career member of the Senior Foreign Service, Class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Burundi.

Peter O. Murphy, of the District of Columbia, for the rank of Ambassador during the tenure of his service as Special Negotiator for United States-Canada Trade and Investment Issues.

James Roderick Lilley, of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Korea.

Ronald DeWayne Palmer, of the District of Columbia, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mauritius.

David A. Korn, of the District of Columbia, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Togo.

James Wilson Rawlings, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Zimbabwe.

Everet E. Bierman, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Papua New Guinea, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Solomon Islands.

Everett Ellis Briggs, of New Hampshire, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Honduras.

Theodore E. Gildred, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Argentina.

Frank Shakespeare, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Holy See.

James Edward Nolan, Jr., of Maryland, to be Director of the Office of Foreign Missions, with the rank of Ambassador.

Donald K. Petterson, of California, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Tanzania.

Walter Edward Stadtler, of New York, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Benin.

Edward Joseph Perkins, of Oregon, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of South Africa.

Elinor Greer Constable, of New York, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Kenya.

UNITED NATIONS

Joan Clark, of California, to be an Alternate Representative of the United States of America to the Forty-first Session of the General Assembly of the United Nations.

The following-named persons to be Representatives and Alternate Representatives of the United States of America to the Forty-first Session of the General Assembly of the United Nations:

Representatives:

Vernon A. Walters, of Florida.

Herbert Stuart Okun, of the District of Columbia.

Thomas F. Eagleton, U.S. Senator from the State of Missouri.

Larry Pressler, U.S. Senator from the State of South Dakota.

Helen Marie Taylor, of Virginia.

Alternate Representatives:

Patricia Mary Byrne, of Ohio.

Hugh Montgomery, of Virginia.

Joseph Verner Reed, of New York.

John Kerry, U.S. Senator from the State of Massachusetts.

Paul S. Trible, Jr., U.S. Senator from the State of Virginia.

EXECUTIVE OFFICE OF THE PRESIDENT

Jorge L. Mas, of Florida, to be a Member of the Advisory Board for Radio Broadcasting to Cuba for a term expiring August 12, 1989.

WORLD HEALTH ORGANIZATION

Frank E. Young, of Maryland, to be Representative of the United States on the Executive Board of the World Health Organization.

DEPARTMENT OF AGRICULTURE

Peter C. Myers, of Missouri, to be a Member of the Board of Directors of the Commodity Credit Corporation.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

SENIOR FOREIGN SERVICE

The following-named Career Member of the Senior Foreign Service of the Department of State for promotion in the Senior Foreign Service to the class indicated:

Career Member of the Senior Foreign Service of the United States of America, Class of Career Minister:

Edwin G. Corr, of Oklahoma.

EXTENSIONS OF REMARKS

MEDICARE SKILLED NURSING HOME QUALITY CARE AMENDMENTS OF 1986

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. STARK. Mr. Speaker, today I am pleased to introduce along with Mr. WAXMAN, the chairman of the Subcommittee on Health and the Environment of the Committee on Energy and Commerce, the Medicare Skilled Nursing Home Quality Care Amendments of 1986. This bill is a companion to H.R. 5450, the Medicaid Nursing Home Quality Care Amendment of 1986. Like H.R. 5450, it is designed to improve the quality of care and quality of life for our Nation's elderly and disabled in skilled nursing facilities.

With the aging of the population, an increase in chronic illnesses, and the move to shorter lengths of stay in hospitals, more and more Americans will spend some time in a skilled nursing facility. It projected that the elderly nursing home population will increase by more than 50 percent from 1978 to 2003. Presently, Medicare and Medicaid account for over half of the payments for nursing home care on behalf of about 1.5 million residents. To protect these elderly and disabled Americans, a Federal-State regulatory system was developed. Unfortunately, according to studies in California and other States this system is not working.

When the Reagan administration attempted to add insult to injury by deregulating this already inadequate regulatory system, the Institute of Medicine, at the urging of Congress, was commissioned to study the nursing home industry. After 2 years of study, in March 1986, the Institute of Medicine released its report entitled "Improving the Quality of Care in Nursing Homes." This prestigious institute concluded that the present regulatory system is apparently unable either to force substandard facilities to improve their performance or to eliminate them.

A nursing home regulatory system should ensure that any person requiring nursing home care be able to receive appropriate care, be treated with courtesy, and enjoy continued civil and legal rights. The Institute of Medicine found that:

This happens in many nursing homes in all parts of the country. But in many other government-certified nursing homes, individuals who are admitted receive very inadequate—sometimes shockingly deficient—care that is likely to hasten the deterioration of their physical, mental, and emotional health. They also are likely to have their rights ignored or violated, and may even be subject to physical abuse.

Mr. Speaker, this deplorable situation must not be allowed to continue. In its report, the Institute of Medicine made several recommendations for reforming the current regulatory system. These recommendations have been endorsed by a wide coalition of senior citizens and nursing home reform organizations.

At the heart of the institute's recommendations is the recognition that the regulatory system has been overconcerned with paper compliance and far too little concerned with what kind of care the elderly actually receive.

This legislation seeks to implement many of the institute's legislative proposals and assure our Nation's elderly and disabled that they will live in an environment that maintains or enhances the quality of their lives. In all, more than a dozen requirements for medicare participation are outlined in the bill. To promote quality of care, nursing facilities would have to develop a plan of care for each resident, conduct resident assessments, protect and enhance residents' rights, provide appropriate access and visitation rights and provide equitable admission, transfer, and discharge policies. The bill would also restructure the current survey and certification and inspection of care processes. Equally important, this legislation would expand the range of enforcement options available to both the Federal and State governments.

We have decided to introduce the bill at this time in order to allow those interested in nursing home reform to consider the specific proposals and make their recommendations known. As chairman of the Subcommittee on Health, with jurisdiction over Medicare, I plan on holding hearings early in the 100th Congress on ways to strengthen and improve these provisions in order to assure quality of care in nursing homes.

Mr. Speaker, we must not turn our backs on our Nation's elderly and disabled nursing home residents. I look forward to working with my colleagues in the next session on making sure that Medicare and Medicaid nursing home residents receive the kind of care they deserve and are entitled to receive.

TRIBUTE TO THE HONORABLE G. WILLIAM WHITEHURST

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. FUQUA. Mr. Speaker, I am delighted to have the opportunity to say a few words in tribute to BILL WHITEHURST. As a member of the Armed Services Committee, he has served his Nation well and been a strong advocate for America's military needs. As a member of the Committee on Standards of Official Conduct he has not only served his Nation but his colleagues in this body with his fair and honest decisions on difficult issues.

BILL is not only my colleague in this House but we are also neighbors in nearby houses in northern Virginia. Many is the time he has graciously given me a ride home late at night after a long House session. For this reason, too, I am grateful to him.

I wish BILL the very best in the years to come. He has been an outstanding Member of Congress and will be an outstanding professor as well.

CORPORATE AVERAGE FUEL ECONOMY—CAFE STANDARDS

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. COATS. Mr. Speaker, recently, the National Highway Traffic Safety Administration [NHTSA] issued its final rule regarding reduction of the corporate average fuel economy [CAFE] standards for the 1987 and 1988 model years. The Agency wisely lowered the standards to 26.0 miles per gallon for these years, noting in its press release accompanying the decision that "a higher standard would have resulted in the loss of jobs for tens of thousands of workers in the domestic auto industry." Clearly this is a victory for American consumers and auto workers alike.

NHTSA concluded in the rule that GM and Ford, which constitute a substantial part of the industry, took or planned appropriate steps to meet the 27.5 miles per gallon standard for the 1987 and 1988 model years, but they were prevented from fully implementing those steps by unforeseen events. NHTSA's analysis found that the only actions now available to those manufacturers to raise their CAFE levels to 27.5 miles per gallon would involve a combination of production restrictions, including substantial job losses, and transferral of production of large cars outside of the United States. Obviously these steps would not have been in the best interest of the companies, their employees and suppliers, and American consumers.

NHTSA stated in the rule that the maximum hypothetical difference in gasoline consumption by lowering the standard is less than one half of 1 percent of the projected national passenger car gasoline consumption over the life of those cars. The Agency also noted that the average fuel economy of the total fleet of new cars sold in the United States is expected to exceed 27.5 miles per gallon during 1987 and 1988, despite GM and Ford falling below this level.

Many arguments were presented in favor of reducing the CAFE standards temporarily, but one which has been less frequently and fully articulated is the consideration of vehicle sizes and their relationships to fuel economy and safety. A March 24, 1986 letter from Brian O'Neill, president of the Insurance Institute for Highway Safety [IIHS], to NHTSA clearly presents this point. The letter observes that weight has more of an effect on fuel economy than does vehicle size, so cars can be made

more fuel efficient without compromising safety to a degree by reducing weight without reducing vehicle size. However, there is a point beyond which weight cannot be effectively reduced without making vehicles smaller and thereby compromising safety. Mr. O'Neill points out in this regard that "occupants of smaller cars are at much greater risk of death and injury than occupants of larger cars."

While the IIHS letter does not specifically endorse a reduction in the CAFE standards, it does point out NHTSA should review this issue very carefully when choosing appropriate standards and where fuel economy targets begin to conflict with safety concerns, the Agency has no alternative under its mandate than to defer to safety.

I would ask that the text of the IIHS letter be printed in the RECORD at this point.

INSURANCE INSTITUTE FOR HIGHWAY SAFETY,
Washington, DC, March 24, 1986.

[Comments of the Insurance Institute for Highway Safety on Passenger Automobile Average Fuel Economy Standards (MY 1987-1988) Docket No. FE-85-01, Notice 4]

MS. DIANE STEED,
Administrator, National Highway Traffic Safety Administration, Washington, DC.

DEAR MS. STEED: In a recent Notice of Proposed Rulemaking, the National Highway Traffic Safety Administration (NHTSA) solicited comments on numerous issues raised by a proposal to reduce the corporate average fuel economy (CAFE) target figure from 27.5 miles per gallon (mpg) to 26.0 mpg for the model years 1987 and 1988 (51 *Federal Register* 2912, January 22, 1986).

Although NHTSA did not pose any questions specifically addressing the impact of CAFE on vehicle safety, as the federal agency responsible for new car safety, it cannot overlook relationships between fuel economy and car safety. NHTSA has recognized this in the current CAFE Notice, which states that the agency does not wish "its fuel economy standard to serve as a disincentive to the sale of motorized belts or air bags" (51 *Federal Register* 2920).

CAFE standards can have a potentially adverse effect on vehicle safety independent of their influence on safety standards. This is because vehicle size is an extremely important factor in safety—occupants of smaller cars are at much greater risk of death and injury than occupants of larger cars. Therefore, it is not sufficient that NHTSA concern itself exclusively with the relationship between CAFE standards and safety standards. Because weight has more effect on fuel economy than does size, cars can be made more fuel efficient without compromising safety by reducing weight without substantially reducing vehicle size. However there is a point beyond which weight cannot be reduced without making vehicles smaller and thereby compromising safety.

Enclosed are two special issues of *Status report* on small cars (Attachments A and B) showing that small car occupants have a substantially greater risk of serious or fatal injury than the occupants of large cars. Data from Maryland crashes from 1974-80 show that twice as many drivers in subcompacts (wheelbase of 97-101 inches) suffered crash injuries as those in full size cars (wheelbase over 120 inches). Data from NHTSA's Fatal Accident Reporting System (FARS) confirm this disparity. For passenger cars one to five years old in the period 1978-80, there were more than twice the number of deaths per 100,000 registered vehicles in small subcompacts (96-inch wheelbase or less) as in full size cars (Wheelbase over 120 inches). During this period, the disparity in deaths per car registered for small and large cars held for all crash configurations. In addition, insurance injury claims data show that small cars produce many more occupant injury claims than do large cars (Attachment C).

These results cannot be explained by the differences in the mass of small and large cars because small car occupants in single-vehicle crashes suffer greater and more frequent injuries than do the occupants of larger cars in such crashes. Neither can they be explained by differences in driver age. Although older drivers more frequently operate larger cars, the pattern of relative safety in small and large cars remains for all driver age groups.

A listing of publications relevant to the issue of the injury risk in small cars is provided in Attachment D. The Institute urges NHTSA to review and consider this material when choosing an appropriate CAFE target. Where fuel economy targets begin to conflict with safety the agency has no alternative under its mandate than to defer to safety.

Sincerely,

BRIAN O'NEILL,
President.

RIGHT FROM THE START: A RECORD OF PRIDE

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. TORRICELLI. Mr. Speaker, I would like to bring to the attention of my colleagues the outstanding record on labor issues of our colleague in the other body, the Senator from Colorado, Mr. HART.

GARY HART: A RECORD OF PRIDE

Gary Hart's 12-year record in the Senate is one of active and consistent support for American workers and their issues: from minimum wage protection to double-breasting, from right-to-work to Davis-Bacon, and from unemployment benefits to Reaganomics.

But Gary Hart doesn't just play defense. In an often-hostile Senate, he has fought hard to increase job opportunities.

Gary Hart has fought to put America's tax money and America's muscle to work where America needs it: rebuilding roads and bridges, improving schools and training to renew America's competitive edge.

That's why COPE has scored Gary Hart's votes "right" better than four times out of five—throughout his Senate career.

THE 99TH CONGRESS: 1985 AND 1986

Hart led the fight against the Gramm-Rudman budget law and stopped the transfer of ever greater power to the Office of Management and Budget—David Stockman's old agency.

Hart opposed and stopped legislation that would let the Administration reneg on hard-won health and safety regulations.

Hart introduced a comprehensive trade reform bill to toughen trade sanctions and increase our industrial competitiveness.

Hart co-sponsored bills to protect workers from toxics on the job and to protect workers and their children from exposure to hazardous asbestos in schools and other buildings.

Hart voted to maintain Davis-Bacon and Service Contract Act protections as written for U.S. contracts.

Hart co-sponsored legislation restricting "double-breasting"—a ploy used by union contractors to pay non-union wages.

Hart sponsored legislation to restore America's crumbling roads and bridges, enable states to pay for the work and revive related construction trades (the National Infrastructure Act).

Hart proposed, with Florida Senator Lawton Chiles, the Growth and investment Initiative ($17 billion to promote education, training, and economic development). And Hart won $400 million in the 1987 federal budget for training programs—a downpayment on the Growth and Investment Initiative.

Hart pushed three other bills increasing support for education and training (American Defense Education Act, National Individual Training Account Act, High Technology Morrill Act).

Hart spoke out in support of USX workers who have been locked out of their jobs.

Hart co-sponsored a bill correcting inequities in the bargaining rights of the International Federation of Musicians.

Hart backed bills to help working families (Family Day Care Provider Assistance Act, Business Meals to School Lunches).

Hart pushed legislation to improve federal job banks, and won improvements that are now being enacted.

Hart joined with labor organizations the world over in fighting the racist apartheid system in South Africa.

Hart provided key support for the tax reform effort, by defending the "Packwood-Bradley" approach on the floor of the Senate. Hart has supported the kind of reform that lowers rates, closes loopholes and taxes investment earnings just like wages. To hold the compromise together, Hart opposed all amendments—resulting in his only two votes contrary to AFL-CIO positions.

THE 98TH CONGRESS: 1983 AND 1984

Hart introduced the Community Assistance and Revitalization Act to promote jobs and development in depressed communities.

Hart pushed for increased support for education, training and unemployment programs.

Hart proposed legislation to open foreign markets to American exports and report unfair trade practices.

Hart voted to protect laid-off workers from mortgage foreclosure or the loss of health insurance.

Hart endorsed legislation requiring industries to notify workers to plant closings in advance and assisting employes and communities that want to keep plants open on their own.

THE 97TH CONGRESS: 1981 AND 1982

Hart opposed all aspects of Reaganomics, especially the tax plan that resulted in the biggest federal deficits ever and the David Stockman assault on all health and education programs.

Hart supported aid to education, introducing a comprehensive education bill and voting for federal support in key areas.

Hart proposed a capital budget to highlight the benefits of public works and long term investment projects, and a tax expenditure budget to make clear the cost of tax loopholes.

Hart opposed a plan to apply a means-testing requirements as an obstacle to Medicare benefits.

Hart voted to protect union political rights.

Hart voted against the creation of a sub-minimum wage.

Hart voted to extend emergency unemployment benefits.

Hart voted against Social Security cuts for workers and their dependents.

Hart voted to protect jobs in the U.S. maritime industry.

THE 96TH CONGRESS: 1979 AND 1980

Hart was endorsed for re-election by the Colorado AFL-CIO and the National AFL-CIO.

Hart voted to maintain legal safeguards for the rights of migrant workers.

Hart fought attempts to roll back Davis-Bacon protections for workers on federal contracts.

Hart opposed attempts at national "right to work" legislation.

Hart worked for public service and public works programs to provide jobs for America's unemployed.

THE 95TH CONGRESS: 1977 AND 1978

Hart fought for Labor law reform, voting six times to break an anti-labor filibuster of the most important labor law revisions since the Wagner Act of 1935.

Hart opposed efforts to deny food stamps to striking workers and their families.

Hart voted against creating red-tape obstacles to the enforcement of health and safety regulations.

THE 94TH CONGRESS: 1975 AND 1976

Hart supported union political rights.

Hart voted to protect Davis-Bacon protections for workers under federal contacts.

Hart voted with labor throughout the struggle over situs picketing rights.

THE REVIVAL OF LAKE ERIE AND WESTERN NEW YORK'S WATERFRONT

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. KEMP. Mr. Speaker, 20 years ago scientists predicted that the death of Lake Erie was imminent and inevitable. Today record numbers of fishermen, boaters, and tourists are enjoying a renewed and revitalized Lake Erie. Although we have come a long way since the days when the Great Lakes were clouded with pollutants and harmful chemicals, we must remain vigilant and committed to the work that still needs to be done. Since my election to Congress, I have actively supported efforts, such as the Clean Water Act, to restore and preserve our priceless natural resources. Our health, jobs, and the quality of our lives are affected by the quality of these waters. The vital effort to clean up the Great Lakes must continue, but I am pleased and excited by the spectacular revival that has taken place thus far.

Until recently, Lake Erie was only an untapped resource. Now, waterfront development is booming, as smokestacks and factories give way to marinas and parks. Recreational fishing and boating has become a multimillion dollar business, stimulating economic growth and expanding job opportunities for western New Yorkers. Fishermen have spent an estimated $1.5 billion a year in all the Great Lakes, with a total economic impact on the regional economy of about $4 billion. This "new" industry has been creating the need for more retail stores, hotels and motels, and restaurants.

Western New York is in the midst of this waterfront development boom. In the lakeshore community of Evans, NY, residents and local and State officials are working together to rehabilitate and expand a marina that is badly in need of repair. Plans call for the number of boat slips at the marina to be increased from 80 to about 200, enabling a greater number of fishermen and recreational boaters to take advantage of this vast resource. Construction of the Sturgeon Point Marina is crucial to the economic revitalization of the western New York area and deserves full congressional support. Waterfront development will not only enhance access to the lake, but will provide significant economic benefits to the entire region in terms of more jobs, a healthier tourism industry, and higher revenues for local and State governments.

Lake Erie is alive and well again, as are the communities that surround it and I urge my colleagues to read the following New York Times article about the rebirth that has taken place along this Great Lake:

A RENEWED LAKE ERIE AGAIN ONE OF THE GREATS

(By John Holusha)

PUT-IN-BAY, OHIO.—Twenty years ago, the western end of Lake Erie was choked with foulsmelling algae, and dead fish littered the shoreline. Some scientists predicted that the lake's death was imminent. But as Gov. Richard Celeste of Ohio proclaimed in a ceremony on an excursion boat in this South Bass Island port last week, Lake Erie has made a comeback. As in testimonial, dozens of boats bodded nearby, filled with fishermen.

In fact, the water in all the Great Lakes is cleaner now than at any time in recent history, officials say. Although environmentalists warn that more needs to be done the change is having an important impact on a region struggling to shift its economy away from the declining heavy industries that were so dominant in the past.

Cities throughout the Great Lakes basin are tearing down the abandoned mills that lined their waterfronts and putting up more than $1 billion in housing, offices, restaurants and parks. Detroit, for example, has been encouraging development along the Detroit River, between Lake Erie and Lake Huron. Cleveland is digging through a century's worth of steel mill slag to create a marina and lakefront park. In Buffalo last week, slabs of concrete were dropped into Lake Erie to create reefs aimed at attracting fish.

Most of the benefits of such efforts are still in the future, but the cities that started early are already reaping rewards. A renewal of Toledo's Maumee River waterfront is generating $10 million a year in tax revenues and has added 4,000 jobs to the 20,000 in what was a declining downtown.

Sport fishing has returned, although concern about toxic chemical accumulations in some species remains. More than 800 charter fishing boats are operating on Lake Erie today, compared with 40 in 1975. Sports fishermen spend $1.5 billion a year in all the Great Lakes. Litter-strewn beaches that were virtually abondoned are being cleaned. An estimated 63 million people visit the state, Federal and, on the Canadian side, provincial parks along the lakes each year.

"People relate to clean water," said Donna Wise, the president of the Center for the Great Lakes in Chicago. "When the water is clean, people want to go to the beaches or fish or build next to the water's edge."

Much of the improvement in the lakes' quality is attributed to the $7 billion that has been invested in waste-water treatment plants since environmental laws began to take effect in the early 1970's. A ban on phosphorus detergents in most states and Canadian provinces in the basin has also helped, officials say, along with the decline of heavy industries. And high water levels have diluted the pollutants that are still flowing into the lakes.

"Dilution has been the solution to pollution, particularly in a shallow lake like Erie," said David Edgington, director of the Center for Great Lakes Studies at the University of Wisconsin. "There is simply a much greater volume of water there now to accept the environmental insult." Unlike the other lakes, which are hundreds of feet deep, the average depth of Lake Erie is only 62 feet, and in the western part it is much shallower than that.

RETURN OF THE WALLEYE

Nevertheless, the lessening of phosphorous pollution and a ban on commercial fishing in Lake Erie have contributed to soaring stocks of the walleye, a popular sport fish. From a low of about four million in 1970, the walleye population in the lake has increased to 30 million, and the species is reproducing without assistance from hatcheries. Other types of fish, such as the white bass, small-mouth bass and catfish, are also being caught in large numbers.

Environmentalists note, however, that much of what has been cleaned up so far is the visible pollution. Still lurking in the water and in the bottom sediment are toxic chemicals, the legacy of the region's industrial heritage. Most states have restrictions on the consumption of some lake fish, particularly predatory species that accumulate toxins by devouring bottom feeders. "The biggest impact of the toxics is the limitations they put on the fishery," Professor Edgington said. "The PCB concentrations are measured in parts per billion, so they don't affect how the water looks or whether you swim in it. But at the top of the food chain, with a big trout or salmon, it is a problem."

But the lingering presence of toxic chemicals is not preventing lakeside communities from taking advantage of their water resources. At the end of a day spent cruising Lake Erie, Governor Celeste stopped at Sandusky, where the G. A. Boeckling, a turn-of-the-century paddle-wheel steamer, is being restored for lake excursions. "Ten years ago," the Governor said, "I doubt you could have drummed up support for restoring the Boeckling—or for being out on the lake."

SWAN FALLS WATER RIGHTS AGREEMENT

HON. RICHARD STALLINGS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. STALLINGS. Mr. Speaker, after several weeks of negotiations and hard work, an agreement has been reached on legislation to approve the Swan Falls Water Rights Agreement. This vital compromise marks a landmark day for the citizens of Idaho.

After many years of heated controversy and public debate, an agreement between the State of Idaho and Idaho Power Co. was reached on October 25, 1984. Incorporated in H.R. 5465, the National Appliance Energy Conservation Act of 1986, is language to implement this important agreement.

The Swan Falls agreement is the result of a dedicated effort and hard work from many Idahoans. Special recognition and thanks to Idaho Gov. John Evans, Attorney General Jim Jones, Idaho Power Co. officials, water users, conservation leaders, and many others who have played an integral role in this process.

The Snake River serves as the lifeblood of Idaho's economy and quality of life. It is one of our priceless natural treasures. Idaho and the Pacific Northwest have been blessed with abundant water resources from our great hydroelectric dams of the Columbia and Snake Rivers. Our economic growth and prosperity depends upon a stable, reliable, and reasonably priced electric power.

Furthermore, the Swan Falls agreement is in the public interest and will help the State of Idaho better manage its water resources. It also should serve as a sound management plan for the Snake River and its many valuable resources. Irrigation, energy production, recreation, and fish and wildlife all benefit from effective stewardship of Idaho's Snake River.

On behalf of the State of Idaho, Idaho Power Co., and all Idaho citizens, I would like to express our personal appreciation and thanks to the distinguished chairman of the House Energy and Commerce Committee, Mr. JOHN DINGELL, and Congressman ED MARKEY.

Without their personal interest and strong commitment to work out an acceptable compromise, this agreement would not have been implemented. Both Members deserve special acknowledgement for their consideration, leadership, and support.

Idaho Senator JIM MCCLURE deserves credit and thanks for his important role and work in working out a solution to resolve this longstanding dispute over Snake River water rights. This process truly was a team effort and had the support of the entire Idaho delegation.

Several key staff members also devoted a great deal of time and effort in working with the Idaho delegation to resolve this issue. Dave Finnegan, Gil Sperling, and Gary Ellsworth provided needed guidance and direction during our discussions.

This legislative solution is more than just a bipartisan settlement. It represents an effective partnership in Congress that has paid off for Idaho citizens. The process also serves as an excellent example of government working at its best.

The Swan Falls agreement represents an important roadmap to Idaho's future and is an important step toward improving our State's economic health and quality of life. House approval today completes the final chapter of a long and difficult struggle that has confronted Idaho for many years.

A TRIBUTE TO ASSISTANT FIRE CHIEF PAUL ORDUNA

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. DYMALLY. Mr. Speaker, early this year the Los Angeles Fire Department, as it began to celebrate its 100th anniversary, took an important and historic action by promoting Mr. Paul Orduna to the position of assistant fire chief. In the history of the Los Angeles Fire Department, Mr. Orduna is the first black person to achieve this high rank.

The story of how Mr. Orduna and the department arrived at this point could serve as the archetypal story of the black struggle to achieve the American dream in postwar America. The humble beginning is there, as is the dedication to hard work. The bitter prejudice is there. But so is the iron-strong will to overcome that prejudice. Finally, the triumph is there. In his achievement, Paul Orduna is proof to all who will follow him that one person with conviction can change the world.

For Paul Orduna, the introduction to racial prejudice occurred relatively late in life. He was born in Omaha, NE in an entirely integrated neighborhood that contained Serbians, Germans, Czechoslovakians, Bulgarians, Hungarians, Bohemians, Mexicans, Japanese, and blacks. His father is Mexican, his mother black. He attended racially integrated elementary and secondaray schools. Before and immediately after World War II he worked in the meat packing industry in Omaha. But after his marriage in 1950, and the birth a year later of a daughter, Chief Orduna considered seriously what he wanted to do as a lifelong career.

The relative job security presented by firefighting was attractive to Chief Orduna. He took the fire department entrance examination and passed. He was 15th on the eligibility list. Unfortunately, the eligibility period expired before Paul Orduna was hired. Paul Orduna is not easily put off. He took the exam again, this time placing No. 2 on the list. He was hired in 1952 and worked 4½ very happy years with the Omaha Fire Department.

When he moved to Los Angeles, he again took the examination. As in Omaha, it took two tries to finally be hired. Unlike Omaha, however, the Los Angeles Fire Department had been placed under court order to integrate. In 1957 that court order was greeted with anger, resentment, and resistence. Paul Orduna bore the brunt of that anger and resistence. The then chief of the department had chosen to resign rather than enforce the integration order. White firefighters made a number of attempts to provoke black firefighters into confrontations to demonstrate the ineffectiveness of integration.

Chief Orduna serving his probationary period in this time of unrest was isolated by his fellow firefighters. At this probationary time when cooperation and mentoring was crucial to learning the fine points of the job, Chief Orduna was transferred to three separate stations. Only the captain would speak to him, and spoke only to give orders. Orduna learned the operating techniques at each station on his own.

Eventually a chief who believed in integration was brought on board, and he began to turn the department around. Paul Orduna says now that his early upbringing in an atmosphere of racial and ethnic tolerance helped him through the tough times and enabled him to adjust well to the Los Angeles Fire Department despite the initial prejudice shown him.

During the Watts riots Paul Orduna's presence became a strong asset for the department. Wherever he and his crew answered a call in the Watts area they were accepted and escaped harassment and harm even during the height of the rioting. That experience convinced Chief Orduna that he could offer his services as an intermediary between the community and the fire department. His efforts involved him deeply in community activities, improved minority recruitment for the department and was markedly beneficial to the department's affirmative action efforts. His special talents were noticed.

He was promoted to captain, and after commanding a station for several years, he became an instructor at the drill academy. For Chief Orduna, this work with new firefighters was one of the most fulfilling experiences in his long career. Turning raw recruits into accomplished firefighters was a challenge he accepted with relish.

His work in the black community eventually helped him to win the post of affirmative action officer for the Los Angeles Fire Department. His progress in that post earned him the rank of battalion chief. After several years in command of two separate battalions, Orduna became the department's career development officer. He recognized his personal need for formal training in management and enrolled at the University of Redlands where he earned a bachelor of arts degree in management.

Armed with both the degree and extensive practical experience, Paul Orduna took the examination for assistant chief of the department. When he was appointed to that rank on February 28, 1986, the final day of Black History Month, he became a part of black history himself as the only black person ever to achieve the rank of assistant chief of the Los Angeles Fire Department. Along with the singular distinction came the chance to return to the area of work he enjoyed so much in earlier years, training; only this time he returns as commander of the training division. Chief Orduna, we in the Congress of the United States salute your accomplishment. Your success is a milestone on the path toward equal opportunity.

JIM BALUKEVICH INDUCTED INTO WASHINGTON, DC BOXING HALL OF FAME

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. LANTOS. Mr. Speaker, on November 14, 1986, Jim Balukevich, a graduate of George Washington University, will be inducted into the Washington, DC Boxing Hall of Fame at the Redskins Touchdown Club.

Jim Balukevich, has been a boxer, and a staunch supporter of boxing, since his youth as a Golden Gloves participant. He won a bronze medal while boxing in the U.S. Army in 1937–38 while serving in Hawaii. More recently he won the Senior Olympic Middleweight Boxing Championship of America.

Jim's leadership in this field of sports has included encouraging young men to develop their skill, strength, and fortitude by facing combat by the rules of the ring. He views boxing as an activity that can build the strength and character of American youth regardless of race, ethnicity, socioeconomic level, or physical characteristics. He sees boxing as the world's toughest sport, calling on the physical and mental resources of stamina, courage, and quick thought.

Jim recalls that Heavyweight Boxing Champion Gene Tunney, who defeated Jack Dempsey for that title, said that during World War I only 15 Marines out of 5,000 volunteered for the boxing team. Gene Tunney, the fighting Marine, commented that "marines were not afraid to fight and die in battle, but were in fear of battle in the boxing ring!"

One of Jim Balukevich's achievements in this field of sports was the founding of the Washington, DC Boxing Hall of Fame which will honor him next month. He also serves as vice president of the New Jersey Boxing Hall of Fame, and is an active member of the Washington, DC Boxing Commission.

Jim exemplifies the humanistic spirit, blending sensitivity with strength, that is rare enough in today's world. An example of this sensitivity is found in the poem of prayer he wrote for the boxer:

THE BOXER'S PRAYER

Look God, I have not spoken to you
But now I must say Hello.
Some say you do not exist,
And some believe thus.
Here I am in the boxing ring with only a prayer
To you. I shall put out my hand
And if you take it we'll both understand.
While I have no fear, my moment of truth is near.
And if I pray you are always here.
There's the bell!
I must come out fighting like hell!
With you as guardian I must do well.
Well, God, it is time to go.
I just want you to know
I met you tonight.

For Jim Balukevich, who serves with dignity, cheerfulness, and strength as he responds to the call of Congress by operating the Longworth House Office Building Members' elevator—a position he has held reliably for close to a decade, we recognize him today. On behalf of my colleagues in the Longworth Building, and in the House of Representatives, I offer warm congratulations to Jim Balukevich on the honor of the occasion of his induction into the Washington, DC, Boxing Hall of Fame.

A DRUG-FREE CULVER MIDDLE SCHOOL

HON. BUDDY MacKAY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. MACKAY. Mr. Speaker, I rise before my colleagues today to honor an exceptional group of young people from Culver Middle School in Leesburg, FL.

At the initiative of the student government, led by Miss Shae Adams, student body president, all 944 students, which is the entire student population, signed a petition promising that they will not bring any drugs to school nor will they use any drugs during the entire school year. This action is an outstanding example of the caliber of our youth today.

With the drug problem approaching the epidemic proportions it has in recent years, the commitment of these young people to provide a drug-free environment for their peers to learn and grow in is a highly commendable action.

I am proud to represent this group in Congress. They have set an example worthy of praise, and one which I hope will be met by others who will pledge to do their part in our fight against drugs.

The text of their pledge is as follows:

In order to create a drug-free campus at Culver Middle School, I voluntarily pledge to myself not to bring any controlled substance on campus during the 1986–87 school year.

A TRIBUTE TO OUR EMERGENCY PHYSICIANS

HON. JAMES V. HANSEN

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. HANSEN. Mr. Speaker, I recently spent several hours at the Baltimore Franklin Center Hospital in Baltimore, MD, with an emergency physician to experience, firsthand, the treatment and environment with which emergency physicians must deal on a day-to-day basis. Let me say, Mr. Speaker, that it was extremely revealing to me to see this special field of medicine.

We all have received care from our family physicians, or our ophthalmologist to treat specific problems. However, I don't believe that we understand the real life drama that emergency room physicians encounter on a daily basis. Emergency physicians are trained to expect the unexpected—any illness, any injury, any number of patients; from sore throats, broken bones, heart attacks, to all manner of life-and-death scenarios.

The selective training they receive aptly separates them from all other classes of physicians. Emergency room physicians must complete 3 years of training beyond medical school devoted exclusively to acute medical care. To keep up with the latest developments in emergency medicine, emergency physicians must complete 150 hours of continuing medical education every 3 years. They are highly skilled, trained, and qualified to treat every patient who comes through their emergency room doors. If it were not for this group of professionals, many people needing emergency, on-the-spot care, would not be living today.

I urge every one of my colleagues to take a few hours of their time to observe, firsthand, the operations of emergency room physicians. It will be time well spent.

KILDEE PAYS TRIBUTE TO OUR LADY OF LEBANON MARONITE CATHOLIC CHURCH

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. KILDEE. Mr. Speaker, I rise today to bring to the attention of my colleagues and the Nation the celebration of the 10th anniversary of the consecration and dedication of Our Lady of Lebanon Maronite Catholic Church complex which will be held November 8, 1986, in Flint, MI.

Our Lady of Lebanon Catholic Church can trace its beginnings to the undaunted efforts of many dedicated individuals within Flint's Lebanese-American community. As a result of their selfless efforts, the church celebrated its first Maronite Liturgy on August 26, 1973. The parishioners continued to worship together at various locations while efforts to raise funds and locate a building site began. On June 29, 1975, at a ceremony which I had the privilege of attending, the then-Bishop Francis Zayek broke ground at the site of the beautiful new church center. Since the completion of the church building in 1976, Our Lady of Lebanon Catholic Church has served as an unwavering source of spiritual strength for its parishioners as well as enriching our community with its rich Arab culture. As a member of the Latin Rite of the Roman Catholic Church, I appreciate the eastern approach to spirituality that the Maronite Rite has brought to the Universal Church.

Mr. Speaker, Our Lady of Lebanon Maronite Catholic Church continues to serve as a sacred temple of worship and as an abode of faith and inspiration for its parishioners. Under the spiritual leadership of its current rector, Father Anthony Mike, Our Lady of Lebanon remains a portrait of Christian fellowship and continues to foster both Christian and ethnic values within the community. It is indeed a great honor and privilege for me to pay tribute to such an esteemed church on the 10th anniversary of its consecration and dedication.

JOHN HOY NOMINATED TO RECEIVE VOLUNTEER ACTION AWARD

HON. JOHN HILER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. HILER. Mr. Speaker, I would like to take this opportunity to recognize an outstanding individual who has accomplished a great deal in the name of friendship. The goodness in his heart and the strength of his convictions compels me to once again call your attention to his efforts to enrich the lives of others.

As countless fellow Hoosiers can attest, a finer friend than John Hoy is mightly hard to find. His A Rose For Friendship Society has served to express the genuine ideal of friendship through the symbol of peace, friendship, courage, and devotion, the rose.

Many years ago, John Hoy learned that the single act of presenting a rose to a total stranger could break down the outside barriers of formality leaving a lasting impression of goodwill. This concept of commitment and caring led to the formation of A Rose For Friendship Society; a belief in the innate goodness to be found in every person.

It is my special pleasure to be able to nominate John Hoy this year for the Volunteer Action Award. I believe that his untiring devotion to A Rose For Friendship—his relentless pursuit of friendship for all mankind—makes him deserving of this honor. As I pointed out to the officials overseeing the award, A Rose For Friendship merits national recognition.

Last month, after a century of debate over our Nation's floral emblem, Congress finally selected the rose, thus elevating it to prominence alongside the stars and stripes and the bald eagle. John Hoy must be smiling having discovered long ago the virtuous qualities of a flower that can turn a stranger into a friend.

CONGRESSMAN JIM WEAVER

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. BENNETT. Mr. Speaker, when I think of JIM WEAVER I think of his sparkling smile, his courage, and his able mind. All these qualities and many other fine ones he has brought here to the Halls of Congress during his service here. We will surely miss him, and we all hope that all his paths in the future will be pleasant and productive for him, for he deserves that and more.

THE OMNIBUS DRUG BILL

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. CHAPPELL. Mr. Speaker, last Wednesday, in an effort to sustain progress toward the enactment of meaningful drug legislation, the House returned to the Senate the Drug Enforcement, Education and Control Act, H.R. 5484, after making modifications to the Senate's amendments. While I was unavoidably detained from the House floor for the vote on the House amendments, I want to state for the record my continued support for this legislation and for the action taken by the House.

The need for this legislation is clear. The pervasive effects of drug abuse are felt throughout our society. Drug-related crime threatens our communities and is taxing the resources of local law enforcement agencies. Drugs are entering our schools at lower and lower grade levels, and drug abuse costs our economy millions of dollars each year due to lost worker productivity.

As one of the original cosponsors of H.R. 5484, it is my hope that the Senate will accept the changes made by the House in order that this important legislation can be sent to the President and signed into law.

WHAT $100 MILLION FOR THE CONTRAS WILL ACHIEVE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. HAMILTON. Mr. Speaker, on July 14, 1986 I initiated correspondence with the Department of State concerning United States policy toward Nicaragua, in view of likely final action on the administration's request of $100 million for assistance to the Contras. I sought to obtain a clearer understanding of what this program is expected to accomplish. The administration makes no prediction of when pressure will bring the Sandinistas to the bargaining table, and it does not speculate on future aid requirements for the Contra program. The administration's lack of precision in detailing the timetable for negotiations or the goals of this assistance points up the need for the continuation of careful congressional oversight now and in the next Congress.

The text of my letter to the Department of State and the October 3, 1986, reply follow:

CONGRESS OF THE UNITED STATES,
COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, July 14, 1986.

Hon. GEORGE P. SHULTZ,
Secretary, Department of State,
Washington, DC.

DEAR MR. SECRETARY: In the aftermath of the June 25, 1986 vote on Nicaragua in the House of Representatives, Congress will take final action to provide $100 million in economic and military assistance to Contra rebels opposed to the Sandinista government.

I write to you concerning U.S. policy toward Nicaragua in light of this assistance program to obtain a clearer understanding of precisely what you expect this program to accomplish.

1. What changes, if any, do you expect in the policies of the Sandinista government within the next year because of this U.S. assistance?

What changes do you expect in Nicaragua's internal and foreign policies?

What changes or trends do you expect in the size of its armed forces, the reliance of the Sandinistas on Cuban, Soviet and other Soviet bloc advisers, and repression of pluralistic forces inside Nicaragua?

2. Do you expect that this assistance will force the Sandinistas to negotiate a settlement acceptable to the Contras?

If not within a year, by when?

Do you expect that this assistance will, at a minimum, force the Sandinistas to open negotiations with the Contras?

3. Do you anticipate that this assistance will promote democracy and a pluralistic political system in Nicaragua?

If so, could you outline the series of events through which the provision of this assistance would lead to the achievement of democracy and a pluralistic political system in Nicaragua?

Is it your view that this assistance program will not lead to greater repression within Nicaragua?

4. If the provision of this assistance does not achieve U.S. policy goals or a suitable alteration of Sandinista policies within the next year, what will you seek next from the Congress?

Will there be another request for funds for the Contras next year?

What will be the size of this request?

Can you assure us that there will not be a request early in the 100th Congress?

5. How long will it take to achieve U.S. policy goals in Nicaragua?

On an annual basis, what level of funding for the Contras is required to achieve U.S. goals?

6. How do you expect this $100 million in assistance will affect the Contras' military performance within the next year?

What size military force will this program support?

Do you anticipate that this $100 million will enable the Contras to capture and hold territory inside of Nicaragua?

What other military gains by the Contras do you expect?

7. How will this $100 million affect political support for the Contras inside of Nicaragua?

Do you expect that this program will lead Nicaraguans to rally around the banner of the Contras?

What tangible evidence would you expect of growing political support for the Contras inside Nicaragua?

8. Do you expect this assistance program to lead to greater financial support for the Contras from third country and private sources?

Which countries and groups do you expect to provide this further assistance?

How much financial support for the Contras from other sources do you expect?

9. What impact do you expect this U.S. assistance program to have on the policies of our Latin, European and Japanese friends, many of whom continue to have financial, commercial and political ties with the Sandinistas?

10. What do you anticipate will be the Soviet and Cuban reaction to the provision of this $100 million to the Contras?

Do you expect the Soviets and Cubans, as one high Administration official said, to "back off?"

Do you expect increasing levels of military hardware flowing from the Soviets and Cubans to the Sandinista government?

Do you expect the provision of increasing numbers of helicopters and helicopter gunships beyond those apparently delivered in early July, 1986?

Do you expect the provision of advanced fighter aircraft?

Do you expect increasing numbers of Soviet and Cuban advisers in Nicaragua?

Do you expect increasing security commitments by the Soviets and Cubans to Nicaragua?

11. Where do you intend to provide U.S. training for the Contras and precisely what training and logistical support will be provided in Central America?

Precisely what role do you expect to be played by non-governmental, U.S. contractors?

12. What is your estimate of the total costs to the United States of its efforts in support of the Contras against the Sandinista government?

13. Do you consider the provision of this assistance by the United States to the Contras to be tantamount to a declaration of war against the Sandinistas?

I appreciate your willingness to address these questions, and I look forward to your early reply.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

U.S. DEPARTMENT OF STATE,
Washington, DC, 20520 October 3, 1986.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe, Committee on Foreign Affairs, House of Representatives.

DEAR MR. CHAIRMAN: This letter provides answers to the questions contained in your letter of July 14, acknowledged by us on July 22. The answers are keyed by number to the questions in your letter.

1. The Sandinistas will continue their present internal and foreign policies until they realize that opposition to them is too strong to be ignored or successfully repressed by application of force. At that point they would hopefully move to accommodate opposition forces, including the democratic resistance. Until that time, we expect opposition political parties, the media, and the Church to face continued repression. There are no signs that the Sandinistas are decreasing the role of Cuban and Soviet bloc advisers.

2. Experience shows that the Sandinistas only negotiate when forced to. Our aid will allow the resistance to provide the needed pressure to bring the Sandinistas into dialogue. We are unable to predict with accuracy when this will happen, but we believe at some point the Sandinistas will have to accommodate the discontent represented by the opposition forces or face being overwhelmed by popular discontent.

3. Our aid to the resistance is intended to lead at some point to a dialogue between the resistance and the Sandinistas. While we cannot provide a detailed outline of the steps leading to a democratic government in Nicaragua, suspension of the state of emergency—including lifting censorship and other curtailments of civil liberties—would be a logical starting point. This would hopefully lead to free and fair elections.

4. We are reluctant to speculate on future aid requirements until we can evaluate the effectiveness of the current program.

5. We are reluctant to provide a timetable or estimate funding needs until we can evaluate the effectiveness of the current program.

6. The $100 million will support the current level of forces—around 20,000. Some force expansion is expected as more Nicaraguans despair of voluntary action by the Sandinistas to live up to their 1979 promises of freedom in Nicaragua.

It is possible that the resistance will be able to capture and hold towns for short periods of time. This, however, is not essential to success. I would point out that during the years of the National Liberation Front's efforts to unseat Somoza, its forces never took and held territory. What is essential is that the resistance establish a presence and publicize its political program so as to be viewed as a realistic alternative to the Sandinistas.

7. The $100 million is a sign that the resistance is assured of much-needed support. It will allow the resistance to more effectively publicize its political program and to establish an increased presence in Nicaragua. This will lead to it's being seen as a realistic alternative to the Sandinistas by the Nicaraguan people, a necessary development if the Sandinistas are to participate in any genuine effort at internal reconciliation.

Support for the resistance will be evidenced by increased recruitment and logistical support from the populace. In addition, there would be increased restiveness about Sandinista controls and rationing.

8. We are reluctant to speculate on amounts and sources of private and other aid to the resistance since it does not flow through U.S. channels.

9. The Sandinistas' repressive policies have come under increasing attack and criticism from nearly all non-Soviet bloc countries. While we may disagree somewhat about tactics, these countries would welcome any move toward a more open, pluralistic society in Nicaragua. Specifically, we would like to see more aid directed toward the region's democracies and calls for dialogue with the resistance.

10. The Soviet bloc and Cuba will continue to provide economic and military support to the Sandinistas until convinced it is a losing cause. There may be deliveries of more helicopters, but we doubt that there will be a major increase in either quantity or quality of equipment provided.

We do not expect a major increase in numbers of advisers in Nicaragua.

Our position that the introduction of advanced combat aircraft into Nicaragua would be unacceptable has been made clear to the Soviets.

The Soviets have not made a security guarantee to the Sandinistas. We believe they recognize that the Caribbean is of vital strategic importance to us, but only of peripheral interest to them. They also recognize the disadvantages they face based on the realities of geography.

11. We would be pleased to provide you with a classified briefing on the details of training and logistical support, including the role of non-governmental contractors.

12. We cannot make such an estimate until we can evaluate the program.

13. We do not consider the provision of assistance to the Nicaraguan democratic resistance to be tantamount to a declaration of war. Assistance is provided pursuant to federal statute in accordance with the terms and conditions of such law.

I hope this provides the information you require. Be assured that the Administration intends to work closely with the appropriate Congressional committees in the development and implementation of the program. In this regard, we will be able to provide more detailed information about the implementation of United States assistance to the Nicaraguan democratic resistance to you and your colleagues on the Permanent Select Committee on Intelligence.

With best wishes,

Sincerely,

J. EDWARD FOX,
Assistant Secretary, Legislative and Intergovernmental Affairs.

THE "THEATER AT WILLIAMSBURG" AND A COMMEMORATIVE POSTAGE STAMP

HON. HERBERT H. BATEMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. BATEMAN. Mr. Speaker, this year marks the 270th anniversary of the founding of the first theater in America. I would like to share with my colleagues some thoughts on this anniversary and on the importance of recognizing the history of theater in America with a commemorative postage stamp.

The first theater in America was built in Williamsburg, VA, by a merchant named William Levingston. Two performers, Charles and Mary Stagg, had been bound to Mr. Levingston as indentured servants for the purpose of providing dance instruction for his family. Soon dance instruction was being provided for the general public, and its popularity led to plans for theatrical performances. In 1716, Mr. Levingston released the Staggs from their servitude and, on July 11, a contract was recorded by which William Levingston agreed with Charles and Mary Stagg to build a theater in Williamsburg.

By November 1716, Levingston had "at his own proper Cost & Charge sent to England for Actors & Musicians for the better Performance of the sd. Plays." In early 1718, he completed constuction of a theater 86 feet long and 30 feet wide, and on May 28 Gov. Alexander Spotswood sponsored its first production, a play in celebration of the birthday of King George I.

The establishment of professional theater so early in our Nation's history is a testament to the important role the theater has played, and continues to play, in America. That is why it is important to pay tribute to the long history of the theater in America with a commemorative postage stamp. I encourage my distinguished colleagues and their constituents to urge the Citizens' Stamp Advisory Committee to commission a theater stamp, and provide well-deserved recognition for the many contributions the theater has made to the cultural development of our great Nation.

CONGRESSMAN MILLER PRAISES "PROS FOR KIDS"

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. MILLER of California. Mr. Speaker, in late July of this year, I had the great pleasure of opening the first "Pros for Kids" camp in Contra Costa County with its director, Chuck Latting, and Delvin Williams, formerly with the

San Francisco 49'ers and now the group's president.

Both Chuck and Delvin are to be commended for their dedicated efforts on behalf of our young people. "Pros for Kids" was established over 3 years ago as a vehicle for professional athletes and kids to communicate about the hazards of drug and alcohol abuse. Their involvement and commitment to our young people and their communities is outlined in the following Contra Costa Times' article. I look forward to making "Pros for Kids" an integral part of our children's lives, and there are no finer examples of how to succeed than Chuck Latting and Delvin Williams.

[From the Contra Costa Times, Oct. 11, 1986]

NANCY REAGAN, EX-BRONCO, ON DRUG WARPATH

(By Jon Bashor)

MARTINEZ.—When Charles Latting joins First Lady Nancy Reagan for dinner in San Francisco in three weeks, they'll have plenty in common and plenty of company.

Latting, who's lived with his family in Martinez for 17 years, and Reagan both devote much of their time fighting drug abuse. Their paths will converge at the St. Francis Hotel for a banquet to raise money for drug abuse prevention. Seven thousand invitations have been mailed asking other Northern Californians to join them.

The dinner benefits "Pros for Kids," a group formed 3½ years ago by former San Francisco 49er running back Delvin Williams after his career was cut short by cocaine abuse. Latting, who played four seasons as defensive back for the Denver Broncos, is a leader of the Contra Costa chapter.

But it wasn't his years on the gridiron, nor his duty as a Marine Infantry commander in Vietnam, that led Latting to declare his own personal war on drug and alcohol abuse.

A special agent with the FBI since 1969, Latting said he has seen drugs take their toll on every level of society, including "corporate presidents who are so stoned they can't dial their phone, to a street junkie with a needle hanging out of his arm."

For the past three years, Latting has been a member of President Reagan's Narcotics Task Force. Based in the Concord office of the FBI, Latting spends most of his 50-hour work weeks investigating drug dealing.

"As an investigator, it became evident to me that we have to do something," said Latting, who at 51, is tan and fit. "We're going to lose this country if we don't do something about the demand for substances."

The impressions he got at work were reinforced at home, as Latting and his wife, Rhoda, raised three sons. A graduate of—and football All-American at—Iowa State University, Latting said he was taught that facts are the most important part of an education.

Though he wanted his sons to study science, all three majored in the liberal arts. The oldest, Chuck, is 29 and working on his doctorate degree at the University of Arizona, John 21, is a senior at Stanford University and Robert, 19, is a sophomore at Pacific Lutheran University in Tacoma, Wash.

"Now I understand that they had the answer and I didn't" Latting said. "Learning to think is more important than learning to be good scientists."

Thinking is the best defense against social and peer pressure, Latting said. Society's trend toward equating success with money, a breakdown in communication between generations and easily available drugs have combined to create a danger that is greater than anything else the United States faces, he believes.

Foreign powers and terrorism pale by comparison, said Latting, who trained many Northern California police departments in SWAT and anti-terrorist tactics for eight years. During his career, he's been called out to 14 skyjackings.

"I'm not a liberal or a conservative, but, boy! something's got to be done," said the Tennessee native.

Pros For Kids arranges for pro athletes to talk to junior and senior high school students about the hazards of drug and alcohol abuse. The group just got a $1.2 million grant from the state of California to develop pilot programs at four schools each in Northern and Southern California. The money will pay for semester-long classes taught by trained athletes.

The San Mateo-based group also sponsors the Teen Alternative Program, student-run clubs on campuses that develop and present their own drug abuse messages, and sponsor assemblies and rallies at schools.

This summer a five-day football camp sponsored at Los Medanos Community College by Pros For Kids drew 90 Contra Costa youngsters, teaching them about the sport and about drug abuse. The program is getting off the ground in Contra Costa County, but Latting said more help is needed from local businesses and current and former professional athletes in the county.

Latting said fighting the drug problem should start at home, but that society cannot impose guidelines on parents. The alternative, then, is to reach young people in school.

"If there's going to be any change, it's going to have to happen in the schools," he said. "Parents, teachers and students need to spend time learning to communicate."

Athletes are asked to help as volunteers because they attract young people.

"We're not in the business of glamorizing athletes, but the athlete does capture the imagination of the kids." Joe Montana would outdraw a Nobel laureate scientist at a school assembly, he said.

The programs are aimed at teaching young people to prepare for their goals in life, whether they are career or family oriented, Latting said. "Life's like an athletic contest—the person who prepares best wins. If you want to get to the Super Bowl of life, you have to prepare better than anyone else—then play one game at a time."

"Some people want life in the fast lane, but lights are sometimes yellow and sometimes red," he said. "Life's sometimes tedious and mundane."

Knowing that life is not always easy and getting by without drugs is what the program teaches. Messages delivered by athletes may not reach every student, but it's a way to start tackling the issue, he said.

"You've got to peck away at the problem. You can't go out there and fight all the windmills in the world at one time."

The Oct. 29 $200-a-seat banquet, at which the first lady will be the honored guest, is expected to raise about $500,000 for the program.

Joe Montana and 49er teammates, and baseball stars Steve Garvey and George Brett are among the sports figures expected to be on hand.

Still, with all the big names and big money involved, Latting said it is the young people who make the program worthwhile.

"When you see one kid you know was headed in the wrong direction and your efforts create an environment where that kid can turn himself around . . . You see that happen one time and that's all it takes."

OUTSTANDING ACCOMPLISHMENTS OF HANS DOE

HON. RON PACKARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. PACKARD. Mr. Speaker, Mr. Hans H. Doe, a Vista, CA, resident since 1946, will be retiring from the board of directors of the Metropolitan Water District of southern California on October 20, 1986.

Mr. Doe has served the water community of California faithfully for over 35 years, the last 27 years of which he served continuously as a member of the MWD board representing the San Diego County Water Authority.

Some of the projects of benefit to San Diego County during his tenure include the construction of the State water project at a cost of over $2 billion, construction of Lake Skinner and its Robert A. Skinner Treatment Plant at a cost of over $30 million and, most importantly, the development of a water system allowing MWD to deliver an ample supply of imported water to nearly 13 million persons in the counties of Los Angeles, Orange, Riverside, San Bernardino, Ventura, and San Diego.

Mr. Doe started this extensive water career in 1950 on a temporary basis—the rest is history.

I would like to salute the outstanding accomplishments of Mr. Hans Doe and his wife, Margaret. It is through dedication to service, foresight, and long-range planning that the citizens of San Diego County enjoy the fruits of his labor.

JIM WEAVER

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. LEHMAN of Florida. Mr. Speaker, no one ever said JIM WEAVER is just a average Congressman. He is indeed very out of the ordinary.

JIM has always acted on the strength of his convictions, no matter how powerful the opposition. He recognized the importance of protecting our public lands even though that meant taking on the big timber interests in his own State. He was somewhat of a prophet when he warned of the financial disaster that would follow the issuance of the now infamous WPPSS bonds. He has never been deterred from doing what he believes is right.

His willingness to take an unpopular stance may have made it difficult for some Members to get to really know him. Yet, if one took the time to break through his reserve, he was a delightful companion.

Institutions like the Congress can become pretty stuffy at times, but because of JIM,

Congress is less self-satisfied, less rigid, and at times more fun. I will miss my friend JIM WEAVER, and I wish him all the best in the future.

RETIRED SENIOR VOLUNTEER PROGRAM

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. MAVROULES. Mr. Speaker, I rise today to bring to the attention of my colleagues the 15th anniversary of the Retired Senior Volunteer Program [RSVP], and to commend those individuals who have made this program such a tremendous success. As we all know, RSVP is a nonprofit, community-based program designed to recruit, refer, and support elderly volunteers who serve both private and public agencies in local communities.

RSVP, initially composed of 10 chapters located throughout the United States, is an outgrowth of a 1971 White House Conference on Aging. By 1973, the time at which ACTION was created to fund all Federal service programs, RSVP had expanded to 660 chapters. Today, there are more than 760 chapters in the United States, employing more than 500,000 elderly volunteers. Each year, these volunteers provide in excess of 64 million hours of volunteer services to over 50,000 community organizations and nonprofit agencies across the Nation. They represent a spirit of volunteerism in which all Americans can truly take pride.

The volunteers of RSVP touch the lives of thousands of Americans each day. The services they offer are far-reaching, affecting all Americans, both young and old. You may find an RSVP volunteer serving food for Meals-on-Wheels, or counseling a confused teenager. Programs which benefit from RSVP include those offering assistance for battered and abused children, as well as for runaways. The program is involved with home repair, food banks, crime prevention, education, and in-home care. The insight and wisdom offered by the elderly are valuable to people with questions on topics ranging from insurance and taxes to family planning and consumer protection.

Mr. Speaker, the success of the Retired Senior Volunteer Program is to be commended by all. Not only has RSVP succeeded in providing volunteer services, it is also one of the most cost effective federally funded programs in existence today. For a minimal investment, the Government and citizens of the United States receive over $200 million of volunteer services every year. The return on Federal investment averages $7.50 worth of service for every Federal dollar spent. Moreover, RSVP has not requested or received an increase in its Federal grant money for over 8 years. This is truly remarkable when one considers the increases in the cost of living which have occurred over this period.

It is important to note that while touching the lives of those Americans in need of volunteer services, RSVP simultaneously offers an invaluable and rewarding experience to elderly volunteers. It allows America's senior citizens to give to the community a knowledge and insight which is only gained through life's experiences. The program provides our elderly with a sense of accomplishment and pride, providing them with an opportunity to really make a difference.

As I have already said, RSVP is a program in which we can all take great pride. Every individual involved in this valuable program should be commended for taking an active role in the improvement of American society.

TRIBUTE TO OLIVER HAAB

HON. JOHN HILER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. HILER. Mr. Speaker, it is with special pride that I bring to my colleagues' attention the story of a very remarkable man, Mr. Oliver Haab, of Milford, IN.

On October 2, 1986, Mr. Haab, known as Ollie to his friends and coworkers, celebrated his 25th anniversary of working with Brock Manufacturing. This, alone, may not seem like an exceptional achievement, however, Ollie is 87 years old and he first began working for Brock Manufacturing at the age of 62. His "first" job was at a local greenhouse where he worked for 33 years.

At Brock Manufacturing, Ollie involves himself with all stages of his work. His supervisors note that he does everything from setup operations to equipment maintenance. In addition, Ollie is active in the plant's "Doing It Better"—quality circle—program, and takes it upon himself to train young workers on how they can most effectively perform their jobs.

Ollie has no plans to retire and states that he works, quite simply, because he likes to work. In fact, Ollie often puts in overtime. Clearly, Oliver Haab demonstrates the true American spirit and appreciation for a time-honored work ethic. Furthermore, Ollie reminds us all of the great wealth of knowledge our senior citizens possess and is an example of the many ways older Americans enhance our daily lives.

Again, I am very proud to represent Mr. Oliver Haab, and I am honored to share his outstanding accomplishments with you. Please join me in wishing Ollie continued happiness in his long and successful career.

TRADE AND COMPETITIVENESS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, October 15, 1986, into the CONGRESSIONAL RECORD.

TRADE AND COMPETITIVENESS

America is in the economic fight of its life. We are beset by a trade crisis that threatens the further loss of jobs and national wealth and the steady decay of our economy's underlying strength. U.S. businesses in nearly every manufacturing sector have lost market share at home while exports face market barriers and unfair trade practices abroad. Two million workers have lost jobs in a flood of imports, from textiles and steel to electronics and biotechnology. The trade deficit could reach $185 billion this year, up from $30 billion just 5 years ago. Despite a year in which trade policy was one of the most talked about issues, the President and the Congress have yet to develop a hard-hitting program to deal with our trade problems. America, once the preeminent player in world trade, finds itself today playing second or third string in every market.

There are several reasons for this decline. We have not kept our economic policies in order. We have been slow to develop a comprehensive trade policy. We have proceeded on a case by case basis making decisions first about steel imports, then about textiles, then about exchange rates, but we have had no game plan for winning world trade. We have sat by while many nations fudged on the rules of fair trade, through dumping, subsidies, and closed markets. Unfair trade practices account for less than 20% of our trade deficit, but those practices are an irritant and they are important.

We simply have to take charge on trade and competitiveness. We can no longer ignore the global economic challenge. We have to develop an effective strategy to lower our trade deficit, to become more competitive, and to help those, particularly workers, who are hurt by imports.

First, Congress and the President must work together to shape up our basic economic policies. The best trade policy is a good economic policy. The new tax bill—which makes taxes fairer and reduces tax distortions of investment decisions—was a step in the right direction, but much more can be done. On the broadest policy level, the federal budget deficit must come down, interest rates must be reduced and we should work toward a more stable and balanced fiscal and monetary policy mix. Lower federal deficits should free capital for productive investment. Lower real interest rates should bring the dollar back into balance with other currencies. We should also review and, where necessary, revise specific tax provisions, regulations and anti-trust laws that hinder competitiveness or distort capital flows.

Second, our long-term strength in trade depends, in a word, on investment, both public and private, in productivity: in research, technology, infrastructure, education, plants and equipment. Our competitive edge hinges on a solid foundation of science and technology. However, U.S. productivity growth is now the weakest of all industrialized nations, and we are quickly losing the technical edge that enables our industries to pay higher wages than other countries yet still compete in world markets. We certainly have to invest more in human resources, by improving public education, attacking adult illiteracy, and expanding job retraining. America need not become poorer in order to compete, but America must become more productive in order to prosper.

Third, the President and Congress must work to develop a comprehensive trade policy. The President's top priority should be the new round of multi-lateral trade talks to strengthen the world trading system, the General Agreement on Tariffs and Trade (GATT), and to further reduce barriers to world trade. The upcoming GATT talks should open trade in agriculture and services, two major sources of ex-

ports for the U.S., but the talks may not conclude until the mid-1990's. In the shorter term, the President must respond swiftly and forcefully to protectionist policies of foreign governments even if that means temporarily denying access to our domestic market. Foreign markets should be as open as ours.

U.S. trade laws have not been overhauled for a decade, and Congress should make passage of a comprehensive trade bill a top priority when it reconvenes in 1987. Current laws do not adequately address the trade problems we now face, and their complexity discourages many U.S. firms from exporting. Any trade bill passed by Congress should include: centralization of trade policymaking in one government agency, probably the Commerce Department; tougher laws against unfair foreign trade practices; a new requirement that the President grant relief to industries and workers injured by foreign imports; enhanced trade adjustment assistance; and simplified export regulations and licensing laws.

Finally, a comprehensive trade policy should include greater efforts to promote U.S. exports. Less than 1% of U.S. firms account for 80% of our manufacturing exports. Americans must become more export-minded. Besides opening foreign markets and improving productivity and competitiveness, we need to expand export credit and loan guarantee programs for U.S. farm exports. We must use the Export-Import Bank to offset the use of export subsidies and mixed credits by our trade rivals. We have to improve the collection and distribution of market information. We should also work to resolve the debt problem in developing countries, like those in Latin America which are our largest potential export markets.

There's no mystery about what we have to do. We have to out-produce, out-sell and out-smart our trade rivals. Much is at stake: Our position as a world leader our standard of living, our national security and our ability to fund domestic programs all depend on our competitiveness in the global marketplace.

Government, of course, cannot legislate success. Success in trade depends primarily on the private sector, but government can highlight the importance of competitiveness and promote consensus-building dialogue among leaders in industry, labor academia, and the public sector. Government needs to provide stable economic policies, an educational system that prepares our people for the future, a marketplace that nurtures technological innovation, fair world trading systems, and policies to help U.S. firms and workers adjust in a changing world market.

REYKJAVIK IN RETROSPECT

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. FLORIO. Mr. Speaker, the recent discussions held by the leaders of the United States and the Soviet Union in Reykjavik, Iceland, have spurred intensified debate on the prospects of reaching an arms control agreement and averting nuclear disaster. The events surrounding this meeting have further reinforced the need for continued negotiations to break the impasse we find ourselves in.

During my recent visit to the Soviet Union, I met with Mr. Donald Kimelman, the Philadelphia Inquirer Bureau Chief in Moscow. Mr. Kimelman has since returned to the United States and has joined the Editorial Board of the Philadelphia Inquirer. I welcome Mr. Kimelman back and look forward to continuing to benefit from his views. I was pleased to see his recent op-ed relating to the Reykjavik meeting and I would like to commend his insight to the attention of my colleagues:

GORBACHEV GOT WHAT HE WAS AFTER

(By Donald Kimelman)

If President Reagan's advisers did not smell trouble immediately when Mikhail S. Gorbachev proposed an unchoreographed get-together in Iceland, they should have realized the full extent of their peril when word got out that Raisa Gorbachev was coming. Here supposedly was a low-key "working meeting" between the two heads of state—a mere prelude to a real summit in Washington a few months hence—and the Soviets were moving in the heaviest artillery in their high-tech p.r. arsenal.

In retrospect, the inclusion of Raisa should have been the tip-off that the Soviets had decided on a two-track strategy for Reykjavik. Either they would go home with an arms deal of historic proportions or they would be positioned ideally to blame the failure to reach agreement on the Reaganites' intransigence.

The deal fell apart over "Star Wars," as the Soviets might have suspected from the outset, but Gorbachev did not leave Reykjavik a loser. He simply switched to the parallel track, the one on which image matters more than substance. No longer Nick Daniloff's surly kidnapper, Gorbachev emerged from the summit having refurbished his image as a new kind of Soviet leader who, with his attractive wife at his side, seems willing to go the extra mile to bring peace to the planet.

At a press conference Sunday night, Gorbachev told the people of the world that the two leaders were on the "verge of taking major, history-making decisions." Medium-range missiles were to be eliminated from Europe and sharply reduced in Asia. Strategic missiles were to be cut by half and eventually phased out completely. The documents were drawn up and ready for signature, but, alas, the Americans could not part with their dream of achieving military superiority by placing weapons in space.

The President's response—that the Strategic Defense Initiative is too precious to the nation's future security to trade away—is controversial enough in this country. One can imagine how well it will play in Europe now that is clear that Reagan passed up the opportunity to eliminate the greatest perceived threat to European security—Soviet medium-range missiles—in exchange for a program that is widely viewed as protecting America lives at the expenses of all others.

The general assumption prior to the wild weekend at Hofdi House was that the meeting would nail down the terms for an "interim" agreement of medium-range missiles while finessing the intractable differences on Star Wars. The way would then be cleared for Gorbachev's trip to Washington, which in turn would set the course for the hard bargaining on strategic and space weapons.

But Gorbachev changed the script and went for broke in Iceland. Not out of desperation, but in a cleverly calculated way. Having surprisingly agreed in Geneva last November to pursue a separate agreement on medium-range missiles, he reverted to the previous Soviet line that all nuclear-arms matters had to be decided in unison and that the entire outcome was dependent on an ironclad agreement to prevent the militarization of space.

What gave new life to that once-tiresome refrain was the setting. In a development that had seemed inconceivable two weeks earlier, the two leaders suddenly were together again on the remote shores of a storybook island-nation (choice of site and timing Gorbachev's), thrashing, out the central issues of our time. The Soviets brought new proposals and soon let it be known through leaks that infuriated White House spokesman Larry Speakes that something momentous was at hand.

Imagine the sinking feeling Sunday afternoon when the Reagan camp realized how Gorbachev's surprising flexibility on a range of issues that had bedeviled negotiators for many months was all contingent on the one step Reagan had said time and again he would never take—abandonment of Star Wars. Until that point, the notion of a grand trade of offensive missiles for defensive potential had seemed more a long-term goal than an immediate possibility, something for the negotiators to chisel away at. But with a giant press corps on hand to record the outcome, Gorbachev forced the President into making an unambiguous choice.

After the meeting broke up, a glum Secretary of State George P. Shultz said that the Soviets had demanded something that "predictably was not possible for us." The Soviets might not have been dead certain that the President would say no, but they clearly were ready to capitalize on that eventuality.

Robert Legvole, director of Columbia University's Harriman Institute for the Advanced Study of the Soviet Union, said yesterday that Gorbachev achieved at Reykjavik what he had been unable to do with his 14-month-long unilateral moratorium on nuclear testing or his grandiose plan for nuclear disarmament by the year 2000.

Gorbachev finally seems to have created serious divisions within the American foreign policy establishment and quite possibly within the European alliance as well. A wedge has been driven between those who supported Star Wars as the ultimate bargaining chip and those who still view it as the ultimate weapon.

Gorbachev eventually may decide to strike a compromise on Star Wars, but for now he can simply sit tight and see how it plays out.

"I feel the President probably would have to seek the advice of Congress, of American political leaders, of the American public," Gorbachev said Sunday night, invoking all the forces that a democratic leader must contend with. "Let America think. We are waiting."

BILL AMBROGIO HONORED FOR SERVICE TO COMMUNITY

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. MORRISON of Connecticut. Mr. Speaker, on October 17 I will be joining friends and colleagues at a testimonial dinner in West Haven, CT, to honor William Ambrogio, who is

completing a 2-year term as Exalted Ruler of the West Haven Elks.

At 82, Bill Ambrogio still exhibits all of the extraordinary energy, dedication, and community spirit that have made him a leader in the Greater New Haven area for more than half a century.

In addition to being an active businessman for 45 years, Bill Ambrogio served as a State representative for two terms representing Connecticut's 95th District, as Democratic ward chairman for the 8th Ward in New Haven, as a member of the boards of the New Haven Rehabilitation Center and the Cerebral Palsy Association, and for many years as president of the board of the Elder newspaper, among many other community activities. He has been an active parishioner of Sacred Heart Church and has served on its parish council.

I have worked closely with two of Bill Ambrogio's sons, are good friends and respected colleagues of mine, John Ambrogio, Chief of Police in Hamden, CT, and Pat Ambrogio, deputy commissioner of administrative services for the State of Connecticut.

Bill Ambrogio has always been guided by the values of friendship, family, church, and community. He has given a great deal to all of us who live in the Greater New Haven area, and I take great pride in sharing his accomplishments with my colleagues today.

TRIBUTE TO THE VERMONTVILLE-GRESHAM UNITED METHODIST CHURCH

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. WOLPE. Mr. Speaker, I want to pay special tribute to the Vermontville-Gresham United Methodist Church in Vermontville, MI, on the occasion of the dedication of its historical marker on October 19, 1986.

In 1839, with the visit of Rev. Isaac Bennett, the first Methodist sermon was given in Vermontville. The first Methodist class was conducted in March 1845, when the congregation became a part of the Eaton circuit of the Methodist Episcopal Church. The Methodist Episcopal Church was renamed the Vermontville-Gresham United Methodist Church in 1868. The church is currently being served by Rev. Glen Litchfield who is the 59th pastor to follow Rev. Josiah Fowler, the church's original pastor.

There are many dates important to the history of the Vermontville-Gresham United Methodist Church: 1839, when the Michigan Conference established Vermontville as a separate charge; 1862, when the church building was erected 2 miles northeast of the village of Vermontville; 1877, when the church building was moved to its current location in the town square in Vermontville and the belfry and tower were constructed; 1878, when the Vermontville-Gresham United Methodist Church was rededicated on its new site. The church is particularly proud of its tooled metal ceiling with its intricate scrolling and artwork believed to have been created by Mr. Frank Bailey, a Vermontville tinsmith.

Mr. Speaker, the dedication of the historical marker commemorating the founding of Vermontville-Gresham United Methodist Church is a very special event, reflective of the church's sense of its own history and its confidence in its future. I feel privileged to represent the members of the Vermontville-Gresham United Methodist Church and to work with constituents who use the celebration of their history as a means of rededicating themselves to their religious heritage and to their community.

THE RETIRING OF CONGRESSMAN G. WILLIAM WHITEHURST

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 14, 1986

Mr. BENNETT. Mr. Speaker, WILLIAM WHITEHURST has been a Congressman's Congressman in the sense that his wisdom and good common sense are so well accepted here that he is frequently sought out for advice. A member of the House Armed Services Committee, he has been close to me in many discussions in that committee. He is always sincere, forthright and intelligent in his approach to questions before Congress. We will miss all those good things when he leaves. However, we know that in his return to the college campus many young people, leaders of the future, will be helped by him. As we lose him here, they will be the gainers, and it is typical of him that he thus projects his good deeds for the future. We hope he will often return to visit with us.

THE GLORY OF THE ROSE

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. CHAPPELL. Mr. Speaker, today, I would like to submit for the RECORD a beautiful written essay on the rose, our newly proclaimed natinal flower. This outstanding piece of literature, entitled "The Glory of the Rose," was provided to me by Cherie Gardner, a personal friend of mine for many years. The completion of Cherie's extenisve research comes at a most appropriate time and serves to educate its readers on the intriguing history of this precious flower. As a cosponsor of House Joint Resolution 385, the House version of the resolution to declare the rose as our national floral emblem, I invite you to peruse this well-done narrative and discover the countless attributes of the rose.

THE GLORY OF THE ROSE

(By Cherie Gardner)

The rose has been known to man from the earliest hours of history. It has been mentioned in story and song in all ages. It is the eternal flower of love, the emblem of sentiment. "All the world loves the lover," said Emerson. And it is true that all the world loves roses, probably for the same reason. Cherished in the palaces and gardens of the rich and mighty, it is nevertheless, the flower of all classes and stations in life.

The fancier may differ in his tastes; the pocketbook may dictate the choice of many; the wealthy gardener may have the most exquisite flowers of every land and clime at his beck and call, but all unite in claiming the rose as the first flower. And this universal love for the rose is unequaled elsewhere in all the things Nature has given us.

It grows wild in the temperate zone throughout the world. When the pioneers poured down over the Allegheny mountains and into the plains of Kentucky and Ohio, later upon the Prairies of Illinois, Iowa and the West, they found the wild rose everywhere. Many a prairie home was gladdened and enriched in those troublesome days by the splendor and color of the wild rose. It brought a vision of peace and of lofty sentiment to those sturdy souls in their hours of struggle; it gladdened the hearts of the lovers and brightened frontier weddings without number. The first flower that the bride planted in her dooryard, whether in the forest of Kentucky or in the sod huts of Kansas, was the queen of the prairie, the wild rose.

The rose has left an imperishable imprint upon the literature of all times and races. During the days of feudalism and chivalry, it was the accepted badge of favor. Sturdy knights and mighty warriors battled the one with the other in contests of strength to win the rose of some fair lady. To have this gift from the gentler sex was a higher tribute than any that royalty might bestow.

In the period of the Renaissance, when the blight of the dark ages was lifting before the dawn of modern literature, we find the rose still the favorite of mankind. When Dante thought of queenly Beatrice, he sang sonnets to the rose.

To trace the rose in literature would be to produce a compilation of the work of all authors and poets. Never has man or woman achieved fame in letters without writing of the rose. The literature of France, of Spain, of England, of sturdy old Scotland, of Scandinavia, of America, is replete with it.

We find it even in the fables of antiquity. Among the ancients it was held sacred to Cupid and Venus, called Eros and Aphrodite, respectively, by the Greeks. They considered it the emblem of joy and love, and at the same time, of prudence.

The Romans placed it over the door when a feast was in progress and whoever passed under it brought upon themselves a solemn obligation not to reveal what was seen or overheard. From this custom the term sub rosa, meaning "under the rose," as applied to anything revealed in confidence.

Later, it was placed at the entrance to confessionals at Rome, as a symbol of secrecy. In poetry, it has always stood as a symbol of purity and innocence. Anacreon, the great lyric poet of the sixth century before Christ, wrote of the origin of the rose, which he claimed sprang from bathing Venus' blushes when she caught Jupiter spying on her. Shakespeare mentions the rose at least 70 times. His Juliet asks, "What's in a name? That which we call a rose by any other name would smell as sweet." Also well known in Gertrude Stein's rhythmic phrase, "Rose is a rose is a rose," which she had printed in a circle.

In art, as literature, we find it going back to the very dawn of the Aryan race. It is seen in the art of the Greeks, the Romans, the Egyptians, the Assyrians. The Etruscan rose is almost as famous as the Etruscan vase. The rose has been distinctly a favorite of the Western world, as distinguished against the Orient. It is strikingly absent in

the horticultural affairs of the early Chinese and Japanese.

In history, the rose has played an important part. In the days of Heraldry, it was a badge worn by whole armies. The badge of the House of Lancaster was the rose gules and the rose argent of the House of York, Henry VI, King of England, was surrounded and supported by loyalists of the House of Lancaster in his claim to the throne. Richard, Duke of York, had a better claim to the throne by descent and his supporters provoked one quarrel after another with the Lancastrians, in the hope of ultimately placing Richard on the throne. The personal emblem of the Duke of York was a white rose, which his followers adopted in order to distinguish friend from enemy. The House of Lancaster promptly adopted the red rose as its emblem. From this fact, the struggle between the two families for the throne of England, which lasted several years, came to be known as "War of the Roses." Thus, the rose played an important part in at least one war, one which destroyed the flower of English manhood and eventually made it possible for the French to drive the English off the continent forever.

As years progressed, roses became better understood by the people at large; they became more common in family gardens and the uses to which they were devoted in addition to their bloom, brings a fuller realization of the glory and beauty of the rose to every lover of Nature. It needed time for the impression that rose culture was not for the masses; that this queen of the florists' art was distinctly a creature of skill and intricate care.

The rush of commercialism in the early days of the present industrial age seemed to sweep all sentiment, all love for the leisurely joy of growing things and enriching life and home with flowers, out of our lives. But the advent of universal prosperity, the coming of the thought that of all attainments, the home is the most important, the settling down of America to dignify and enrich herself in the worthier things, has swept back that old desire, that old longing, for the "vine over the door."

And never before have we all been so favored whether here of elsewhere. The modest gardens in most cities outrank those of the aristocracy of yesterday. Many homes today boast of more ingenious planting—larger and better gardens than those of her Colonial grandmother.

The natural love for the rose has had a great deal to do with this revival of interest in floriculture. Hardly has sod been turned before thoughts of roses blooming in the garden come to the garden lover. It assumes expression often before a shrub is planted or lawn established.

The rose stands for permanency. It has none of the disadvantages of annual flowers which endure for a season and must be planted again each succeeding spring. It endures from year to year, blooming each season and attaining a varying growth depending upon variety. It blooms the first season, if properly established, and continues to repay the gardener throughout the years. The Teas and Hybrid Teas are, as a general rule, continuous in the blooming habit and Hybid Perpetuals display the same admirable trait.

There is a rose for every climate where people live in any considerable numbers. Wild varieties are found in Lapland and Labrador. Even the delicate teas are successfully grown outdoors in Canada, where thousands of them are to be found in public parks.

As there is a rose for every climate, so there is a rose for every purpose, susceptible of outdoor cultivation. From the tiny polyanthus to the giant and rugged rugosas and climbing varieties, there is a wide selection for almost any condition that may be present. Unsightly terraces or bare spots in lawn or park or cemetery may be made a place of beauty with the creeping varieties.

In the rose, we find all the variations which climate, nature and skill a person can combine. It is not extraordinary, then, that the rose should have the universal place it holds in the hearts of so many people in all classes and in all climes. It is the universal flower and its appeal in that direction is only indicative of its merits.

TRIBUTE TO TOM LOEFFLER

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 7, 1986

Mr. LIVINGSTON. Mr. Speaker, TOM LOEFFLER's departure from this institution will be a tremendous loss to all of us, but particularly to this administration and the people of Texas and this country. TOM's effectiveness, influence, and abilities in the House of Representatives rank him among the best leaders of this institution. I say this sincerely. Though TOM never received a great deal of national attention, his quiet effectiveness behind the scenes was directly responsible for every major Reagan administration victory since the beginning of 1981.

From Gramm-Latta to Gramm-Rudman, TOM was there to formulate the strategy, count the votes and get the votes this administration needed in a democratically controlled House to achieve one of the best records of any administration in recent history.

Mr. Speaker, TOM has been the epitomy of a great legislator, and I have no doubt that while his political career may be temporarily interrupted, it will bloom with even greater vigor in years to come.

TOM is a personal friend of mine, as a former neighbor and colleague, I will miss him. But his presence in this House has benefited and will continue to benefit our Republican Conference, the Reagan administration and the Nation well into the future.

CONGRESSMAN MILLER URGES INDIA PROTECT SIKH MINORITY RIGHTS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. MILLER of California. Mr. Speaker, last year, Indian Prime Minister Rajiv Ghandi visited the Congress and afforded many of us an opportunity to discuss issues concerning the relations between our two nations.

For those of us who believe that human rights should remain a significant priority in the foreign affairs of this Nation, the continuing actions of the Indian Government with respect to the civil and political rights of the Sikh minority are very troublesome.

There is little question that there has been violence and other illegal acts on each side. The Government's assault on the Golden Temple in 1984 and the political and press crackdown which followed, and acts of violence committed by Sikh extremists have produced an atmosphere in which there is no winner.

Sikhs compose just 2 percent of the population of India, but that is equal to 16 million people. Clearly, it is folly for any government to attempt to deprive so significant a number of its countrymen of their basic political and civil rights. Nor is it just.

Despite their tiny minority status, Sikhs are among India's most productive and influential minorities. They produce more than half of the country's wheat crop, and 26 percent of its gross national product.

It is true that many Sikhs serve in the Government, and some at the highest levels. Yet millions of Sikhs are living in Punjab under conditions which, according to many reports, approach martial law. Police and the military have been granted widespread rights of arrest and detention. There are also serious allegations about religious intolerance and political persecution.

The accuracy of these allegations could better be determined if the world press were allowed free access to Punjab so that an independent assessment of the conditions there could be explored. Unfortunately, the Government of India continues to maintain a virtual ban on foreign access to Punjab by members of the press and human rights organizations.

I do not think that anyone in this Chamber denies that it is in our national interest to maintain a close relationship with the Government of India. But neither do I believe that, because of that desire, we should ignore the kinds of reports about repression of the Sikh minority.

Religious and political division has too long characterized India. The Government should be making constructive steps toward bringing the nation together under the laws and rights which are guaranteed to all Indians, Hindu, Sikh, and other minority groups alike. I would hope that our own Government would send that message to Prime Minister Ghandi, and reflect this concern for human rights in our future dealings with the Indian Government.

TRIBUTE TO JOSEPH R. FERRARA

HON. WILLIAM H. GRAY III

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. GRAY of Pennsylvania. Mr. Speaker, a great and generous man has retired from the UAW after 40 years of service to working men and women in the metropolitan Philadelphia area.

I know my colleagues will want to join me in paying tribute to Joseph R. Ferrara, who, as the union's area director of Sub-Region 9, labored diligently to protect the rights and benefits of the rank and file.

Those who worked with Mr. Ferrara when he presided over the UAW local at Budd Co. plan in north Philadelphia remember him as a caring individual. They remember his helping people get their Social Security checks and helping others to get their kids into college.

Mr. Speaker, it has been my good fortune to work with this remarkable man and to see firsthand his commitment to building a better community, a better world for all.

As a top official of one of the most progressive unions in the country, he has been at the forefront of social issues, including civil rights and women's rights.

We hope that Joe Ferrara will continue to be an asset in both the labor and political arenas. His humanitarism, his wise counsel, and unselfish dedication to his fellow Americans are sorely needed.

IN TRIBUTE TO THE PORT OF STOCKTON NATIONAL PORT WEEK

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. LEHMAN of California. Mr. Speaker, during the first week in October, virtually every American port city celebrates the importance of our Nation's ports. In special tribute to the Port of Stockton, located in my California district, I have joined in cosponsoring House Joint Resolution 714. This resolution authorizes President Reagan to officially recognize, during the first week of October, the importance of our Nation's ports.

The coastal, Great Lakes, and inland river ports are expressways through which goods worth billions of dollars pass each year. Since most goods in international trade are transported by ship and passthrough ports, they are the single-most important aspects of international trade and ocean transportation. Additionally, the commitment of our ports to building and maintaining modern and efficient shoreside facilities is an important contribution to the movement of international cargo. Our modern and efficient system of ports helps U.S. farmers and manufacturers to compete in the international marketplace.

For 55 years, the inland port in Stockton, CA, has been an important facilitator of trade and ocean transportation between American markets and many nations abroad. The Port of Stockton's deepwater facilities and operations link truck, flight, and rail systems with ocean carriers, shippers, and receivers on regional, national, and international levels.

Originally, the port district was created and developed to provide waterborne transportation for the abundance of products harvested from the fertile soil of the San Joaquin Valley. Through the years, the very existence of the port has had a profound effect upon the local economy and industry, with nearly 1 million tons of agricultural and related products currently moving across its docks each year for shipment to or from California and elsewhere abroad the world's bulk fleet.

Agriculture still plays an important an integral part of the port's present day operations, however, the port of Stockton's influence now extends far beyond that historical origin. Under the stewardship of Port Director Alexander Krygsman, the operation of Stockton's seaport has expanded to encompass the administration of vast capital resources and the operation and maintenance of a comprehensive physical plant capable of handling a wide variety of cargoes ranging from molasses and fertilizer to jet fuel and other petroleum products, clay, coal, sulfur, cement, cartons, finished steel, steel scrap, paper products, bagged grain, and more.

The Port of Stockton generates over 1,000 jobs directly, with an annual payroll of approximately $15 million. Another 3,000 to 4,000 jobs are generated indirectly for a total payroll impact of over $50 million.

The capricious nature of supply and demand, inherent to international trade, requires a flexible approach to business, both technologically and philosophically. In response to the contantly changing needs of shippers who must respond quickly to the whims of world commerce and a fluctuating economy, the Port of Stockton has innovatively designed, constructed, and installed multipurpose equipment which provides highly productive, cost-effective services to port customers.

This week I join many of my colleagues in the House of Representatives to pay tribute to all of the ports of our Nation, especially to the Port of Stockton. In declaring the first week of October as National Port Week, it is my hope that the citizens of our Nation will grow more aware of the vital link that the port system plays in our Nation's economy.

STAR WARS EQUALS ARMS RACE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. STARK. Mr. Speaker, star wars is a trillion dollar addition to the arms race.

It may never work—but that doesn't matter: It is a trillion dollar addition to the arms race.

If anyone questions that, they should just ask themselves how the United States would view star wars if the Soviets were developing it and we were not. The Pentagon, most editorial writers, indeed most of the country would demand that the President and the Congress either develop a similar system or find a way to overwhelm the enemy's system—that is, build more and different types of penetrating missiles.

The Soviets see star wars as a huge addition to the arms race. If they have to, they will match it—just like we would if we were in their shoes.

Let's stop this arms race. Let's not build star wars.

U.S. COMPETITIVENESS: AMERICA'S ECONOMIC CHALLENGE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 15, 1986

Mr. LAFALCE. Mr. Speaker, in the October 5, 1986 Washington Post, it was reported that more than 100 leaders from universities, business, and organized labor had joined together in an effort to make the restoration of U.S. industrial competitiveness a top national priority. Year after year of record trade deficits may be finally having an effect in convincing business that something must be done to ensure the competitiveness of U.S. industries in the global marketplace.

While this is a welcome development, we are already much too late in responding to what is the most important economic challenge facing this country in the next decade. Failure to meet this goal will preclude needed economic growth and ultimately reduce our standard of living. Yet we have still not genuinely responded to this formidable challenge.

Since first coming to Congress in 1975 I have worked to promote an awareness of these issues. For example, in October 1982 I obtained passage of a bill that I introduced to create a White House Conference on Productivity. This legislation was designed to focus the attention of both the public and private sectors on this vital issue, which so directly affects our economic performance. The White House Conference on Productivity was held in 1983, but even then it was apparent to me that our economic problems went far beyond productivity, important as that issue was.

I concluded that the key problem underlying our declining trade position is the deteriorating competitiveness of U.S. industry in international markets. The problem is not confined to the "older" industries targeted in the past as the sole focus of any competitive difficulties. It extends to the high technology and service sectors once viewed as the country's economic salvation.

Unfortunately, however, not everyone was willing to listen at the time, as election year politics successfully obscured our underlying competitiveness difficulties. The administration chose both to deny the existence of a competitiveness problem, and, at the same time, to accuse those who were concerned about it of advocating an industrial policy which would subject the American economy to central planning and stifling bureaucratic control.

Many traditional Keynesian liberals also felt ill at ease with the notion of a competitiveness strategy. These critics, too, disputed the fundamental premise that the American economy had a competitiveness problem. The alarming increase in the U.S. trade deficit was not being caused by a lack of competitiveness, according to these experts, but by the overvalued dollar that taxed American exports and subsidized foreign imports. If the United States could only manage its macroeconomic policy more efficiently and responsibly, the dollar would come down to reasonable levels and the trade imbalance would magically be reduced, if not eliminated. Both traditional lib-

eral and conservative economists agreed that competitiveness was not the problem, and that an industrial competitiveness strategy was not the solution.

Many of those who disagreed with this analysis proposed creating institutions such as an Economic Cooperation Council and a National Development Bank as solutions to the problem. These proposals were however, easy prey to their detractors, the defenders of the status quo. They also were misdirected because they did not focus our energies squarely on the problem of competitiveness. Thus, what we needed was not an Economic Cooperation Council and a National Development Bank, but a Council on Industrial Competitiveness and a Bank for Industrial Competitiveness, both of which I proposed in an effort to direct our attention to the fundamental problem of competitiveness.

The debate that occurred in 1983–84 should not have been about industrial policy—that was a phony issue—but industrial competitiveness.

If competitiveness once again emerges as a critical issue in 1987, as I believe it must, we will not be able to so easily dismiss it. The trade deficit has soared to $150 billion in 1985, and is expected to be even higher in 1986. A variety of reasons have been advanced to explain the trade deficit: the high dollar; unfair foreign trade practices; the U.S. budget deficit. But we have made some progress in rectifying those problems. The dollar has come down substantially from former peaks. Significant progress has been made in curbing the unfair trading practices of some of our fiercest competitors, most notably Japan. We are beginning to tackle, albeit only in the most preliminary way, our enormous budget deficit.

Despite these accomplishments, the trade crisis is not abating. The decline in U.S. competitiveness is more evident and widespread than it has ever been. The salvation offered by our high-technology and service sectors has not so easily been achieved. It is time for us to stop perpetually identifying the problem and start doing something about it.

But first, it is important that we learn from our past experience with this issue, so allow me to recount for you the history of the debate on this issue and discuss where I believe we must go from here.

THE HISTORY OF THE DEBATE

Beginning in May of 1983, the House Banking Subcommittee on Economic Stabilization, which I chair, embarked on an extensive series of hearings on U.S. industrial competitiveness. We examined the competitive problems facing both mature industries in transition and new and emerging high technology and service sectors.

During over 30 days of hearings, more than 150 witnesses representing all segments of our economy testified before the subcommittee, including: representatives of all levels of government; members of the business community from major corporations as well as small and medium size firms; labor leaders; representatives of an array of industries including steel, autos, semiconductors and computers, and machine tools; members of the financial community; advocates of entrepreneurialism; educators; scientists; economists; research specialists; community and citizens groups; agricultural specialists; representatives of the military and defense analysts; representatives of the administration; and Members of Congress. Additional information and data were obtained from a series of meetings and private breakfasts held with experts from the business, labor, academic and government communities, and from a number of studies conducted under the auspices of the subcommittee.

One fundamental fact became clear: both mature and emerging U.S. industries were facing serious competitive difficulties when measured against their international competition. Those problems were being—and continue to be—exacerbated by structural deficiencies that impede the adjustment of older industries and the rapid development of emerging ones. Among the most serious of these deficiencies is unnecessary adversarial relationships between business, labor and Government.

Based on the knowledge and insights gained from these hearings and related activities, I introduced legislation in November 1983—H.R. 4360—designed to create a comprehensive competitiveness strategy for this country. That legislation was favorably reported by the Banking Committee in April 1984. Opposition from the administration and the business community precluded any further efforts.

AN EMERGING CONSENSUS

But the subcommittee's deliberations did mark the beginning of a closer examination of the competitive problems facing this country. Since the subcommittee turned its attention to U.S. competitiveness problems in early 1983, there have been dozens of studies on long-term U.S. competitiveness and the need to improve the quality and focus of Government decisionmaking. The blue-ribbon panels performing these studies involved leaders from virtually all of the leading companies—large and small—unions, academe, public policy institutes and foundations, and hundreds of private citizens.

There emerged clear consensus that the stunning confusion that characterizes the U.S. policymaking process is a major obstacle to improving U.S. competitiveness. Groups as diverse as the Business-Higher Education Forum, the AFL-CIO, and the White House Conference on Productivity, which my legislation had created, concurred that we need an institutional mechanism to focus attention on competitiveness issues in the policymaking process and develop consensus regarding Government policies affecting industry.

These varied studies all emphasized the need to improve the coherence of Government decisionmaking, regardless of whether the size and influence of Government is larger or smaller. The Center for National Policy reported that a missing ingredient in America's competitive efforts is "an effective process for making policy decisions," and called for an Industrial Development Board, composed of Government, labor and business leaders. The Committee on the Next Agenda informed the President that "there is an overriding need for a clearly developed and articulated comprehensive foreign economic and trade policy. . . . The current fragmented system needs to be rationalized or replaced by mechanisms that promote the formulation of coherent, long term and thoughtful approaches to foreign economic and trade issues."

Distinguished leaders from business, Government, unions and academe thus sent a clear message to the President and Congress that Government must give much more attention to the management of its affairs and how those affairs affect the competitiveness of our Nation's economy. That message was sent yet again by President Reagan's own Commission on Industrial Competitiveness.

THE PRESIDENT'S COMMISSION ON INDUSTRIAL COMPETITIVENESS

Despite the growing consensus that something needed to be done to address our declining competitiveness, the administration continued to ignore the problem until I introduced legislation in 1983 calling for the creation of a National Commission on Industrial Competitiveness. Shortly thereafter, President Reagan finally acknowledged the growing concern about our competitive position and appointed his own Commission on Industrial Competitiveness, chaired by John Young and consisting of 30 distinguished Americans from business, labor, Government, academia and the public. This Commission, which called attention to the new reality of global competition faced by American industry at home and abroad, was charged with developing recommendations on ways to improve the Nation's ability to compete.

The President's Commission studied the global economy for 15 months and reported unanimously in January 1985. The report served only to substantiate the subcommittee's own findings that the U.S. economy continued to suffer from declining competitiveness and a failure to heed the signs of a changing global marketplace. The Commission gave us an unflinching picture of where we are and where we must go. The report concluded:

Our ability to compete internationally faces unprecedented challenge from abroad. Our world leadership is at stake, and so is our ability to provide for our people the standard of living and opportunites to which they aspire.

The President's Commission then offered a series of thoughtful proposals for Government and private action: to develop mechanisms for building a consensus among key sectors of society to better respond to our competitive challenges; to better create, apply, and protect new technology; to increase the supply of productive capital; to develop a more skilled, flexible, and motivated workforce; and to make competitiveness a national priority. The Commission noted that "government decisionmaking can be strengthened significantly by providing a forum in which consensus can be reached on the facts of an issue and in which the implicit tradeoffs among policy options can be made explicit."

The President's Commission did some vital work for this Nation. That Commission's work should have been persuasive because it was the work of a blue-ribbon commission, representing a diversity of interests. The Commission's report could have been a focal point for a national debate and the foundation on which to build a new consensus for needed policies.

Instead, this administration has ignored the findings and recommendations of the Commission. The President has done virtually nothing in the 20 months since the Commission unanimously called on America to grasp the challenge of this competition and to make it the primary economic agenda for the next decade.

RECENT LEGISLATIVE EFFORTS: THE COUNCIL ON INDUSTRIAL COMPETITIVENESS AND THE COMPETITIVE EXCHANGE RATE ACT

In the face of this neglect, the subcommittee continued its exploration of the competitive problems facing U.S. industry in several months of hearings on trade, debt, and competitiveness held during the 99th Congress. By this time, our competitive position had only gone from bad to worse.

It was also apparent that at a time when it was increasingly imperative that Government, business, labor, academia, and public interest groups act together to develop long-term competitiveness strategies, counterproductive adversarial relationships remained the order of the day. No high level forum existed for developing a consensus on economic policies.

In May 1985, I introduced H.R. 2373, the Council on Industrial Competitiveness Act, a bill substantively similar in concept to title I of the Industrial Competitiveness Act which I had introduced in the previous Congress. This legislation was specifically designed to create the high level institutionalized forum that was necessary to enable us to fashion a comprehensive and rational industrial competitiveness strategy.

The bill would establish a Council on Industrial Competitiveness as an independent advisory body within the Government. The Council would have 16 members appointed by the President: 4 from business; 4 from labor; 4 from Government; and 4 from the academic and public interest communities. The Council would create an essential forum in which these groups could work cooperatively to identify economic problems inhibiting the competitiveness of U.S. industries and develop strategies to enhance the performance of those industries in the world market. Such a Council would provide the catalyst for a serious and sustained national effort to enhance this Nation's competitive position.

I had hoped that the findings and recommendations of the numerous blue-ribbon panels and the President's own Commission would finally secure the ready passage of this important initiative. Yet again little progress has been made.

In addition to our failure to create an institutional mechanism capable of developing an industrial competitiveness strategy, it was also clear that the overvalued U.S. dollar, which for years the administration touted as a symbol of our economic leadership, was causing enormous problems for U.S. industries in world markets, and was one of the principal factors behind our declining competitiveness.

Consequently, in December 1985, I introduced the Competitive Exchange Rate Act, which was specifically designed to deal with the damage that the overvalued dollar was doing to our competitiveness. Under the act, the Secretary of the Treasury is made accountable for developing a strategy to move the dollar to a competitive level and minimize the destabilizing fluctuations in exchange rates that have become all too common over the last several years. This proposal would also significantly increase the accountability of the President for the impact of exchange rates on trade competitiveness.

Both the Competitive Exchange Rate Act and the Council on Industrial Competitiveness Act were reported out of the House Banking Committee on April 22, 1986, and became part of the omnibus trade bill passed by the House in May. Senate inattention and White House indifference to the trade issue, and indeed to competitiveness issues generally, continue to preclude passage of this vital legislation.

Just a few weeks ago, I met with President Reagan to discuss the continuing need for a high-level forum to address competitiveness issues and to urge his support for the creation of the Council. I informed him that it was imperative that the United States develop an industrial competitiveness strategy as an alternative to protectionism; that his own Presidential Commission had concluded that "mechanisms should be developed for building consensus among key sectors of society to better respond to our competitive challenges"; that our competitiveness difficulties will persist unless we deal with the problem on both a macro- and microeconomic level; and that a Council on Industrial Competitiveness was an alternative to bad trade legislation and a mechanism that will enable the Government to work with, and not against, labor and management. But all this was to no avail. The President was not ready to listen.

A NEW "COALITION"

Now we see on the horizon yet another effort to "raise competitiveness to the top of the national agenda." According to the October 5, 1986, Washington Post, business and labor leaders have now formed a new "Council on Competitiveness," which will try once again to make U.S. industrial competitiveness a national priority. The new private sector council is to be linked to a privately funded research institute and to a congressional coalition, in the hopes of developing a firmer legislative agenda.

I am, of course, pleased to see that others in the business community and in government share my continuing concerns about the competitive problems facing this country. But let us not fool ourselves. We have only to read the article to see how little progress has actually been made and the obstacles that still confront us.

Much was made of the fact that this new private sector group represents a "new" widespread interest in the business community in competitiveness problems, even among companies "not threatened" by foreign competition, in contrast to the earlier "industrial policy" debate which focused on older, declining industries. That is revisionist history. The same companies and business organizations leading the way in this new effort—including the Business-Higher Education Forum, the American Business Conference, and numerous representatives of the high technology and service sectors—testified many times before my subcommittee over 3 years ago, and expressed their concern regarding the competitive problems we face. These groups also met, under my auspices, with Members of Congress on a more informal basis, including at monthly breakfasts hosted by the subcommittee, to discuss competitiveness issues.

John Young, CEO of one of the major high-technology companies in this country, heads the new effort. As Chairman of the President's Commission on Industrial Competitiveness, he identified the serious competitive problems facing this country and advanced a concrete policy agenda before my subcommittee well over a year and a half ago.

Then, as now, it was clear that all of the U.S. business community was threatened by the newly competitive international economic environment. The interest in the business community is not new. The problem is not new. The only news here is old news: We have done nothing to confront the serious economic problems we face. If we must once again go about the arduous process of reidentifying the problem, I fear for our future. Conventional wisdom has it that Nero fiddled while Rome burned. I am increasingly convinced he was busily building coalitions.

Hopefully, we will this time move farther and faster. But the structure of this new group may make that impossible. This coalition is missing a key ingredient: those who develop and implement Government policy. We should be long past the stage where a group of business and labor leaders sit in one room, a group of Congressmen in another, and Government policymakers in a third to muse separately about our competitive problems. We need to coalesce these interests in an institutional mechanism with stature and visibility that will provide the necessary forum in which Government, business, labor and public interest groups can work cooperatively together, not to indentify, but to solve the competitive problems we face. A Council on Competitiveness comprise only of private sector representatives cannot hope to form the consensus necessary to develop and secure the implementation of the necessary policy initiatives.

What will constrain this new effort is the same shibboleth that has inhibited past efforts to deal with our competititive problems: that Government should stay out of business affairs. Those who continue this line of argument totally ignore current reality. Government makes policy having a direct impact on industrial performance and prospects all the time. In fact, experts estimate that half of all actions taken by business are in direct response to the decisions of Government. The problem is that the techniques of public administration have not kept pace with this reality. I do not recommend the imposition of industrial plans by administrative fiat, but the initiation of a cooperative process through which all parties with an economic interest can coordinate efforts so as to enhance the competitive position of U.S. industry.

The Council on Industrial Competitiveness, which I have proposed, is precisely the type of mechanism we need. It would help the President and other policymakers focus on the diverse concerns—such as trade and investment regulatory reform, technological innovation, and the development of human resources—basic to an effective competition effort. This initiative would begin the long

overdue process of improving the coherence of Federal decisionmaking, particularly as it influences the competitiveness of U.S. industries. It would elevate the issue of trade and competitiveness to a parity with foreign policy and national defense—an acknowledgement of the critical nature of competitiveness concerns that has been too long in coming.

What the Council would provide is not central planning but a brokering mechanism which would play an important coordination and consensus-building role. This mechanism would institutionalize an economic policy apparatus that would integrate domestic and international considerations, eleminate redundances, and have sufficient visibility to make its concerns a national priority.

SOLUTIONS TO OUR COMPETITIVENESS PROBLEM

The Post article on the supposedly new concern about U.S. competitiveness raised once again the old strawman of whether a competitiveness strategy is simply protectionism in another guise. The truth of the matter is precisely the opposite. A competitiveness strategy is our only realistic alternative to self-defeating protectionism. Our industries are hurting badly, and unless something is done to improve their competitive position, the political pressure for trade relief will grow. In the last year, the Congress considered legislation providing import protectlon for the Textile, shoe and copper industries. Virtually every week, another plea for sector-specific trade relief appears. Such pleas are becoming so extensive as to be unmanageable.

Indeed, if protection were the solution, then a number of U.S. industries would have no problems. The textile industry is heavily protected by more than 300 import quotas and average tariffs of 22 percent, yet the industry is suffering severely. Despite years of voluntary restraints, there is an increasingly cynical view that American automobile companies risk becoming merely the marketing agents for foreign producers. The steel industry has still been demonstrably unable to rationalize and modernize, despite years of protection in various forms.

Pressures to shield industries from foreign competition are strongest in economies that face slow growth, rapid transition, the emergency of new competitors, and few alternatives. That description fits the United States only too well. Policies aimed at sustained economic growth, effective adjustment to structural changes and higher productivity can reduce, and even eliminate those pressures. If the worldwide drift to protectionism is to be curbed, the United States itself must set an example of reasonable self-restraint.

It is time to adopt a strategy, not build a wall. It is also long since time for us to stop needless quarreling over the impact of macro- versus micro-economic policy, the dollar versus unfair trade practices, free trade versus protection. Our problems do not need classification, they need solutions.

CONCLUSION

If the United States does not begin to take the necessary steps to deal with the issue of competitiveness, the problems we confront will only worsen. There will never be a day when a clear crisis arrives. It does not work that way. Great Britian did not awake one day to discover that its competitiveness and its standard of living were declining. Rather, it was a gradual deterioration over many years, eventually resulting in second-rate economic status for the Nation. Some of that deterioration has taken place here already; according to the Post 61 percent of all CEO's surveyed now say that the U.S. competitive position is growing worse; this trend will continue to take place unless we dedicate ourselves to reversing it. But we have great assets as a nation, and with a growing awareness on the part of business, labor and Government that competitiveness is, in fact, a major economic problem, a concerted effort can be mounted to insure a bright economic future for our country and our people.

ATTACKING OUR TRADE DEFICIT—IN EARNEST

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. BROWN of California. Mr. Speaker, this fall, the House has passed several important legislative programs. We have passed the most sweeping tax reform bill in history, we have finally reached a compromise on Superfund, and we passed a comprehensive new package to combat drug abuse.

However, as we adjourn, we are aware that many problems will be waiting for us at the beginning of the 100th Congress. One of the most severe and growing problems our country faces today is the diminishing ability of our industries to compete in the world marketplace.

Mr. Speaker, in the past, we have prided ourselves on being world leaders in science and technology. We attained this position because, first, we had the resources to commit to research, and, second, because our country placed a much higher priority on new and high quality commercial products than did our international neighbors.

Today, this situation has changed. Other countries, such as Japan and West Germany, have committed growth portions of their resources toward technology development and innovation, and have taken the lead in transforming the best research ideas worldwide into high quality state-of-the-art commercial products. They have placed a high priority on outcompeting the United States in the marketplace, and in some fields, such as auto industry and electrical, general, and precision machinery, they have succeeded. Moreover, through the use of technology, they have developed their automated manufacturing and quality control processes to an extent that many of our traditional industries can no longer compete.

I feel very strongly that it is time to address the root causes of our growing trade deficit. Additionally, I believe that without a change in direction within Federal technology policy, a recovery of our international competitiveness will be impossible and our economic condition will continue to erode. Today, I am introducing a comprehensive package to improve the ability of our industries to compete in the international marketplace. This is the third major legislative approach I have introduced since 1980. I have introduced these bills for the purposes of drawing attention to some of the problems, as well as to serve as discussion vehicles from which we can begin to develop an acceptable approach.

In my statement today, I will briefly mention some of the reasons why I feel it is essential for us to analyze the position of the United States in the international marketplace. I will also list some of the excellent reports and studies which have been conducted on this problem in the last few years. I would like to encourage all of my colleagues to take some time in the coming months to study some of the proposals and reports which I will mention today. This fall, I will be working with several other concerned Members of Congress and representatives of industry and academia to develop legislation on this issue introduction in the 100th Congress. I will be happy to discuss these proposals, as well as others, with my colleagues at any time.

THE GROWING TRADE DEFICIT: THE PROBLEMS

Mr. Speaker, last year, our trade deficit rose to nearly $175 billion. The most recent trade statistics showed our exports running at half the dollar value of imports. In other words, we are importing twice as much as we sell abroad.

Since 1960, or productivity growth has been outstripped by most of our trading partners. Japan's productivity growth has been five times greater than our own.

The United States has lost market shares in many traditional industries such as textiles and steel. In high technology industries, the United States has lost its world market share in 7 out of 10 sectors. Industries such as ceramics, pharmaceuticals, and even home construction are undergoing technological revolutions and are vulnerable if we, as a nation, do not respond.

Since 1960, America's standard of living has grown more slowly than that of Canada, Germany, France, Italy, and Japan. Real hourly compensation in the United States has remained virtually stagnant since 1973. Since 1979, it has decreased.

Mr. Speaker, it is time we address these problems in earnest.

THE GROWING CONCERN ABOUT U.S. DIMINISHING COMPETITIVENESS

Our growing trade deficit has triggered alarms in many sectors of our society. In the past, reactions and efforts to improve this situation have occurred on a piecemeal basis. However, this has changed. In recognition of the immensity of the problem, and the need to develop an integrated program, a coalition is being formed to address the issue. Below is a summary of the Washington-based groups or agencies that are working on agendas to strengthen U.S. economic competitiveness. This list is reprinted from an article in the October 5, 1986, Washington Post titled, "Coalition Growing to Boost Level of U.S. Competitiveness."

[From the Washington Post, Oct. 5, 1986]

THE COMPETITIVENESS COALITION

Washington-based groups or agencies that are working on agendas to strengthen U.S. economic competitiveness:

American Business Conference: Chairman, Arthur Levitt Jr., chairman of American

Stock Exchange; William Lilley III, president; members are the heads of 100 midsized, high-growth companies; sponsoring research on trade and export issues; competitiveness is now its top policy priority.

Business-Higher Education Forum: Chairman, Edward Donley, chairman of Air Products and Chemicals Inc.; acting president, Don Blandin; membership is 89 corporate chief executives and university presidents; has sponsored yearlong study of competitiveness problems, and last month, issued action proposals with the Northeast-Midwest Coalition and the Congressional Clearinghouse of the Future.

Center for National Policy: Chairman, former Maine senator Edmund S. Muskie; president, Kirk O'Donnell; board members include Stuart Eizenstat, President Carter's chief domestic adviser, Sidney Harmon, chairman of Harman International Corp., and Robert Rubin, partner, Goldman, Sachs & Co.; will sponsor studies and seek a consensus between Congress, business and labor on policies.

Congressional Caucus on Competitiveness: Chairmen, Sen. Max S. Baucus (D-Mont.), Sen. John H. Chafee (R-R.I.), Rep. Buddy MacKay (D-Fla.) and Rep. Claudine Schneider (R-R.I.); will raise competitiveness issues and seek legislation.

Congressional Economic Leadership Institute: Executive director, Laurence Zabar; private, nonprofit organization backed by TRW Inc. and other corporations, labor unions and organizations; will analyze legislative proposals and seek congressional action; allied with the Congressional Caucus and the Council on Competitiveness.

Council on Competitiveness: Chairman, John Young, president of Hewlett-Packard Co.; president, Alan H. Magazine; forming a group of business, labor and other private-sector leaders to publicize issues and support legislation.

Democratic Working Group on Competitiveness: Chairman, Sen. Jeff Bingaman (D-N.M.); appointed by the Senate Democratic Policy Committee; issued report last month saying strengthening competitiveness should be the government's top priority.

National Academy of Engineering: Chairman, John Welch Jr., chairman of General Electric Corp., president, Robert M. White; in cooperation with the White House Office of Science and Technology Policy and the National Science Foundation, will establish a government-industry-university project on manufacturing technology.

National Association of Manufacturers: President, Alexander B. Trowbridge; executive vice president, Jerry Jasinowski; will seek policy and legislative action on competitiveness and stress need for better corporate management of the manufacturing process.

Northeast-Midwest Congressional Coalition: Cochairmen, Rep. Howard Wolpe (D-Mich.) and Frank Horton (R-N.Y.); acting executive director, Shelley Amdur; will support legislation.

STUDIES AND PROPOSALS FOR IMPROVING AMERICAN COMPETITIVENESS

Our diminishing lead in technology is not a new or an unforeseen event. This issue has been examined for several years. As early as 1976, a GAO report to Congress, titled "Manufacturing Technology—A Changing Challenge to Improve Productivity," stated, "The United States needs to make manufacturing productivity a national priorty to remain internationally competitive and to maintain strong industries."

In 1979, the Advisory Committee on Industrial Innovation—called for by President Carter in 1978—which included more than 150 senior representatives from industry, public interest, labor, scientific, and academic communities, stated: "An increase in industrial innovation will contribute significantly to the reduction of inflation, the creation of jobs, the improvement of the country's balance of trade position, and the ability of the Nation to conserve natural resources and reduce reliance on nonrenewable energy resources."

In 1985, the President's Commission on Industrial Competitiveness stated, "After more than a year of close scrutiny, the Commission has concluded that America's ability to compete in world markets must be improved, that we should view the challenge as immediate, and that the positive effects of the recommendations we make will be felt far into the future."

Over the past few years, concern about our trade deficit has increased to crisis proportions. According to the Clearing House on the Future, in its summer 1986 report titled "An Action Agenda for American Competitiveness," 17 major reports on competitiveness have been prepared in the past 30 months on the diminishing ability of the United States to compete. A small sampling of such reports includes:

"Productivity Policy: Key to Nation's Economic Future," Committee for Economic Development, April 1983;

"America's Competitive Challenge: The Need for a National Response," a report to the President of the United States, Business-Higher Education Forum, 1983;

"Global Competition: The New Reality," the Report of the President's Commission on Industrial Competitiveness (the Young Commission), January 1985;

"Targeting the Process of Innovation: an Agenda for Meeting America's Competitive Challenge," House Republican Research Committee Task Force on High Technology Initiatives, December 1985;

"U.S. International Competitiveness: Perception and Reality," New York Stock Exchange;

"Competitiveness in the World Economy," edited by Bruce R. Scott and George C. Lodge. Harvard Business School Press, 1985;

"A Competitive Assessment of the U.S. Information Services Industry," U.S. Department of Commerce:

U.S. High Technology Trade and Competitiveness," U.S. Department of Commerce;

"International Competition in Advanced Technology: Decisions for America," National Research Council;

"An Action Agenda for American Competitiveness," prepared by the Business-Higher Education Forum, the Northeast-Midwest Congressional Coalition, and the Congressional Clearinghouse on the Future, summer 1986; and

"Economic Competitiveness; Promoting America's Living Standards," Senate Democratic Working Group on Economic Competitiveness, September 1986.

Although the list of studies conducted on U.S. competitiveness is long, the underlying message of most of these studies remains the same. The United States must place a higher priority on technology development, innovation, manufacturing productivity, and commercialization of technological products.

Yet, for the most part, many of the recommendations offered by these reports have been ignored.

CONGRESSIONAL ACTION TOWARD IMPROVING AMERICAN COMPETITIVENESS

In Congress, there have been several efforts to address isolated factors which contribute to our decreasing competitiveness. Several excellent CRS issue briefs have been prepared which contain analyses of congressional actions.

"Establishing a Department of Science and Technology: An Analysis of the Proposal of the President's Commission on Industrial Competitiveness," CRS, May 30, 1985. This historical review reveals that Members of Congress have been concerned about our technology policy for decades. The brief states: "The idea of reorganizing Federal science and technology programs is not new. After World War II, there were a number of reports which addressed the question of the future organization for Federal research and development activities. The basic rationale woven within each of the reports for reorganizing Federal science activities was the need for an agency to provide for efficient coordination of the rapidly expanding federally funded research and development programs."

"Industrial Innovation: Debate Over Government Policy," CRS, August 1986, states, "Recent policy developments * * * have established a precedent for Federal action in the area of industrial innovation. However, at the present time, the U.S. Government does not have a formal delineated national policy for innovation and high technology development. It may be the only major industrialized country does not have such a program."

This is very true. While Congress has tried to address some of the barriers to increased productivity and innovation through the enactment of the Stevenson-Wydler Technology Innovation Act, Amendments to the Patent and Trademark Act, Title II of the Economic Recovery Tax Act, the Japanese Technical Literature Act, and the Small Business Innovation Development Act, these bills have addressed only small portions of the problem, and we still lack a coordinated, broad-based agenda for encouraging U.S. technology, productivity, and competitiveness.

Part of the problem has been that technology policy and industrial competitiveness issues extend through several committee jurisdictions. Since 1978, several committees in both the House and Senate have held hearings on aspects of U.S. competitiveness and Federal technology policy. Below is a partial list:

REPORTS AND CONGRESSIONAL DOCUMENTS

Industrial innovation colloquy. Congressional record [daily ed.] v. 125, Dec. 13, 1979: H11982-12005.

U.S. Congresss. House. Industrial innovation, message from the President of the United States transmitting proposals for fostering industrial innovation. Oct. 31, 1979. Washington, U.S. Govt. Print. Off., 1979, 8 p. (96th Congress, 1st session. House. Document no. 96-214)

U.S. Congress. House. Committee on Banking, Finance, and Urban Affairs. Sub-

committee on Economic Stabilization. An industrial policy for America: is it needed? April 1983. Washington, U.S. Govt. Print. Off., 1983. At head of title: 98th Congress, 1st session. Committee print.

Research and innovation: developing a dynamic economy. A staff study. December 1980. Washington, U.S. Govt. Print. Off., 1980. 40 p.

However, there has long been a recognition that a forum for developing integrated Federal policies would be beneficial, and several such comprehensive approaches have been proposed, dating back to the 1940's when the Bush report recommended the establishment of a National Research Foundation.

On an individual level, several such comprehensive approaches have been introduced in the 99th Congress to improve our ability to compete in technology-oriented markets. These bills include: the Advanced Technology Foundation Act (H.R. 2374) introduced by Representative LAFALCE; the National Bureau of Standards and Industrial Competitiveness Act, a proposal by Representative RITTER; the Department of International Trade and Industry Act of 1985 (H.R. 1928) introduced by Representative WATKINS; and the America's Living Standard Act of 1986 (S. 2810), introduced by Senator BINGAMAN.

As many of my colleagues know, I have also introduced proposals and discussion vehicles to improve our country's technology ability for years. Since 1980, I have introduced the National Technology Foundation Act (H.R. 745), which would bring many of our existing Federal technology programs under one umbrella, as well as increase our Federal efforts to encourage innovation and technology development. I have also introduced the National Technology and Policy Foundation (H.R. 3997) which would offer a similar "broad perspective" approach. To improve our ability to utilize and disseminate information, an area which is vital to maintaining a healthy economy in today's society, I have also introduced the Information Science and Technology Act (H.R. 744).

AMERICA'S LIVING STANDARD ACT OF 1986

Today, I am introducing yet another approach to addressing this problem. The package I am introducing today was compiled by the Senate Democratic Working Group on Economic Competitiveness, chaired by Senator JEFF BINGAMAN of New Mexico. This legislation was introduced in the Senate, S. 2810, and currently has 23 cosponsors. It is a well-thought-out approach, and I encourage my colleagues to review this proposal. This legislation addresses the following five mine areas:

ESSENTIAL FIRST STEPS

I. Information on Foreign Technologies

We must provide better and much more broadly disseminated information on the rapid changes in technologies occurring abroad:

A. Establish within the U.S. Patent Office a new Office of Technology Assessment, Forecast and Outreach.

B. Establish within the Department of Commerce a new on-site function for monitoring developments in foreign science and technology.

II. Technological Excellence

We must support excellence in the development of U.S. technology:

A. Expand and diversify the engineering research centers of the National Science Foundation.

B. Establish an economic competitiveness program to grant 500 graduate fellowships in science and engineering.

C. Establish a fund to assist America's colleges and universities rebuild their R&D infrastructures.

III. Educational Improvement

We must strive for excellence in education and training:

A. Establish a graduate fellowship program for teacher training.

B. Expand Federal funding to develop and disseminate quality instructional software and video technologies, and train teachers to use them.

IV. Work Force Mobility

We must encourage participation and mobility of the workforce:

A. Provide the States with additional resources to help the unemployed to become fully productive members of society.

B. Provide the Department of Labor with sufficient funding to fully implement a nationwide computerized job bank.

C. Examine the merits and the costs of initiating a personal portable pension for all Americans.

V. Forum for National Consensus Building

We must create a single independent body to provide an on-going forum for national leadership and cooperation to address the competitiveness challenge.

Establish a National Council on Industrial Competitiveness to:

A. Collect and analyze data about current and future economic trends and market opportunities.

B. Monitor the changing nature of the United States economy and its international competitive capacity.

C. Create a forum where national leaders in business, labor, academia, public interest groups, and Government will identify national economic problems, develop recommendations to address such problems, and create a broad public consensus to support the recommendations.

D. Develop and promote a national vision and specific policies which enhance U.S. productivity.

E. Assess private sector requests for governmental assistance or relief and to recommend any reciprocal actions or conditions of such assistance or relief.

F. Establish industry subcouncils of public and private leaders to develop similar long-term forecasts and visions for sectors of the economy.

G. Review legislative and executive policies which affect national economic competitiveness.

H. Report annually to the President and Congress on ways to increase American competitiveness in world markets.

I. Examine all international agreements on foreign trade agreed to by the United States monitoring the effect of imports on U.S. industries.

CONCLUSION

There are several factors which contribute to our growing trade deficit and, likewise, several approaches we can take to reduce this threat to our economy. However, if we are to achieve lasting improvements in our trade balance, we must address all of the areas which have weakened our country's ability to remain competitive.

Today, I have introduced a possible approach for addressing this problem. I bring this proposal to the attention of my colleagues as one of several options. I have also tried to provide a road map to some of the excellent reports and studies which have already been conducted on U.S. technology policy and industrial competitiveness.

My friends, I feel that this is a very important issue, one on which action cannot be delayed. Again, I encourage my colleagues to review some of these works, and join the growing coalition in addressing one of the most important issues of our time in the 100th Congress.

BICENTENNIAL OF THE CONSTITUTION

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. FRENZEL. Mr. Speaker, many organizations across the land are making plans to commemorate the Bicentennial of the Constitution in 1987. The Congress, itself, will take part in this great national celebration.

Few, if any, organizations have planned longer and more tirelessly for this upcoming celebration than the U.S. Capitol Historical Society.

At the annual meeting of the Historical Society held in the Old Senate Chamber on September 17, 1986, two excellent speeches on ways and means to celebrate both the Bicentennials of the Constitution and that of the Congress in 1989 were given by Dr. Richard A. Bakee, Senate Historian, and Dr. Raymond W. Smock, Director of the Office for the Bicentennial of the House of Representatives.

The speeches of the Senate and House Historians follow:

REMARKS BEFORE THE ANNUAL MEETING OF THE CAPITOL HISTORICAL SOCIETY, SEPTEMBER 17, 1986, BY DR. RAYMOND W. SMOCK, HISTORIAN AND DIRECTOR

President Schwengel, members of the U.S. Capitol Historical Society, and distinguished guests. It is a great privilege to be able to speak before the Capitol Historical Society in this historic room that has been the scene of the making of so much of American history. Fred has asked the Senate historian and myself to talk to you about the upcoming Bicentennial of the Constitution and the Federal Government and to tell you what the House and Senate history offices are planning for this great celebration. I will begin by giving an overview of the national bicentennial celebration, and Dick Baker will focus on what the Congress will be doing.

Before I do that I want to take a moment to publicly thank Fred Schwengel for all he has done to preserve and promote the history of this great institution. Most of you in this room already know Fred well, and know that he has devoted the past quarter century to his love affair with the Congress. He has done more than any one individual to share the art and history of this place with the American people. What some of you may not know is that Fred was one of the first to call for the creation of the History Office in the House of Representatives, and that he has wholeheartedly supported our efforts to expand the scope of historical activities related to the Congress. One of the real pleasures of my position is having the opportunity to work closely with Fred and his fine staff on a number of projects. Thank you, Fred, for all that you have done and will continue to do.

When the Office for the Bicentennial of the House opened its doors for the first time three years ago, many persons came by and said: "Bicentennial? Isn't that over?" The Revolutionary Era Bicentennial is over. The Constitutional Era Bicentennial is just beginning. What we all celebrated and gloried in back in 1976 was a commemoration of our Declaration of Independence from Great Britain, and that is something that should not be dismissed as insignificant. What we will be celebrating for the next few years, however, is even more important.

Think about it for a minute. What we did on July 4, 1776, was to state that we planned to fight for our place as an independent nation. We'd actually been doing that for over a year. Remember Lexington and Concord and the "shot heard round the world?" What happened *after* the Declaration of Independence and *after* our victory in the Revolutionary War was even more significant to the development of this nation.

We became an independent country. The national government after the Revolution, however, was under the "Articles of Confederation," a very weak government that did not even have the power to levy taxes.

What we had was not a national government so much as it was a loose collection of near-autonomous states, a "league of friendship" they called it. The Articles of Confederation took effect in 1781, but the national government under the Articles was almost impotent, unable even to maintain much of an army or a navy. It is not too much to suggest that the continuation of this form of government would have led to the Balkanization of this country and its ultimate degeneration into a collection of third-rate powers.

No, the United States did not end up that way, and *that* is the reason we have such an important bicentennial to celebrate. What we will begin celebrating in 1987 and extending through 1989 is the drafting of our U.S. Constitution, its ratification by the states, and the beginning of the new government in 1789. Part of the celebration will extend to 1991, the 200th anniversary of the Bill of Rights. Without the Constitution, and the subsequent convening of the first House of Representatives, and the first Senate, and the election and inauguration of our first President and the creation of the Supreme Court, the Revolutionary War would not have meant very much. There have been many revolutions in world history, but Revolution is one thing, while the creation of a successful government is another.

It's a little harder to get people as excited about this bicentennial as they were about the last one. Somehow the image of men sitting down at a table and arguing about the powers of the House of Representatives does not seem terribly exciting when compared with the brave deeds of the Revolution.

Those of us who are planning the bicentennial for the House of Representatives believe that we can demonstrate to the American people the importance of this celebration and that the country will get excited about the meaning of this bicentennial. We have some specific projects in mind. And we have some less tangible things we hope to get from the bicentennial, such as an increased interest in the role the House of Representatives and the Senate have played in our country's history.

It may be a little harder to identify with these events than it was with the heroes of the American Revolution. But we are confident that the American people understand that 200 years of uninterrupted democracy is an enterprise well worth celebrating. The framing of the United States Constitution and the establishment of a govenment under the Constitution almost 200 years ago has had a profound effect on the history of the world and has shaped our politics, our society, and our culture perhaps more than any other event in American history. If we can help another generation of Americans to understand and appreciate the meaning of the American Constitution and the role of the federal government under that Constitution, we will have performed an important service to the Congress and to the country.

Let me give you an idea of how the United States has mobilized for this event. The granddaddy of all bicentennial organizations, Project '87, was begun nine years ago to help plan for the bicentennial. This is the joint enterprise of the American Historical Association and the American Political Science Association. This fine organization has provided academic scholars and the schoolteachers of America with much needed background information to see to it that this celebration is based on solid historical information. We all owe a debt to them for their outstanding work. Project '87 has just produced a series of twelve historical posters that are excellent introductions to the Constitution. Their wonderful magazine, this Constitution, is a first-class publication.

The Congress responded well to the Bicentennial as early as 1982 when the Senate created a Bicentennial Study Group to begin planning for what the Senate would do for the commemoration. In December 1982 the House passed a resolution creating the office for the Bicentennial of the House of Representatives. Then in 1983 the Congress passed legislation to create a Commission on the Bicentennial of the United States Constitution. This bill was signed by the President on September 29, 1983, but, unfortunately, the Commission was not sworn in until July 30, 1985. Despite this delay, the 23-member Commission, chaired by the Chief Justice of the United States, Warren E. Burger, went quickly into action once it was appointed. It outlined a three-pronged strategy for the Bicentennial.

Nineteen hundered and eighty-seven will be the year of the "Framing of the Constitution"—dedicated to the memory of the Founders and the great document they drafted in Philadelphia, which was adopted 199 years ago today.

Nineteen hundred and eighty-eight will be the year of the "Ratification of the Constitution," the time, 200 year ago, when the states examined and approved of the work of their delegates to the Philadelphia Convention. This will be a year when all 50 states, not just those who originally ratified the Constitution, will focus on the state process or ratification or their admission to the Union.

Nineteen hundred and eighty-nine will be the 200th anniversary of the establishment of the federal government under the Constitution. The three branches of government as we know them today began operation in 1789 beginning with the first Congress, which convened on March 4 of that year. The inauguration of the first President, George Washington, took place on April 30, 1789, and the passage of the Judiciary Act of 1789 created the federal court system, including the Supreme Court on September 24, 1789. If the Commission on the Bicentennial of the Constitution has its life extended to 1991, their celebration will also include the 200th anniversary of the Bill of Rights, which was adopted as the first 10 amendments to the Constitution on December 15, 1791. The U.S. Commission has received about $13 million so far to conduct its work, and a bill has already passed the House to provide about $13 million more toward the effort.

In the meantime, in 1985 the House created a separate Commission to focus on the House of Representatives' part of the celebration, and this year the Senate created a Senate Bicentennial Commission. Both of these Commissions are composed of distinguished Members of the House and Senate, including the leadership of both parties, all of whom have an abiding interest in the history of the Congress. Some of the membership of the House and Senate Commissions and the U.S. Commission overlap, so there is good communication between these groups. For example, the Chairman of the Commission on the Bicentenary of the House is Congresswoman Lindy Boggs, who also serves on the U.S. Commission. Senator Strom Thurmond, President pro tem of the Senate, also serves on both the Senate and U.S. Commission.

On the state level, 45 of the 50 states have already appointed state commissions, and we expect the other five to follow suit in the future. There still needs to be greater commitment of money by the states since all 45 state commissions have total funding of less than $2 million, and 23 of the 45 have no funds whatsoever right now. Many of the State Humanities Councils have taken a lead with creative bicentennial programs, but, like the state commission, they lack the money to carry out some of their plans.

In the private sector we have heard from a number of corporations who want to help. But we need much more support than we have now. A few major corporations have launched important bicentennial projects. One is Merrill Lynch, which has agreed to sponsor a $2 million, 4-part public television series on Contemporary constitutional issues, and they also plan to sponsor 50 State Ratification Bills to help raise money for state educational projects related to the Constitution. Dick Baker will tell you more about an excellent program sponsored by Ameritech, whch will be a major congressional bicentennial project.

I am tremendously excited by all the activities that are under way or in the planning stages. We have the potential to develop a truly great bicentennial celebration over the next few years. If I have any worries or criticisms to make about what I have seen thus far, it is a concern that was expressed so eloquently by Dr. Ronald Hoffman in his address before this Society exactly one year ago. When Ron made his remarks the Commission on the Bicentennial of the United States Constitution was only a few months old and had only a meager appropriation from the Congress. Now, when that same Commission is on the verge of receiving a second appropriation that will bring its total funding to over $26 million, Professor Hoffman's words ring even more urgently than they did a year ago.

I can do no better at this juncture than to quote from Ron's speech that many of you heard last year. This is not history repeating itself—this is historians repeating themselves. These are Ron Hoffman's words:

"What we need is a renewal of the federal government's commitment to the preservation and publication of the documents that are the building stones of our knowledge and appreciation of our history. I fully expect that the Commission for the Bicentennial of the United States Constitution will receive substantial funding for its activities, and I hope that it will choose to invest a meaningful portion of it in the work of preserving and making widely available the records of our past."

Ron Hoffman's vision of a great historical legacy coming out of this Bicentennial is one that I share. We should have great ceremonies, and fireworks, and galas, because the Constitution of the United States deserves a great celebration. But I suggest, as Ron did, that the things that made this country great were important deeds that left a legacy for future generations. We will remember the fact that the Statute of Liberty was restored long after we have forgotten the multi-million dollar fireworks display on the Fourth of July. What will we remember from the Bicentennial of the Constitution? What legacy will we leave to the youngsters who will be the stewards of the Constitution in the 21st century? The best thing we can preserve and pass on is the memory of this nation itself.

Two years ago I had the pleasure of meeting former Senator Eugene McCarthy at a reception in the Capitol. We got to talking about history and he told me a story about his 95-year old father. Senator McCarthy said that the records of the families that settled in Minnesota a hundred years ago were mostly kept in the area churches built of wood. One by one, over the years the old churches burned down and the fires consumed not only the buildings, but the records of those who build them. History was left to the oldtimers who preserved it in their own fading memories. Senator McCarthy said if someone asked his father about an individual and his father didn't like that person he could choose not to remember him! What a power over history Senator McCarthy's father has. His memory is the last surviving record.

The history of the United States and its people is contained in the rich documentary heritage of 200 years of Constitutional government. Many of the records at the federal, state, and local levels are not well preserved and are decaying before our very eyes. We can't let our historical memory fade, because it is a story that will be worth telling for thousands of years to come. Our country and our times will shape the world as much as ancient Greece and Rome shaped the Western world. We are the temporary custodians of that memory and we owe it to the ages to see that it is preserved and understood. The U.S. Capitol Historical Society, the Senate History Office, the Office for the Bicentennial of the House, the Commission on the Bicentennial of the U.S. Constitution, the State Commissions, the private sector, none of these can do the job alone, but together we can leave a legacy that will have our ancestors pointing back in time to the 1980's and saying, "There was a time when Americans appreciated their history and did all they could to save it for us." Now that's what I call an enduring legacy.

REMARKS OF DR. RICHARD A. BAKER, ANNUAL MEETING U.S. CAPITAL HISTORICAL SOCIETY: PLANNING FOR THE BICENTENNIAL OF CONGRESS

Mr. President, distinguished members and guests. I am delighted to have the opportunity to address this most distinguished group. Looking around this room, I see individuals who have devoted a great deal of their time, energy and financial resources toward the promotion of broader public understanding of Congress's historical and contemporary role.

Take a moment and admire this beautifully restored Old Senate Chamber that serves as our meeting site today. Without question this room stands as an enduring Senate contribution to the 1976 bicentennial of American Independence. It offers a wonderful example of the test we should apply to all projects—great and modest—executed in the name of such major commemorative opportunities. The test is "Will the effort be remembered and have meaning after the immediate celebrations have passed?" Certainly, for this project, the answer is a resounding "Yes!"

Joining us today are representatives of many offices and organizations concerned with planning for the bicentennial of the United States Congress. A brief inventory of just those groups housed on Capitol Hill would include, of course, the Capitol Historical Society, the historical offices of the House and Senate, the curators of the Senate and of the Architect of the Capitol, the Library of Congress Manuscript Division, and the Congressional Research Service. Looking beyond the Hill, we know of plans underway at the Legislative Archives Division of the National Archives, the First Federal Congress Project at the George Washington University, the Georgetown University Law Center, the Carl Albert Congressional Studies Center at the University of Oklahoma, the Dirksen Congressional Research Center in Pekin, Illinois, and the D. B. Hardeman Project at the Lyndon B. Johnson Library in Austin, Texas.

In addition, major private corporations across the United States have expressed a willingness to participate in funding substantial projects for the congressional bicentennial. To offer one example, last week the Ameritech Corporation of Chicago announced a $750,000 grant to Washington public television station WETA. That station has in turn contracted with Academy Award nominee Ken Burns to produce an hour-long documentary film on the history of Congress. Mr. Burns has won numerous awards for his documentaries on the Statue of Liberty, the Shakers, the Brooklyn Bridge, and most recently for film on Huey Long that will premier this October 15 on the PBS network. This will be the first such effort to provide a film history of congressional development over two centuries. It will be a monumental understanding. While the House and Senate share a common constitutional mandate, they are, in many respects, profoundly different institutions. We wish Mr. Burns and his associates well.

Closer to home, plans for Senate and House bicentennial activities have been underway in the above-mentioned congressional offices for quite some time. Recently each house established its own bicentennial commission to guide these activities. In the House, the commission is chaired by Rep. Lindy Boggs. On the Senate side, Sen. Strom Thurmond serves as chairman with Sen. John Stennis as vice chairman.

House and Senate plans fall into four major categories: publications, conferences, exhibits, and ceremonial events.

Publications: Guides to members' papers. If a researcher wishes to determine the location of President Franklin Roosevelt's papers, he or she can do so very quickly. To locate the papers of Senate Majority Leader Joseph Robinson, who served in the early years of Roosevelt's presidency, is another matter. Even more difficult is the challenge of uncovering personal papers of committee chairmen and members who served during, let's say, the period of intense legislative activity in 1933 known as the "First Hundred Days." I can assure you, that such an investigation would consume many frustrating hours and would yield only a tiny portion of the available material. Historians are pretty much like anyone else when it comes to following the path of least resistance. The result is that congressional papers in repositories across the nation are neglected, as these researchers instead mine the resources of comfortable presidential libraries. To write of legislative matters from the executive perspective, I submit, leaves a key portion of the story either distorted or untold.

In 1983 the Senate Historical Office published its "Guide to Research Collections of Former United States Senators, 1789-1982." This 360-page reference book provides the location of papers, photographs, oral histories, and memorabilia for most of the Senate's 1650 former members. These materials are housed in 350 libraries, museums, and historical societies in every state of the Union. We plan to issue an updated edition

in 1989. The new edition will include photographs or other pictorial likenesses of these members. The Office of the Bicentennial of the House of Representatives is currently at work on a similar volume. Under the skilled editorship of Cynthina Pease Miller, that work will include a great majority of the 11,000 men and women who have served in the House.

Guide to official congressional records at the National Archives. The official records of the House and Senate are located at the National Archives. There a staff of fifteen professionals, under the direction of Archives veteran R. Michael McReynolds, cares for more than 50,000 cubic feet of files dating back to the First Congress. Surprisingly, there is no guide to these uniquely important documents. Consequently, the historians of the House and Senate, working with their respective commissions and the Archivist of the United States, have agreed that such a guide will be prepared and published in time for the 1989 commemorations. In 1982, the Archivist reported to a Senate bicentennial planning group that many of Congress's records in his custody were deteriorating and in need of serious preservation attention. As a result of his plea, the Senate and House appropriated $600,000 to restore these irreplaceable records.

Biographical Directory of the United States Congress. In 1859 the first edition appeared of a congressional biographical directory that has since become an invaluable reference source in libraries throughout the country. Unfortunately, the volume's most recent edition was last updated in 1971. Accordingly, both congressional bicentennial commissions have agreed to support funding for a thoroughly revised edition. This edition, to be published in 1989, will include all members serving in the first one hundred Congresses. It will also include, for the first time, citations to books and articles by and about each member, as well as information on members' committee chairmanships and significant legislative accomplishments. Dr. Kathryn Jacob is editor for the nearly 1800 members who have served in the Senate, including the more than 660 who have served in both chambers. Dr. Bruce Ragsdale edits entries for the nearly 10,000 individuals who have served only in the House. All of the data for the new edition has been computerized to reduce cost of this and future revisions.

Senator Robert C. Byrd's Addresses on the History of the Senate. Since March 1980 Senate Democratic leader Robert C. Byrd has, on more that 85 occasions, addressed the Senate on topics related to its history. He has covered the chronological history for the years since 1789 and he has treated such official Senate positions as the Secretary of the Senate, the Sergeant at Arms, and the Chaplain, along with Senate pages and Capitol Police. When he completes the series during the 100th Congress, it will include approximately 100 separate addresses. These will be edited, indexed and published as a major contribution to the 1989 festivities.

Other publications: There will be other publications as well. They will include brochures, for distribution to gallery visitors, describing the House and Senate chambers. The Senate plans to publish a historical almanac containing brief accounts of that body's significant events and personalities since 1789. The House Bicentennial Office intends to update two popular booklets first issued during the 1976 bicentennial. One is entitled "Black Americans in Congress" and the other is "Women in Congress."

CONFERENCES

Many organizations are planning conferences in connection with the bicentennial of the Constitution and the Federal Government. We do not wish to crowd the field, as these undertakings are expensive. Also they frequently fail to pass our test of enduring value. Accordingly, we cannot be as specific about plans for such events as we have been for the publications I've just described. We are looking for private sponsors to provide suitable funding and thus our plans will remain flexible to accommodate these sponsors.

We are considering, for 1988, a conference of Pulitzer Prize winners in history and biography. These distinguished writers would present at the conference essays related to the history of Congress. The essays would then be published to reach the widest possible audience. We are also thinking of a conference whose participants—members, journalists, historians, and political scientists—would discuss opportunities and problems associated with conducting research on Congress.

Exhibits: A number of exhibitions are planned. The National Portrait Gallery will cosponsor with the Congress in 1989 an exhibition of likenesses of many of the First Congress' members. The Senate Curator and the curator in the Architect of the Capitol's office have other displays in the works that will draw on the rich documentary resources related to Congress.

Ceremonies: July 16, 1987. July 16, 1987 marks the 200th anniversary of the Consitutional Convention's "Great Compromise" that provided for states to be represented equally in the Senate and in proportion to their populations in the House. That compromise determined the fundamental nature of both legislative chambers. Each House of Congress is currently considering an invitation by Philadelphia's "We the People 200" committee, an organization planning a year-long national celebration of the Constitution's bicentennial, to convene a regular legislative session in that city. Private foundations have offered $1.5 million to defray the cost to this event. If the trip is realized, it would be the first time that the Congress has ever met outside the seat of government and the first time in 187 years that it has met away from Washington, DC. This extraordinary session would focus national attention on the unique role of Congress as a coequal branch of the Federal Government.

March 4, 1989. A joint session of Congress is being planned for March 4, 1989. This was the date, in 1789, set for the first meeting of both Houses. Difficult winter travel conditions delayed the arrival of many members for several weeks. Consequently, the House will hold special ceremonies on April 1, 1989, the bicentennial of the day on which it established its first quorum. The Senate will conduct similar activities on April 6, the date of its initial quorum.

I have outlined many of the projects being planned within the Senate and House historical offices. There are opportunities for related activities to be accomplished by individual scholars and private organizations. There is no published narrative history of Congress currently available. In 1938, on the eve of Congress's 150th anniversary, Professor George Haynes published a monumental two-volume history of the Senate. Several years later George Galloway, of the Library of Congress, issued his own "History of the House of Representatives." Although that volume is not actually a history, it does develop important historical themes. Now is the time for latter day Hayneses and Galloways to come forward with independent accounts that will, it is hoped, reach a popular as well as a scholarly audience. Unlike the situation fifty years ago, today there are ample research support facilities available to such authors.

There is a need for a historical encyclopedia of Congress—a ready reference book that would do much to enlighten the public about Congress' past and present. It would bring together the scholarship of literally hundreds of specialists on Congress. I am sure that corporate funding could be found for such a valuable enterprise.

We know little about the origin and development of congressional committees. I am aware that the Capitol Historical Society has been considering commissioning a series of committee histories. Why not consider publishing a bibliography of writings about the hundreds of standing, select, and special committees that have existed since 1789? This would serve as a worthy companion to the Society's recently published bibliography on Speakers of the House.

The forthcoming bicentennial offers a once-in-a-lifetime opportunity to establish programs that will truly enrich our nation's understanding and appreciation of Congress. I suggest, once again, that we look around this beautiful chamber as a reminder of what can be done in the name of this institution's history and traditions. Working together we can ensure that generations to come will deeply value this commemoration's legacy.

IN HONOR OF RAOUL WALLENBERG—PLAQUE UNVEILED ON RAOUL WALLENBERG PLACE AT HOLOCAUST MUSEUM SITE

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. LANTOS. Mr. Speaker, on October 8, a bronze plaque honoring Swedish Diplomat Raoul Wallenberg was dedicated and unveiled on Raoul Wallenberg Place—in the section of 15th Street SW. between Independence and Maine Avenues in Washington, DC, opposite the site of the U.S. Holocaust Memorial Museum. Last year, my distinguished colleague and fellow Californian BILL LOWERY and I introduced legislation to rename this section of 15th Street "Raoul Wallenberg Place."

As you, Mr. Speaker and my colleagues in the House know, Raoul Wallenberg risked his life to save tens of thousands of Hungarian Jews from extermination by German Nazis and Hungarian Facists in the chaotic closing days of World War II. Wallenberg was seized by the Soviet Armed Forces in January 1945, and he has been a prisoner in the Soviet Union since that time. Other Soviet prisoners have reported seeing Wallenberg as recently as 5 years ago, and he may still be alive in a Soviet prison.

By naming the street on which the Holocaust Museum will stand in honor of Raoul Wallenberg and by dedicating this memorial

plaque to him, we are honoring a hero in an age which is so profoundly devoid of true heroes. Many become heroes when heroism is thrust upon them, but this is a man who voluntarily assumed a daring and dangerous assignment. He went out of his way, leaving behind the comfort and affluence, the safety and security of Stockholm to go to Budapest—and I know what Budapest was like in those last hellishly ugly months of World War II, because I was there. Wallenberg put his life on the line day in and day out for people he did not know because he believed in the right of every human being to live. My wife, Annette, and I were two of those people.

Neither of us, nor our children nor our grandchildren would be here today if it were not for Raoul Wallenberg. During that whole dark nightmare, no one else directly confronted Nazi cruelty. No one else had the audacity to follow the death marches, to jump in front of guns leveled at Jews, to pull people off deportation trains. Raoul Wallenberg not only saved 100,000 lives, he saved our faith in humanity.

The plaque dedication ceremony had special significance since it took place during the week of the fifth anniversary of President Reagan's signing of legislation making Raoul Wallenberg an honorary citizen of the United States. Wallenberg is the second person in our Nation's history after Sir Winston Churchill to receive honorary citizenship.

Mr. Speaker, almost 15 years ago my wife, Annette, began the effort to call attention to the magnitude of what Wallenberg did and to win his release from the Soviet gulag. She more than anyone else was responsible for bringing international attention to Raoul Wallenberg. During the ceremony last week, as founder and chairperson of the International Free Wallenberg Committee, she read the text of the plaque after it was unveiled by the distinguished participants in the program.

The text of the plaque reads as follows:

RAOUL WALLENBERG PLACE

Raoul Wallenberg's mission of mercy on behalf of the United States behind enemy lines during World War II is unprecedented in the history of mankind. He is responsible for saving tens of thousands of lives during the Holocaust. A shining light in a dark and depraved world, he proved that one person who has the courage to care can make a difference.

This street was named in honor of Raoul Wallenberg by act of Congress on December 19, 1985.

Many distinguished Members of this House and other leaders participated in this ceremony honoring Raoul Wallenberg: Interior Secretary Donald P. Hodel; Washington, DC, Mayor Marion Barry; Sweden's Ambassador to the United States, Count Wilhelm Wachtmeister; Senator CLAIBORNE PELL; Congressman BILL LOWERY; Congressman BENJAMIN A. GILMAN; Congressman STENY HOYER, who is Cochairman of the U.S. Helsinki Commission; and executive director of the U.S. Holocaust Memorial Council Richard Krieger. Also taking part in the ceremony were Rabbi Yitzchak Merkin Principal of the Yeshiva of Greater Washington, DC; and the Reverend Dr. James D. Ford, Chaplain of the U.S. House of Representatives. Congressman RON PACKARD also joined us for this special event.

Mr. Speaker, I would like to place in the record the statements of these distinguished participants.

The statements follow:

REMARKS OF THE HONORABLE DONALD P. HODEL, SECRETARY OF THE INTERIOR

I am enthusiastic and honored to be with you this morning. This is an important event. Part of its importance lies in the fact that, by placing a bronze plaque to mark the street which bears his name, we honor a good man, a courageous man. But, of at least equal significance, is the message that is being sent to all who care to listen: America cares about Raoul Wallenberg, and cares about the principles for which he stood—and for which he may have died.

A year ago, I was privileged to speak at the groundbreaking ceremonies for the United States Holocaust Memorial Musem, which with the support of Americans from across our great land, will be constructed on Raoul Wallenberg Place. In those remarks, and in subsequent speeches in support of the effort to build the Memorial Museum, I have asked the rhetorical question: Why do we have need for this memorial and museum? Why do we seek to *remember* such a painful episode in history?

The first answer is that we need to remember the Holocaust not merely because of that specific event in itself, but to help us remember what can happen if we forget about man's capacity to be inhuman. As Secretary of State George Shultz put it so well, we must remember the Holocaust because we must remember that man's capacity for evil did not die in the bunker with Hitler.

The second reason why we must remember the Holocaust is that we must never forget that the Holocaust was significant not only because some evil people perpetrated crimes against humanity that almost defy description. Rather, it is that so many otherwise decent people let them do it. If we will remember that lesson, we never again will sit mutely, as so many people did when they first sensed, or should have sensed, what Hitler was up to.

We lose our right to proclaim we are children of God when, as happened in the 30's and 40's, leaders in government, in churches, in the academic community—and, yes, just plain, ordinary people—consciously and deliberately refused to react to the repeated eye-witness accounts of Nazi horror. It was a classic case of Edmund Burke's dictum that all that is necessary for evil to triumph is that good men and women do nothing.

But, against that dark conspiracy of silence, there stood out one man—Raoul Wallenberg. He stood out much in the same way a dazzlingly bright star that is virtually alone stands out against the black sky at night.

The stories about how Wallenberg saved as many as 100,000 Jewish men, women and children are now legion. Perhaps the miraculous nature of his courageous efforts was best captured by Tommy Lapid, who was 13 when he was saved by Wallenberg. Said Tommy, "in the complete and total hell in which we lived, there was a savior-angel somewhere, moving around."

We dedicate a bronze plaque today to honor Raoul Wallenberg, just as the Nation paid tribute to him by making him an honorary citizen five years ago this week. We would pay him—and what he stood for—even higher honor if American public opinion were mobilized to send a powerful message to the masters of the Soviet gulag: we mean business about learning the fate of Raoul Wallenberg.

President Reagan has gone on record. He publicly has decried what he sadly called "the reward [Wallenberg] received for his selfless humanitarianism." Secretary of State Shultz, Ambassador Kampelman and Ambassador Novak—all have made plain to the Soviets that we will not be satisfied until we learn the truth about this great man.

But when the subject is diplomat Wallenberg's arrest by Soviet authorities in what President Reagan aptly has called a "violation of international law," where are the editorial writers and the television commentators who so properly and passionately attacked the Soviet's arrest of Nicholas Daniloff?

When the subject is Wallenberg's imprisonment and his disappearance, where is the Congress that is so quick to act when it has a sense of moral outrage on other matters? I call upon those members of the Congress present today to call upon their colleagues to put the force of Congress' expressed moral indignation on record to the Soviet Union: we demand to know the fate of Raoul Wallenberg.

To be sure, some have spoken out on this important subject. We should be grateful for the tireless efforts of the Raoul Wallenberg Committee of the United States and for the voices of the journalists and individual members of Congress who have refused to remain silent. But we, the people, must do more.

Raoul Wallenberg is more than a hero. he was a symbol of honor when all too few acted very honorably. He is an inspiration to good people to speak out and to do what is right. Let us honor him by doing just that.

REMARKS OF THE HONORABLE MARION BARRY, JR., MAYOR OF WASHINGTON, DC

Raoul Wallenberg was one of our century's true heroes. While much of the Western world refused to see the truth about the fate of Europe's Jews or, seeing, refused to act, he saw the horrible truth with great clarity, and he acted with total commitment and great personal courage. He saved tens of thousands of lives with few weapons beyond threats and bluffery, and he did this at great risk to his own life.

The Holocaust Memorial Museum will soon be built here on Raoul Wallenberg Place. This national museum will mark both darkness and light. It will serve as a memorial to the six million Jews murdered during the Holocaust and to the millions of other victims of Nazism. It will tell the story of one of the most monstrous crimes of recorded history.

In telling that story, it must in honesty tell of the American and Allied failure to act decisively to prevent the Holocaust. It will also, however, honor the American GIs, as well as the Allied soldiers, who broke into the concentration camps and stopped the killing. It will honor, as well, the righteous gentiles who risked their lives—and sometimes gave their lives—to save Jews from the gas chambers. Pre-eminent among them, of course, is Raoul Wallenberg, whom we honor today.

It is throughly appropriate that this national museum be located on our National Mall, in the presence of our great monuments of democracy, honoring those who fought and, indeed, died for democracy and for human dignity. This Museum will recall

the persecutions of fanatical totalitarianism and those righteous few who opposed it.

In the same way, the U.S. Holocaust Memorial Museum will ensure that never will we forget the six million Jewish dead and the millions of others victimized by the Nazi murderers. The museum will ensure as well that never will we forget the brave men who at last put an end to the murders. The Holocaust is a subject which must be studied and restudied through the generations until perhaps one day we will understand it. This museum will be a place of study and learning situated among the great collections and archives which are our national treasures.

It is appropriate that this museum, dedicated to international understanding, will find its home in the great capital city of the free world. The District is not only the national capital, it is also a city of many groups, of many origins, all united in their love of freedom, their love of this beautiful city. It is fitting that this city be home to a memorial recalling gruesome inhumanity and dedicated to human dignity.

Remarks of Count Wilhelm Wachtmeister, Ambassador of Sweden

Ladies and gentlemen, as Ambassador of Sweden and Honorary Chairman of the Raoul Wallenberg Committee of the United States and as somebody who for 40 years has personally participated in the Swedish Government's relentless efforts—so far in vain—to clarify Raoul Wallenberg's fate, it is a moving experience to be with you here today on this beautiful spot in the Nation's capital.

At a time when Man behaved against Man with brutality on a gigantic scale, when human beings behaved with insanity, Raoul Wallenberg acted as a beacon of hope to the tens of thousands. His deeds were heroic because he was carried by deep humanitarian consideration for those that suffered.

In the midst of darkness 41 years ago, Raoul Wallenberg showed through his hard and unselfish work what one compassionate and brave individual can achieve almost single-handedly for his fellow men.

No wonder, therefore, that Wallenberg and his fate continue to this day to fascinate people the world over. He will go down in Swedish history as a symbol for compassion and courage in saving persecuted people from the jaws of their tormentors.

During more than four decades the Swedish Government has relentlessly pursued efforts to clarify Raoul Wallenberg's fate. The activities in other countries for Raoul Wallenberg is a strong and important support in this endeavour. We will not shrink from our responsibility to our national as long as any doubt remains as to his fate.

For the Swedish Government and people Raoul Wallenberg is alive until evidence to the contrary is produced. The memory of his deeds, to which we pay tribute today in the capital of the United States, lives on by its own force. May that memory continue to be an inspiring light to persecuted men, women and children all over the world.

To pay tribute to what Raoul Wallenberg did is not to forget the horrible fact that people disappear even today. On the contrary, our praise to Raoul Wallenberg brings their fates to the force.

Thank you.

Remarks by Senator Claiborne Pell

I am very pleased to be here today and to join my good friend, Congressman Tom Lantos, in dedicating this street as "Wallenberg Place." This is the second time that Tom and I have had the pleasure of being together honoring Raoul Wallenberg, the "lost hero of the Holocaust". A little more than a year ago, we laid a commemorative wreath at Raoul Wallenberg Street in Budapest.

My interest in the Raoul Wallenberg case goes back to my father's service as the American Minister to Hungary before World War II and subsequently as the U.S. Representative to the U.N. War Crimes Commission, where he was responsible for the State Department reversing itself and agreeing that Genocide would be considered a war crime. As the Senate sponsor of the legislation giving Raoul Wallenberg honorary U.S. citizenship, I think that it is fitting that "Wallenberg Place" be dedicated on this, the fifth anniversary of the signing of that law by President Reagan.

Raoul Wallenberg is one of the great humanitarian heroes of World War II. His courageous and selfless efforts to save thousands of Hungarian Jews from death at the hands of the Nazis have proven to be a unique contribution in the history of the salvation of European Jews from the Holocaust. Wallenberg undertook these deeds at the behest of his and our government. We have a responsibility to remember him, as we are doing today, and to solve the mystery of his tragic disappearance. I know that we will be relentless in our effort to resolve the question of his fate and to save him as he saved so many others so that the "lost hero of the Holocaust" will be lost to us no more.

Remarks of Congressman Bill Lowery

More than 40 years ago we were a world at war, itself an exercise in man's inhumanity to man. But beyond that, there was a plague alive in the lands Hitler occupied. Bergen-Belsen, Dachau, Auschwitz: all death camps that attested to a concerted plan of genocide—a Holocaust that left six million Jews dead.

Few believed it was happening, even fewer did anything about it.

Raoul Wallenberg was a notable exception.

We stand here near the sight of the Holocaust Memorial that will say to the world, "Never again." While the memorial symbolizes the death and inhumanity of the Hitler regime, perhaps Raoul Wallenberg Place will symbolize a road to sanity and salvation.

Wallenberg was sent to Budapest in 1944 by the Swedish and U.S. governments to save Jewish people from Nazi concentration camps. He set up "safe houses" for them and dragged them from cattle trucks bound for the death camps. Using the ploy of Swedish passports, he was able to save the lives of tens of thousands of Hungarian Jews. His reward was arrest by the Russians and imprisonment, possibly until his death.

This memorial cannot illustrate the horror that was the Holocaust nor can a small segment of street portray the unselfish and heroic works of Raoul Wallenberg. But it was my hope in writing the legislation renaming the street, that each time someone reads "Raoul Wallenberg Place", they will remember the Swedish man who not only put the lives of thousands ahead of his own but was a touch of sanity in a world gone mad.

Through memory perhaps we can prevent a recurrence of that madness so well described by Martin Niemoeller:

"In Germany they came first for the Communists, and I didn't speak up because I wasn't a Communist. Then they came for the Jews, and I didn't speak up because I wasn't a Jew. Then they came for the trade unionists, and I didn't speak up because I wasn't a trade unionist. Then they came for the Catholics, and I didn't speak up because I was a Protestant. Then they came for me, and by that time no one was left to speak up."

Remarks of Congressman Benjamin A. Gilman

The plaque which we dedicate today is in honor and remembrance of a man who gave of himself so that others might live. Raoul Wallenberg was a unique individual, whose courageous actions still stand today as a beacon for others. The Talmud says, "He who has saved one life, it is as if he has saved thousands." Raoul Wallenberg's mission saved thousands. Therefore, it is as if hundreds of thousands had been rescued from the gas chambers.

The Holocaust Memorial Museum, whose construction is now underway, is a potent symbol that man cannot forget what happened just a few decades ago. We cannot allow the world to forget what happened, nor can we allow the world to forget Raoul Wallenberg.

To this day, we have never been convinced that Raoul Wallenberg died as the Soviets claim he did. Rumors continue to circulate throughout the Soviet gulag that a Swede remains alive. Just as we continue to press for the release of Soviet Jewish prisoners of conscience and persecuted Christians, we must maintain pressure for a full accounting of Raoul Wallenberg's whereabouts.

Throughout the dark years of the Holocaust, individual made the difference. Lives were saved one by one, in farms and villages and attics and basements around Europe. What makes Raoul Wallenberg's contribution unique is that he saved thousands in open defiance of the Nazis. This plaque honors that selfless commitment, and brings to mind the words of the great rabbi, Hillel: "If I am not for myself, who will be for me? But if I am only for myself, what am I? And if not now, when?" Raoul Wallenberg's deserves our continued dedication, not only because he is one man who made the supreme sacrifice, but in honor of all those innocent men and women who were saved by his mission of mercy.

Remarks of Congressman Steny Hoyer, Cochairman of the Helsinki Commission

Ambassador Wachtmeister, Secretary Hodel, Mayor Barry, fellow Members of Congress, and all of you here on behalf of the Holocaust Memorial Council:

Robert Kennedy once observed that in this often cruel world of ours, there are many who see things as they are, and ask why. But few are the ones who see things as they can be, and ask why not.

Raoul Wallenberg was one of the few—he is one of the quiet heroes of this difficult century.

We all know the sorry history. We know that many witnessed the murder of Europe's Jewish community—and with horror and disbelief they could only ask why. But Raoul Wallenberg was different. He saw that Jewish lives could be saved, and asked why not.

He knew that the secret of life could be found in the courage to act on what's right. And so with great risk to himself, he returned the gift of life to thousands of Jews—to people whose lives meant so much to him, and so little to their executioners.

We are now in the midst of the Jewish High Holidays—a time to reflect on the past and welcome the new—a time to explore the painful and celebrate the bountiful. It is only fitting that we pay tribute to Raoul Wallenberg during these Holidays. Few men better represent the tragedy, the promise, the fulfillness of life.

As a man of principle, as one who kept his covenant with the family of man, may Raoul Wallenberg be written into the Book of Life. May his sacrifice restore our faith in what an individual can do for the integrity of the world. And may his example give us the inspiration and courage to continue his struggle—to pull life and liberty out of the angry jaws of oppression.

Thank you.

REMARKS BY RICHARD KRIEGER, EXECUTIVE DIRECTOR, U.S. HOLOCAUST MEMORIAL COUNCIL

Thank you Congressman Lantos, Annette, ladies and gentlemen:

It is my pleasure to be here today to honor Raoul Wallenberg, whose selfless devotion to justice, freedom and compassion serves today—and for all time—as a true example of the nobility of the human spirit. In the midst of the Nazi realm of terror and hatred, any act of kindness towards those marked for death was an act of heroism, Any act of compassion which broke through the wall of indifference was an act of righteousness. We cannot even begin to measure the righteousness and heroism of the Swedish diplomat whose acts of steadfastness and strength in the cause of humanity saved tens of thousands of lives.

It is the obligation of all of us to remember both the good and the evil, the heroism and the horror of the events which transpired in Europe during the late 30's and early 40's. Only by remembering can we assure that such atrocities will never again be committed. Only by remembering can we honor those brave souls who risked everything for the cause of justice.

Unfortunately, throughout the world, there are those who would deny the courage and the struggle of Raoul Wallenberg and those that comprise the Righteous among the nations. Some would go so far as to deny that the Holocaust ever happened. And these so called "scholars" are not the only ones who manipulate the facts to serve their own perverted purposes. For more than forty years, the Soviet Union has hidden the truth of Raoul Wallenberg's fate behind a veil of evasion and distortion. This veil must be lifted. The conscience of the world will not rest until President Ronald Reagan has said, "In the depths of the horrors of World War II, Raoul Wallenberg was one shining light of inspiration, upholding the honor of the human race. The world owes a tremendous and eternal debt to this great man. The Soviet Union owes the world a full (and) complete accounting of his fate."

The plaque we dedicate today is a symbolic and visible affirmation of this nation's will to remember its honorary and honored citizen, Roaul Wallenberg. We are proud that the United States Holocaust Memorial Museum, a building commemorating the victims of the Holocaust, will have its address on the street named "Wallenberg Place." We are proud that the story of Raoul Wallenberg will be told within the Museum.

In conclusion, let this dedication ceremony and the words uttered here today, signal a warning and a reminder to every totalitarian fascist and communist state that the spirit of Raoul Wallenberg will neither expire nor be consumed. In every place where innocent lives are threatened, Wallenberg's acts of protection and rescue will be remembered and reenacted and in every generation, men and women will gather to recount to their children the heroic story of Raoul Wallenberg. He will continue to live throughout the ages long after the dictators and tyranny he struggled against have faded into infamy for all of us here and everywhere else in the world. Raoul Wallenberg will always live.

BENEDICTION BY THE HONORABLE JAMES DAVID FORD, CHAPLAIN OF THE U.S. HOUSE OF REPRESENTATIVES

Gracious God, even as we gather in freedom this day, we thank you that you raise up faithful people to do your good works, to set the captives free, and to raise the hopes and dignity of every person.

As we honor Raoul Wallenberg, may we recall that each person is created in your image and thus has the potential and the responsibility to do the things that make for peace in our time.

Now, may the Lord bless us and keep us,
The Lord make his face shine upon us and be gracious unto us,
The Lord lift up his countenance upon us and give us peace. Amen.

THE FEDERAL GOVERNMENT NEEDS GAAP

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. CRANE. Mr. Speaker, today I am introducing legislation that will establish an accrual-basis accounting system for the National Government and its agencies. By implementing this accounting system and requiring the publication and distribution of annual financial statements, the reliability and accountability of the National Government will be enhanced.

Presently, the U.S. Government requires no publication of the financial statements of its various entitiles, and uses the cash basis of accounting for budget reporting. This presents some serious problems. According to one of the world's largest accounting firms, Arthur Andersen & Co., cash-basis accounting "hides the costs of current programs, and results in misinformation and misunderstanding."

Cash-basis accounting keeps track of all money which an organization receives and pays out. It ignores money which an organization will both earn and owe in the future. It is an accounting method tailored to the needs of small businesses. When applied to a large government, it falls short of providing reliable information needed for sound policymaking decisions and therefore creates a clouded financial picture. A more appropriate alternative to cash-basis accounting is accrual-basis accounting or GAAP.

Applying GAAP [generally accepted accounting procedures] produces a more accurate picture of our Government's financial health. Accrual-based accounting matches expenses with their associated revenues; in other words, it recognizes financial events as they occur. Hence, it keeps track of all assets and liabilities. It provides the tools to evaluate both the current and future financial picture of an organization. The U.S. Government requires numerous State and local governments and all publicly held companies to prepare financial statements in accordance with GAAP. This ensures that these organizations will use the most sophisticated accounting methods presently available.

A study conducted by Arthur Andersen & Co. compared consolidated financial statements under cash-basis accounting with statements under GAAP. Under GAAP, the more accurate of the two, the deficit for 1984 was $148.1 billion higher than under cash-basis accounting. In fact, GAAP accounting shows that the National Government has been running deficits for the last decade which have exceeded the reported deficits by as much as 200 and 300 percent.

These deficits manifest a profound problem: a lack of accountability of elected officials to their constituents. Members of Congress, under present accounting methods, are able to adopt programs which provide benefits currently without providing funding until later years. Individual citizens are therefore unable to judge whether their representatives are creating and maintaining programs in a fiscally responsible manner.

The legislation I am introducing, the Truth in Government Accounting Act of 1986, will make the national Government fiscally responsible to the people. It requires the Secretary of the Treasury to prepare and make public, for each fiscal year, consolidated financial statements for the United States based on accrual accounting procedures. These statements shall include reports on the operations of all instrumentalities of the United States Government. This will force the National Government to stop using the cash-basis of accounting and start using the GAAP method.

It also requires that the Secretary of the Treasury publish these statements each year. He will also notify the people about the existence of these statements and make them public by placing a notice on all tax forms that copies of these statements are available and will be sent to all who request them. This will ensure that all citizens have the opportunity to evaluate whether their tax dollars are being spent wisely.

This act also requires the Comptroller General to use the accrual method of accounting to audit the financial statements prepared by the Secretary of the Treasury. The Secretary of the Treasury will provide the Comptroller General with all the necessary information and facilities needed to insure a successful audit. This will ensure that the financial statements of the national Government are prepared properly and that they meet the highest standards of the accounting profession.

Finally, my bill requires the President, when submitting his budget, to provide a summary of how the use of GAAP procedures would effect estimated expenditures, appropriations, and receipts of the Government in the year for which the budget is submitted. The Director of the Office of Management and Budget shall also prepare all budgets submitted to the President according to both the cash and accrual accounting methods. This will enable the public and its elected officials to judge the value of GAAP method of accounting.

The time has now come to return our country to the path of fiscal responsibility. We must also make our representatives more accountable to their constituents. By forcing the National Government to adopt GAAP accounting procedures, we can further these noble goals. I urge my colleagues to consider my bill and support it. I believe the financial integrity of our country is at stake. We must act now.

WORLD FOOD DAY

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. LELAND. Mr. Speaker, today is World Food Day. World Food Day was instituted by the Food and Agriculture Organization to mobilize awareness and support for the long-term effort needed to overcome world hunger and malnutrition. We in Congress, have a crucial role to play in ensuring that the U.S. Government and the U.S. people work together to address these serious concerns.

Hunger affects hundreds of millions of people. Over 15 million lives are lost annually due to malnutrition-related illness and death. An estimated 40,000 people die daily from the effects of hunger. And in the United States, the 20 million people who live in poverty are at daily risk of hunger.

Hunger in its starkest reality is manifested in the wasted bodies of children living in wartorn Sudan. We must respond to these desperate and immediate needs. However, World Food Day also calls attention to the chronic hunger of those hundreds of millions who, while not visibly starving, are still leading lives of hunger, sickness, and reduced physical and mental capability.

This year, special attention is focused on the importance of fisheries resources in eradicating world hunger. Many poor and undernourished people around the world could be assisted to improve their diets with fish and fish products. Aquaculture development substantially increase the permanent food supply at low cost. Programs to expand these opportunities are supported through the Department of Agriculture, the Agency for International Development [AID], and the Peace Corps. Several universities and private voluntary organizations are also developing programs. At the Select Committee on Hunger, we will continue to explore these opportunities to alleviate hunger.

As chairman of the Select Committee on Hunger, I have been honored to be a part of many important initiatives supported by Members of Congress and the American people to reduce hunger. This year the Child Survival Fund of AID will be increased to $75 million, allowing for expansion of basic health care services to millions of malnourished children and their mothers. Furthermore, additional funding for agriculture projects targeted to people in the poorest countries, particularly in Africa, will be made available through the International Fund for Agricultural Development [IFAD] and the International Development Association of the World Bank.

On the domestic front, we have been successful in our efforts to allow poor and homeless people in this country access to additional food assistance in nonprofit soup kitchens and shelters through the Food Stamp Program. This could greatly enhance the ability of private groups; to meet the needs of the poor and unemployed, many of whom are children and single parents. Another significant achievement this year was a substantial increase for the Women, Infant and Children [WIC] Program, which targets food benefits to poor children and pregnant and breastfeeding women.

There are important milestones in our battle to alleviate hunger and the conditions which perpetuate hunger. However, we are very far from eliminating hunger in our world. In 1974, the first world food conference was convened by the United Nations in Rome. The conference adopted recommendations and pledged to eliminate hunger within 10 years. The failure to achieve that goal is self-evident. Clearly the task is difficult and requires more than rhetoric. It requires hard choices and sacrifice. I call on each of you to assist in achieving this goal.

ARMS CONTROL ACTIVITIES AND ACCOMPLISHMENTS OF THE HOUSE FOREIGN AFFAIRS COMMITTEE

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. FASCELL. Mr. Speaker, during the 99th Congress, the House Foreign Affairs Committee and its Subcommittee on Arms Control, International Security and Science, under my chairmanship, considered and acted on a wide range of arms control issues which led to decisive and constructive House action on several key arms control issues including: limitations on nuclear testing, continued adherence to the sublimits of the SALT II Treaty, budgetary limitations on the strategic defense initiative, reaffirmation of the ABM Treaty, preservation of the ban on antisatellite [ASAT] weapons testing, and prohibitions on the production of binary chemical weapons.

What follows is a description of the House action in these areas as well as an account of the evolution of these issues by the subcommittee, through the committee and onto the floor. A brief account of other related arms control issues the committee has and will continue to address is also contained in this report.

NUCLEAR TESTING

FOREIGN AFFAIRS COMMITTEE HISTORY

The Subcommittee on Arms Control, International Security and Science conducted several hearings on proposals to ban nuclear testing. Members of the House and Senate were heard from in a subcommittee hearing conducted on February 26, 1985, on House Joint Resolution 3, legislation urging the President to seek the advice and consent of the Senate on the ratification of the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, and to resume negotiations with the Soviet Union on a comprehensive test ban treaty.

During a May 1, 1985, hearing and markup testimony was received from a representative of ACDA as well as private experts with scientific expertise relating to nuclear testing. The measure was subsequently approved by voice vote for full committee action.

The full committee marked up House Joint Resolution 3 on May 15, 1985, and ordered it favorably reported by voice vote. (H.Rept. 99–221.)

In passing this resolution by a strong bipartisan vote of 268 to 148, the House expressed its firm commitment to bring an end to nuclear testing. The House, in fact, added its voice to the Senate's which in 1984 passed the exact language of House Joint Resolution 3 as an amendment to the Defense authorization bill by a vote of 77 to 22. With both houses taking similar action, Congress is firmly on record in favor of negotiation rather than endless escalation as the way to end the costly arms race.

This decisive House vote reflected a call for a commonsense arms control policy. We should return to the longstanding established policy—pursued by every President since Eisenhower—that test bans are necessary to stop the nuclear arms race. Reductions in our nuclear arsenals without a nuclear test ban to prevent the introduction of newer, more deadly weapons into our arsenals, is at best an incomplete and tentative national security and arms control policy.

HOUSE ACTION ON THE FISCAL YEAR 1987 DEFENSE AUTHORIZATION BILL

The House acted strongly to limit nuclear testing in an amendment to the fiscal year 1986 Defense authorization bill. The House by a vote of 234 to 156 on August 8, 1986, prohibited funds for conducting nuclear weapons tests over 1 kiloton unless the President certifies to the Congress that the Soviets have conducted a test over 1 kiloton and unless the Soviets refuse to accept in-country monitoring arrangements.

The strong action of the House reflects an overriding desire to bring an end to nuclear testing as a way to control the escalating nuclear arms race. Reducing nuclear weapons is meaningless if we do not also refrain from adding new nuclear weapons to our arsenals.

Moreover, pursuit to a nuclear test ban enhances United States credibility with our allies and offsets the propaganda advantage that Soviet Leader Gorbachev has exploited since the summer of 1985 when he declared a unilateral Soviet moratorium on nuclear testing and asked the United States to join that moratorium.

CONFERENCE REPORT ON THE FISCAL YEAR 1987 DOD AUTHORIZATION ACT

On October 15, 1986, the House approved conference report language that rejected the 1-year ban on nuclear testing above 1 kiloton. Under a separate agreement, the President has indicated that he will submit to the Senate two unratified treaties—the 1974 Threshold Test Ban Treaty and the 1976 Peaceful Nuclear Explosions Treaty—and to recommend their ratification. While the President's decision to submit the two treaties to the Senate for ratification at the beginning of the next Congress represents a significant step in the right direction, a number of potential stumbling blocks remain in the way of Senate ratification

of the treaties and the resumption of United States-Soviet discussions that would lead to a comprehensive test ban agreement. It will, therefore, be incumbent upon the next Congress to continue to monitor closely the test ban issue if the ultimate goal of a total cessation in nuclear testing by both sides is to be achieved.

ADHERENCE TO SALT AGREEMENTS

FOREIGN AFFAIRS COMMITTEE HISTORY

The committee has considered the merits of continuing United States adherence to the SALT arms control agreements in numerous hearings and briefings, including the April 15, 1986, Arms Control Subcommittee hearing on the "Implications of Abandoning SALT."

In the aftermath of the President's May 27, 1986, decision to abandon United States adherence to the SALT agreements in the future, on June 11, 1986, I introduced House Concurrent Resolution 350, a resolution providing that the President shall continue to adhere to the numerical sublimits of the SALT agreements for as long as the Soviet Union does likewise. It was my hope that the resolution would provide a vehicle for the Congress to urge the President to honor his commitment to the SALT agreements.

On June 12, 1986, the committee approved House Concurrent Resolution 350 after adopting an amendment in the nature of a substitute by a vote of 29 to 11. (House Report 99-634.)

Floor debate on this measure occurred in the House of Representatives on June 19, 1986 and was passed by a bipartisan vote of 256-145. In passing this legislation, the Congress expressed its opposition to United States abandonment of the SALT arms control regime with nothing to replace it and expressed its strong support for maintaining the existing restraints on United States and Soviet forces found in the SALT agreements.

HOUSE ACTION ON THE FISCAL YEAR 1987 DEFENSE AUTHORIZATION BILL

By a vote of 225 to 186, on August 12, 1986, the House attached to the fiscal year 1986 Defense authorization bill strong policy language and funding limitations regarding the SALT Treaty. The House voted to prohibit the expenditure of funds for nuclear weapons that exceed the sublimits of the SALT II agreement unless the President certifies to the Congress that the Soviet Union has exceeded those sublimits.

Such action reflects the wisdom that some constraints on the Soviet nuclear arsenal are better than no constraints on their arsenal. Since SALT II was signed, neither the United States nor the Soviet Union have exceeded the sublimits. By supporting this measure, the House reaffirmed the logic of maintaining adherence to the sublimits while our negotiators in Geneva attempt to draft a better arms control agreement that results in greater reductions and strategic stability. The House saw no logic in abandoning existing constraints before there is something to supercede them. Preservation of the existing constraints on the Soviets is simply common sense.

CONFERENCE REPORT ON THE FISCAL YEAR 1987 DOD AUTHORIZATION ACT

On October 15, 1986, the House approved a conference report containing strong policy language that urges the President to continue observing the SALT II Treaty sublimits, provided that the Soviet Union continues to adhere to those sublimits. The conference language reflects congressional opposition to the United States abandonment of the SALT arms control regime and congressional support for continued United States and Soviet adherence to the numerical sublimits of the treaty. In view of the current arms control impasse, as reflected in the recently concluded United States-Soviet summit in Iceland, it is even more incumbent upon the President to preserve the arms control limitations as embodied in the SALT agreement.

STRATEGIC DEFENSE INITIATIVE [SDI]

FOREIGN AFFAIRS COMMITTEE HISTORY

The Arms Control Subcommittee has conducted an extensive series of ongoing hearings on the administration's strategic defense initiative [SDI]. Based on our first series of hearings, the subcommittee concluded that the SDI would be extremely costly, probably technically unworkable, with adverse implications for arms control. Serious concerns were expressed during our hearings concerning a likely outcome of the SDI: A dual arms race that will render the ABM Treaty meaningless.

There is a general consensus in the Congress for maintaining an adequate level of SDI research. But many believe that the levels the administration has been requesting for SDI research are inordinately high and that SDI research should be conducted within the terms of the longstanding interpretation of the ABM Treaty.

When the administration attempted to reinterpret the ABM Treaty last year, the committee immediately held a hearing to examine the President's policy. Testimony from the U.S. negotiator to the ABM Treaty negotiations and others confirmed that the ABM Treaty was clear in its prohibition of the testing, development and deployment of space-based, air-based, sea-based, and mobile land-based ABM systems and components. The administration disputed this longstanding interpretation of the ABM Treaty and then attempted to mollify the opposition to its decision by stating that it would adhere to the longstanding interpretation of the ABM Treaty even though it contended that it was legally free to broadly interpret the Treaty.

As many of us in Congress seriously question the broad interpretation, we therefore welcome current administration policy which is to abide by the longstanding, interpretation of the ABM Treaty as it pursues research into SDI technologies.

The committee also examined the impact of the SDI on our allies. Specifically, we explored the issue of technology transfer between the United States, our NATO allies and Japan relative to the SDI in a joint hearing by the Arms Control Subcommittee, the Europe and the Middle East Subcommittee, and International Economic Policy and Trade Subcommittee on December 10, 1985.

HOUSE ACTION ON THE FISCAL YEAR 1987 DEFENSE AUTHORIZATION BILL

On August 12, 1986, the House adopted an amendment to the fiscal year Defense authorization bill to maintain SDI funding essentially at current levels with an adjustment for inflation. This resulted in a cut in SDI funding from the administration's request of $5.4 billion to $3.1 billion—including DOE money. This measure passed by a vote of 239 to 176.

In supporting this measure, the House concluded that the administration request was excessive. The House went on record in support of continued research into SDI technologies but at a level consistent with budgetary concerns and within the parameters of the ABM Treaty.

CONFERENCE REPORT ON THE FISCAL YEAR 1987 DOD AUTHORIZATION ACT

On October 15, 1986, the House approved conference language cutting the President's funding request to $3.5 billion, approximately halfway between the House and Senate approved versions. While there still remains in Congress a general consensus for maintaining an adequate level of SDI research, the cut in SDI funds from the President's original request of $5.4 billion reflects a belief by many that the level the administration has requested is much too high for an adequate research program alone and also reflects congressional interest in assuring that the SDI program be conducted within the confines of the longstanding interpretation of the ABM Treaty.

In this regard, it is important to note that the conference agreement contains a provision which stipulates that action by the Congress in approving SDI funds does not express or imply an intention on the part of the Congress that the United States should abrogate, violate, or otherwise erode the ABM Treaty, and does not express or imply any determination or commitment on the part of the Congress that the United States develop, test, or deploy ballistic missile strategic defense weaponry that would contravene the ABM Treaty.

ANTISATELLITE [ASAT] WEAPONS POLICY

FOREIGN AFFAIRS COMMITTEE HISTORY

The committee has conducted several hearings to examine the arms control implications of pursuing an ASAT weapons system. In my view, instead of spending money on another weapons system, we should be working with the Soviet Union at the Geneva Arms Control Talks to reach an agreement to ban ASAT weapons as a way to prevent an arms race in space. The congressional action on ASAT represents a major step toward averting an arms race in space and demonstrates congressional support toward improving the climate of negotiation between the United States and the Soviet Union in avoiding an extension of the arms race into space.

HOUSE ACTION ON THE FISCAL YEAR 1987 DEFENSE AUTHORIZATION BILL

The House, on August 13, 1986, voted 222 to 197 for an amendment to the fiscal year 1986 Defense authorization bill to retain current law which bans ASAT tests against objects in space unless the President certifies that the Soviets have conducted such a test.

CONFERENCE REPORT ON THE FISCAL YEAR 1987 DOD AUTHORIZATION ACT

On October 15, 1986, the House agreed to conference report language that preserves the ban on the production and deployment of antisatellite weapons. Continuation of the ASAT weapons ban reaffirms congressional belief that an agreement between the United States and the Soviet Union on banning ASAT's would represent a major step toward averting a costly and destabilizing arms race in space.

Continuation of this mutual ASAT ban represents the only significant arms control achievement of the past 6 years which can be directly attributed to House insistence.

BINARY CHEMICAL WEAPONS

LEGISLATIVE HISTORY

Over the last few years, I have led a bipartisan group in Congress—Representatives JOHN PORTER, Illinois, and MARGE ROUKEMA, New Jersey, in the House and Senators MARK HATFIELD, Oregon, and DAVID PRYOR, Arkansas, in the Senate—against the production of new lethal nerve gas chemical weapons—that is binary.

In June 1986, a GAO report, was released that found that binary chemical weapons are undergoing persistent test failures, don't work now, and probably never will work properly.

Reflecting my views on this important issue, I am a cosponsor of bipartisan-supported legislation that: bans the production of binary chemical weapons; calls for a negotiated arms control ban on the use and production of chemical weapons; and calls for the preservation of the U.S. chemical deterrent by improving U.S. defenses against chemical weapons.

HOUSE ACTION ON THE FISCAL YEAR 1987 DEFENSE AUTHORIZATION BILL

On August 3, a bipartisan majority of the House of Representatives adopted the Porter-Fascell amendment that bans funding for binary production during fiscal year 1987 and prohibits the unilateral withdrawal of U.S. chemical weapons now in Europe. For the fifth consecutive time, the House of Representatives said "no" to a flawed strategy based on a flawed weapon. We wisely rejected the Pentagon's request to produce binary nerve gas weapons for sound foreign policy, defense, budgetary, and arms control reasons. Rather than producing chemical nerve gas weapons, we should be negotiating an arms control agreement that bans the production and usage of nerve gas chemical weapons.

CONFERENCE REPORT ON THE FISCAL YEAR 1987 DOD AUTHORIZATION ACT

On October 15, 1986, the House approved conference report language on binary chemical weapons which contains the following main elements: Prohibits funding for the Bigeye Bomb Production Program, and Bigeye components during fiscal year 1987; and prohibits final assembly of the 155-mm. artillery binary shell during fiscal year 1987.

In short, an operational 155-mm. binary chemical weapon is not possible for at least 1 year—fiscal year 1987—and an operational Bigeye chemical bomb is not possible for at least 2 years—fiscal year 1987 and fiscal year 1988.

While not as conclusive as many of us would like, the conference position on chemical weapons reaffirms Congress' position that we should not be funding a weapons system that does not work, is not proven safe for our troops, needlessly adds billions of dollars to the deficit, unilaterally eliminates the present chemical deterrent in Europe, and undermines efforts of the superpowers to agree to an arms control agreement that bans chemcial weapons.

As we address this problem in the next Congress, we should not fund a full and final binary chemical production program unless: progress on an arms control agreement with the Soviets proves impossible; an independent assessment by GAO concludes that binary weapons are technically ready for production and operationally safe and usable; and our European allies agree to replace unitary chemical weapons on their soil with binary chemical weapons.

GENEVA ARMS CONTROL TALKS

As a member of the House Observers Group to the Geneva Arms Control Talks, one of my responsibilities is to monitor the status of each round of talks. As new United States and Soviet proposals are tabled in Geneva, those proposals are reviewed in the CONGRESSIONAL RECORD—most recently on September 10 on page E-3035—pointing out areas of agreement between the United States and Soviet proposals and remaining areas of contention.

I have also organized numerous closed briefings for the House Observers, House Foreign Affairs Committee members and Members of Congress on the status of the Geneva Arms Control Talks, the summit preparatory meetings between U.S. and Soviet officials in Moscow on August 11 and 12 and in the United States on September 5 and 6, and the preparations for the Reagan-Gorbachev presummit in Iceland. Members have been briefed by Secretary of State Shultz, our negotiators to the Geneva Arms Control Talks, Ambassador at Large Paul Nitze, and other administration representatives.

ARMS CONTROL AND THE ATOMIC BOMB: 40 YEARS LATER

In conjunction with the 40th anniversary of the dropping of the first atomic bomb, a hearing was held on May 13, 1985, to discuss the arms control implications of the atomic bomb some 40 years later. The subcommittee heard testimony from three world-renowned nuclear physicists: Hans Bethe, professor of physics, Cornell University, and Bernard Feld and Philip Morrison, professors of physics at the Massachusetts Institute of Technology, all of whom were involved in the development of the atomic bomb and the Manhattan project. These nuclear physicists underscored the necessity to control the nuclear arms race by pursuing nuclear testing bans and keeping the SDI Program fully consistent with the longstanding interpretation of the ABM Treaty.

ARMS CONTROL WORKSHOPS

In cooperation with the Congressional Research Service, the Foreign Affairs Committee and its Subcommittee on Arms Control, International Security and Science sponsored nine informal workshops for Members of Congress to discuss the role and importance of arms control as an integral part of our country's national security policy. Key outside national security and arms control experts joined House Members to discuss such topics as:

First. Nuclear Arms Control: A Brief Historical Survey.

Second. Goals of U.S. Nuclear Arms Control Policy.

Third. Structuring Nuclear Arms Control Policy.

Fourth. Treaty Compliance and Nuclear Arms Control.

Fifth. The Internal Dynamics of U.S. Nuclear Arms Control Policymaking.

Sixth. Soviet Attitudes and Objectives in Negotiations.

Seventh. The Impact of Technology on Nuclear Arms Control.

Eighth. Linkage: Nuclear Arms Control in the Broader Context of United States-Soviet Relations.

Ninth. The Role of Congress in Nuclear Arms Control.

RESOLUTION COMMENDING THE ARMS CONTROL AND DISARMAMENT AGENCY'S [ACDA] 25 YEARS OF SERVICE

On September 16, 1986, I and the ranking minority member of the committee, Representative BROOMFIELD introduced House Resolution 551, commending ACDA for its 25 years of service.

The resolution was approved by the committee on the same day by a voice vote and subsequently passed by the full House on September 22, 1986.

The purpose of this agency is to make arms control an integral part of U.S. national security policy. Our hope in passing this resolution is that ACDA in the next 25 years will be even more successful in integrating arms control into U.S. policy than it was in its first 25 years.

NEED FOR A COMPREHENSIVE ARMS CONTROL POLICY

As should be clear, 1986 was a very active year with respect to arms control issues for us in Congress. In view of persistent evidence that the administration's arms control policy remains inconclusive, incomplete, and uncertain, it is incumbent for the Congress to call upon the administration to pursue a more meaningful, consistent, and comprehensive arms control policy.

In this respect, the United States should specifically:

First. Seek the resumption of bilateral comprehensive test ban [CTB] negotiations;

Second. Propose a comprehensive verification package that would force the Soviets into concrete action on Gorbachev's offer of onsite inspections and "any other additional verification measures";

Third. Obtain a mutual reaffirmation by both superpowers of adherence to SALT II and to the longstanding interpretation of the ABM Treaty;

Fourth. Press United States concerns on Soviet compliance through the private diplomatic channels of the Standing Consultative Commission [SCC] and reject Pentagon recommendations to abandon United States adherence to existing arms control agreements; and

Fifth. Accelerate efforts to achieve a verifiable ban on chemical weapons by agreeing as a first step to prohibit the production of new chemical weapons and to impose common export controls.

Such an approach would be a marked improvement from continuation of the administration's current arms control approach that is primarily based on rhetoric and which has resulted in not one negotiated arms control agreement over the past 6 years.

As the next Congress convenes early next year, I pledge to continue my efforts in support of a comprehensive arms control policy that increases stability, reduces the threat of nuclear war, and enhances U.S. and world security.

COMPETITION VERSUS THE COMMONWEAL

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. FORD of Michigan. Mr. Speaker, I would like to commend to my fellow colleagues the following speech made on October 7, 1986, by Robert Atwell, president of the American Council on Education. Mr. Atwell observes that under the right circumstances, competition plays a vital role in creating a powerful and diverse system of higher education in our country, but when gone awry, as may be the case today, this same force dulls the very lines of distinction among institutions it so carefully crafted. I believe Mr. Atwell's remarks are thought provoking and timely in light of the 5-year reauthorization of the Higher Education Act recently enacted by Congress.

COMPETITION VERSUS THE COMMONWEAL

[Remarks of Robert H. Atwell, President, American Council on Education, Given at American Council on Education Annual Meeting, San Francisco, October 7, 1986]

My comments today are in keeping with the spirit of this annual meeting, which invites you to examine some current American social realities and speculate about the future we face. I would like to offer reflections on the current tension between competition and cooperation within the various sectors of higher education. For we will pay if it goes too far. American history has shown competition to be healthy, but it has also shown that too much competition can be destructive. I believe it is necessary to rein in the more unproductive forces of competition, which are on the verge of going out of control. At the moment, the failure to exercise restraint will weaken our public policy credibility and will invite further unwelcome and intrusive regulatory actions by government. Strengthening the commonweal is not simply a noble idea, though nobility should surely justify it. It is an imperative if we are to be a social force in this Nation rather than mere vendors of educational services.

The choices we face today are rooted in a fundamental tension in American society that is a source of strength to our Nation but at the same time imperils our collective welfare. The tension is between the pursuit of individual goals and commitment to the collective good. In a concrete way, it is expressed as competition among organizations, groups, and industries, as opposed to cooperation to achieve larger, shared goals.

Surely, this country would not be the great and rich democracy that it is without its traditions of individualism and free enterprise. But neither society as a whole, nor higher education is best served by the unregulated pursuit of self-interest. I am dismayed by the now-popular notion that obedience to market forces is the best approach to public policy, economic life, or individual transactions. I am frightened by the growing public acceptance of the idea that these market forces will somehow sort things out and that the most economically and socially fit will survive.

Pulling against these competitive forces is the reality that we live in an increasingly global village where we must work together to reduce conflict and to see to the equitable distribution of resources. Redressing the balance between the individual and the larger society, between nationalism and the global village, between competition and cooperation, between the pursuit of our own self-interest and our responsibilities to others should be major agenda items for American society, and for higher education as well in the late 20th century. For I fear that if we do not attend to these values, we will undo much of the progress we have made in the last 200 years toward fulfilling the American dream.

America was born in a spirit of revolution and rebellion, and the pursuit of individual freedom has had an illustrious history in this Nation. We have leaned toward individualism, competition, and free enterprise. Beginning with the New Deal and extending essentially until the beginning of the Reagan Presidency, the United States took modest and halting steps in the direction of the cooperative or egalitarian approach. We are at a crossroad today.

The subject of individualism and the commonwealth has taken on a new urgency for all of us citizens and educators. We have a great deal at stake and the American people continue to be ambivalent about this issue. There are both encouraging and dangerous signs on the horizon.

The current administration, reflecting in part, but not entirely, the mood of the American people, has made its position clear. It has rejected the social welfare experiments of the previous 50 years, turning us backward toward what it believes is our historic free enterprise heritage in which the role of the Government is limited to national defense and to the delivery of the mail. The administration believes that the untrammeled pursuit of self-interest will give us more economic growth and a generally more productive society than would result from a more activist government.

The policies of this administration have clearly reflected a diminished commitment to investing in the overall social good—through education, through attention to the growing underclass in American society, and through other social programs designed to help those who, for whatever reason, have been deprived of their share of the bountiful American pie. As a result, during the first 4 years of the Reagan administration, the richest one-fifth of our families gained $25 billion in disposable income, and the poorest one-fifth lost $7 billion. Any society that concentrates 30 percent of the wealth in less than 5 percent of the population must seriously examine its definition of fairness.

The pursuit of self-interest will inevitably widen the gap between rich and poor, the educated and the uneducated, the powerful and the disenfranchised. A recent article in the New York Times pointed out that the growing polarization of our society and the rapid expansion of the underclass creates its own dynamic: The haves do what they can to avoid contact with the have-nots. The haves do not use public schools, parks, or mass transit, and thus they do not support expenditures for these services. As author Barbara Ehrenreich says, "If you send your children to private school, commute to work by taxi, and find your clean air at Aspen, you are likely to prefer a tax cut to the expansion of Government services."

By defining the common good as national defense, this administration has rationalized abandoning the individual and has chosen guns over butter. Reducing the Federal deficit has become a smokescreen. The administration helped to create the present deficit by vast increases in defense spending, coupled with an excessive 1981 tax cut. It has now proposed to solve the problem it helped to create by massive cuts in discretionary domestic spending. Discretionary domestic spending, only a small part of which is for education, did not cause the budget problem. It has been a declining share of federal spending for years and yet this administration proposes to balance the budget with that 17 percent of expenditures. Fortunately, the Congress does not agree. It is generally accepted on both sides of the political aisle that this budget problem will be solved by a combination of moderating growth in defense spending, moderating growth in entitlements, and levying a tax increase.

The administration's ideology and its budgetary priorities have made education a rhetorical bonanza but a low priority. The Congress, believing that the administration has misread the American people, has saved the Federal role in education from destruction, but there has been steady erosion. The result is not only a lesser Federal role, but a misplaced notion that education is simply a transaction between an institution and somebody called a consumer. Yet, our heritage reflects the very strong conviction that society benefits in countless ways from an educated citizenry.

There is much that is great about the American higher education system. No other country provides so many opportunities for so many to learn. The diversity of our system makes it a rich resource not only to students but to the entire Nation. But we urgently need to get our own house in order, to sort out our struggle with the conflicting values of competition and the commonwealth. Higher education is not immune to self-interest or less than lofty behavior. The world of scarcity in which we find ourselves has clearly driven us too far in the direction of unhealthy competition. Students are scarce for many institutions because of inexorable demographic trends. The faculty, staff, and facilities remain static in size and are aging. A dwindling of financial resources has aggravated the problem and brought institutional self-interest, if not survival, to the forefront.

And these pressures have driven some institutions to behaviors that are not only unbecoming to our mission, but which ultimately will weaken the entire higher education enterprise. Let me cite a few examples.

The competition for high achieving traditional-age students has become unseemly. Recruiting has become expensive and flashy. The cost of attracting students continues to escalate and every dollar spent on recruiting reduces what can be spent on instruction. These days, recruiting has taken a new twist as we compete with each other for the better student with lures of financial aid. I believe that there is nothing wrong with wooing good students by offering financial aid on a basis other than need, but when the bidding war becomes so expensive that it cuts into academic quality or into the ability of institutions to attract and aid the neediest students, it has gone too far.

Competition has also obscured our vision of purpose and misguided many 4-year institutions to embrace a single model of excellence—that of the research university. It is understandable that we would have this as an ideal since most faculty members attended such institutions where their graduate school mentors were the research-oriented and highly-published barons of their field. When these faculty members find them-

selves in what should be a teaching institution, they often behave as though it were a research university, in part because they are rewarded for doing so. All too often, the incentive and reward system in teaching institutions looks suspiciously like that of research universities. Responsibility for this problem resides as well with the academic administrators, chancellors, and presidents who too often embrace the single model of excellence and enter the bidding wars for superstar professors, who reward research more than teaching, and who initiate graduate programs despite the surplus of Ph.D's in most fields. I am by no means arguing that undergraduate teaching institutions should not engage in graduate and professional education, but rather that we need multiple models of excellence which reflect pluralistic educational goals and social demands.

The single model of excellence promotes internecine warfare among institutions, particularly in the public sector where the regional State universities try to emulate the flagship institutions in the hope of improving their share of State funding. While institutional leaders have resented externally-imposed efforts to distribute programs and centers of excellence around State systems, the logic is compelling that not all institutions can excel in all areas. We must recognize this and act voluntarily to target our institutional efforts and resources. Control of the free market will enable undergraduate State institutions to truly excel in undergraduate instruction, for that is simply not the forte of research universities. To a lesser extent, the single model of excellence problem is found in some community colleges which look to the 4-year institutions for their models of excellence as the regionals look to the research universities.

More pernicious fallout from the single model of competition is found in athletics. There is an assumption that good universities offer big-time athletics. Thus to be a "real university," an institution must offer Division 1 sports. Rather than orienting athletics to maximizing student participation in intramural and club sports, institutions striving for this single model invariably seek the holy grail of athletic prominence. A president or governing board usually sends strong messages to that effect to coaches whose jobs depend on producing what the bosses want.

Some problems associated with competition haunt us over time. The tension between public and private institutions is not a new issue, but it has worsened in recent years. Private institutions are now heavily dependent on Federal financial aid funds and are increasingly aggressive in obtaining State dollars. Hard-pressed State institutions resent this, especially the increasing access of private institutions to the State treasuries. The resultant escalation of conflict has caused considerable bitterness in many States. That bitterness is aggravated by the increasing success of public institutions in private fund-raising, formerly the exclusive domain of independent institutions.

Competition has escalated the war among institutions of all kinds to obtain earmarked Federal appropriations. Partly to blame is the fact that for many years, there have been too few Federal programs with too few dollars to support physical facilities and equipment. The success of a few institutions, often assisted by very high-priced Washington lobbyists, has encouraged others to compete individually. This has buttressed the growing conviction on the part of the "have-not" but aspiring institutions that their potential for greatness—as determined by the single model of excellence—is being systematically thwarted by the peer review systems for distributing Federal science funds. The allegation against the peer review system, which is dominated by the faculty of research institutions, is that it is not a merit review but simply a closed club, whose members come from 100 research universities, and who hand out money to each other. Those institutional leaders that believe that their campuses cannot successfully compete in that arena not surprisingly are tempted to seek legislative redress.

Finally, our notions about leadership have fallen prey to the single model of excellence. It is no accident that the majority of our leaders have the same profile: White males who have emerged from the faculty ranks. Surely, that is only one model of leadership. Women, minorities, individuals with nontraditional credentials are still seen as different, as other in a system that has defined the norm by a subset of its people. Leadership in higher education must reflect its current and growing diversity, its staggering complexity. The single model no longer serves us well.

Where does all this lead us? We educators excel in stating and restating the problem. Practical solutions are harder to come by. It would be premature and presumptuous to end today with a series of proposed solutions, but it is certainly not presumptuous to begin the process of formulating them. And as ACE members, you have choices to make about the role ACE plays in renewing higher education's commitment to collaboration for the common good.

Earlier, I referred to the paradoxical nature of ACE—as an organization of leaders and followers, speakers and listeners. It also serves as a two-day conduit, both representing the interests of our constituents to Government officials and communicating to institutional leaders the concerns of those who make public policy. On the one hand, we work to fulfill your expectations of keeping Federal dollars flowing with a minimum of regulatory intrusion, of defending self-regulatory mechanisms in accreditation or in athletics. On the other hand, we have an obligation to inform you on campuses of the concerns of those public policymakers about how the higher education enterprise is managing itself. The depth of their concerns and some of the proposals they set forth indicate that Congress—and the voters—believe that competition has gotten out of hand. The Higher Education Act reauthorization contains a number of provisions that signal a public loss of confidence in our ability to police ourselves. For example:

There will be a National Commission on Family Responsibility for financing postsecondary education, reflecting the belief of some Members of Congress that too many families who are able to pay for their children's education are not doing so and that the present financial aid system offers no positive incentives for saving for college.

The reauthorization proposes that students receiving Federal aid must have a C average or an institutionally-determined standard of satisfactory progress. While not a particularly intrusive provision, this does reflect the belief on the part of some of our friends that our progress standards are inadequate.

Institutions receiving Federal financial aid will have to certify that they have a viable drug abuse program.

The Secretary of Education will be required to conduct a study of the escalating cost of higher education and recommend legislation, thus raising the specter of Government measures for cost containment in our institutions.

A Joint Study Commission on Accreditation will be created, which is a clear statement that voluntary accreditation—our most important self-regulatory instrument—is not satisfactorily addressing minimum standards or educational outcomes.

A drug bill which passed the House calls for a politically appointed national commission to look at abuses in intercollegiate athletics.

The time is past when ACE can simply bring the earnest message from our members to the public, to Government officials and to lawmakers: "Trust us." Things have simply gone too far, our house is too conspicuously in disorder. That message will have to be accompanied by evidence that we are grappling with issues of containing our prices, measuring our outcomes, and assessing and ensuring the quality of our institutions.

And that brings me to a second aspect of the ACE dichotomy. ACE is both the voice of the diversity of our constituents and an organization that provides leadership for our constituents. That means that at times our decisions will be difficult, our stands will be unpopular with some of you. We have difficult tasks ahead, positions and actions to take that do not lend themselves to easy consensus among our very diverse membership. Thus, for ACE to represent all the interests of higher education while developing equitable and meaningful solutions is our great challenge. Few policies or strategies can satisfy everyone; satisfying the common denominator produces solutions at such a level of generality and banality as to be meaningless. Yet practical solutions with teeth are bound to alienate some constituents. So we found when ACE presidents met to work on the problem of collegiate athletics. The outcomes of that process clearly made some of our members angry. Yet the strategies you embrace to strengthen the commonweal raise the fundamental question of your expectations of ACE and of yourselves as citizens of the higher education community. ACE is the only national forum that brings together presidents and chancellors from all segments of higher education. As such, it is uniquely suited to the task of devising cooperative solutions to strengthen the commonweal.

But the question that I put before you today is whether you have the will to confront the tough issues and the commitments to sacrifice individual institutional interests, or the interests of the various segments of higher education, in order to forge a new agenda. It is now up to you, the ACE members, to decide if you will mobilize and take action, with all the attendant risks, or if you will continue our current course of fragmentation and avoidance. You can expect ACE to work toward building the consensus which is so essential on so many issues, but I hope that you will also expect us to take risks, step on a few toes, and prod this wonderfully diverse community to become even better.

TRIBUTE TO QUEEN MARLA AND THE TYLER ROSE FESTIVAL

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. HALL of Texas. Mr. Speaker, in these troubled times when much of the world is tormented by violence, it is refreshing to know that beauty still abounds in out great country, and especially in Tyler, TX, where Texas Rose Festival Queen Marla Kathryn Hughes is opening the Tyler Rose Pageant as we meet this afternoon.

This beauty is no more evident than in Tyler, TX, the "Rose Capital of the World" where the beauty of the roses, our national flower, is annually celebrated. The festival this year is especially important because Congress and the President have officially adopted the rose as the Nation's flower.

For many years Tyler has been known for its production of field-grown rose bushes. It continues to be the Nation's largest rose bush growing area, producing some 20 million bushes annually, more than 50 percent of the national supply; thus highlighting the signal honor bestowed on the beautiful Queen Maria.

Tyler will again host the Texas Rose Festival October 15 through October 19 with 4 days of pageantry. Marla Kathryn Hughes, daughter of Mr. and Mrs. W.M. "Bill" Hughes of Tyler, is the reigning queen of the 1986 Texas Rose Festival. She is a sophomore business major at Baylor University in Waco, TX, where she served in the Freshman Leadership Organization and is a member of Pi Beta Phi sorority.

Queen Marla, a beauty with dark brown hair, light blue eyes, and standing 5 feet 7 inches tall, is not only a lovely lady but is also blessed with inner beauty. Upon being selected as the 1986 queen, she said: "The honor of serving as the 1986 Rose Queen will forever be a high point in my life." She was born in Tyler and has taken part in many Rose Festivals in the past. She is a leader in her church and plays piano for her greatest form of entertainment.

Each year the Rose Festival invites a host of young ladies from all over the world to become dutchesses and represent their country or hometown. These ladies are to be joined by a collection of local Tyler girls who serve as ladies-in-waiting with the queen and make up the queen's court. Queen Marla has decreed that every one of the out of town dutchesses and her family will be assured of a warm welcome and a fun-filled festival by her court. This same provision will be extended to all visitors to the 1986 Texas Rose Festival by the community of Tyler. She especially welcomes visitors and guests to come and enjoy, not only the festival, but this loveliest of cities, Tyler, TX, the queen's hometown.

The purpose of this speech is to congratulate the city of Tyler, the Tyler Rose Festival Committee, the county of Smith, and all of east Texas—for reflecting and sharing God's gift of beauty that abounds there—and especially for sharing the loveliness, the grace, and the eloquence of our beautiful Queen Marla Kathryn Hughes—during this festive occasion.

Mr. Speaker, I ask, that as we adjourn Congress this 16th day of October, that we do so in honor of Queen Marla and the Tyler Rose Festival.

UNFINISHED BUSINESS: PLANT CLOSING

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. BIAGGI. Mr. Speaker, for more than 10 years now, Congress has considered measures aimed at easing the negative impact of plant closings on local economies and the workforce. This Congress was no exception. On November 21, 1985, this body considered, but failed to pass a bill (H.R. 1616) that would have required 3 months' prenotification to workers prior to plant closings or indefinite layoffs extending for longer than 6 months.

So, the issue of plant closing prenotification will once again go into the history books as "unfinished business" of yet another Congress. As a ranking member on the House Education and Labor Committee I would strongly urge that this issue be revisited early in the 100th Congress. My plea comes from firsthand exposure to the problem. In 1983, the Otis Elevator Co., which is owned by United Technologies Corp., closed its plant in my home district of Yonkers (NY) after operating there for more than 130 years. Most of the 1200 Otis workers—some of whom had been with the company 30 and 40 years—were caught by surprise; and needless to say, the substantial number of lost jobs and tax dollars has left the city of Yonkers still reeling in the wake of the Otis plant closing.

However, poorly handled plant closings are not unique to Yonkers. A General Accounting Office survey of plant closings that occurred during 1983 and 1984 found that a mere 9 percent of companies gave advance notice of 3 months or more before a permanent shutdown. Moreover, approximately one in four workers discovered their termination on the day they lost their jobs. Nearly two-thirds of blue-collar workers received just 2 weeks or less notice.

Mr. Speaker, these and other deeply troubling statistics are contained in a report prepared earlier this year by the Industrial Union Department of the AFL–CIO. It clearly points to the need for a basic and reasonable national policy on the issue of plant closings. This should be at the top of next year's legislative priority list.

At this time, Mr. Speaker, I wish to insert the full text of the Industrial Union Department's report on plant closings, entitled "Advance Notice: An Emerging Consensus":

ADVANCE NOTICE: AN EMERGING CONSENSUS

There have been several important studies which confirm the importance of advance notice and demonstrate that the majority of workers facing a layoff or plant closing are provided either no or very little notice.

CONFERENCE BOARD

The Conference Board recently concluded a study on business practices regarding plant closings. This study (pp. 7–8) points out:

Both survey and interview participants note that advance notice is beneficial to employees and is an essential element in a plant-closure program. This finding concurs with other studies . . . Notice is also critical because a functioning plant is, perhaps, the program's single most important resource.

Regarding the practice of advance notice, the Conference Board finds:

Company managers responsible for closure believe that advance notice, combined with generous severance plans, reduces pressure and anxiety, generates good will, and contributes to improved productivity.

The Conference Board study also notes that most companies offering retraining or outplacement services also provided at least three months notice. Those giving less notice tended to restrict their programs to salaried workers.

GENERAL ACCOUNTING OFFICE

The General Accounting Office (GAO) has just released a preliminary report on "U.S. Business Closures and Permanent Layoffs During 1983 and 1984." The findings regarding the number of workers receiving little or no notice are astounding (see the attached tables from the report). The report distinguishes two types of notice—a "general" notice which "does not specify the exact date or the particular workers affected" and a "specific notice" which informs particular workers their date of termination. The GAO surveyed establishments with over 100 employees which closed during 1983 and 1984.

The GAO's findings regarding plants which closed or had permanent layoffs are:

General Notice—For blue collar workers, nearly 25 percent of the establishments provided no notice, while 55 percent gave notice of two weeks or less.

Specific Notice—Twenty-three percent of the establishments provided no specific notice to their workers. That is, nearly one in four workers discovered their job loss on the day they lost it. Thirty percent of the establishments gave blue collar workers no notice of their impending layoff.

More than Three Months Notice—Only nine percent of the establishments gave specific notice of at least three months. General notice of more than three months was given by 18 percent of the establishments.

Union versus Nonunion—Twenty-nine percent of nonunion establishments provided absolutely no notice.

Unionized employers, however, gave no notice sixteen percent of the time. On average, nonunion establishments provided three days specific notice, while unionized establishments provided 14 days specific notice.

Closures—Of facilities that closed, only 32 percent provided their workers more than three months notice.

BUREAU OF LABOR STATISTICS

Some information on notice is available from the Displaced Worker Survey conducted by BLS in January, 1984. A recent study of this data was conducted by the Department of Labor.

The BLS survey defined dislocated workers as those workers over 20 years old who "lost or left a job because of a plant closing, an employer going out of business, a layoff, from which (they) were not recalled, or other similar reason."

The survey showed that 11.5 million workers were displaced in the years 1979 through 1983. The DOL study focused on the 9.5 million full-time workers who were displaced (5.8 million blue collar and 3.8 million white

collar and service workers). In this survey, each respondent was asked "Did (you) expect or had (you) received advance notice of a layoff or a plant or business closing?" The percentage of workers having either an expectation or formal notice of job loss is as follows:

Blue Collar: Male, 53.9 percent; Female, 55 percent.

White Collar and Service: Male, 50 percent; Female, 52.4 percent.

Thus, only half of the displaced workers had any suspicion that they were about to lose their jobs. The number that received formal advance notice is not known but clearly must be less than half. Unfortunately, this survey does not tell us the amount of notice (weeks or months), either formal or otherwise, that workers had.

Other tabulations (see attached table) from the BLS survey indicate that no group of workers received notice or expected their layoff to any great extent. At least 44 percent of the following groups had no expectation of layoff: workers with more than three years tenure on the job, workers whose plant closed, manufacturing workers, workers who were from 30–39, 40–49, or 50–61 years of age.

CONCLUSION

There have now been several studies based on representative samples of workers and establishments. These studies overwhelmingly point out that the vast majority of workers receive inadequate notice. Moreover, there is a broad consensus that advance notice is an essential element of a plant closure program.

ADVANCE NOTICE AMONG PRIVATE SECTOR WORKERS DISLOCATED BETWEEN 1979 to 1983 [1]

[In percent]

	Received advance notice or expected layoff	No notice or expectation of layoff
By type of layoff:		
Plant closing	56.6	43.4
Other layoff	46.4	53.6
By tenure:		
Three years or more	55.5	44.5
Less than 3 years	47.0	53.0
Manufacturing	53.9	46.1
By age:		
30–39	55.7	44.3
40–49	54.9	45.1
50–61	52.5	47.5

[1] Tabulation from the January 1984 BLS Dislocated Worker Survey.

CORPORATE FINANCIAL STATEMENTS AND THE TAX BILL

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. GEPHARDT. Mr. Speaker, I rise today to indicate my concern regarding the actions of the Financial Accounting Standards Board relating to the tax reform measure recently passed by the House and Senate.

Under current accounting standards, any of the changes in the tax reform bill must be reflected in the corporate financial statements in the year the legislation is enacted, that is, 1986. As a result, some corporations will have to reduce earnings and net worth in 1986. For many corporations, the possible adverse effects they might experience from certain changes in the bill would be more than offset if the book provisions for deferred taxes payable in 1987 and later years were adjusted to reflect the fact that the rate at which those taxes will in fact be paid will be substantially less than that provided for in the deferred tax account. It is important that the enactment of tax reform not unnecessarily have an adverse effect on corporate financial statements.

I know my colleagues share my belief that the Financial Accounting Standards Board and other regulatory bodies and agencies should take into account all of the financial effects of tax reform—including the positive effects of tax rate reduction—when drafting accounting standards and regulations for 1986 and later years.

ALLERTON CO-OPS ENTERED IN REGISTRY OF HISTORIC PLACES

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. SCHEUER. Mr. Speaker, the Allerton Co-ops have been named to the National Registry of Historic Places, a designation which marks their significance in architectual and social history. The Allerton Co-ops unique history and cooperative ownership of apartments is being recognized as a forerunner in what today is a growing trend.

Founded by the United Workers Cooperative Association, the 700-apartment complex on two square blocks at Allerton Avenue and Bronx Park East was built as a nonprofit cooperative between 1926 and 1929 for Jewish needle trade workers, many of whom had been living in stifling Lower East Side tenements.

The United Workers shared a Socialist political ideology which carried over to the management of their buildings as well as the unique lifestyle they developed there. The complex, the first cooperative in the Bronx and a forerunner in the worker cooperative movement, was built without philanthropy. Instead it was built and run, not for profit, but for the service of the occupants. Residents shared more than just an address; they shared a social network, a tightly knit community and a way of life. The cooperative also sponsored a nursery for the children of working mothers, as well as cooperative stores on Allerton Avenue, and several clubs for children and adults, whose members gathered in basement meeting rooms provided for this purpose.

While some of the original members still live at the co-ops, the buildings have been privately owned since 1943 when the Workers Colony Corp. was dissolved due to insolvency and the effects of the Depression. Other cooperative housing projects, however, greatly benefited from the experience of the Allerton Co-ops. The co-op buildings remain today as the physical manifestation of an important chapter of American socio-political history.

FEDERAL AND POSTAL ADVISORY COMMITTEE PROVIDES INVALUABLE HELP

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. MORRISON of Connecticut. Mr. Speaker, as the 99th Congress comes to a close, I rise to express my thanks to a particular group of individuals in my district who have helped me greatly over the past 4 years. These are the members of my Federal and Postal Advisory Committee.

In a time which has been marked by unfair and unfortunate attacks on the rights, job benefits, and working conditions of these employees, I have been extremely fortunate in having the benefit of the cooperation and information provided to me by the members of the committee to fight these attacks.

I believe that it is essential that Members of Congress be knowledgeable of the circumstances of Federal workers and supportive of the notion of the Federal Government as a first-class employer. As the board of directors of the Federal Government, we owe our employees the respect and support that will enhance their morale and performance on behalf of our constituents.

Credit for the creation and successful operations of my advisory committee is especially

due to John Dirzius, president of the Greater Connecticut Area Local of the American Postal Workers Union. Beginning after my election to Congress in 1982, John spearheaded the effort to create this group and begin the ongoing process of meeting with me and my district staff to discuss and act on both State and local problems faced by Federal and postal workers and retirees, such as workers compensation, contracting out, pension benefits, and collective bargaining rights.

Also very active in the creation and development of the advisory committee have been Jim Halligan, who recently retired as president of Branch 19 of the National Association of Letter Carriers Union, and Peter Grossi, former president of American Federation of Government Employees First District and now national vice president of AFGE's District 1. Federal and postal workers in my district are fortunate to have had the leadership of these able and articulate spokesmen.

Mr. Speaker, this administration has made no secret of its desire to cut Federal and postal benefits and to let inflation reduce wage scales, and has consistently tried to make Federal and postal workers and retirees the scapegoats for the budget crisis. I am proud of my record of working to block these attacks, and to have had the help and support of such committed and effective associates at home in Connecticut. I commend the creation and use of such advisory committees to my colleagues.

THE SECOND ANNUAL CONFERENCE ON GAMBLING BEHAVIOR

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. BORSKI. Mr. Speaker, the expansion of legalized gambling in the United States has led to increased concern about the problem of compulsive gambling, and its impact on our society. Since 1972, the National Council on Compulsive Gambling has served as a disseminator of information on gambling as an illness and as a public health problem.

In November, the Pennsylvania Council on Compulsive Gambling and Valley Forge Medical Center and Hospital of Norristown, PA will sponsor a national gathering to address the social, economic, and business issues involved in the gaming industry.

This meeting, the Second Annual Conference on Gambling Behavior, will bring legislators, administrators, educators, researchers, criminal justice personnel, and other professionals to Philadelphia to address these serious and timely concerns.

Mr. Speaker, I wish to bring this important conference and this issue to the attention of the Congress, and to encourage greater public awareness about the problem of compulsive gambling.

UNIONIZATION WINS A ROUND IN THE SOUTH

HON. CHARLES A. HAYES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. HAYES. Mr. Speaker, on Friday, October 10, a large majority of the 1,050 workers at Delta Catfish Processors, Inc., in Indianola, MS, voted in a National Labor Relations Board election to make the United Food and Commercial Workers International Union [AFL–CIO] their collective-bargaining agent. That vote is extremely significant.

It took place in the Mississippi Delta, which is an area considered unfriendly to union organizing. The workers are overwhelmingly black, poverty stricken, and concerned about losing their jobs. The company launched an extensive and expensive campaign to beat the union.

Yet, the UFCW, won 58 percent of the vote.

Mr. Speaker, I know the UFCW well. Before coming to Congress, I was one of its vice presidents and regional directors. I spent virtually all of my adult years in the service of the UFCW and its predecessor unions.

It is an excellent organization which is strong, smart, and pragmatic. It never forgets its purpose, which is to improve the wages and working conditions of workers. It bargains hard on behalf of its members and works hard to see that the contract is observed. But it, too, tenaciously observes the letter of its contracts and its every agreement.

Mr. Speaker, I sincerely hope that Delta Processors will negotiate in good faith with the UFCW. I hope the company's antagonism to the union can be put away. I hope a new era can come to the Delta which will improve the conditions of the workers and everyone else in the area.

I have already talked with the UFCW about the need for agreement and harmony. It agrees. It will do its utmost to negotiate a mutually satisfactory agreement.

Mr. Speaker, I ask unanimous consent to place in the RECORD the news story from the Washington Post of October 12 concerning the NLRB vote at Delta Pride.

[From the Washington Post, Oct. 12, 1986]

UNIONIZATION WINS A ROUND IN SOUTH

(By Peter Perl)

INDIANOLA, MS.—Just 24 hours before the largest union organizing vote ever held in the Mississippi Delta, the owners of Delta Catfish Processors Inc. brought out their final persuaders: hundreds of pounds of barbecue and $182,000 in cash, escorted to the plant by five Sunflower County sheriff's cruisers in an armored truck.

This was the final salvo in a bitter, year long attempt by the company to persuade its 1,050 workers to vote against forming a labor union. The pile of cash represented the money the company said workers would be squandering in dues over the next year if they formed a union.

In case the work force—90 percent of it black—missed the message, Delta Catfish had hired Mayor Charles Evers of Fayette, brother of slain civil rights leader Medgar Evers, to urge the workers to vote no, explaining that they didn't need unions and could use the $182,000 for better purposes than dues. Evers was paid a speaker's fee by the company.

Delta Catfish then allowed workers to leave work early to prepare for a gala preelection company barbecue. The evening featured live entertainment, all the ribs-and-fixings employees could eat, prizes including cash and a color television set, antiunion literature, posters and vote "NO" baseball caps.

But when the election results were tabulated late Friday night by the National Labor Relations Board, the AFL–CIO's largest private sector union scored one of the biggest victories ever among black workers of the Deep South. With a 90 percent voter turnout, the union received 58 percent of the vote and will now begin trying to negotiate a labor contract with Delta Catfish.

The United Food and Commercial Workers Union (UFCW)—building an unusual coalition with black clergy, business people and civil rights leaders—overcame an intense and well-funded antiunion campaign that the NLRB charged included firings of prounion workers, threats, surveillance and other illegal practices. The company denied the charges.

"This is the beginning of a second era of civil rights for us here. We are going past public accommodations and the right to vote, and looking at economic power. We have let management and the power structure have the money," Cleve McDowell, state field director of the Mississippi NAACP, said yesterday.

". . . We joined this campaign because here was a labor union finally doing what we had always hoped they would be doing. I hope this will be a signal to unions all over the country that black people are important, and poor people in the Deep South need help, too," McDowell said.

The AFL–CIO has long been active in supporting civil rights, "but unions didn't do it inside their own union halls," which remain overwhelmingly white, said Willie Baker, vice president of the 1.1 million-member UFCW. Baker, who is one of the highest-ranking blacks in organized labor, said, "We are reaching out in new directions," particularly in historically antiunion southern states where UFCW plans to expand.

Baker joined the UFCW after he was involved in the 1960s civil rights battles to integrate public accommodations on Maryland's Eastern Shore while he was a University of Maryland student. In the Mississippi union campaign, he was among a team of 22 organizers, most of them black, who were dispatched from around the country to Indianola.

The union drive began after UFCW conducted an unusual direct-mail solicitation last November that targeted more than 100,000 homes in the Delta, in a state that ranks 48th in union membership at 9 percent of the work force.

The campaign at Delta Catfish was fueled by complaints of pay averaging about $3.90 an hour, heavy-handed discipline, including punishment for unauthorized bathroom visits, lack of sick leave, and other issues including the absence of doors on toilets.

Catfish workers, who kill, fillet and freeze up to 400,000 pounds a day, were sometimes required to punch out when the plant ran out of fish, and wait, unpaid, for the next truckload. The union filed a lawsuit last week alleging violation of federal wage laws and is seeking a $6 million payment for workers.

Living in a motel for the past nine months, members of UFCW's organizing

team used a computer installed in a motel "war room" to aid them in mailings, in tracking the leanings of each worker and in making house calls. They made hundreds of visits to public housing projects, backwoods cottages and churches to try to persuade workers that a union could give them power to raise wages, improve benefits and working conditions and create "dignity on the job."

The union, which estimated it spent nearly $500,000, also attempted to sell the black community on the idea that unionism could provide everyone a boost through a sort of "trickle-up" version of economics: If the UFCW could succeed in putting a little more money in the pockets of workers, every local business would benefit.

"This is still a plantation-type economy," Baker said. "We have emphasized that low-income workers are spending 99 percent of their wages at every corner store, supermarket and barbershop . . . and they all stand to benefit."

The union message hit home to people such as the Rev. Edward Shields, who is the pastor of Mount Carmen Baptist Church and the proprietor of Soul Brothers Barber Shop. Shields, who also hosts a local Sunday radio show, said he is one of four local ministers who has preached support of unionism on moral and economic grounds.

"People are getting unfair treatment. Conditions are bad and pay is low. . . . People are tired of doing two men's work for a half-man's pay," Shields said. As a shop owner, he said, "These workers have put money in my pocket and steak on my table, and I should help put some money in their pockets."

That money, however, would come at the expense of Delta Catfish, a company owned by about 160 Delta farmers who are the heart of the white business establishment. Delta hired Kullman, Inman, Bee & Downing, a prominent New Orleans law firm that specializes in defeating unions. An antiunion campaign of radio ads, mailings and posters throughout the plant highlighted the threat that voting for a union could lead to strikes, layoffs and possibly a plant-closing.

Sales of "farm-raised" catfish, grown in more than 70,000 acres of man-made ponds, has grown remarkably in the Sun Belt. Catfish, in just a decade, has become a $300-million-a-year business and has made Delta Catfish the largest employer in Sunflower County. Catfish is the third-largest farm crop in the Delta, behind cotton and soybeans.

"We do not need a union," said Samuel I. Hinote, president of Delta since its founding in 1980. "We have done more for our employes than any company around here." In a highly competitive business, he said, union demands could jeopardize the firm's future. Starting from minimum wages and no benefits, Hinote said, Delta now offers better wages than comparable firms, a Christmas bonus of a week's pay, a one-week vacation, a health plan and a life insurance plan that Hinote said he started "after some workers died and couldn't even afford a funeral."

Hinote, whose firm posted five-foot posters showing union officials' income of up to $100,000 a year, portrayed the UFCW as being primarily interested in workers' dues and accused the union of raising "dignity" issues only to stir up racial discontent. "We have made some mistakes in labor-management relations, but it has been blown out of proportion," he said, when compared to Delta's record of creating 1,000 jobs in a county that has 18 percent unemployment.

The NLRB regional office accused the company of illegally firing eight union supporters and asking employes to spy on their colleagues' union activities as part of a "coordinated and orchestrated effort" to defeat the union. A hearing is scheduled for December.

"A lot of people were really scared of losing jobs", said Diane Williams, a filletcutter who became a union activist. "People were very concerned. But they were more tired of being pushed around and treated like kids. . . . We believe in what we are doing."

SOUTH AFRICA'S POLICY ON APARTHEID

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. MAZZOLI. Mr. Speaker, American citizens—from all walks of life—have joined together in protest of the repugnant human rights policy of apartheid in South Africa. Through such actions as embassy pickets, demonstrations, and vigils, they made their voices heard. The message was loud and clear, the American people would no longer stand idly by and passively accept apartheid.

This message did not fall on deaf ears here in Congress. Last month, Congress approved legislation which imposes economic sanctions against the South African Government. Among other things, the measure bans new loans and investments in South Africa, imposes a trade embargo against certain South African goods, and denies landing rights in the United States for any South African-owned airline.

The President vetoed the measure. However, I am proud to have joined the overwhelming majority of my colleagues in the House and Senate in voting 313 to 83 to override the Presidential veto.

Some argue the measure is too strong and rigid, while others say it is too weak. All in all, I feel that the program is a step in the right direction and expresses a balanced reaction of the United States to apartheid.

South Africa's policy of racial segregation is unacceptable not just by United States standards but by world standards. And the world is watching us. We as a nation cannot take the posture of the ostrich and bury our heads in the sand, hoping the challenge will pass us by. We must continue to make clear our objection to the abominable human rights policy of apartheid, as well as confirm our commitment toward its abolition.

OUTSTANDING SUCCESSES ACHIEVED BY WASHINGTON AND JEFFERSON COLLEGE

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. MURPHY. Mr. Speaker, in this time of enrollment declines in higher education and increasing competition for financial support from both the public and private sector, I am pleased to call attention to an independent college from my district which has achieved outstanding successes in both enrollment and support.

Washington and Jefferson College, the 11th oldest college in the United States, announced this past weekend that their Century III Fund Program has surpassed its $10 million goal. Relying on the voluntary support of alumni and friends who believe in the value of a traditional liberal arts curriculum, Washington and Jefferson College sought $4.5 million in support for the endowment of faculty excellence, curriculum development and scholarships, $4 million for the renovation of four buildings which have played central roles in the 205-year history of the college, and $1.5 million for support of current operations.

Through the generosity and special commitment of its donors, W&J has been able to meet its $10 million goal in only 2 years—1 year ahead of schedule. At the same time, the college has received a $1 million gift from an anonymous benefactor in the form of a one-for-two challenge: In order to receive the $1 million gift, W&J alumni and friends must contribute an additional $2 million. By successfully meeting this challenge, and the challenge presented to the college in 1985 through the Endowment for the Humanities, W&J's Century III Fund will pass the $13 million mark, and may exceed $15 million.

This record of achievement represents votes of confidence by donors in the programs and goals of Washington and Jefferson College.

I am also pleased to learn that Washington and Jefferson College has welcomed one of the largest freshman classes in its history this fall. W&J is listed in the New York Times Guide to competitive colleges and in the highly respected Peterson's Guide to competitive colleges, and this fall's freshman class maintains the W&J tradition of academic excellence.

I am submitting an article from the Observer-Reporter Newspaper of October 11, 1986.

REACHES CENTURY III FUND GOAL—A YEAR AHEAD OF SCHEDULE

Washington and Jefferson College has exceeded the $10 million goal in its Century III Fund—one full year ahead of schedule.

Kenneth M. Mason, chairman of the Board of Trustees at W&J, made the announcement Friday as part of W&J's annual homecoming activities. Mason noted that the college is entering a special challenge-grant phase that could raise the Century III Fund to more than $13 million.

Speaking to an alumni group, Mason said the $10 million Century III Fund goal is the largest in W&J's history. The fund timetable called for the goal to be reached in three or more years.

"I am pleased to announce today that, though the special commitment of W&J alumni and friends, the goals of the Century III Fund are fully subscribed," Mason said. "We are most encuraged that the goals have been reached in only two years."

Mason also announced that W&J has received a $1 million gift from a friend of the college that will be used to stimulate additional support for the Century III Fund goals. The gift will be matched on a two-for-

one basis by gifts from alumni and friends, thus generating an additional $3 million.

Combined with the support already received, the Century III Fund would pass $13 million, making it the most successful fundraising effort in the college's 205-year history.

"W&J entered the Century III Fund program with the realization that sustaining and further developing already strong progams in athletics, academics and student services require an increasing financial commitment," said Mason. "Through the unprecedented success of the Century III Fund, W&J will be able to continue its record of excellence."

The Century III Fund goals included $4.5 million for faculty, scholarship and curriculum endowment; $4 million for renovation of Thompson Memorial, Administration Building, McIlvaine Memorial and Old Main; and $1.5 million for operating support.

In making the announcement, Mason pointed to the leadership roles played by Leo Wright of the Class of 1952, who is serving as campaign chairman; Ronald Sandmeyer, Class of 1957, leadership gifts chairman;/ and Anica Rawnsley, memorial gifts chairman.

VISUAL ARTISTS RIGHTS AMENDMENTS OF 1986

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. MARKEY. Mr. Speaker, today I am introducing legislation to strengthen the copyright protections for artists of pictorial, graphic, or sculptural works. It addresses problems which affect not only the visual arts community but all of us who have an appreciation for the arts.

The Constitution is the basis for our copyright laws. Article 1, section 8 states that the Congress shall have the power to "promote the Progress of Science and useful Arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries." Unfortunately, unlike the great strides made to bring copyright protections up to date with new technology, little has been done to protect the rights of visual artists.

This bill has three major components. First, it would give artists the legal right to claim authorship of publicly displayed works or disclaim authorship of such works where they have been altered. This would codify in Federal statute provisions presently in force in several States, including Massachusetts, New York, and California. Under current law artists are discouraged from participating in outdoor displays of artwork because there is no protection or remedy under law in most States for destruction, mutilation, or distortion of their work.

Along with the right to claim or disclaim authorship due to tampering, the artist would be able to seek compensation for the wrong. This remedy is available to writers, computer programmers, and other creators. There is no reason for neglecting the visual artist.

Second, the bill addresses a related area of copyright law concerning the aesthetics of artwork. The bill would exempt an artist from the requirement to display the copyright seal on the outside of the creation. The artwork would still have to be registered with the copyright office thus preventing any mistake in authorship.

Third, this bill would establish royalty rights for the visual artist. This is a common economic principle applied to other creative endeavors, which gives the author the right to claim a small percentage of the increased value of a work when it is sold. As it now stands, artists often find that paintings or sculptures completed years ago have become quite valuable and are now bought and sold by dealers and collectors for far more than the original price. The bill would provide the artist a small but significant financial benefit from the increasing value of the artwork.

The rights granted by this measure are well known in most foreign countries especially in Europe. Furthermore, the bill is supported by Artists Equity, the American Council for the Arts, the Graphics Artists Guild, the New York Volunteer Lawyers for the Arts, the Visual Artists and Galleries Association, and the Boston Visual Artists Union. It is my hope that this legislation will not only rectify some of the problems facing artists in the United States, but also provide a more accurate reflection of their invaluable contribution to our society.

SOCIAL SECURITY NOTCH

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. HAMILTON. Mr. Speaker, hundreds of my constituents recently signed a petition urging the House to support H.R. 1917, a House bill to eliminate the Social Security notch between the benefit levels of workers reaching age 65 in or after 1982 and the corresponding benefit levels of persons who reached age 65 before 1982. I wanted to share their concerns with you and my colleagues, and urge serious and careful consideration of efforts to alleviate the notch problem.

As you know, the Social Security notch results from a law enacted in 1977 that was signed to correct a flaw in the benefit formula that threatened to bankrupt the entire Social Security System. When Congress decided in 1972 to index Social Security benefit increases to the cost-of-living, a technical mistake was made that led to new retirees receiving benefits that reflected the same period of inflation twice. This double-benefit increase meant that overall benefit levels increased far more than anyone had ever anticipated, and much more than the Social Security System could afford. It also meant that, if left unchecked, many future retirees would receive benefits higher than the wages they earned while working.

Congress could not ignore the financial crisis created by this mistake. In 1977, a bill was passed to correct the double-benefit increase that was threatening the system. The resulting formula affects all people born after 1916. Under the new formula the average worker's benefit replaces about 42 percent of his or her preretirement lifetime earnings. This is a higher rate of return than the 35 to 38 percent received under the formula used from the beginning of the system through the early 1970's.

To ease the transition from the old to the new formula, the amendments included special computation provisions for people nearing age 62 when the new system was implemented—those born in 1917–21. Their benefits are figured under the new law and under the transitional provisions. They are paid the higher of these two benefits. Benefits for many of these people are somewhat greater than they would have been under the new formula without these special rules but not as large as they would have been under the old law. Benefits for people born in 1922 and later are computed just under the new benefit formula. Congress chose not to scale back the unusually high benefits provided to those born in the years 1912 through 1916, since these persons had already become eligible.

In general, bills that have so far been introduced to address the notch would partially or fully extend the flawed 1972 benefit formula to beneficiaries who come under the transitional or new rules. Any approach along these lines could be very costly.

I believe any legislative solution to alleviate the notch must be fair both to present and future retirees. It should ensure a more equitable treatment of those who, because of their birthdate, receive less in Social Security benefits than someone with an identical work history. At the same time, a solution cannot undermine the long-term financial stability of the Social Security System.

The notch has become a major source of controversy, confusion, and misinformation in the Congress, the media, and the public. The debate has become very emotional. To clear the air, the General Accounting Office has been asked to conduct a thorough study of the entire notch issue, including an analysis of its causes, a detailed review of its actual effect on beneficiaries, and an examination of the financial implications of lessening or eliminating the notch.

I want to urge my colleagues to follow closely the work of the General Accounting Office, and to support reasonable solution to lessen the effect of the notch.

INTRODUCTION OF THE EL MALPAIS NATIONAL MONUMENT, MASAU TRAIL AND GRANTS NATIONAL CONSERVATION AREA ACT

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 16, 1986

Mr. RICHARDSON. Mr. Speaker, I want to take this opportunity to share with my colleagues my introduction today of the El Malpais National Monument, Masau Trail and Grants National Conservation Area Act. This comprehensive and energetic proposal expands on the House-passed El Malpais National Monument bill, H.R. 3684. It is a pro-

posal designed to protect a sensitive and unique environmental area in western New Mexico and stimulate tourism-related development. My New Mexico colleagues on the Senate side, Senator PETE DOMENICI and Senator JEFF BINGAMAN, are introducing a companion bill today.

The El Malpais bill represents a compromise—balancing community needs and national interests. The bill will establish a national monument run by the National Park Service, a grants national conservation area run by the Bureau of Land Management, and the establishment of the Masau Trail. The Masau Trail will highlight an auto-touring route linking prehistoric and historic cultural sites in western New Mexico. The bill also provides wilderness protection for sensitive lands and archaeological resources, recognizes the unique land uses in the area and authorized the establishment of a visitors and multipurpose center.

Mr. Speaker, the El Malpais lava flow is truly deserving of national protection. Some of the most outstanding examples of volcanic landscapes in the world will receive permanent protection and the legislation will stimulate tourism-related development in an area of New Mexico that has been suffering the adverse effects of the decline of our domestic mining industries. The El Malpais bill is extremely important to the people of the Third Congressional District of New Mexico, has a broad base of support from a coalition of local citizens, local and State governments, national environmental organizations and myself and New Mexico's Senators.

I am delighted that Senators DOMENICI, BINGAMAN, and myself have been able to come up with a good, solid plan providing the necessary elements to promote tourism, economic development, and recovery in the region and provide national protection for sensitive lands in the El Malpais area. I hope that my colleagues will take the opportunity to review the legislation and support this energetic proposal. Thank you.
